## HAND-HELD BOX SEALING TAPE DISPENSERS

Scotch™ brand hand-held tape dispensers provide a quick, easy method of dispensing box sealing tape directly from the roll. Portable units are ideal for on-the-spot applications.

### No. 3KT70

- Lightweight, compact
- Plastic construction
- Built-in braking device allows tighter, more precise seals
- Accommodates tapes on 3" core

### No. 3KT67

- Lightweight, compact
- Metal construction
- Accommodates tapes on 3" core

### No. 3KT66

- Lightweight, compact
- Steel construction
- Accommodates tapes on 3" core

### No. 3KT68

- Primarily used for applying "C" clips of Scotch brand film tapes to regular slotted containers
- One-hand method to apply, cut, and buff tape clips with 2"min. leg lengths
- Accommodates tapes on 3" core

### Nos. 2A670 & 3W659

- For center seam sealing of regular slotted containers
- Adjustable tape brake allows operator to choose comfortable tape tension and unwind
- Plastic and metal construction
- No. 2A670 dispenses tape up to 2"W (48mm)
- No. 3W659 dispenses tape up to 3"W (72mm)
- Accommodate tapes on 3" core

### No. 1F193

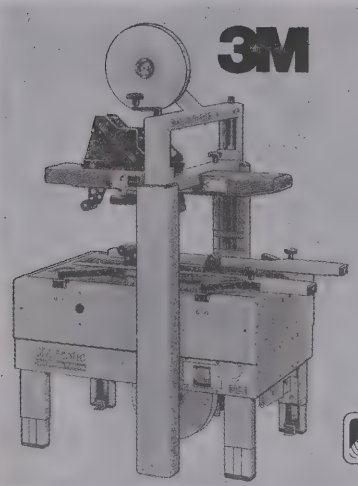
- Ergonomically designed pistol grip
- Features unique pull-apart design
- Lightweight, durable plastic
- Accommodates tapes on 3" core

## DEFINITE LENGTH BOX SEALING TAPE DISPENSERS

### No. 1F192 Manual Dispenser

- Accommodates multiple tape rolls up to 3" (72mm) max. width and up to 9" max. roll diameter on 3" diameter core
- Delivers standard tape lengths from 1½ to 16" max. with one lever stroke
- Longer lengths may be obtained by repeating lever stroke
- 16¾L x 11½W x 10¼"H

### No. 3KT72 Electric Dispenser



- Dispenses tape widths 1½ to 3" (36mm to 72mm) with up to 9" max. roll diameter
- Tape lengths from 4 to 52" (100 to 1320mm) max. are delivered with touch of a button or automatically after a length of tape is removed
- Random lengths of tape can also be dispensed by pressing another button
- Tape is fed at 57 ft./min.
- Black metal cover protects tape feed rollers

# ADJUSTABLE CASE SEALER, BOX SEALING TAPE, TOP SHEETING AND BRACKETS

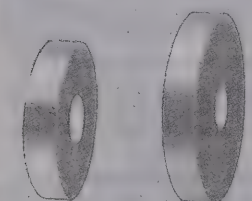
## 3M-MATIC™ ADJUSTABLE CASE SEALER

- Puts tight, consistent seals on regular slotted containers in one operation
- Seals up to 30 cases per minute
- Handles wide range of box sizes

Uses No. 5A144 Utility Purpose or No. 5A145 High Performance Box Sealing Tape

Replacement Parts Available 1-800-323-0620

**200a Adjustable Case Sealer** features the AccuGlide II™ taping head for more positive tape starting and precise, low force tape application. Floating taping heads adjust smoothly for underpacked or overpacked boxes, ensuring accurate sealing; need no adjustment for tape roll sizes. Top and bottom taping heads are removable for easy cleaning and maintenance. Quick box height/width adjustment allows greater versatility. Built-in blade oiler helps prevent adhesive buildup. Dual masts with twin lead screws provide extra stability and allow for uniform height adjustment.



Standard features include compression rollers that position each box for precise tape sealing; upper tape roll bracket attached to the machine for easier tape mounting; friction brake drums to prevent tape overrun and provide more consistent tape application; easy-to-reach outboard tape roll mount for the bottom head; and easy-to-install laced replacement belts. Also included is a hardened tool steel cutting blade and safety blade guard.

Case sealer offers consistent seals on top and bottom of regular slotted containers from 6L x 6W x 4¾"H to unlimited length x 21½W x 24½"H. Seals up to 30 cases per minute. Graduated leg adjustments allow easy adaptation to a variety of conveyor bed heights. Overall dimensions: 36½L x 31W x 53"H. Operates on 115V, 60 Hz, 1.9 amps. 3M-Matic brand (200a).

**No. 5Z131.** Shpg. wt. 322.0 lbs. List $4285.00. Each ....**$4220.00▲**

## BOX SEALING TAPE

No. 5A144 No. 5A145

### HIGHLAND No. 371 UTILITY PURPOSE BOX SEALING TAPE

All purpose tape for single strip sealing of regular slotted containers. Has strong, yet conformable "Scotchpro" transparent film backing. Provides very good resistance to edge tear and splitting. 48mm (1.9") wide. 2 mil thickness.

**No. 5A144.** 914m. long. Shpg. wt. 4.8 lbs. List $21.00. Each.....**$15.95***
Lots 24.....**$9.57***

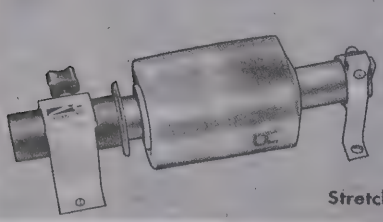
(*) Priced each. Sold only in case of 6.

### SCOTCH No. 375 HIGH PERFORMANCE BOX SEALING TAPE

Features high performance "Scotchpro" film backing and adhesive system highly resistant to edge tear and end splitting. Meets US Postal Regulations. Other common applications are general sealing, recooperage, and fibre drum sealing. Transparent. 48mm wide. 3.2 mils thick.

**No. 5A145.** 914m. long. Shpg. wt. 4.8 lbs. List $21.00. Each.....**$15.95***
Lots 24.....**$9.57***

## TOP SHEETING



GOODWRAPPERS HANDWRAPPERS®

Lightweight, convenient way to apply pallet top protection. Prevents costly damage to tops of shipments caused by dust, dirt, and debris during shipping or storage. Made of 125-gauge polyethylene film. Each roll contains 75 centerfolded sheets, perforated every 60". Simply pull a sheet off roll, tear at perforation, and unfold to a 60 x 60" sheet. Can be secured to load using stretch film handwrappers. Top sheeting is easily dispensed by mounting to walls, racks, or stretch wrap machines with brackets (sold separately) in listing below. Goodwrappers brand (TS60X75).

**No. 6A223.** Shpg. wt. 13.0 lbs. List $44.60. Each.....**$37.20**

## MOUNTING BRACKETS

GOODWRAPPERS HANDWRAPPERS®

Stretch Film Not Included

For conveniently dispensing Goodwrappers® top sheeting and Identi-Wrap™ stretch film. Brackets mount to walls, racks, or stretch wrap machinery. Eliminate time consuming bottlenecks in warehouses or shipping rooms by putting brackets at various locations. Identi-Wrap can be dispensed with semi-automatic stretch wrap machines by mounting brackets to either stretch wrap machine control tower or to film roll carriage. Set comes with one bracket that has adjustable tension control to adjust back tension and one bracket with a support that holds both top sheeting and Identi-Wrap rolls in place. Mounting instructions included. Goodwrappers brand (TSBR).

**No. 6A224.** . Shpg. wt. 1.0 lbs. List $43.25. Each.....**$38.65**

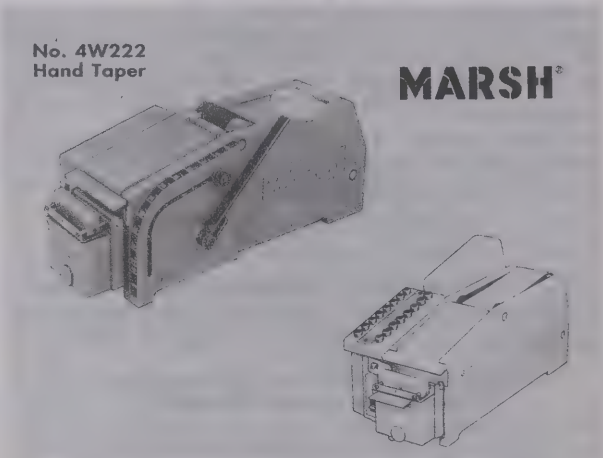
# MARSH HAND AND ELECTRIC TAPE MACHINES

- **Accurate tape length selection**
- **Sturdy construction**
- **Provide quick, strong seal and neat uniform packages**

### MARSH No. 5-HT HAND TAPER

**For sealing all size cartons.** Easy pull handle delivers exact tape length selected. Scissor-action cutter blades slice tape cleanly. Fast, drop-in tape loading reduces operating costs. Flow-thru nylon bristle brush, water level regulator, and adjustable pressure pad assembly assure uniform moistening of tape for secure bonding.

**Casing is lightweight structural styrene.** Can be used in harsh environments. Choice of tape widths include 1, 1½, 2, 2½, and 3". Tape delivery lengths are 4 to 42" with single pull.



### MARSH No. GPLT13567 ULTRA-TAPER

**Measures, moistens, dispenses, and cuts** gummed tape for sealing cartons of all sizes quickly and reliably. Electrically operated, microprocessor controlled. Offers the fastest closure for various sized cartons. Top touch buttons speed operation, reduce fatigue. Includes slip-on colored caps for frequently used cap lengths. Equipped with a heater for use in cold environments. Low maintenance electronic components give dependable performance under high-use conditions. Easy to service. Tape delivery lengths of 4 to 60".

**Dispenses 35, 60, and 90 lb.** paper and reinforced tapes in widths of 1, 1½, 2, 2½, and 3". 120 volts, 60 Hz.

**No. 4W222.** Hand Taper. Shpg. wt. 23.0 lbs. List $439.38. Each ..**$366.25**

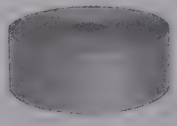
**No. 4JX93.** Ultra Taper. Shpg. wt. 26.0 lbs. List $1149.00. Each...**$982.50**

# WATER-ACTIVATED REINFORCED CARTON SEALING TAPE

- **Tan color**
- **3" wide x 450 ft. roll or 72mm wide x 450 ft. roll**
- **3-way reinforced**
- **Immediate tack**

**Provides great strength while retaining flexibility** to conform to most packaging situations. Three way reinforced tape constructed of hot melt laminate between two layers of high quality kraft paper. Offers immediate tack to packages either over or underpacked and gives security of permanent bonding to cartons, envelopes, mailers.

**Available in 3" wide x 450 ft. rolls** which fit in all standard tape dispensers, and also in more economical 72mm wide x 450 ft. roll which is 3/16" narrower while having the same strength and sealing capabilities. Tan color. Priced per roll. Holland brand.



| Tape Size | Stock No. | List | Each | Lots 10 | Shpg. Wt. |
|---|---|---|---|---|---|
| 3"W x 450 ft. | 2A239 | $10.26 | $6.84 | $6.50 | 3.9 |
| 72mm W x 450 ft. | 4X877 | 9.16 | 6.11 | 5.80 | 3.3 |

# KRAFT WATER-ACTIVATED GUMMED SEALING TAPE

- **Fits manual and electric tape dispensers**
- **3" wide x 600 ft. roll**

**Kraft paper gummed sealing tape is a nonreinforced tape** for economical carton sealing. This low-cost tape makes it a popular choice for shipping rooms, repackaging and wrapping departments, mail rooms, and wherever sealing tape is needed. Kraft tan color. Holland brand.

**No. 2A238.** Kraft Gummed Sealing Tape. Shpg. wt. 3.8 lbs. List $7.28. Each $4.85; Lots 10 .....**$4.61**

# PACKAGING AND LABEL PROTECTION TAPE, DISPENSER AND TAPE PADS

### A SCOTCH™ POUCH TAPE ROLL No. 824 & PAD No. 830

Used to attach and protect packing lists, shipping papers and other documents. Imprinted "Documents Enclosed" on top and bottom borders. Pouch inner dim.: 3⅝W x 5"L.

**No. 2A668 Pouch Tape Roll** is quick, inexpensive, and easy to use on No. 2A672 Pouch Tape Dispenser sold separately below. 500 pouches per roll.

**No. 5A146 ScotchPad™ Pouch Tape Pad** is precut, no dispenser needed. Liner strip along top edge allows removal and reinsertion of documents as needed before attaching all edges permanently. Comes 1000 pouches per box.

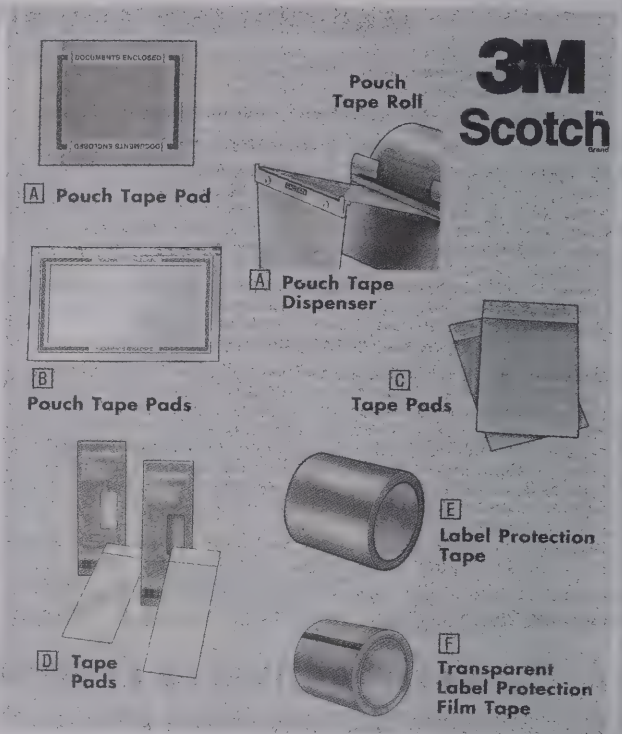
**SCOTCH M-727 POUCH TAPE DISPENSER**

Rugged metal dispenser; can be mounted on wall or bench.

### B SCOTCHPAD™ BRAND PREMIUM POUCH TAPE PADS

Offers portable convenience. Tape has an aggressive adhesive border on all four sides which adheres to a wide range of surfaces. Center portion will not stick to contents.

### C SCOTCHPAD™ No. 822 PREMIUM INDUSTRIAL GRADE TAPE PADS



Transparent tape is mounted in an easy-to-use self-sticking pad form. Dispenser not needed. 1000 sheets per box.

### D SCOTCHPAD No. 3750-P PREMIUM INDUSTRIAL GRADE PACKAGING TAPE PADS

Heavy-duty packing tape. Space-saving portable design for convenient use and storage. Precut lengths easy to apply, reduce waste, and need no dispenser. Tough ScotchPro™ backing provides good resistance to edge tear and splitting. Sold in carton quantity of 1000 applications.

### E SCOTCH No. 821 PREMIUM INDUSTRIAL GRADE "LABELGARD" FILM TAPE

Highly transparent film tape. Low static, easy handling and dispensing backing. Allows electronic scanning through the low glare surface. Correction may be made directly onto backing with No. 2 pencils, ball point, many marking pens, and some stamp pad inks. Acceptable for label covering by U.S. Postal Service. Adheres to a variety of surfaces. Offers abrasion and moisture protection. Lightly tinted for easy roll identification. Meets Federal Specifications and Commercial Item Description.

### F SCOTCHPAR™ No. 356 LABEL PROTECTION TAPE

A film tape made with rugged Scotchpar backing and long aging adhesive. Recommended for protection of packing lists or shipping papers in harsh environments. Stability up to 300°F (149°C) for continuous periods of time. Backing provides excellent water, abrasion, and chemical resistance. Holds tight to boxes and will not discolor even with outdoor exposure.

# DUCT TAPE AND CLOTH TAPE

Nashua

A An excellent general purpose tape for light duty applications. Conforms well to irregular surfaces.

B Easy to apply tape used in heating, ventilating, and air conditioning applications to seal aluminum backed insulated ducts and thermal insulation to maintain a vapor barrier. Ideal for permanently flexible seals. Conforms to pattern of any duct board when squeegeed down. 7.4 mils thick overall with 2-mil dead soft aluminum foil and permanent high tack adhesive. UL Std. 723 classified.

C High strength printed aluminum foil duct board tape has an acrylic adhesive system that meets UL 181A-P requirement. Approved for bonding joints and seems on fiberglass ductwork. Ideal for permanently flexible seals.

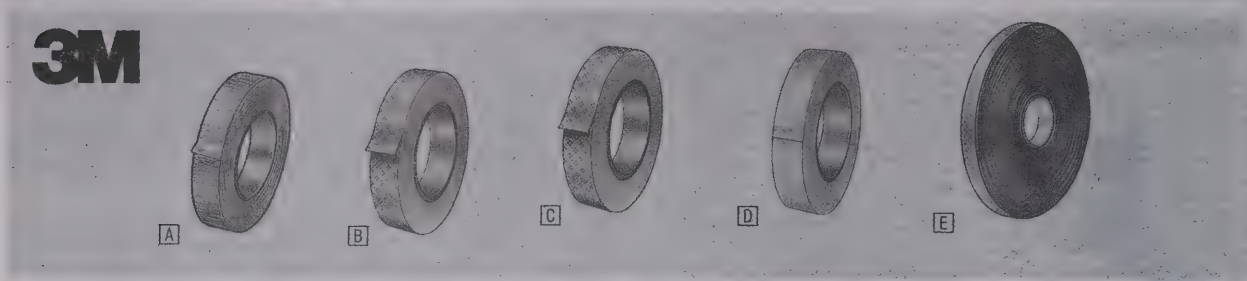
D Economical polyethylene film-backed cloth tape for a wide variety of industrial grade applications. Highly conformable. Gauge 11 mils.

E Highly durable professional grade duct tape recommended for sealing both metal and fibrous air handling system connections. Als suitable for general contractor use. Gauge 12 mils.

F High-strength premium grade duct tape seals seams airtight at joints and overlaps in air handling systems for durable, consistent closures. Extremely high tack adhesive makes it suitable for use as a waterproof packaging tape and for holding and tabbing applications. Clean release, will not delaminate. Gauge 13 mils.

G Foil, fiberglass scrim, and Kraft laminate in a diamond pattern with high tack adhesive. Conforms readily to irregular surfaces. Used as fiberglass duct wrap where high tensile strength is required. Ideal for patching scrim-reinforced duct insulation. 10.5 mils thick. Backing is UL Std. 723 classified.

H Scrim reinforced all service jacket (ASJ) tape for pipe insulation closure. High tack, acrylic based adhesive provides immediate bonding. Flame resistant, vapor barrier jacketing is ideal where ASJ facings are used and for sealing seams. Thickness 14.5 mils. Backing material is white Kraft-laminated fiberglass scrim foil and UL Std. 723 classified.



I Metallic duct tape applies easily as a cloth tape. High tack rubber adhesive seals flexible duct work and insulation board. 11 mils thick.

J Water-resistant tape of high thread count, vinyl-impregnated cloth to resist ultraviolet rays and severe weather conditions. For use outdoors to seal exterior duct and insulated pipe systems; in film industry as gaffer's tape; and in packaging. 13 mils thick.

# 3M DOUBLE-COATED AND FOAM TAPE

## A SCOTCH™ No. 400 DOUBLE-COATED PAPER TAPE

A paper tissue coated with a high shear adhesive on both sides. Paper release liner. Bonds well to almost any surface.

## B SCOTCH No. 410 DOUBLE-COATED PAPER TAPE

Paper tissue coated with a high shear adhesive on both sides. Treated, easy-release

smooth green plaid paper release liner. Mirror smooth, adhesive coat gives high level of adhesion to most clean, smooth surfaces.

## C SCOTCH No. 9589 DOUBLE-COATED FILM TAPE

3 mil HDPE carrier coating on both sides with 3 mils synthetic rubber adhesive. Easy-release green plaid liner. Aggressive adhesive permits adhesion to irregular or porous surfaces where high immediate adhesion is desired.

## D SCOTCH No. 444 DOUBLE-COATED FILM TAPE

Polyester film coated on both sides with a transparent acrylic adhesive. Easy-release flatback, off-white paper liner. Offers the bond characteristics of rubber adhesives while maintaining most of the performance characteristics of the acrylics. Well suited for attaching similar and dissimilar materials where an aggressive adhesive with high initial adhesion is desired. Excellent general purpose, good aging.

## E SCOTCH DOUBLE-COATED FOAM TAPE

High density, polyurethane foam with a long-aging acrylic adhesive on both sides, and treated, green plaid paper liner. Foams are soft, conformable, high in internal strength. Applies to most clean, dry, unified surfaces. Ideal for mounting and holding jobs, joining rough, mismatched surfaces. Provides thermal insulation, reduces vibration transmission, high solvent resistance. Nos. 1F228 and 1F229 meet MIL-T-60394A, Amend. 1(MU), Type I and II.

**No. 1F232 is double-coated vinyl foam tape** with same properties as foam tape above, but functional for extended periods at 150°F. Closed-cell foam makes excellent water and air seals; resists weathering.

## F SCOTCH PRE-CUT DOUBLE-COATED FOAM TAPE PADS (Not Shown)

1 x 1" die-cut fasteners consist of the same type of polyurethane foam tape listed above. Protected with paper liners which are extended for easy removal.

# ADHESIVE TRANSFER TAPE AND DISPENSER AND HOOK AND LOOP FASTENERS

## ADHESIVE TRANSFER TAPE

### [A] SCOTCH™ ATG-924 ADHESIVE TRANSFER TAPE

All-purpose clear acrylic adhesive. Reverse wound on 1" core for use with ATG hand dispenser No. 1F238 listed below. Excellent bond strength, high tack, long aging adhesive. For bonding a wide variety of similar and dissimilar materials such as metals, glass, wood, papers, paints and many plastics. Uses include splicing of foils, films, and fabrics. High solvent resistance.

### [B] SCOTCH™ ATG-969 ADHESIVE TRANSFER TAPE

High tack modified acrylic adhesive. Reverse wound tape comes in small diameter rolls for use with No. 1F238. Features high initial adhesion to most plastics. Thick clear adhesive mass permits bonding to many irregular surfaces. Good solvent resistance.

### [C] 3M 465 ADHESIVE TRANSFER TAPE

Acrylic adhesive easily transfers from liner to most smooth surfaces. Same properties as Nos. 1F239 and 1F240, except that it comes wound on silicone-coated, paper liner for manual application. **Not for use with hand held tape dispenser No. 1F238.**

### [D] SCOTCH™ ATG-700 ADHESIVE TAPE APPLICATOR

Designed to apply adhesive transfer tape while simultaneously removing/rewinding liner. Applies adhesive precisely and quickly with no mess or clean-up. Built of durable ABS plastic. Extended roller "nose" provides excellent sight line for precise application. Use with Nos. 1F239 and 1F240 adhesive tapes.

## SCOTCHMATE™ HOOK AND LOOP FASTENERS

Advanced closure alternatives to zippers, screws, snaps, hooks, bolts, and more for greater flexibility, faster product assembly, and a smoother and cleaner exterior surface. Consist of two woven strips; one is covered with tiny, stiff hooks and the other with pliable loops. Press together to fasten; simply pull apart to open. Widely used in the apparel, furniture, packaging, printing, safety equipment, and sporting goods industries.

Adhesive backed fasteners are designed for dynamic and static load applications on most dry, clean surfaces. Offer a high adhesive bond to a wide variety of materials including wood, glass, metal, fabric, polyethylene, polypropylene, and most rigid plastics. Just peel off protective liner and press firmly for a clean, dependable bond. Superior moisture resistance.

**Mini Packs of hook and loop fasteners are also available.** Offer simplified storage and dispensing. Well suited for design development and small volume production requirements. Convenient, compact packaging contains 4.9 yards each of both hooks and loops in choice of black or white. Mini packs come in two varieties: plain backed, sew-on fasteners and adhesive backed fasteners. Pressure-sensitive adhesive backed type is available in both general purpose adhesive and clear Dual Lock™ very high bond VHB™ adhesive.

# MASKING TAPE

### A SCOTCH™ BRAND HIGH PERFORMANCE MASKING TAPE

Tough, extremely smooth high performance crepe paper tape. Should not be subject to outdoor exposure. Can be qualified to meet Federal Specifications PPP-T-42C Type I and MIL-T-21595D Type 1.

### B SCOTCH™ BRAND POLYETHYLENE MASKING TAPE

Reinforced with saturated crepe paper. Excellent holding, weathering, and stain resistant characteristics. Backing resistant to many solvents, solutions, and strippers. Good conformability and easy tear; die-cuts easily for custom masking. Ideal for outdoor protection of metal and painted surfaces for periods up to a maximum of 3 months, sealing seams or access holes. Can be qualified to meet MIL-T-23397B Type L.

### C SCOTCH™ MASKING TAPE

Crepe paper backed tape with rubber-based adhesive which easily conforms to irregular shapes. Adheres well to many different surfaces.

### D LONG MASK

Specialty masking tape. Should be applied to clean and dry surfaces. Crepe paper backing.

### E TARTAN™ BRAND MASKING TAPE

Can be qualified to meet Federal Specifications PPP-T-42C Type I and Commercial Item Description CID-A-A-883B.

## NATIONWIDE BRANCH NETWORK WITH LOCAL ACCESS IS YOUR SHOPPING ADVANTAGE

Grainger's network of more than 350 local branches provides you nationwide access to our broad selection of product offerings. And with 30-minute "Will Call" service or 24-hour shipping on in-stock items, help is as close as a phone call away. Check the Branch Locations listed in the front of this catalog for the location closest to you.

# 3M FILAMENT TAPE AND DISPENSERS

## 3M FILAMENT TAPE

### A SCOTCH™ BRAND SUPERIOR PERFORMANCE FILAMENT TAPE

A high-performance "Scotchpar" film backed tape reinforced with continuous glass yarn filaments. Stain-resistant "mirror finish" aggressive high shear adhesive. Applicable Fed. Spec. PPP-T-0097E (DSA-FSS0, Type II, Class B); also Rule 41 of the Uniform Freight Classification for certain box styles. Meets Commercial Item Description CID A-A-1687. Provides excellent abrasion, moisture, and scuff resistance. Meets US Postal Regulations.

### B SCOTCH™ BRAND PERFORMANCE GRADE FILAMENT TAPE

Transparent "Scotchpar" film-backed tape, reinforced with continuous polyester filaments, provides excellent impact and cut resistance. Applicable Fed. Spec. PPP-T-00973, Type I, and Commercial Item Description CID A-A-1686B.

### C SCOTCH™ BRAND SUPERIOR PERFORMANCE FILAMENT TAPE

"Scotchpar" film-backed tape reinforced with continuous glass yard filaments. High tensile strength to hold lift flap on modified regular slotted containers. Features stain-resistant "mirror finish" and high shear adhesive. Provides excellent abrasion, moisture, and scuff resistance; resists curing even when dispensed under conditions of high humidity. Printable by "Print Seal" process. Transparent and black are applicable Fed. Spec. PPP-T-0097E, Type III and Type IV, respectively; also Commercial Item Description CID-A-A-1685A (black) and CID A-A-1687B (transparent).

### D SCOTCH™ BRAND STRETCHABLE TAPE

When optimally stretched, adhesive won't tear labels or graphics upon removal.

Good tensile strength and excellent elastic memory to keep wrapped products tightly bundled, or pallets securely unitized during shipment.

### E HIGHLAND™ BRAND INDUSTRIAL FILAMENT TAPE

Clear ScotchPro™ film backing, glass filament reinforced, pressure-sensitive, hot melt rubber resin adhesive. Clear, moisture-resistant conformable film backing, reinforced with continuous glass yarn filaments. Long aging, clear rubber resin adhesive with good shear strength on fiberboard surfaces.

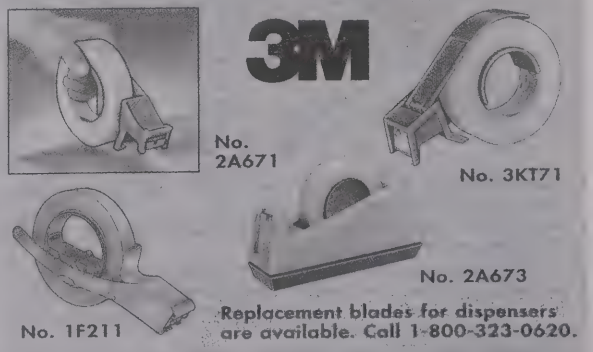
## 3M FILAMENT TAPE DISPENSERS

### HIGHLAND™ No. HB-901 FILAMENT TAPE DISPENSER

- **Hand-held model for filament tapes up to 1"W x 60 yds.**
- **For tighter box reinforcement and bundling applications**

### SCOTCH™ No. H-120 FILAMENT TAPE DISPENSER

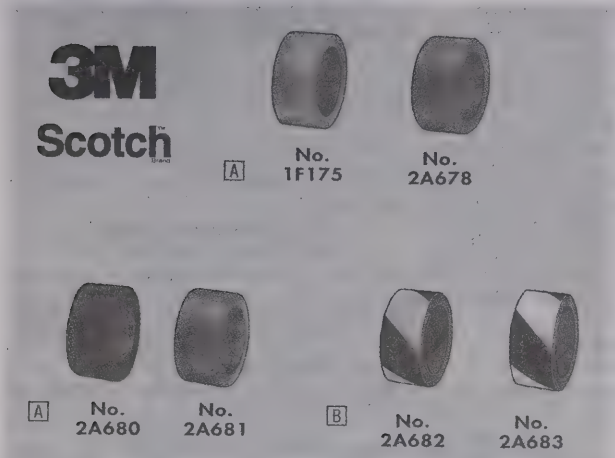


- **Durable metal dispenser for carton taping**
- **Portable, easily refillable**
- **Applicable Federal Specification GG-D-459B, Type I; Meets CID A-A-343A**

### SCOTCH™ No. H-36 STRETCHABLE TAPE HAND DISPENSER

- **Designed specifically for use with Scotch brand stretchable tape (No. 3KT46 sold above)**
- **Tape roll brake allows tape tension to be varied during use**
- **Made from high-impact durable plastic**

### SCOTCH™ No. C-25 HEAVY-DUTY DISPENSER



- **Dispenses 72 yd. rolls of cellophane, acetate fibre, acetate film tapes, or paper tapes and filament tapes up to 1" width on 3" core**
- **For mailing, shipping, wrapping stations**
- **Rubber base prevents slipping, won't scratch surfaces**
- **Made of high impact-resistant plastic**

# VINYL TAPE AND LANE MARKER/TAPE APPLICATOR

## LANE MARKING TAPE

### A SCOTCH™ No. 471 COLORED VINYL LANE MARKING TAPE

Vinyl plastic tape has a synthetic rubber adhesive. Used for color coding, abrasion protection, decorations, sealing, patching, splicing, and general purpose marking applications. Vivid colors. Highly conformable. Resistant to most common solvents—avoid ketones, chlorinated hydrocarbons, and esters. Comply with OSHA standards to allow identification of hazardous areas, fire lanes, and safety equipment. Can be qualified to meet Fed. Spec. PPP-T-66E Type I Class 2 (colored, except red/orange). Meets Commercial Item Description CID A-A-1689 (colors only).

### B SCOTCH™ No. 5702/5700 VINYL LANE MARKING SAFETY STRIPE TAPE

Vinyl plastic tape with alternating colored stripes. Has same adhesive as Scotch No. 471 (above). Printed stripes covered by 4 mil of vinyl. Black and white are basic colors for lane marking. Yellow and black tape is used for marking physical hazards which can cause stumbling, falling, or tripping.

## T & S LANE MARKER/TAPE APPLICATOR

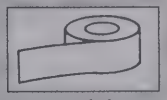
- **For use with 2, 3, and 4" wide rolls of vinyl lane marking and safety stripe tapes**
- **Removable tape can be used in place of paint for rapidly changing plant needs**
- **Dual handle grips for stability and guidance**
- **Radius adjustment for circles and curves**
- **Adjustable stabilizer guide for applying tape equal distances from any object**
- **Self-adjusting roller for uniform pressure on uneven floor surface**

Designed for indoor and outdoor use for applications such as marking aisles in factories, caution areas, temporary road markings during construction, basketball and tennis courts. Unit is constructed with tubular steel frame welded with heavy gauge steel on all other parts. Red color. T & S brand (TPA-20).

**No. 6W059.** Shpg. wt. 20.0 lbs. List $189.00. Each .....**$187.25**

*More ways to move and store products safely and securely.*

## REFLECTIVE WARNING TAPE



- Outdoor rated 5 to 8 years
- Engineer grade
- 7.0 mils thickness
- Service temperature –40°F to 200°F
- Applies to most clean dry surfaces
- Rated as Reflectivity 1 according to Federal Specification L-S-300C

Provides maximum safety identification in dark and low lighting conditions with high visibility reflective tape. Stripes and checks provide best contrast for low lighting situations. Meets OSHA specifications [1910.144(a)].

Use black and yellow for physical hazards, red and white for fire protection, and black and white for traffic and housekeeping. Minimum application temperature, 50°F. Brady brand.

### OIL BOARD

Oil-treated paper board cuts cleanly for sharper stenciling. No bleed-through. Size: 7 x 24". 0.015" thick. Natural color. Sold in 50 pound box. Marsh brand (OB15-7X24-50).

**No. 4W225.** Shpg. wt. 52.0 lbs. List $111.17. Each ..... $92.10

## STENCIL SUPPLIES

MARSH®

No. 5A131
Fountain Roller with Cover

No. 5A132
Roller Stencil Ink

No. 5A135
Fountain Roller with Cover

No. 5A136
K-1 Stencil Ink

### ROLMARK ROLLER STENCIL

For stenciling on porous and nonporous surfaces. Pump action button releases ink uniformly for clear marking. Unique open cell, skinless foam roller gives full ink coverage. Roller size: 3". Comes with protective cover and quart of No. 5A132 black stencil ink. Marsh brand (RFR-200-30).

**No. 5A131.** Shpg. wt. 3.6 lbs. List $84.96. Each ..... $70.80

**No. 5A141.** Replacement Roller. Shpg. wt. 0.2 lbs. List $13.31. Each ..... $11.09

### ROLMARK ROLLER STENCIL INKS

For marking on cartons, wood boxes, metal drums, pipe, and other porous and nonporous surfaces. Use with Rolmark fountain roller No. 5A131. Waterproof, permanent, fast-drying inks. Comply with performance requirements of Federal Ink Specifications TT-I-1795, Type IV; and Commercial Item Description A-A-208, Type IV. Quart can. Marsh brand.

| Color | Marsh Model | Stock No. ❸ | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| Black | 20903 | 5A132 | $24.10 | $20.08 | 2.5 |
| White | 20923 | 1F151 | 24.41 | 20.34 | 3.1 |
| Red | 20909 | 1F152 | 24.43 | 20.36 | 2.5 |
| Yellow | 20926 | 1F153 | 24.43 | 20.36 | 2.5 |

### No. 5A133 ROLMARK SOLVENT CLEANER

For general cleanup and equipment cleaning after using Rolmark stencil inks above. Quart can. Marsh brand (RM-S-Q).

**No. 5A133.** ❸. Shpg. wt. 2.5 lbs. List $15.88. Each ..... $13.23

### No. 5A135 FOUNTAIN ROLLER WITH COVER

Pumping button dispenses ink quickly and evenly. Marks on vertical or horizontal surfaces. Open cell, skinless design foam pad produces complete coverage. Lightweight. Roller size: 3". For use with No. 5A136 stencil ink on porous surfaces only. Comes with cover to protect foam roller and quart of No. 5A136 black stencil ink. Marsh brand (FR-100-30).

**No. 5A135.** ❸. Shpg. wt. 3.2 lbs. List $80.76. Each ..... $67.35

**No. 5A143.** Replacement Roller . Shpg. wt. 0.2 lbs. List $13.31. Each ..... $11.09

### No. 5A136 K-1 STENCIL INK

For stenciling on corrugated cartons, wood crates, and most other porous surfaces. Permanent, waterproof, fast-drying. For No. 5A135 fountain roller use. Complies with performance requirements of Federal Ink Specifications TT-I-1795, Type II; and Commercial Item Description A-A-208, Type II. Quart can. Black. Marsh brand (K-BK-Q).

**No. 5A136.** Shpg. wt. 2.5 lbs. List $19.98. Each ..... $16.65

### No. 5A137 K SOLVENT

For general cleanup and equipment cleaning after application of K-1 stencil ink No. 5A136 listed above. Quart can. Marsh brand (K-SOL-Q).

**No. 5A137.** ❸ Shpg. wt. 2.5 lbs. List $15.79. Each ..... $13.16

❸ These Products are covered by OSHA Hazard Communication Standard, and Material Safety Data Sheets (MSDS) are available. See page opposite inside back cover.

# STENCIL SUPPLIES

## STENCIL FOUNTAIN BRUSH

Valve action fountain brush designed for fast, uniform ink dispensing. Polypropylene bristles for durability. Use with No. 5A136 K-1 stencil ink on porous surfaces. Comes with cover. Marsh brand.

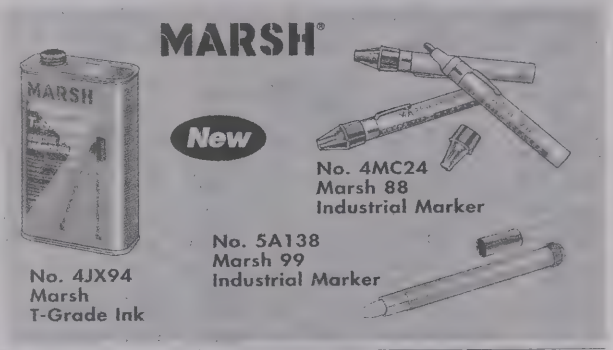
**No. 5A134.** Stencil Fountain Brush (20139). Shpg. wt. 0.5 lbs. List $38.57. Each ..... $32.15

**No. 5A142.** Replacement Brush Tip (15227). Shpg. wt. 0.1 lbs. List $16.13. Each ..... $13.45

## INDUSTRIAL MARKERS AND INK

Durable, long lasting fiber tip won't feather or soften after repeated use. Valve action allows fast write-out and smooth ink flow.

**Marsh 88HF Industrial Marker.** For general marking on wood, corrugated and chipboard, metal, plastic, and other porous and nonporous surfaces. Black. Marsh brand (M88-HF-BK).



***New* No. 4MC24.** Shpg. wt. 0.1 lbs. List $2.23. Each **$1.86;** Lots 12 .. **$1.77**

**Marsh 99 Industrial Marker.** Heavy-duty, industrial-grade felt tip marker provides reliable service for large, bold marks for shipping and sign making. Easily refillable barrel holds large quantity of Marsh T-grade ink No. 4JX94. Black. Marsh Brand (M99).

**No. 5A138.** Shpg. wt. 0.2 lbs. List $15.56. Each ..... $12.97

**Marsh T-Grade Ink.** Dye-type ink for use with refillable markers. Marks on paper, wood, cartons, metal, glass, and other porous and nonporous surfaces. Fast drying, waterproof, semi-transparent. Good flow-through in felt tip pens. 16 ounce can. Black. Marsh brand (T-BK-P).

**No. 4JX94.** ❸ Shpg. wt. 1.4 lbs. List $16.00. Each ..... $10.80

## MARSH® FAST SPRAY ADHESIVE

Translucent spray is fast-drying. Provides permanent bond. Allows time for repositioning of objects being attached to surfaces. Won't soak in or bleed through; does not wrinkle paper or other thin materials. Use on cloth, cardboard, felt, rubber, upholstery, Styrofoam, canvas, leather and balsa wood. Net wt. 14 oz. Marsh brand (26036).

**No. 3U571.** ❸ Shpg. wt. 1.1 lbs. List $9.31. Each ..... $7.76

## MARSH® SPRAY STENCIL INKS

Waterproof, weather-resistant aerosol inks dry instantly on all surfaces; won't smear, ripple, or smudge on stencils. Use on wood, cardboard, steel, metals, paper, fabrics, plastics, stone, glass, concrete, and other porous or nonporous surfaces. Net wt. 11 oz. Marsh brand.

| Color | Marsh Model | Stock No. | List | Each | Shpg Wt. |
|---|---|---|---|---|---|
| Black | 27004 | 3U573❸ | $6.47 | $5.39 | 1.1 |
| White | 27009 | 3U574❸ | 5.40 | 4.50 | 1.1 |

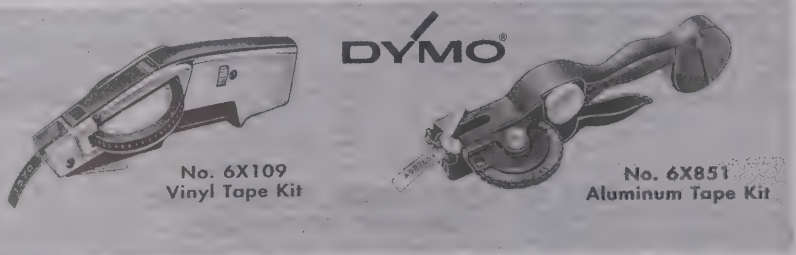
## TAN SPRAY MARK OVER

Covers and hides old print, markings, labels with an even, fast-drying color that matches the carton. Steady, uniform spray with minimum mist and running. Net wt. 11 oz. Marsh brand (27012).

MARSH®

**No. 3U572.** ❸ Shpg. wt. 1.1 lbs. List $5.83. Each ..... $4.86

❸ These products are covered by OSHA Hazard Communication Standard, and Material Safety Data Sheets (MSDS) are available. See page opposite inside back cover.



## TAPE LABEL-MAKING KITS

**Vinyl tapewriter kit includes 9½" chrome plated zinc embossing tool** with black plastic handle, three interchangeable embossing wheels, one roll each of red and black adhesive backed vinyl tape, and molded plastic carrying case. Embosses both 3/8" and 1/2" tape and horizontal and vertical letters using interchangeable embossing wheels. Not for use with metal tape. Dymo brand (1570-01).

**No. 6X109.** Shpg. wt. 2.2 lbs. List $84.14. Each ..... $64.00

**Heavy-duty tapewriter kit embosses both 1/2" metal and vinyl tape.** Kit includes one roll of 1/2" x 16 ft. aluminum tape without adhesive, and one roll 1/2" black vinyl tape with one 0.188 character horizontal wheel. Use to label underground wires, products outdoors, or in industrial plants for tagging. Can punch holes in tape when permanent pinning is needed. Dymo brand (1011-05).

**No. 6X851.** Shpg. wt. 2.2 lbs. List $263.03. Each ..... $179.25

## APEX PLUS AND MAGNUS STEEL STRAPPING

A cold-rolled, medium carbon steel strapping. Both types are painted and waxed for improved tension transmission around corners of a load. Specially formulated to meet different demands. Order dispenser separately. Mill or ribbon wound* coils.

**Apex Plus** is manufactured with superior edge conditioning and coating.

**Magnus** strapping is heat-treated with a Signode process that combines fine surface and controlled physical properties with high strength and excellent shock resistance.

(*) Mill wound (MW) strapping is oscillated uniformly and tightly across the 2½" width of the coil. Approximate coil weight is 105 lbs.
Ribbon wound (RW) strapping is wound with each layer directly over the one below so that the width of the coil is the same as the strap width. Approximate coil weight is 120 lbs.

| Strapping Type | Size (In.) | Wind | Average Strength (Lbs.) | Approx. Ft. Per Coil | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|
| **Apex Plus** | 3/8 x 0.017 | MW | 980 | 4945 | **3XG66** | $137.50 | **$114.60** | 105.0 |

| **Magnus** | 1¼ x 0.029 | RW | 5450 | 972 | **3XG74** | 134.70 | **112.25** | 120.0 |

## APEX PLUS ANCHOR STRAPPING

3/4W x 0.017" thick strapping has average strength of 1465 lbs. Strap is punched with 3.5mm holes on 19mm centers to allow securing with nails. Apex anchor strapping is used to secure objects to flat surfaces such as suspending pipes from floor joists or securing strapping to crates. For use in home, plant, and warehouse. 300 ft. long roll. No scales or tensioner tools required. Signode brand.

**No. 5A432.** Shpg. wt. 15.0 lbs. List $32.88. Each .....**$27.40**

## STATIONARY FLOOR STEEL STRAPPING DISPENSER

Steel dispenser holds coil of steel strapping that pays off from the inside of the coil. Dispenses steel strapping up to 3/4" wide: Nos. 3XG66, 3XG67, 3XG68, 3XG69, 3XG70, 3XG71. Strapping is not included, order separately. Signode brand (DF-23).

**No. 3XG81.** Shpg. wt. 34.0 lbs. List $261.85. Each .....**$218.25**

## STEEL STRAPPING SEALS

Push-type seals are used where the steel strapping is tensioned by butting the nose of the tensioner against the seal. Overlapping flanges withstand greater stress. Snap-on seals are placed over the overlapping strap ends either during or after tensioning the strapping. Eliminates pre-threading and speeds strapping operation. For use with Apex Plus and Magnus steel strapping.

| Size (In.) | For Use With Steel Strapping Nos. | Joint Type | Signode Model | Stock No. | List | Each Pkg. | Seals Per Pkg. | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|

## MOBILE FLOOR MODEL PLASTIC AND STEEL STRAPPING DISPENSERS

Portable floor model dispensers are used for typical shipping room applications. Constructed on tubular steel frame. Feature strap troller, tool tray, and rubber tread tires for easy mobility. Coil of strap is mounted on center axle of dispenser and feeds through rollers for smooth pay out. Strapping not included, order separately.

| For Use With Strapping Nos. | Signode Model | Stock No. | List | Each | Shpg. Wt. |

# STEEL SEALERS, TENSIONERS AND TOOLS

## MANUAL SEALERS

Used with steel strapping seals to secure tensioned strapping. Notch sealers cut into outer edges of strapping and seal, turning tabs down (regular) or up (reverse).

**Front-action sealer** handles are positioned perpendicular to the strapping for use in front of the operator by pushing handles together close to the chest. Generally used for lighter duty applications. **Side-action sealer's** lower handle can be rested on a flat surface of the unit being strapped. Operators can then apply much of their weight with both hands on upper handle. Generally used for heavier strapping applications. Seals are not included, order separately.

| Description | For Use With Steel Strapping Seals | Notch Type | Signode Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|
| **Front Action Sealers** | 3XG75 | Single Reverse | 008620-SRC-3820 | **3XG95** | $172.86 | **$144.10** | 2.1 |
| | 3XG76 | Single Reverse | 008625-SRC-1223 | **3XG96** | 172.86 | **144.10** | 2.1 |

## PNEUMATIC TENSIONER

Pneumatic tensioner takes most of the effort out of strapping large or compressible packages. It also makes tensioning uniform and precise through adjustment of the air pressure. A quick-disconnect plug is included. A filter-regulator-lubricator is required.

| Steel Strapping No. | For Use With: Manual Sealer Nos. | Strapping Seals No. | Signode Model 008860-... | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|
| **3XG74** | 3XG99, 3XH01 | 3XH11 | PN-114 | **3XH07** | $1989.90 | **$1659.00** | 9.8 |

## SIDE-ACTION PNEUMATIC SEALER

Pneumatic sealer lets compressed air do most of the work. Increases production on heavy strapping jobs, especially where seals are in awkward positions. A quick-disconnect plug is included. Air filter and regulator are required. Seals are not included, order separately.

| For Use With Steel Strapping Nos. | For Use With Strapping Seals No. | Notch Type | Signode Model 012550... | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|
| **3XG72, 3XG73** | 3XH10 | Single Reverse | RCNS-3435 | **3XH08** | $1372.20 | **$1144.0** | 8.6 |

## MANUAL FEEDWHEEL TENSIONER

Serrated feedwheel engages strapping firmly to remove any slack for maximum tension and secure bundling. Fast and easy one-handed operation.

| For Use With Steel Strapping | Signode Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| **5/8 to 3/4"W** | 003450-T | **3XG89** | $334.20 | **$278.50** | 4.9 |
| **3/8 to 3/4"W** | 003480-ST | **3XG90** | 261.40 | **218.00** | 3.4 |
| **3/4 to 1¼"W** | 020500-TH | **3XG93** | 533.22 | **444.50** | 7.0 |
| **1/4 to 3/4"W** | LT | **5A429** | 153.18 | **127.65** | 2.8 |

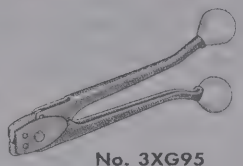
## MANUAL FEEDWHEEL PUSH-TYPE TENSIONER

For use with steel strapping on smaller or irregular shaped bundles. Push-type tensioner has no base to fit under the strap which allows greater tensioning.

| For Use With Steel Strapping | Signode Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| **3/8 to 3/4"W** | 017900-PF | **3XG91** | $493.40 | **$411.25** | 4.3 |
| **3/4 to 1¼"W** | 017930-PFH | **3XG92** | 537.50 | **448.00** | 7.5 |

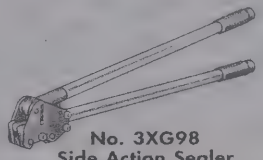
## STRAP CUTTING TOOLS

No. 5A248 is a lightweight cutting tool which allows user to cut strapping with one hand. Works with steel strapping up to 1/2W x 0.020" thick, and all sizes of plastic strapping.



**No. 3XG84** is used for steel strap removal or cutting steel strap to length. Replaceable blades.

**No. 3XG85** is lightweight and allows one-handed operation.



**No. 3XH09** cuts tightly embedded strap. One-handed operation.

| Description | Signode Model | Stock No. | List | Each | Shpg. Wt. |

# STEEL STRAPPING CUTTERS, PLASTIC EDGE PROTECTORS AND STRAPPING ACCESSORIES

## STEEL STRAPPING CUTTERS

**9" Strapping Cutter.** For cutting flat strap. Lower jaw slides under the tightest strapping or staple. Blades pass each other giving clean, smooth easy cuts. Spring action opens jaws automatically before and after each cut. Capacity 3/4 x 0.035". H.K. Porter brand (0990T).

**No. 6A217.** Shpg. wt. 1.3 lbs. List $91.61. Each ..... $77.90

**12" Strapping Cutter.** A lightweight, rugged cutter that can be used with one hand. It features sharp, clean, fast cuts. Special design eliminates need for spring. Capacity 1¼ x 0.050". H.K. Porter brand (1290G).

**No. 6A218.** Shpg. wt. 1.9 lbs. List $99.35. Each ..... $84.50

**Heavy-Duty 24" Strapping Cutter.** Long-handled two handed cutter that will make light work of the heaviest strapping. Long handles keep worker at a safe distance from cut. Excellent for pallets, loading, and unloading freight cars, trucks, ships, etc. Capacity 2 x 0.050". H.K. Porter brand (2690GP).

**No. 6A219.** Shpg. wt. 6.5 lbs. List $226.15. Each ..... $192.25

## HANDY STRAPPER

Lightweight kit has everything needed to strap packages, cartons and bundles. Includes 12mm wide x 2,500 ft. of Contrax® plastic strapping and 425 self-sealing metal buckles packaged in a convenient carry carton. Perfect for light to medium-duty strapping jobs at home or work. Does not require tool, but for greater tension, use with DLT Tensioner, No. 3A083. Signode brand (010426).

**No. 3A082.** Handy Strapper. Shpg. wt. 20.0 lbs. List $67.22. Each ..... $60.05

## DISPENSI-PAK

Portable self-dispensing polypropylene strapping system designed for light bundling applications. Easy to use system is self-contained; no tools required. Contains 250 feet of 1/2" wide Contrax® strapping and 40 steel buckles. Signode brand.

**No. 5A430.** Shpg. wt. 1.6 lbs. List $22.44. Each ..... $18.70

## PLASTIC EDGE PROTECTORS

1¼L x 2"W plastic edge protectors spread strapping tension across a 2" surface, protecting packages from surface damage. For use with steel strapping or plastic strapping up to 3/4" wide. 2,000 per package. Signode brand (PL-1).

**No. 5A431.** Shpg. wt. 20.0 lbs. List $89.46. Each ..... $74.55

## METAL BUCKLES

1/2" Steelock® metal buckles join plastic strap ends together without tools. Ideal for low volume, low tension strapping of lightweight packages or bundles. Box of 500 self-sealing buckles. Signode brand (50 SL).

**No. 3A127.** Shpg. wt. 12.0 lbs. List $35.46. Each ..... $29.55

## AVISTRAP® POLYESTER STRAPPING

Strong polyester fiber strapping is used for securing shipments to pallets, binding boxes during shipping, or securing goods for storage. Releases without recoil when cut loose. White polyester fiber is 3/8"W x 1,125'L, 500 lb. tensile strength. Packed in self-dispenser carton. Can be knotted or secured with buckles No. 4X888. Cooper Tools brand (P30V).

**No. 4X887.** Strapping. Shpg. wt. 4.2 lbs. List $30.37. Each ..... $25.35

## STRAPPING BUCKLES

Used for securing polyester (Avistrap®) or plastic strapping. Spring steel wire construction, 3/8" wide. 1000 buckles per case. (AVB-3).

**No. 4X888.** Buckles. Shpg. wt. 10.0 lbs. List $27.06. Each ..... $22.55

# PLASTIC STRAPPING AND ACCESSORIES

## CONTRAX PLASTIC STRAPPING

Contrax polypropylene strapping is used for light to medium-duty applications such as palletizing, unitizing, bundling, carton closure, and reinforcement. It resists splitting and has a smooth, uniform surface for reliable performance. Contrax strapping has "elastic memory" which absorbs shock and keeps strap tight during handling and shipping. Controlled surface properties minimize tensioning effort, increase tension transmission around corners, and improve operating efficiency. Dispenser is sold separately.

### CONTRAX STRAPPING SPECIFICATIONS

## TENAX® POLYESTER STRAPPING

For rigid loads requiring highly retained tension for longer periods of shipping or storage time. Recommended tools: WTD-2 Tensioner, No. 3A084; D-504 Sealer, No. 3A124; and 50DYS Seals, No. 3A133. Coil is 1/2"W x 10,500 ft. long with 500 lb. average strength. Dispenser not included. Signode (1816).

**No. 5W148.** Polyester Strapping. Shpg. wt. 58.0 lbs.
List $175.05. Each.....$134.65

## STRAPPING SEALS

Snap-on seals speed sealing operations on all types of 1/2" wide plastic strapping. Seal can be placed on overlapping ends of strapping either during or after tensioning. Requires tool No. 3A124 to crimp seal ends together. Box of 500 seals. Signode brand (50 DYS).

**No. 3A133.** Strapping Seals. Shpg. wt. 6.0 lbs.
List $24.69. Each.....$18.99

## FLOOR MODEL DISPENSERS

Portable floor model dispensers are constructed on tubular steel frame features straptroller, tool tray and rubber tread tires for easy mobility. Can be used with all general duty Contrax® and Tenax® plastic strapping. Coil of strapping mounts on center axle of dispenser and feeds through rollers for smooth play out. Dispenser can be suspended if required. Order strapping separately. Signode brand.

# PLASTIC STRAPPING TENSIONERS AND PLASTIC STRAPPING MACHINE

## HAND TENSIONER

Lightweight gripper-type tensioner/cutter triples the pull on plastic strapping in a simple one-hand operation, providing maximum tension. Easily tensions strapping around cartons, pallets and bundles. Can be used with No. 3A082 Handy Strapper. Also with No. 3A127 or 3A133 buckles. Signode brand (DLT).

**No. 3A083.** Shpg. wt. 0.7 lbs. List $69.02. Each ..... $60.05

## MANUAL FEEDWHEEL STRAPPING TENSIONER

Serrated feedwheel engages strapping firmly to remove any slack for maximum tension and secure bundling. Fast and easy one-handed operation. For use with plastic strapping Nos. 5W148 and 5W149. (Requires use of sealer tool No. 3A124 and seal No. 3A133).

**No. 3XG94.** Shpg. wt. 3.6 lbs. List $282.20. Each ..... $235.25

## WINDLASS TOOL

A strapping tensioner for use only with Signode plastic strapping. Adds great tension with less effort on flat packages. Tool grips one end of strap with lever action, and winds the other around a slotted shaft. Applies greater tension than feedwheel tools, and also cuts strapping. Signode brand (WTD-2).

**No. 3A084.** Shpg. wt. 2.8 lbs. List $117.66. Each ..... $98.05

## SEALER TOOL

Lightweight front action sealer crimps seal around overlapping ends of plastic strapping. Place the seal on tensioned strapping, place sealer over seal and push handles together to close seal. For general strapping purposes. Signode brand (D-504).

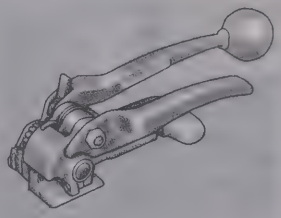
**No. 3A124.** Shpg. wt. 3.0 lbs. List $180.60. Each ..... $150.50

## COMBINATION PNEUMATIC TENSION WELD TOOL

Supplied with a quick-disconnect plug and socket, this tool requires a filter-regulator-lubricator. This tension weld tool applies Tenax, Contrax, and Contrax Plus plastic strapping Nos. 5W148, 5W149 and 3XG62. Strap ends are joined with Signode's patented tension weld process, eliminating the need for metal seals. Signode brand (VXM-2000E).

**No. 3XH02.** Shpg. wt. 9.6 lbs. List $3301.20. Each ..... $2751.00

## EMPAX® PLASTIC STRAPPING



12,900 ft. coil of 3/8" Empax® polypropylene plastic strapping. Break strength of 300 lbs. Signode brand (2X1112).

**No. 4A444.** Shpg. wt. 28.0 lbs. List $85.14. Each ..... $70.95

## SIGNODE MST PLASTIC STRAPPING MACHINE

Dispenses, tightens, and seals economical polypropylene strapping around any package or bundle greater than 3". Operation is simple and fast: user selects strap tension and length from front panel buttons, guides loose end of strap around the package, and reinserts the end into the machine. Unit automatically tensions strap and joins the ends with a secure heat weld. Tension is adjustable up to 80 pounds. Machine requires 3/8" wide Empax® plastic strapping, No. 4A444, listed separately above. 115V, 60 Hz. 31H x 39W x 24½"D. Signode brand (MST).

**No. 5Z093.** Shpg. wt. 241.0 lbs. List $2719.20. Each ..... $2266.00▲

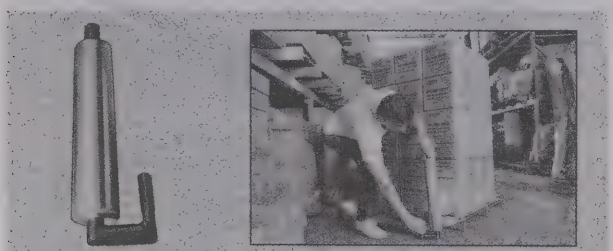
# STRETCH FILM HANDWRAPPERS AND STRETCH BAND-IT™ STAND

## TENNECO PALLETECH™ HAND WRAP



**Extra Strong 79-Gauge Film:**
- For heavy, odd shaped, hard to wrap pallet loads
- Withstands severe puncturing

**Strong 59-Gauge Film:**
- Holds shipments securely
- For general wrapping of most pallet loads

Tightly secures and protects pallet loads efficiently and economically for transportation. Strong, tear-resistant stretch wrap holds up against puncturing. Outstanding stretchability and cling prevents load from vibrating loose. Highly versatile stretch wrap unitizes most any type, size, and weight load. Easy to apply by hand or with No. 5A414 Highlight Hi Tech Handwrapper listed below. Tenneco PalleTech brand.

## HIGHLIGHT HI-TECH HANDWRAPPER & STRETCH BAND-IT® STAND

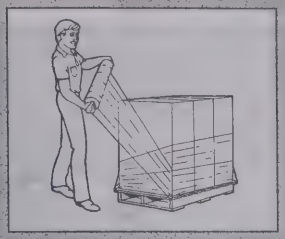
No. 5A414 Handwrapper

No. 5A415 Band-It® Stand

**Hi-Tech Handwrapper** is a precision hand held stretch wrap dispenser. Lightweight and easy to use. Comfortable foam handle with 33° angle makes it easy to wrap any load. Sturdy zinc die-cast construction. Patented Stretch Set film control feature delivers higher stretch levels for tight, secure, and economical loads. Use with PalleTech® X-79 and X-59 Hand Wrap listed above. Adjusts to accept 12, 14, and 18" wide film. Highlight brand.

**Highlight Stretch Band-It® Stand** supports packages for stretch bundling in shipping room operations. Mounts easily and securely to any table. Adjustable zinc-plated steel forks hold packages up to 35 lbs. Bundled products are easily removed from forks after wrapping. Sturdy backplate offers package alignment and rear support. For use with Tenneco Master Wrap handwrappers. Band-it brand (HBS-100).

**No. 5A414.** Hand Wrapper. Shpg. wt. 4.0 lbs. List $89.95. Each .....**$80.40**



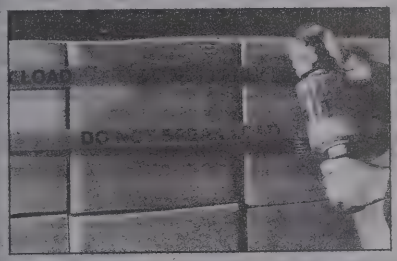
**No. 5A415.** Band-It Stand. Shpg. wt. 14.0 lbs. List $69.95.Each .....**$64.25**

❸ These products are covered by OSHA Hazard Communication Standard, and Material Safety Data Sheets (MSDS) are available. See page opposite inside back cover.

# STRETCH FILM HANDWRAPPERS AND SEMI-AUTOMATIC STRETCH WRAP MACHINE

GOODWRAPPERS HANDWRAPPERS.

One Person Can Fully Wrap Any Size or Shape Load



## STRETCH WRAP

- **Tear and puncture-resistant, 0.8 mil thick film**
- **Exceptional clarity**
- **20" wide x 1000 ft. long roll**
- **Disposable hand-held dispenser**

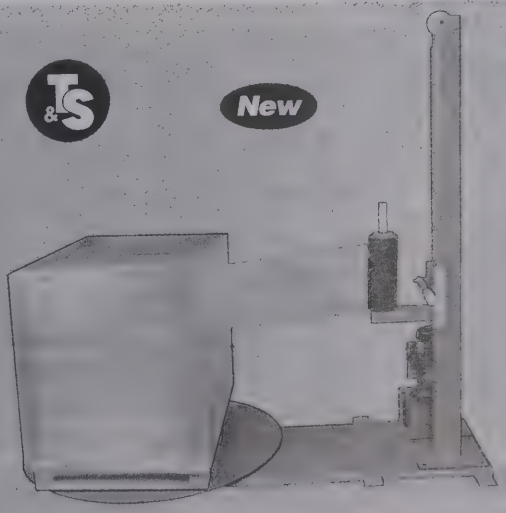
Goodwrappers® completely self-contained handwrapping system uses stretch film to protect shipments and pallet loads from damage and theft when in transit, sitting on a dock, or stored in a warehouse. Each roll is ready to use out of the box, complete with built-in dispenser. Eliminates inconvenience of losing or breaking extra parts. Operator gets maximum film stretch by squeezing patented hand braking system. Hand brakes protect operator's hands from friction heat. Two hand brakes allow operator to stretch 100% of stretch film width. Each roll is loaded with 1000 ft. x 20" wide Bemis "80" stretch film which has exceptional clarity, tear and puncture resistance; retains stretch from –20 to 120°F. Goodwrappers brand (4G-20-4M)

**No. 2A096**. Shpg. wt. 8.0 lbs. List $24.45. Each ..... **$20.40**

## GOODWRAPPERS PRINTED STRETCH FILM

Three messages available:

- "FRAGILE"
- "RED HOT RUSH"
- "DO NOT BREAK LOAD"



Alerts shippers to shipments that need special attention. Adding printed messages to stretch film allows identification of load at the same time it is being stabilized. Eliminates need for extra labor and shipping room supplies. Three messages available: "FRAGILE," "RED HOT RUSH," and "DO NOT BREAK LOAD." Bold black lettering is 1" high with a red background band. Comes in 5" x 500 ft. roll, complete with dispenser and patented hand braking system for hand application. Can also be applied by stretch wrap machine when using brackets (sold separately on page 2276). Goodwrappers brand.

| Message | Goodwrappers Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| **FRAGILE** | 6R53MFRG | **6A220** | $13.15 | **$10.95** | 2.0 |
| **RED HOT RUSH** | 6R53MRHR | **6A221** | 13.15 | **10.95** | 2.0 |
| **DO NOT BREAK LOAD** | 6R53MDBL | **6A222** | 13.15 | **10.95** | 2.0 |

## SEMI-AUTOMATIC STRETCH WRAP MACHINE

T&S

New

Wraps pallets up to 78" high and weighing up to 4000 lbs.

Facilitates efficient palletizing at the end of a production line or in a shipping department by automatically rotating pallet while operator remains stationary. Powered by 115V, 1/2 HP motor with soft start and stop variable speed control. Unit is easily operated by actuating the foot pedal and manually moving film up or down with handle.

Stretch wrap machine can wrap pallets up to 78" high with a maximum weight of 4000 lbs. Maximum load diameter is 76". Round platform is 48" in diameter x 2" high. Mast is 75" high. Uses stretch wrap film rolls up to 11" in diameter. Comes equipped with bars to handle 10 and 20" wide rolls of stretch wrap film. T & S brand.

| Description | T&S Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| **Semi-automatic Stretch Wrap Machine** | SWA-48 | **4W943** | $3791.27 | **$3294.00▲** | 480.0 |

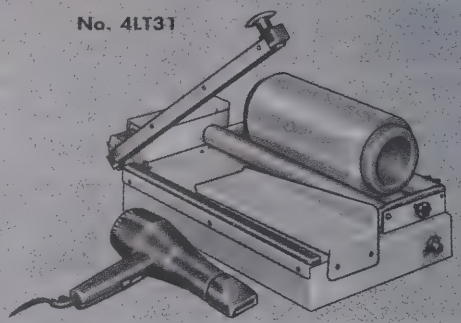
### PALLETECH™ "T" FILM

**For use with T & S semi-automatic stretch wrap machine as well as other brands of stretch wrap equipment**

PalleTech™ "T" film is a higher load force machine film which provides greater force-on-load to protect and secure all types of loads. This film has excellent clarity, silent unwind, and consistent cling that reduces chances of film slippage. Outstanding restretch memory for greater load retention. PalleTech™ "T" will stretch up to 225%. 80-gauge clear film in 20" wide x 6000 ft. long roll. Tenneco® brand (TT1-2080).

**No. 4W935**. PalleTech Film. Shpg. wt. 40.0 lbs. List $81.46. Each **$67.90**; Case Lots 4 ..... **$64.46**



# SHRINK WRAPPING SYSTEMS AND FILM

## SHRINK WRAP SYSTEMS

Midwest Pacific™

Replacement Parts Available 1-800-323-0620

- Easy to use, professionally shrink wraps products in seconds
- Compact size, can be used almost anywhere
- Heavy-duty construction for continuous use
- Used by manufacturers, wholesalers, distributors, parts departments, shipping rooms, printers, and retailers
- Dual in-line safety fuses protect both the operator and the machine
- Includes 500 foot roll of shrink film

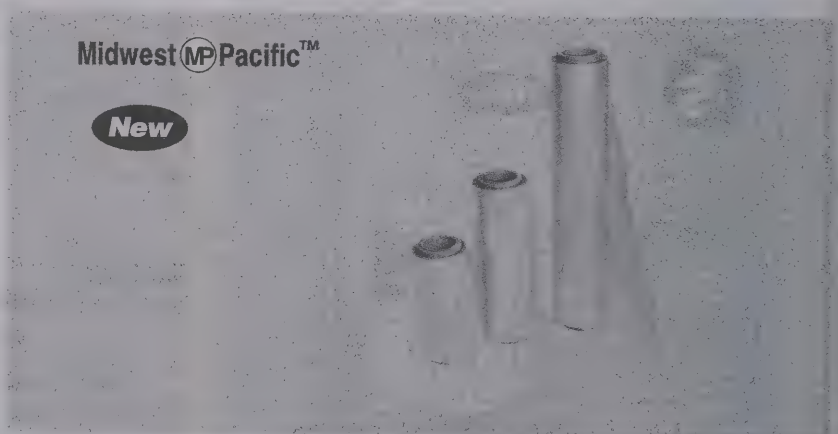
Midwest Pacific shrink wrap systems provide a simple, economical way to protect your product from soil and contamination while clearly displaying the product or package. The system makes your product tamper-resistant and tamper-evident.

The dispenser film cradle features self-lubricating bearings and a rugged film separator for smooth film flow and easy product insertion. Solid-state timer control and special alloy heating element provide consistently strong seals. Lightweight, sturdy 900 watt heat gun with baffle diffuser plugs into a fused standard outlet in the back of the unit. Each unit comes with spare element and teflon. Maintenance kit (Part# 488-9762 for 16" and Part# 488-9788 for 27" model) and all other parts available: to order, call toll free 1-800-323-0620

Easy to use. Just insert the product into the centerfold film. The sealing arm both seals the open sides and removes any excess film. Hot air from the heat gun makes the film shrink tightly around the product.

**No. 4LT31 16" Shrink Wrap System** includes 16" bar impulse sealer/dispenser, 500 ft. long x 15" wide roll of centerfold shrink film, and maintenance kit (heating element, upper and lower teflon). Can be used with centerfold film 6 to 16" wide.

**No. 4LT35 27" Shrink Wrap System** is similar to 16" system, but will accommodate film up to 27" wide. Midwest Pacific brand.



| Description | Maximum Film Width (In.) | Bar Sealer Dimensions (In.) L | W | H | Midwest Pacific Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|---|
| **16" Shrink Wrap System** | 16 | 19 | 11 | 5 | MP16SW | **4LT31** | $482.70 | **$375.00** | 23.0 |
| **27" Shrink Wrap System** | 27 | 30 | 11 | 5 | MP27SW | **4LT35** | 711.00 | **475.00** | 34.0 |

## CLEAR PVC SHRINK FILM

- Shrinks to conform to shape of product when heat is applied
- Less "cling" for easy product insertion
- Offers tamper resistant and tamper evident seal on products of any shape
- Protects products from moisture and contamination
- Maximum shrink: TD (width) 42%, MD (length) 38%
- Free of "fisheyes" and other defects that cause flaws in packaging
- Can be used on food containers but is not approved for direct food contact
- Available in 10 and 15" (75 gauge) and 26" (100 gauge) center folded width films

Midwest Pacific™

*New*

Clear, general purpose centerfolded shrink film is made of PVC. Film shrinks when heat is applied to produce clear, skin-tight, overwraps or re-shrinkwrapping of damaged retail packages. Heat can be applied by heat guns or shrink tunnels. Designed for use by retailers, manufacturers, wholesale distributors, and printers. Midwest Pacific brand.

## RECEIVING SCALES

pelouze

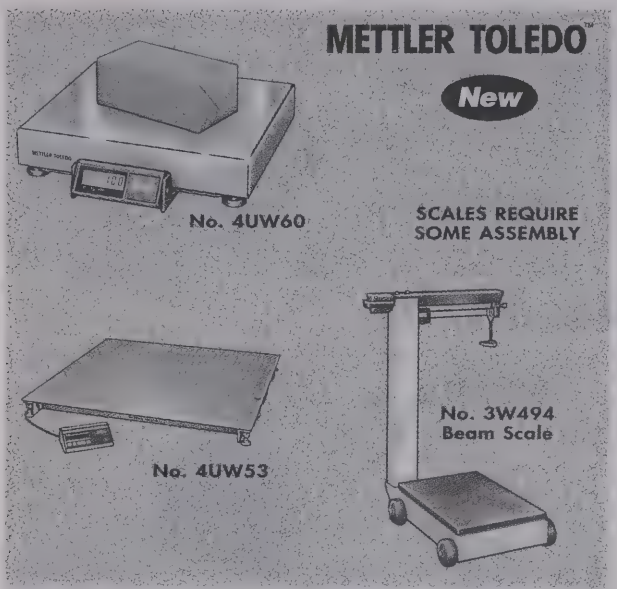
New

No. 4TH72

**Capacity:**

- **No. 4TH71—up to150 lbs. (60 kg.)**
- **No. 4TH72—up to 400 lbs. (180 kg.)**

Ideal for UPS, Parcel Post, and warehouse shipping applications. Platform is all-steel construction with heavy-duty "no-slip" platform, LCD display and control panel on 9 foot cord, can be wall mounted for easy viewing so large packages won't block LCD display. Tare functions. Automatic shut-off feature.



Both models have an RS232 port so scale can connect to a PC. Operates on AC (adapter included) or 9V battery (not included). Pelouze brand.

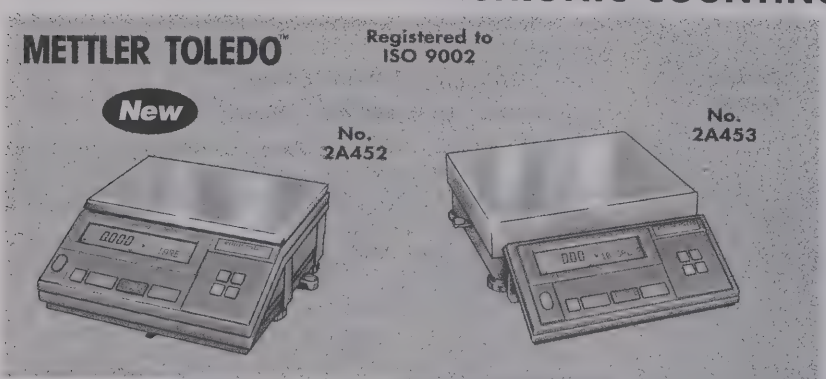
## INDUSTRIAL SCALES

**No. 4UW60 Parcel Scale.** For gross weighing of parcels; including manifesting, receiving, shipping, and checking weights. Rugged, reliable die-cast aluminum construction with stainless steel platter. Switch readings from lb to kg and back. Legal for trade. Easy-to-read LCD display. RS-232 serial interface. Operates on 120VAC.

**No. 4UW61 Portable Parcel Scale.** Battery operated version of No. 4UW60. Uses six "D" alkaline batteries to power scale continuously for a minimum of 40 hours. Sleep mode extends battery life.

**No. 4UW53 Floor Scale.** Mettler Toledo 5000-lb. capacity fully electronic low-profile floor scale with 4 x 4 ft. tread plate deck. Electronic indicator with easy-to-read LCD display, and On-Off, zero, tare, print, and function keys. Delivered precalibrated 5000 lb. x 1 lb. Can be legal for trade when recalibrated by 5 lb. Operates on 120VAC.



**No. 4UW55 Scale Ramp.** Optional ramp for No. 4UW53 Floor Scale. Scale accommodates one ramp, or two ramps on opposing sides to make loads easier to move on or off. Priced per one ramp.

**No. 3W494 Portable Heavy-Duty Beam Scale.** 1000-lb. capacity beam scale. Reliable, low cost, and portable. Standard beam is calibrated to 100 pounds in 8-ounce graduations. Total capacity is increased to 1000 pounds using additional counterpoise weights which are provided. Lever operated lock secures beam indicator when scale is not in use. Phenolic wheels. Rugged fabricated steel construction. Legal for trade.

**METTLER TOLEDO LIMITED WARRANTY**
**Mettler Toledo warrants industrial scales from defects in workmanship and materials for 1 year from date of installation. Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.**

## SCOUT® BALANCES

- Large, high-contrast LCD display
- Large weighing pan and simple, two button operation
- Multiple weighing units and parts counting
- Battery operation or AC adapter operation
- Easy span and linearity calibration
- Integral security bracket
- Weigh below hook

Durable ergonomic construction and simple, two-button operation add versatility for laboratory and industrial environments. Easy-to-use features like high-contrast display, large stainless steel weighing surface and auto shut-off. Ohaus brand.

# CHATILLON SCALES

## PUSH-PULL GAUGES

**No. 4VG64**
**CAP.: 10 Lbs. x 2 Oz. (4.5kg x 0.05kg)**

**No. 4VG65**
**CAP.: 40 Lbs. x 8 Oz. (18kg x 0.2kg)**

- **Sturdy construction with easy-to-read avoirdupois and metric graduations**
- **Accurate to ±1 graduation**
- **Knurled knob for tare and zero adjustment**

Push-Pull gauges have a satin chrome finish with black embossed avoirdupois and metric graduations for fast, error-free readings. Built with Chatillon springs, each is individually calibrated using certified weights to ensure absolute accuracy. Scales work at any angle, with tare and zero easily adjustable. Includes maximum reading pointer. Chatillon brand.

***New*** **No. 4VG64.** 10 Lb. Push-Pull Gauge (719-10MRP). Shpg. wt. 1.1 lbs. List $204.49.
Each.....**$186.00**

***New*** **No. 4VG65.** 40 Lb. Push-Pull Gauge (719-40MRP). Shpg. wt. 1.1 lbs. List $204.49.
Each.....**$186.00**

## 7" LEGAL TRADE COMMERCIAL SCALES

**No. 5A355**
**CAPACITY: 20 lbs. x 1/2 oz.**

**No. 4VG63**
**CAPACITY: 40 lbs. x 1 oz.**

- **Inner steel frame construction**
- **Large, easy-to-read dial wtih red band and contrasting black bezel**
- **TEMPRUF™ temperature compensated springs**

General purpose H44 Class III "Legal for Trade" hanging scales reaches full capacity in two pointer revolutions. Temperature compensated spring ensures accuracy and reliability. Corrosion-proof, chip- and impact-resistant requiring minimal maintenance. Chatillon brand.

**No. 5A355.** 20 Lb. 7" Commercial Scale (0723TGDD). Shpg. wt. 3.8 lbs. List $208.75.
Each.....**$190.00**

**No. 4VG63.** 40 Lb. 7" Commercial Scale (0724TGDD). Shpg. wt. 7.0 lbs. List $239.00.
Each.....**$198.50**

## STRAIGHT SCALES

**No. 5A354**
**CAPACITY: 50 lbs. x 8 oz.**

**No. 4VG68**
**CAPACITY: 100 lbs. x 1 lb.**

- **Precision springs calibrated by certified weights for accuracy to ±1 graduation**
- **Knurled knob for tare and zero adjustment**
- **Dual graduations—avoirdupois and metric**
- **Rugged, all-metal design**

Compact, general-purpose weight and force measurement instruments. Non-corrosive brass with numeral and graduations deeply embossed in black. Rugged construction includes industrial class cadmium-plated spring for long life and reliability under all conditions. For unlimited applications in sport fishing, laboratory, automotive, and repair service operations. Can be used vertically or horizontally. Chatillon brand.

**No. 5A354.** 50 Lb. Straight Scale (IN-50). Shpg. wt. 0.9 lbs. List $63.00. Each.....**$50.00**

***New*** **No. 4VG68.** 100 Lb. Straight Scale (IN-100). Shpg. wt. 2.0 lbs. List $145.00.
Each.....**$124.00**

## 12" CRANE SCALES

**No. 5A359**
**CAPACITY: 5000 lbs. x 20 lbs.**

**No. 4VG69**
**CAPACITY: 20000 lbs. x 100 lbs.**

- **12" dial with widely spaced graduations for maximum readability**
- **Wide angle viewing due to special bezel design and dial position**
- **Accurate to 1/2 of 1% of capacity**
- **Integral zero adjustment to tare loads up to 20% of capacity**
- **Lightweight design for ease of movement between work stations**

Rugged crane scales handle full range of weighing tensiometer and crane scale applications. 12" dial has large visible numerals and a wide-angle bezel design. Complete with factory-installed safety hook. Calibration certifiable to NIST. Chatillon brand.

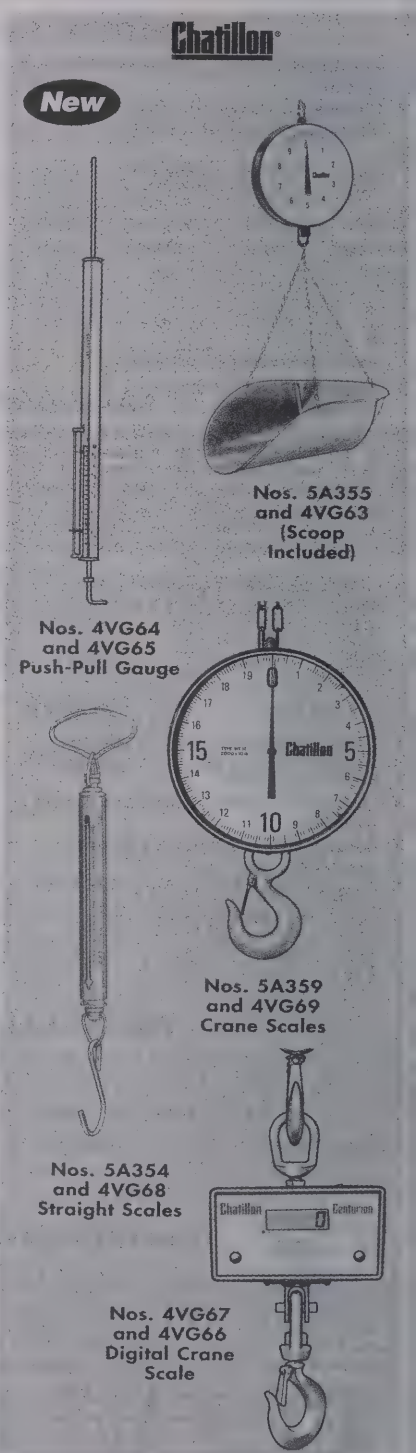
**No. 5A359.** 5000 Lb. Crane Scale (WT12-5000H). Shpg. wt. 20.0 lbs. List $808.11. Each..**$735.00▲**

***New*** **No. 4VG69.** 20,000 Lb. Crane Scale (WT12-20000H). Shpg. wt. 40.0 lbs. List $1223.64.
Each.....**$1113.00**

## DIGITAL CRANE SCALES

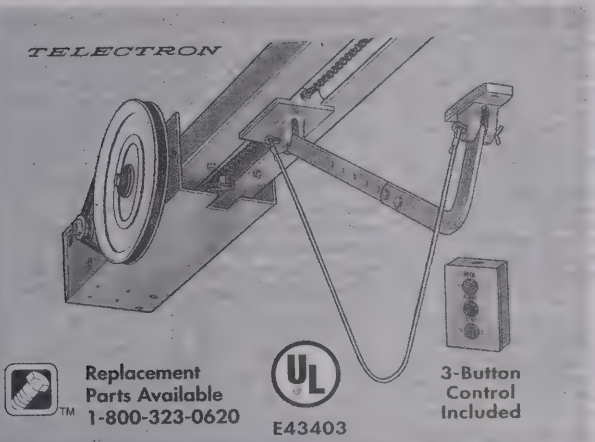
**No. 4VG67-CAP: 5000 Lb. x 2 lbs.**

**No. 4VG66-CAP: 20,000 Lb. x 10 lbs.**



- **Accurate to 0.25% of full capacity**
- **Tare adjustment 10% of capacity**
- **Safety factor at least four times full capacity**
- **Includes fixed lifting eye and bottom safety swivel hook**

Advanced digital scales are ideal for industrial applications. Large LCD readout on scale. Scale features automatic zero tracking. Chatillon brand.



***New*** **No. 4VG67.** 5000 Lb. Crane Scale (DWT5000). Shpg. wt. 21.0 lbs. List $1100.00.
Each.....**$1005.00▲**

***New*** **No. 4VG66.** 20,000 Lb. Crane Scale (DTW20000). Shpg. wt. 44.0 lbs. List $1300.00.
Each.....**$1189.00▲**

# INDUSTRIAL OVERHEAD DOOR OPENERS

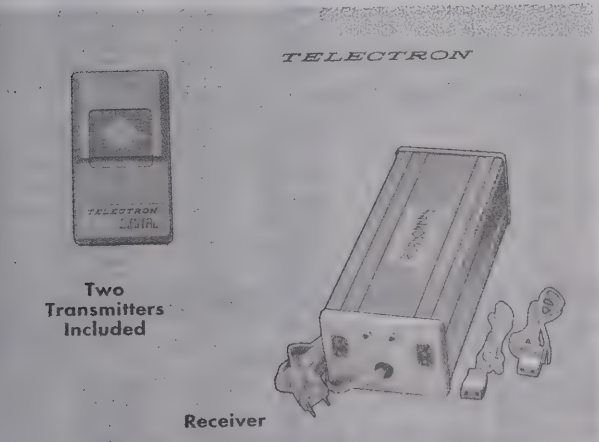
Replacement Parts Available 1-800-323-0620

E43403

3-Button Control Included

**Telectron operator systems are chain driven,** drawbar type, designed to operate 20 ft. wide sectional overhead doors up to 280 sq. ft. in size. Drawbar power: 300 lbs. Requires only 3" of headroom. 3/4" drive shafts have permanently prelubricated ball bearings. Powered by 1/2 HP, 115V, single phase permanent split capacitor start motor with automatic reset overload protection. Motor, switch gear, control system, power and control wiring connections are contained in a dust and dripproof enclosure.

**Three-button (Open-Close-Stop) 24V control station** (included) allows lowering and raising door to any desired position. Positive limit switching in both directions will not permit the door or operator to over travel in either direction. Adjustable double friction clutch stops door if obstruction is hit. Full roller chain drive with heavy-duty carriage. Quick release door arm. UL Listed. Telectron brand. Telectron Radio Controls available for remote operation, see below.



## EXTRA THREE-BUTTON CONTROL STATION

**Control Station** operates door opener from multiple locations; one control required for each location. UL Listed (E91951). Telectron brand (330220).

**No. 6X891.** Shpg. wt. 1.0 lbs. List $40.00. Each ..... **$34.65**

# RADIO OPERATED CONTROL SYSTEM FOR INDUSTRIAL DOOR OPENERS

Two Transmitters Included

Receiver

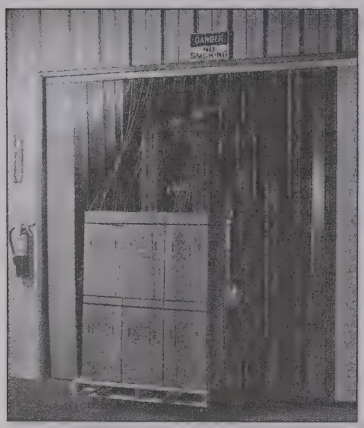
**Radio Operated Control System.** A complete digitalized system with receiver and two 2-button transmitters. Permits remote radio control of commercial/industrial door opener systems from a vehicle or adjacent office. System includes one receiver and two transmitters tuned to 225 MHz frequency and code. Operates on 115V, 60 Hz power supply (line cord included). Telectron brand (R204AD-T80G).

**Receiver.** Unit receives coded radio signal to open-close door. Size: 7½ x 3¼ x 2". Telectron brand (R204AD).

**Transmitter.** Operates from vehicle or adjacent office to control door operation. Two button (open-close) transmitter will open door on activation of one button, closes door with activation of second button. Operates on 9V battery (included). Size: 4 x 2¼ x 1". Telectron brand (T80G).

**No. 6X892.** Radio Control System. Shpg. wt. 3.0 lbs. List $180.46. Each ..... **$144.45**

## EXTRA TRANSMITTER



Extra transmitter operates on 225 MHz. Check receiver code number and set transmitter code to match receiver code. Telectron brand (T80G).

**No. 6X893.** Shpg. wt. 1.0 lbs. List $39.10. Each ..... **$36.40**

# CLEAR VINYL STRIP DOORS

Replacement Parts Available 1-800-323-0620

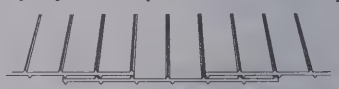
ALECO

MOUNTING POSITIONS (Universal Aluminum Hardware)

**Sidewall Mount** for narrow clearance between traffic and mounting hardware. Mounting bracket should be 12" or more above door opening.

**In-opening Mount** for normal door mounting. 12" clearance between top of traffic and mounting hardware is recommended.

**PARTIAL OVERLAP—CONVEX/CONCAVE**



### SMOOTH CLEAR-FLEX II® STRIPS

- Provide unobstructed vision in all directions
- Convex/concave overlap design creates effective seal for easy opening with immediate closing and resealing action

### RIBBED SCRATCH-GUARD™ STRIPS

- Double-sided ribs greatly reduce scratching and abrasion to strips for longer retention of clarity
- Provide better seal than conventional strips, yet still open and close easily

### ALECO 90-DAY LIMITED WARRANTY

**Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.**

**Strip doors lower energy costs** by preventing heated or cooled air from escaping through open doorways. Eliminate wear on automatic door opening systems, and lower sound transmission from parking lots and busy loading docks. Control dust, dirt, snow, and other contaminants moving through doors in high traffic areas.

**Made of fire retardant clear polyvinyl chloride (PVC) strips** having a flexibility temperature range of 0° to +150°F. Should not be installed in constant low temperature areas (32°F or less). Rounded edges prevent cutting. Overlaps provide weather resistant seal. Specially treated additive keeps strips from sticking. Strip door hangs straight down from mounting hardware to part easily and close immediately as traffic passes through. Bright orange safety strips at each end identify open area.

**Ten sizes available.** When ordering for "in opening" mounting (see drawing above), strip door should be same size as opening or slightly larger; larger door can be trimmed easily to fit smaller opening. Wall mount installations require strip door with a greater height and width than the opening for proper wall overlap. Mounting hardware and fastener supplied (see drawing above) except anchor to hang door.

**REPLACEMENT STRIPS.** Same high quality as supplied with complete strip doors. Each strip has 3/8" diameter holes on 2" centers. Can be used on most other strip doors. Come in packages of 5.

### BULK STRIPS

Bulk rolls of same clear vinyl stripping as used with complete strip doors for custom size strip door or for cutting and punching individual replacement strips. Material is clear, fire resistant PVC; recommended for use within 0° to 150°F temperature. Also available in either smooth Clear-Flex II® or ribbed Scratch-Guard™ design. Bulk strips not intended for constant low temperature or USDA applications.

# VINYL STRIP DOORS, FLEXIBLE TRAFFIC DOORS, AND STEEL FOLDING GATES

## ALECO CLEAR-FLEX II® COOLER/FREEZER STRIP DOOR

**Keeps cold air in, and warm moist air out of walk-in coolers and freezers** found in restaurants, institutions, meat markets, and produce departments.

**Clear-Flex II® strip door lowers compressor load and coil ice buildup** caused by wide open doors during deliveries and restocking. This extends compressor life; saves energy; maintains a more constant temperature; helps prevent spoilage; and reduces maintenance and frequent defrosting. Mounts on inside wall of the cooler/freezer and covers the entire opening. Strips separate and allow easy entry and exit, resealing automatically.

**Overall dimensions: 3' 4" wide x 7' high.** Door consists of smooth, clear, curved overlapping strips with rounded edges. Easily installed. Fire-resistant strips are 8" wide x 0.080 thick and withstand temperatures down to -40F. Formulated entirely of USDA approved materials.

**Comes complete with aluminum mounting hardware,** individually cut and punched strips, and installation instructions. Anchoring fasteners also included.

**REPLACEMENT STRIPS**—Same high quality as supplied with cooler/freezer door. Each strip has 3/8" diameter holes on 2" centers and can be used on most other doors. Come in packages of 5.

**BULK STRIPS**—Bulk rolls of same clear USDA approved material are also available in 150 and 300 ft. lengths. To order, call 1-800-323-0620.

**No. 4W292.** Strip Door. Shpg. wt. 26.0 lbs. List $131.76. Each ..... **$103.65**

**No. 4W293.** Replacement Strips. Shpg. wt. 14.0 lbs. List $52.50. Each ..... **$49.15**

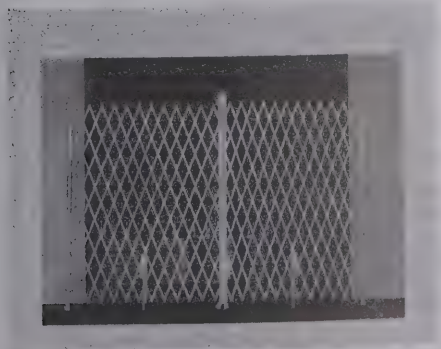
**ALECO 90-DAY LIMITED WARRANTY**
**Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.**

## ALECO FLEXIBLE IMPACT TRAFFIC DOORS

- **Tear and abrasion-resistant HTP™ polymer panels**
- **Fast acting clear zinc-coated gravity hinge system**

**ALECO 90-DAY LIMITED WARRANTY**
**Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.**

ImpacDor® is designed for retail, commercial, institutional, and industrial environments. For use in traffic areas where there is a need for a sight divider, heat retention, or cooled air retention from 0° to 150°F. Traffic doors reduce noise and help keep out dirt and insects. Maintenance-free doors mount easily in any opening and can be trimmed up to 1/2" on top and bottom, and 1½" in the center.



**Flexible traffic doors open easily** in both directions for pedestrians, hand carts, and motorized traffic, and close automatically behind them. Heavy-duty, 3-ply door panels are 5/16" thick. Center panel is made of clear PVC and outside panels of impact, tear and abrasion-resistant HTP™ polymer.

**Extra heavy, clear zinc-coated gravity hinges** are top mounted, fast acting, and have bronze bushings for years of dependable service. Plated steel hinge assembly slides into a hinge pocket in each door panel and is fastened with plated hardware through matching holes. Anchoring fasteners not included. Green color. Panels are shipped preassembled.

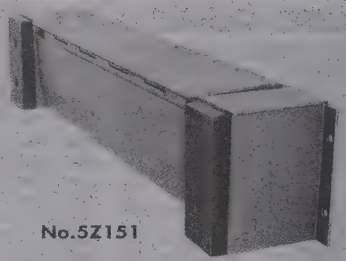
## STEEL FOLDING GATES



Gates secure receiving doors, lift-up doors, hallways, and entranceways while allowing light and air to circulate through opening. Constructed of 3/4 x 3/8" 15-gauge U-channels riveted back to back. Vertical gate rails are 1" 15-gauge steel posts which mount and pivot gate completely out of opening. Equipped with self-securing center drop pin. No. 4W950 has a lockable drop pin in the center bottom of each web. Come with brackets, bearing washers, casters, and lock lugs. Screws and locks not included. Gates have universal mounting on face or in casing. Galvanized finish. Folding Guard® brand.

## EDGE-O-DOCK DOCK LEVELERS

**Permanently attaches to face of dock,** ready for instant use. This saves valuable floor space and avoids slipping out of position. Leveler never gets lost or stolen and helps protect against pinched fingers and toes. Mechanical spring counterbalanced dock leveler operates by hooking the lip with lift hook and lifting until tip of lip clears bed of trailer. With an outward lifting motion lip extends and dock leveler is lowered to trailer. When trailer departs, lip automatically retracts behind bumper face. Concrete recess is not required. Bumpers project 15" from dock face. Recommended for docks at least 48" high. High tensile steel ramp extends 27" with service range of 5" up, 5" down. Comes complete with 2 x 8 x 18" bumpers, lift hook, and installation instructions. Both leveler models may be used with No. 3KR49 Dock Seal or No. 3KR50 Dock Shelter listed below.

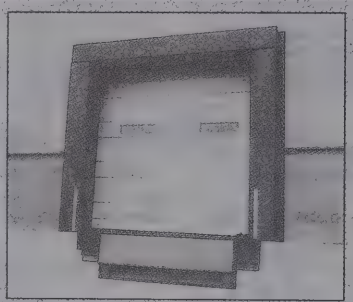
**20,000 Lb. Capacity High Strength Steel Construction**



**Steel dock edge required for correct installation.**

## DOCK SEALS

- **Designed for doors 8 ft. wide x 8 ft. high (maximum)**
- **Recommended trailer compression of 5"**

Conserve energy, provide significant heat cost savings, and offer employee comfort by maintaining temperature level. Three-piece construction of 36 oz. nylon reinforced vinyl facing mounted and bonded on wolmanized wood. The seal fastens directly to the surface of the building wall. Fit 8 x 8 ft. doors, but can be adapted to fit smaller door sizes. Sides measure 12W x 96"H. Header measures 120W x 12"H. Includes installation hardware that fits most applications. Usable opening is 90W x 96"H. No. 3KR49 designed for use with Nos. 5Z151 and 3KR66 Edge-O-Dock dock levelers. T & S brand.

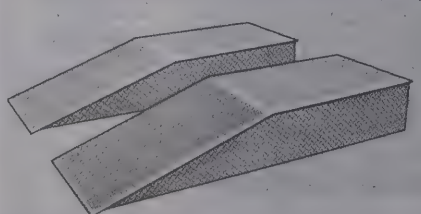
## DOCK SHELTER

- **Built for a maximum door size of 10 ft. wide x 10 ft. high; provides full height and full width access to door and trailer**
- **Projection is 24" (recommended minimum trailer penetration of 10"); semi-trailer penetrates into dock shelter for tight seal**

**Cost-effective dock shelter seals off** warehouse from outside elements while servicing a semi-trailer. Two vertical side frames are 126" high. Top header frame is 132" wide. All three frames include heavy-duty flaps that close the sealed opening down to 90W x 90"H. Flaps are 54oz. black polyester reinforced vinyl. Internally-mounted rubber cords are included to keep flaps in place. Wooden frames are covered with white translucent nylon reinforced vinyl; allows light to penetrate shelter while semi-trailer is backed into dock. Protective aluminum angle covers the external edges of the dock shelter. Includes safety yellow steel guide protectors and corner filler pads. Installation instructions are included. T & S Brand (D-750-24).

**No. 3KR50.** Shpg. wt. 315.0 lbs. List $1113.00. Each.....**$1058.00**



## ALUMINUM TRUCK WHEEL RISERS

- **24,000 lbs. capacity per pair**
- **Welded aluminum construction**
- **Lightweight design for easy portability**

Elevate semi-trailers at loading docks for maximum serviceability during loading and unloading operations. Manufactured from heavy-duty aluminum treadplate for positive traction. Priced each. T&S brand.

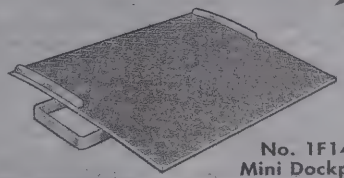
# DOCKPLATES AND DOCKBOARDS



## ALUMINUM DOCKPLATES–Not Recommended for Fork Truck Use

Economical way to speed up loading and unloading. Span open space between dock and trailer. Allow equipment and people to safely move in and out, and automatically compensate for height difference between dock and truck bed. 3/8" or 1/2" thick high strength, lightweight aluminum alloy nonskid tread plate.

- Handle on each side for portability
- Meet OSHA requirements
- T & S brand

Two rugged legs secure dockplate in position between barrier and dock

No. 1F145 Mini Dockplate

**Mini dockplate No. 1F145** is a lighter duty 500 lb. capacity dockplate designed specifically for use as a curb or threshold jumper. Used on delivery trucks when repeated trips are necessary or by a store to facilitate deliveries and increase safety.

## ALUMINUM AND STEEL DOCKBOARDS–Recommended for Fork Truck Use

Aluminum Dockboard

Steel Dockboard

New

Recommended for fork truck usage. For safer, easier truck loading and unloading. Designed for higher capacity use than dockplates. Dockboards have safety curbs to help prevent run-offs and provide a visible driving lane. Positive traction treadplate. Beveled entrance and exit lip. Locking legs are included for OSHA compliance. One leg is slightly longer than the other to facilitate easy fork truck positioning. T&S brand.

Aluminum dockboards have yellow safety curbs for greater visibility of driving lane. Rugged welded-aluminum construction.

Steel dockboards come standard with patented lever lift mechanism that raises front edge of dockboard off ground to allow fork truck to lift and move to new location. One-person operation. Lever automatically falls to rest position as dockboard is lifted. Heavy-duty welded-steel construction.

Aluminum dockboard with steel curbs includes a painted yellow structural steel safety curb bolted to each side of the dockboard. Plate is made of tough aluminum alloys with treadplate surface.

# DOCK AND TRAILER/CRANE BUMPERS

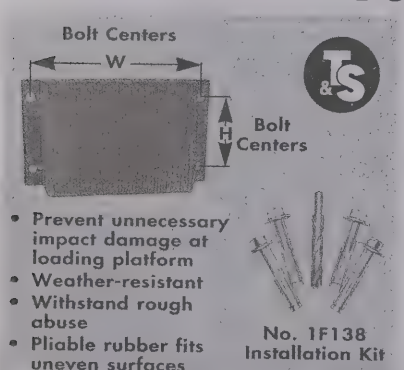
## MOLDED RUBBER DOCK BUMPERS

T & S weather and abrasion-resistant molded rubber bumpers protect docks, dock levelers, and shelters from impact damage caused by trucks and semi-trailers. Nos. 4W938 and 3W664 also draw attention to high traffic areas inside and outside of buildings. Individual sections can be replaced if severely damaged. Installation kits available; see listing below.

**Nos. 2A094 and 2W879** include a 2" wide x 3/16" thick steel bar which is molded-in running the length of each bumper and anchors the rubber to the dock. Mounting fasteners not included.

**No. 5A350** has two 1½" dia. reflectors.

**No. 5A349** has one 1½" dia. reflector.



**No. 4W938 Bumper Stop** features a yellow and black caution stripe down its center to protect as well as draw attention to docks, buildings, or high traffic corners within a factory. Caution stripe is recessed to protect it from damage by impact.

**No. 3W664 Plastic Face Molded Bumper.** Bright yellow plastic face improves visibility and draws attention to dock area. Plastic face is replaceable, adding longer life to the bumper.

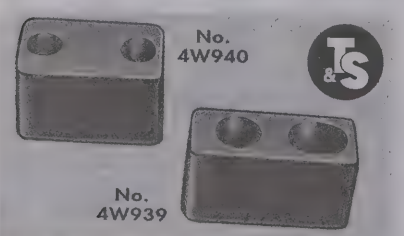
## LAMINATED DOCK BUMPERS AND INSTALLATION KITS



Constructed from same material used in manufacture of heavy-duty tire cord. Mount anywhere by bolting or welding. Weld to channel or to curb angle with one preset bolt. Mount with anchor bolts in new concrete construction or with lag bolts and shields for existing concrete. Wood dock mount requires lagging. Flush mounted. T & S brand.

**INSTALLATION KITS.** No. 1F138 contains four concrete anchor bolts, 3/4 x 4⅞L and one 3/4" masonry bit for installing one laminated dock bumper. For mounting additional bumpers, order kit No. 1F139 which includes all of the above except for the masonry bit which is reusable. Can also be used with molded dock bumpers listed above. T & S brand.

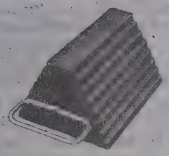
## TRAILER/CRANE BUMPERS

### Weather and Abrasion-Resistant Molded Rubber Bumpers



Trailer/crane bumpers are designed to mount directly onto truck trailers and cranes to protect them from contact with docks, buildings, or other trailers and cranes. Such protection is necessary when truck trailer does not align with dock bumper. Mounting hardware not included. T & S brand.

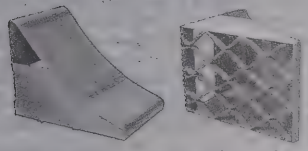
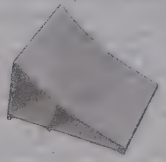
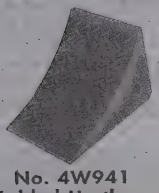
# WHEEL CHOCKS AND ACCESSORIES



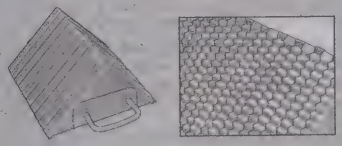
## WHEEL CHOCKS



No. 2A092
Molded Rubber



No. 2W874
Heavy-Duty Steel



No. 3KR56 Formed Steel

No. 5A347
Extruded Aluminum

No. 4W941
Molded Urethane

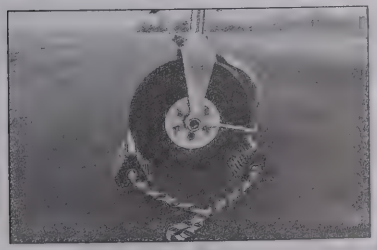
No. 3KR79 Laminated Chock, Serrated Bottom Surface for Maximum Grip

Wheel chocks are used for wedging and blocking tires to restrict movement of the wheel while vehicle is being loaded or unloaded at the dock. All chocks meet OSHA Specification 1910.178(k). T & S brand.

**Rubber Chock** of nylon reinforced molded rubber provides maximum grip traction. Rubber resists tearing, abrasion, and ozone weathering. Safety engineered to minimize sliding. Complete with cadmium plated eyebolt to which a security chain (sold separately below) may be attached for permanent installation. Includes a handle for convenient retrieval from truck when chocks are not supplied at dock.

**Heavy-Duty Steel Chock** of high strength annealed ductile cast iron. Maximum traction on any surface. Bottom teeth grip securely, resist slipping. Grip slot for easy pickup and positioning.

**Formed Steel Chock.** Long life, all-weather use. Sawtooth bottom for maximum traction on almost any surface. Open back for easy pickup. Hole for attaching security chain and hanger (sold separately below).



**Lightweight Extruded Aluminum Chock** allows easy handling with high tensile strength. Serrated surface grips tire, and triple-edged bottom grips ground.

**Lightweight Molded Urethane Chock** is bright orange for greater visibility. Incoming and outgoing drivers can easily see chock for added safety. Safety tread on chock face provides better grip and reduces slippage. Molded-in hole through width of chock for attaching security chain and hanger (sold separately below).

**Durable Laminated Wheel Chock** is made of cord reinforced serrated rubber on steel rods to provide a sure grip on concrete or paved surfaces. Large handle allows easy transport and placement of chock.

| Chock Type | Dimensions (In.) W | H | D | T & S Model | Stock No. | List | Each | Shpg. Wt. |

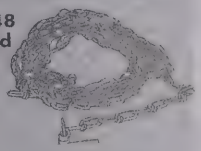
## AIRPLANE AND LIGHT-DUTY TRUCK WHEEL CHOCK



- **Can be used for both commercial and private aircraft, and smaller trucks**
- **Molded rubber construction with rope handle**

Use Wheel Chock to wedge and block both sides of an aircraft's wheel to restrict rolling in wind or heavy turbulence from other aircraft. Unit consists of two molded rubber chocks attached by a rope handle for ease in removal and handling. Designed for commercial and private aircraft, and small sized trucks. Reflective stripes add to visibility at night and in inclement weather. 10W x 4½H x 5"D. Order one unit for one wheel on each side of airplane or truck. T & S brand (AC-13).

**No. 3W666.** Airplane Wheel Chock. Shpg. wt. 13.0 lbs. List $75.00. Each.....**$71.80**

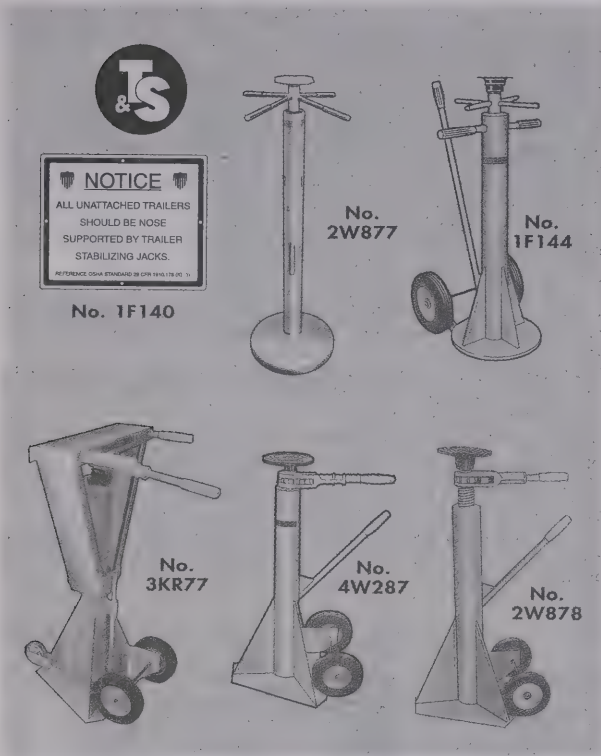
## WHEEL CHOCK ACCESSORIES

No. 5A348
Chain and Hanger

No. 4W945
Warning Sign

### SECURITY CHAIN AND HANGER

15 ft. chain attaches any of these wheel chocks to the hanger which bolts directly to the dock, securing chock permanently to the dock. This discourages theft and misplacement which facilitates safety in dock area and efficiency in trailer activity. T & S brand.



### WHEEL CHOCK WARNING SIGN

Aluminum sign warns truck drivers and dock workers to chock their wheels as required by law. Weather resistant. Bright red lettering provides high visibility. Sign has four mounting holes and is shipped with protective coating which should be removed after mounting. Dimensions: 12L x 10"W. T & S brand.

| Description | T & S Model | Stock No. | List | Each | Shpg. Wt. |

# TRAILER STABILIZER JACKS, PARKING CURB/ CAR STOP, SPEED BUMP AND CAUTION SIGN

## TRAILER STABILIZER JACKS AND NOTICE SIGN

Jacks prevent up-ending semi-trailers when not connected to a tractor during loading and unloading with heavy equipment. Also used to level trailers parked on sloping ground and prevent landing gear from sinking into a soft surface. High strength steel construction. Flush-type zerk fitting for relubricating Acme screw. Meet OSHA regulations when used with wheel chocks. Safety yellow. Includes reflective collar for visibility at night. T & S brand.

**Nos. 2W877 and 1F144 Spin Top Jacks** have a manually turned Acme thread screw which raises and lowers jack allowing fast installation and removal of jack.

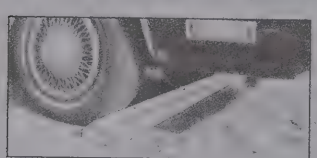
**No. 2W877** has a 10" long lift screw allowing a 7" adjustment range. 14" dia. heavy-duty dome shaped base provides maximum leveling stability.

No. 1F144 has a lifting capacity of 40,000 lbs. 12" adjustment range. 8" dia. swivel head and 8" dia. semi-pneumatic wheels.

**No. 3KR77 Medium-Duty Jack** has an extra-wide 6W x 24"L lifting beam for greater trailer support. Two handles assist positioning jack under trailer. Two-way reversible ratchet for adjusting height. 40,000 lb. lifting capacity.

**No. 4W287 Medium-Duty Jack** has a lifting capacity of 40,000 lbs. Triangular base has 18" sides. Two-way reversible ratchet with a 2" dia. thread screw allows a 12" adjustment range. Forged 8" dia. swivel head and 8" dia. wheels.

**No. 2W878 Heavy-Duty Jack** with easily reversible two-way ratchet and 2½" dia. thread screw provides 12" adjustment range. 8" dia. swivel head, 8" semi-pneumatic wheels. 50,000 lb. lifting capacity.



### NOTICE SIGN

Notifies truck drivers that OSHA requires use of trailer stabilizer jacks during loading and unloading. 10 x 12" highly visible aluminum sign. Four 1/4" dia. mounting holes. OSHA regulation 1910.178K (3). T & S brand (SJS-1012).

**No. 1F140.** Sign. Shpg. wt. 0.4 lbs. List $17.05. Each.....**$16.25**

## SPEED BUMPS AND CAUTION SIGN

New

Speed Bumps. Designed to slow traffic in parking lots, driveways, construction sites, special events and similar areas where high speeds can be dangerous to pedestrians and drivers alike. Bright yellow color improves visibility. Use for temporary or permanent installations. Concrete mounting hardware included (1/2 x 6" long concrete anchors). Constructed of recycled polyethylene and polypropylene. T&S brand.

Asphalt Installation Kit. Designed for installing speed bumps on asphalt or blacktop surfaces. Includes 12" long steel spikes, two pieces of butyl tape and installation instructions.

Caution Sign. Warns drivers of speed bumps. Sign is made of light-reflecting aluminum material with black lettering. Four 1/4" diameter mounting holes. T&S brand.

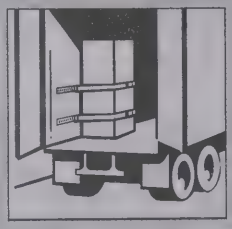
# CARGO STRAPS, BARS, AND HOOPS

## LOGISTIC STRAPS

- Spring loaded E-Track fittings provide quick one-handed connection to anchor point
- Both Ratchet and Cam Buckle models tighten and release quickly
- Color of webbing indicates assembly length for easy identification
- Adjustable end is sewn to prevent removal - keeps assembly ready for use at all times
- 4 ft. long fixed end places ratchet/cam buckle at optimum location for easy operation
- Tightens securely around cargo to help prevent damage due to load shifting
- 2" wide polyester webbing conforms to load to avoid restraining marks

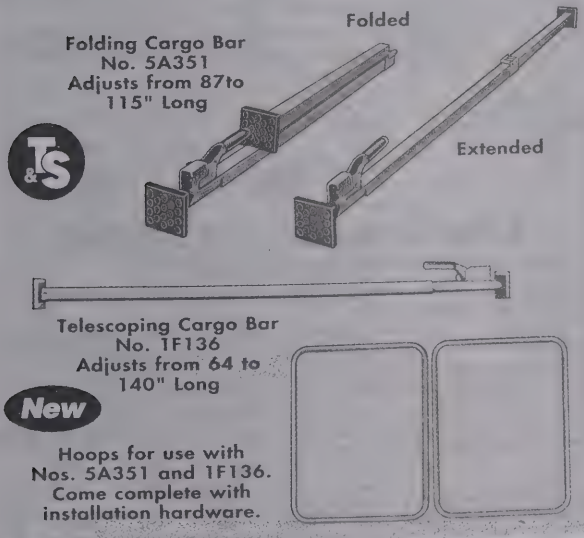
**IMPORTANT: Read Warning Sheet Supplied With Each Strap.**



LiftAll®

No. 3KN69

No. 3KN66



Logistic straps secure cargo inside trailers to prevent load shifting

### LOGISTIC STRAP ORDERING DATA

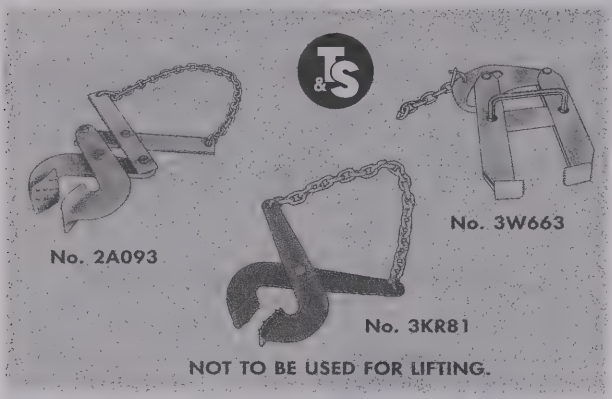
## CARGO BARS AND HOOPS

Restrict cargo from shifting and minimize damage. No permanent installation or adaptation required. Quick installation and removal. T & S brand.

**One-Piece Aluminum Cargo Bar No. 4UP81** is constructed of lightweight extruded aluminum tubing that will not rust. Service range is 87 to 103". Articulating footpads are located at each end. Easy to operate locking handle secures bar into position.



**Folding Steel Cargo Bar No. 5A351** consists of 1½" square 14-gauge tubing for substantial strength. Easy-to-operate mechanical ratchet will not slip or vibrate loose and works well in freezing and wet conditions. 4" square, rubber protected, articulating end pads keep bar in place. Adjusts from 87 to 115". Two-piece hinged bar can be folded and stored in trailer cab to minimize pilferage.

**Two-Piece Galvanized Steel Telescoping Cargo Bar No. 1F136** adjusts from 64 to 140". Made of 1½" square 14-gauge tubing. Galvanized steel construction is ideal for refrigeration trucks. 4" square rubber pads are vulcanized to metal ends for a more secure fit and longer life. Articulating pads allow angled mounting.

**Cargo Hoops** are constructed from galvanized steel and each measures 24"W x 36"L. Expand the retention area to secure a large area of smaller boxes or cartons. Installation hardware is included. Sold in pairs. (Not for use with No. 4UP81.)

| Model | Service Range | T&S Model | Stock No. | List | Each | Shpg. Wt. |

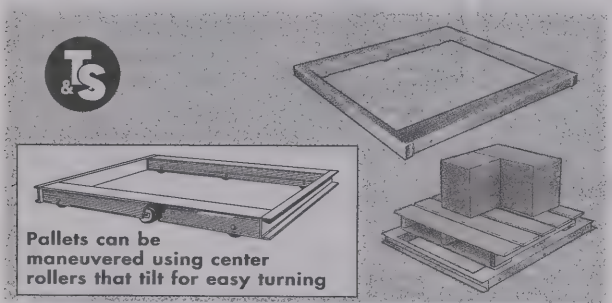
# PALLET PULLERS, PALLET DOLLY, PRY BARS AND PALLET TURNS

## PALLET PULLERS



**Pallet pullers** are used to pull pallets to rear of trailers for easy fork lift access. Rugged steel construction. 2¾" high heads are self-cleaning and unaffected by wood particles, paint or grease. 1/4" proof coil chain included for attaching pull chain. T&S.

**No. 2A093.** One-piece curved heads have integral spurs for gripping pallet stringers. Scissor action 30" long. 30" chain.

**No. 3KR81.** Single scissor action allows for wider jaw opening. Opens to 5½". Overall closed length: 19½". 30" long chain.

**No. 3W663.** Cammed closing action provides maximum gripping strength and reduced pinch points. Safety handle enables easier positioning and removal of separated heads. Grip both metal and wood pallets with biting action. 15½" long. 7½" long chain.

| Description | Max. Pallet Wt. (Lbs.) | For Stringers (In.) | Length (In.) | T & S Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|
| Scissor Action | 5000 | Up to 3 | 30 | PAL-21 | **2A093** | $70.00 | **$53.65** | 21.0 |
| Scissor Action | 5000 | Up to 5½ | 19½ | PAL-12 | **3KR81** | 73.50 | **58.80** | 12.0 |

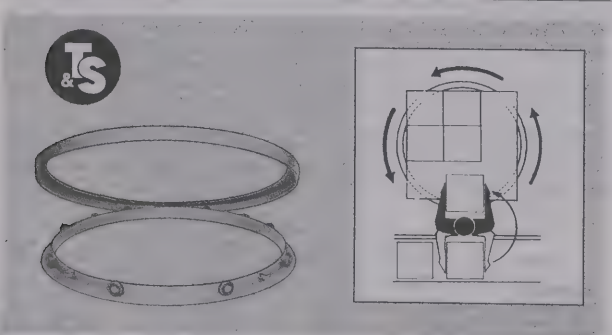
## ALUMINUM PALLET DOLLY

- **Welded aluminum construction with flush platform**
- **4000 lb. capacity**
- **Six 3½" rollers with sealed bearings**
- **Center rollers allow dolly to tilt for easy turning**

Used in shipping, production, and office areas where pallet sized loads need to be moved and fork truck or pallet truck is not available or not practical. Move pallets easily from one work station to another. Simply push loaded pallet manually or tilt center rollers to turn. 4000 lb. capacity. 48L x 40W x 4¼"H. T&S brand (DOL-4048-6T).

**No. 1F137.** Aluminum Pallet Dolly. Shpg. wt. 36.0 lbs.
List $215.27. Each ..... **$209.25**



## PRY BARS

**Provide dock workers, riggers, and freight handlers** with the leverage to get underneath heavy objects for lifting with fork lift, hand truck, or other types of trucks.

**No. 4W944.** 6W x 8L x 1/2" thick welded steel noseplate with reverse beveled edge is welded to a 72" long steel handle. 5000 lb. capacity. Two 5 x 2" polyurethane wheels. T & S brand.

**No. 3KR82.** 6W x 8L x 1/2" thick steel noseplate with beveled edge is bolted to a 60" long wood handle. 4250 lb. capacity. Two 5 x 2" polyurethane wheels. T & S brand.

| Handle Type | Capacity (Lbs.) | T & S Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|
| **Steel** | 5000 | PLB/S-6 | **4W944** | $130.30 | **$108.60** | 34.0 |
| **Wood** | 4250 | PLB-5 | **3KR82** | 114.18 | **91.35** | 30.0 |

## CAROUSEL PALLET TURNS

- **Decreases amount of worker movement**
- **Reduces fatigue, muscle strain, and cumulative trauma**
- **Increases productivity**

Pallet turns use the "Lazy Susan" concept to rotate heavy pallets with ease. Help increase productivity by reducing number of reaching movements required to load or unload pallets. Carousel can also facilitate stretch wrapping operations.

Constructed of heavy gauge steel. Rotating ring floats on low friction roller bearings with guide rollers to ensure smooth operation. Blue color. T&S brand.

| Load Cap. (Lbs.) | Diameter (In.) Interior | Exterior | Height (In.) | T & S Model | Stock No. | List | Each | Shpg. Wt. |

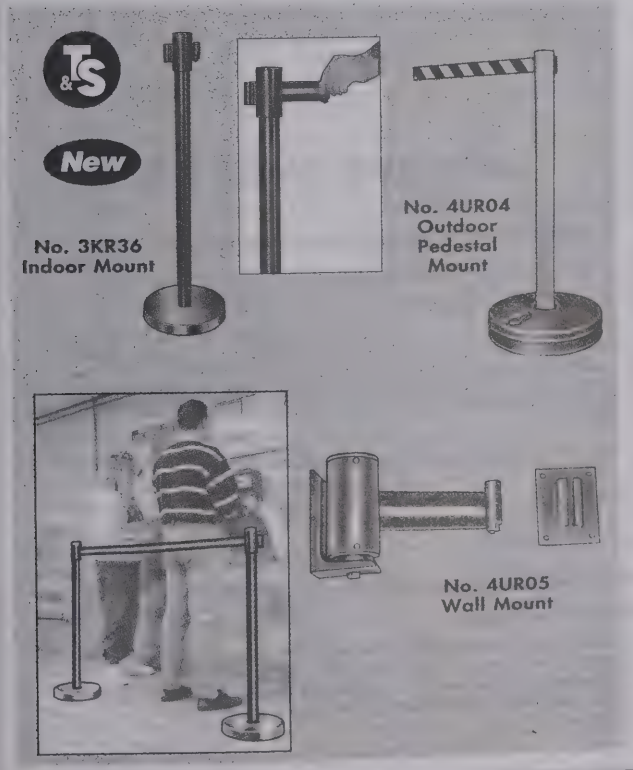
*More ways to move and store products safely and securely.*

# BRACES AND BARRIERS

## TELESCOPIC SUPPORT BRACES

- Red oxide finish
- Rugged all welded steel construction for maximum strength and support
- Telescopic style with removable pins enables proper positioning and leveling
- End pad includes screw and turning bar for easy height adjustment
- Excellent for use as an extra support brace for leveling and stabilizing floor beams and joists
- T & S brand



Excellent for use as an extra support brace for leveling and stabilizing floor beams and joists. Telescopic-style with removable pins. End pad includes screw and turning bar for easy height adjustment. Rugged welded-steel construction with red-oxide finish.

### TELESCOPIC SUPPORT BRACE ORDERING DATA

## WEB BELT BARRIERS

- Ideal for use as crowd guidance barrier
- Portable post includes a retractable web belting mechanism
- Maximum belt extension is 66"
- Belt end piece can be quickly and easily attached to another post
- Web belting is black with white stripe; post is black with chrome base
- 40" overall post height

Indoor pedestal-mounted web belt barrier is ideal for use as a crowd guidance barrier. Portable post has retractable web belting mechanism. Belt end piece can be quickly attached to another post. Web belting is black with white stripe; post is black with chrome base. Heavy-duty steel construction. T&S brand.

Indoor wall-mounted web belt barrier is designed for use with indoor pedestal-mounted web belt barrier or for use as a standalone guidance barrier. Retractable web belting mechanism includes bracket for mounting unit to wall. Also includes wall-mounted receiver unit. Web belting is black with white stripe; wall-mounted head and receiver units are black. T&S brand.

Outdoor pedestal-mounted web belt barrier is ideal for use as a warning barrier in street maintenance operations and construction areas. Lightweight plastic post has retractable web belting mechanism. Belt end piece can be quickly attached to another post. Web belting is black and yellow striped; post is yellow with black base. Post may be quickly connected to base using twist-lock design. Plastic base may be filled with anti-freeze or sand for weight. Base design facilitates stacking when not in use. T&S brand.

# WALK, WHEELCHAIR, AND HOSE AND CABLE RAMPS

## ALUMINUM WALK RAMPS

**Lightweight Walk Ramp Allows Safer Loading and Unloading of Truck to Ground Surface**

Enables deliverymen, shippers, and receivers to load and unload trucks when docks are unavailable. Ramps feature a 1½" high safety curb on each side. Heavy-duty steel chain with steel grab hook is permanently attached to each side of ramp for safely securing ramp to truck. Constructed of strong aluminum alloy with non-skid tread surface. Lightweight and easy to handle. T&S brand.

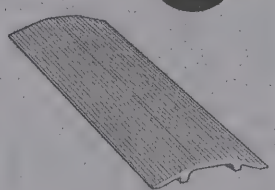
88" long; retracts to 44" long for easy storage
550 lb. capacity

No. 1F133
Telescoping Ramp



## WHEEL CHAIR RAMP

- Meets ADA requirements
- Allows businesses to comply without new construction
- Corrosion-resistant aluminum construction
- Sold only in pairs

**No. 1F133 Telescoping Ramp.** Meets ADA requirements and wheel chair manufacturers' specifications for ramping curbs, single steps, and thresholds. Consists of two separate ramps for easy adjustment of any width required. 88" long when fully extended; 44" long when retracted for easy storage. 7⅞" usable width per ramp. 2¾" curb height. 550 lb. capacity total. Lightweight aluminum construction. T&S brand (D-TR-88).

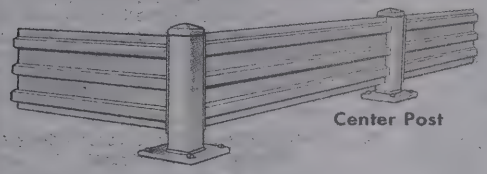
**No. 1F133.** Shpg. wt. 46.0 lbs. List $304.70. Each ..... **$272.25**

## HOSE AND CABLE RAMP

- 48L x 7W x 1 13/16"H
- 2½" wide x 3/4" high usable channel space
- Extruded aluminum
- 12,000 lb. capacity

Ramp protects hoses and cables from damage when they must be stretched across pedestrian and equipment traffic areas. Also protects workers and equipment from hazardous falls. Extruded aluminum construction with serrated surface for better traction. Suitable for factories, warehouses, and office areas. T & S brand (HCR-48).

**No. 1F141.** Shpg. wt. 12.0 lbs. List $139.22. Each ..... **$137.15**



### NATIONWIDE BRANCH NETWORK WITH LOCAL ACCESS IS YOUR SHOPPING ADVANTAGE

**Grainger's network of more than 350 local branches provides you nationwide access to our broad selection of product offerings. And with 30-minute "Will Call" service or 24-hour shipping on in-stock items, help is as close as a phone call away. Check the Branch Locations listed in the front of this catalog for the location closest to you.**

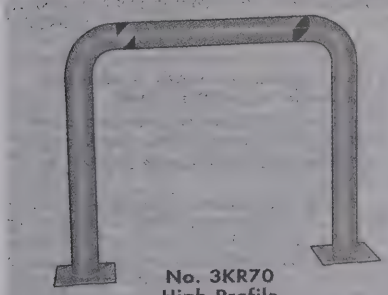
## GUARD RAILS

**Rails are constructed from 11-gauge steel with unique corrugated design for additional impact resistance.**

**Rails present a visual and physical barrier between traffic and equipment**

STEEL KING

Also available in double high system for additional safet



Steel guard rails provide a visual and physical barrier between traffic and work areas. For protection against accidents due to lift trucks or other mobile equipment in dock areas, aisles, around special equipment, or offices. Reduce costly damage to equipment and inventory. Modular system is easily expanded or moved as needed. For indoor or outdoor use.

Bolted assembly for easy installation by maintenance people. Bolts and anchors included with posts. Triple ridge provides more strength and rigidity than conventional dual ribbed highway type rail. Rolled top and bottom edges eliminate sharp edges. Posts are made of 4" square steel tube 1/4" thick and are welded to 10" square floor plates. Four rail lengths and two post heights allow customized assemblies for individual plant needs. Painted industrial yellow for high visibility. Steel King brand.

| Description | Height (In.) | Steel King Model | Stock No. | List | Each | Shpg. Wt. |

## MACHINE GUARDS AND SAFETY BOLLARD

- **Constructed of heavy-duty, all welded steel pipe**
- **Mounting plate is pre-drilled with four 1" diameter holes**
- **Painted safety yellow for high visibility**
- **Order installation kits Nos. 1F138 or 1F139 on page 2308**

High-profile machine guard is ideal for in-plant use to protect expensive equipment such as drill presses, lathes, and saws from possible fork truck damage. Low-profile machine guards may be used indoors to protect valuable pallet racking or outdoors to guide semi-trailers when backing into loading docks. Safety bollard can also be used both indoors and outdoors to protect work areas. T & S brand.

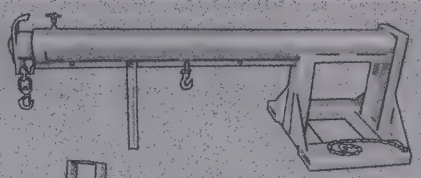
## IDEAL SLEEVE®

SUPPLIER DIVERSITY™

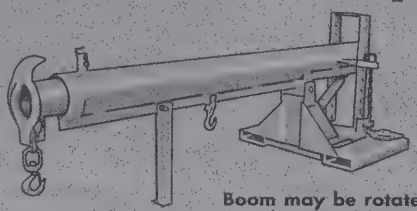
Minority Owned Business

Easy to Install

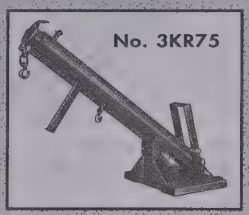
- **Does not conduct electricity**
- **Ultra-violet additive maintains color intensity and high visibility**



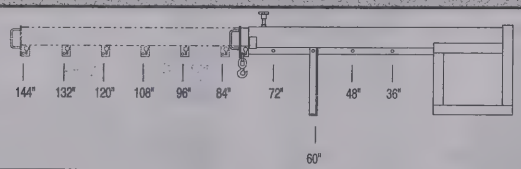
Bumper post sleeve reduces high maintenance costs for OSHA required guard posts. Low density polyethylene thermoplastic tube easily slides over existing or new bumper posts. Eliminates rusting, chipping, pitting, discoloration, scraping, sanding, priming, and painting. Sleeve is chemical resistant, durable, and withstands temperature extremes. Easily cleaned with environmentally friendly industrial cleaners.



Sleeve wall is approximately 1/4" thick. 52" high. Fits 6 to 7" dia. posts. OSHA yellow color. Ideal Sleeve® brand by Ideal Steel® L.L.C.



**No. 3JK19.** Shpg. wt. 10.0 lbs. List $56.95.
Each ..... $55.50



# TELESCOPING FORK TRUCK BOOMS

## TELESCOPING FORK TRUCK BOOMS

### MAXIMUM SINGLE HOOK BOOM CAPACITIES* (Lbs.)

| Stock No. | HOOK POSITION 144" | 132" | 120" | 108" | 96" | 84" | 72" | 60" | 48" | 36" |

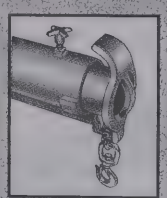
(*) Attaining maximum capacities depends on the size and fork capacity of the lift truck used.

- **Usable fork pockets are 7¼ W x 2¼ H on 24" centers**
- **Safety latch lifting hooks, one rigid and one swivel**

Easily attach to almost any fork truck. Safety chain secures boom to carriage of fork truck for safe operation. Other features include a self-storing design, infinitely adjustable locking screw, cast handle end cap, and a telescopic limiting stop. All welded-steel construction. Blue color. T&S brand.

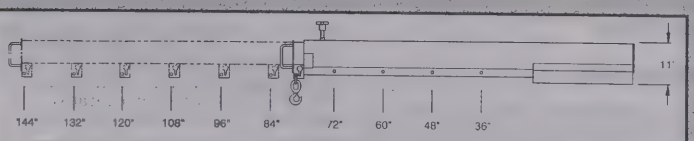
### No. 3KR74 HEAVY-DUTY TELESCOPING FORK TRUCK BOOM

- **Telescoping boom length is infinitely adjustable from 80 to 144"**
- **Heavy-duty 6000 lb. boom capacity**
- **Economical boom offers maximum capacity to handle the heaviest loads**



**No. 3KR74.** (LM-IT-6). Shpg. wt. 585.0 lbs. List $1109.30. Each.....**$998.50**

### No. 3KR75 TELESCOPING ORBIT FORK TRUCK BOOM.



- **Telescoping boom length adjustable in increments of 7½" from 80 to 144"**
- **Industrial 4000 lb. boom capacity**
- **Ideal for handling high and awkward balance loads**
- **Unique manual counter-balance system and safety drop-lock pin configuration allow quick and easy one-man height adjustments**

**No. 3KR75.** Shpg. wt. 510.0 lbs. List $1157.30. Each.....**$1042.00**

New

### MAXIMUM SINGLE HOOK BOOM CAPACITIES* (Lbs.)

| Stock No. | HOOK POSITION 144" | 132" | 120" | 108" | 96" | 84" | 72" | 60" | 48" | 36" |
|---|---|---|---|---|---|---|---|---|---|---|

# WORK PLATFORMS AND FORK TRUCK LIFTING HOOK AND EXTENSIONS

## WORK PLATFORMS

- **Manufactured per OSHA specifications**
- **1000 lbs. platform capacity**
- **4" toeboard on all four sides**
- **Quicker and safer means of lifting and moving personnel for maintenance work**
- **Double safety lock/latch and chain**
- **Mesh guard protects personnel from fork truck**
- **Includes tine lock for added safety**
- **Safety instruction sign**

Convenient fork truck work platform quickly and safely transports maintenance personnel where they are needed. Attaches to fork truck by inserting forks into fork pockets and chaining platform to fork truck. Tine lock must be engaged to secure platform to forks.

42" high handrail with 21" high mid-rail on three sides. 60" high expanded metal backing on fourth side. Capacity is 1000 lbs. Includes checker floor plate platform and 36" long chain with hook to attach platform to fork truck. Fork pockets are 7½W x 2½"H on 24" centers. Welded steel constraction. T&S brand.

### WORK PLATFORM SPECIFICATIONS AND ORDERING DATA

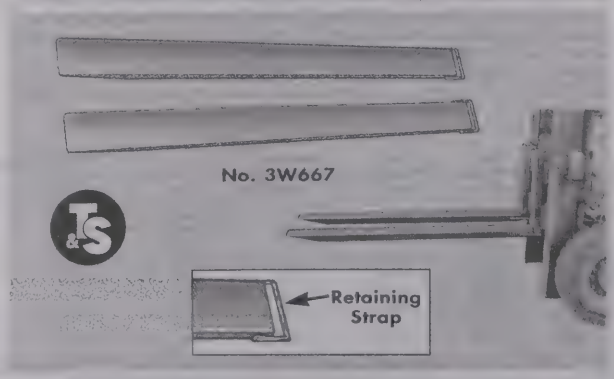
Consult fork truck owner's manual for maximum allowable also capacity

No. 3KR51



## FORK TRUCK FORK EXTENSIONS

**Designed to be used when long objects or large pallets** must be lifted and moved with a fork truck. OSHA requires that extensions do not exceed length of forks on which they are installed by more than 50%.

**To determine added length to fork truck,** subtract length of forks from length of extension. Welded steel construction. Fit onto forks up to 2" thick. Steel retaining strap prevents fork extensions from sliding off forks during use. Priced and sold in pairs. T&S brand.

### FORK EXTENSION SPECIFICATIONS AND ORDERING DATA

| Fork Ext. Length (In.) | Fit Fork Width (In.) | T & S Model | Stock No. | List | Each Pair | Shpg. Wt. |

No. 3W667

# INDUSTRIAL BATTERY CHARGERS AND CABLE CONNECTORS

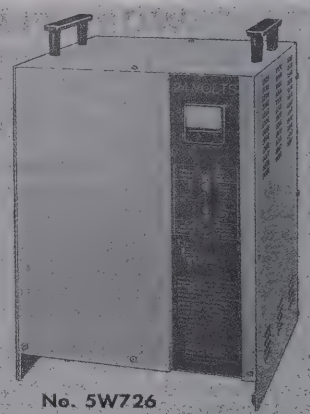
**LTD Battery Chargers** are used in a wide variety of light industrial motive power applications including powerworkers, walkie trucks, sweepers, scrubbers, transporters, man lifters, and other single shift equipment. Designed primarily for overnight charging, these quality engineered chargers are reliable and easy to use. Compact, lightweight units save floor space.

**Automatic start/stop control** protects battery from overcharging. To operate, plug charger into 120V AC outlet and connect battery to charger (connectors not included, order separately). After a 5-second delay, charger automatically turns on. Built-in electronic voltage/time control runs battery through charging cycle selected, then automatically turns charger off to prevent overcharging.

**Rocker switch allows either normal or equalize charge.** Dual status LED indicates charging function chosen; red for Normal, green for Equalize. At 80% of full charge, amber LED turns on, indicating final phase of charging. In Normal mode, final charging phase lasts for 3 hours. In Equalize mode, charger continues to run at low output for 6 hours. This ensures that all cells are equally charged. Equalize function is typically used once a week, such as over a weekend.

**Ferroresonant transformer circuit** provides a taper type output profile similar to full rated industrial motive power battery chargers. This self-regulating circuit provides the proper DC output regardless of AC input voltage fluctuations of ±10%.

**Chargers applied to batteries** within the ampere hour range specified in the table below require 12 to 16 hours to fully charge an 80% discharged battery.



**7-foot AC cord with molded plug** and 8-foot color coded heavy-duty DC output cables included. Sturdy steel cabinets finished with durable, long lasting powdered epoxy baked finish. LTD Products brand. LTD Products is an affiliate of Prestolite Power Corp.

- Ferroresonant transformer
- Automatic start/stop control
- LED status indicators
- 16-hour backup timer
- Rocker switch for equalize and manual stop
- All models 16½H x 12½W x 12"D

**TYPICAL APPLICATIONS**

Walkie Pallet Trucks
Rider Pallet Trucks
Walkie Lift Trucks
Tow Tractors
Burden Carriers
Boom Lifts
Scissor Lifts
Personnel Carriers
Floor Sweepers
Floor Scrubbers

**Connectors Not Included See Listing Below**

No. 5W726

**LTD PRODUCTS LIMITED WARRANTY**

LTD Products warrants transformer and diodes for 3 years, and all other parts for 1 year. Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.

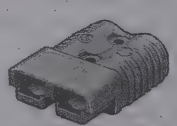
## BATTERY AND CABLE CONNECTORS

Used in all electric forklift truck applications in addition to batteries, battery chargers, sweepers, personnel carriers, golf carts, construction equipment, and marinas. One-piece polycarbonate Lexan connector housings are impact-resistant for physical and dielectric strength.

Silver-plated electrolytic copper contacts offer low resistance and high conductivity with annealed barrel to ensure even crimping. Solid barrel contacts are flared for easy insertion of stripped wire or cable. Contacts are supported by tempered stainless steel leaf springs to maintain constant pressure and vibration resistance. Systems Material Handling brand.

**BATTERY AND CABLE CONNECTOR HANDLE**Heavy gauge insulated steel assist handle easily installs on any of the 175 amp or 350 amp rated connectors listed below. Covered with red plasticsol for excellent resistance to corrosion and insulation from electrical shock. Comes complete with hardware. Systems Material Handling brand (SY175-350H). **No. 6W058.** Shpg. wt. 0.5 lbs. List $13.00. Each ..... $12.20



No. 6A071

ASMH Connectors are male/female. Rotate one connector 180° to connect to the other.

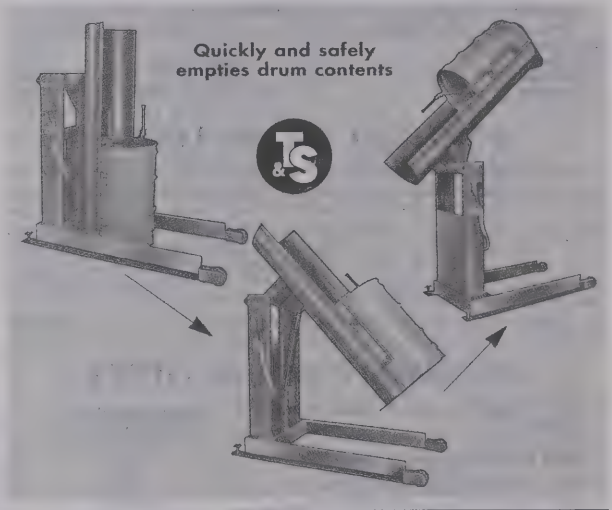
## WESCO MANUFACTURING COMPANY FORK MOUNTED DRUM LIFTER/DISPENSER

- **800 lb. full, 500 lb. half-full drum capacity**
- **Fiber drum adapter No. 4W966 available; see page 2323**

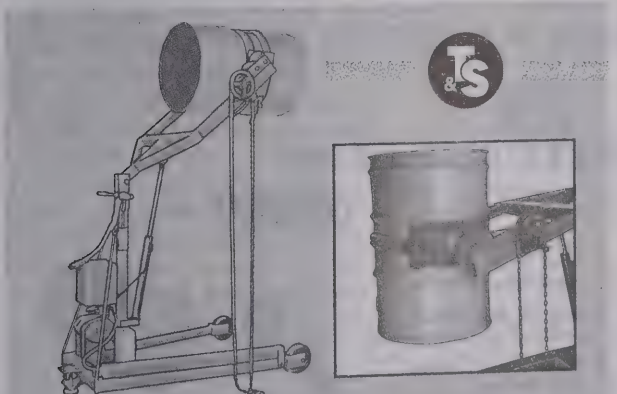
Turns your fork truck into a simple, easy drum lifter/dispenser. Geared design and 10 ft.chain drop allow operator to remotely-control dispensing and dumping of open and closed head drums without leaving fork truck. Simple operation: mount to lift truck by sliding forks into 6.625" x 2.625" fork pocket and tightening screw locks; cinch saddle around drum. Minimum inside width between forks 24" center to center overall. 20½H x 38W x 32½D". Orange. Wesco brand (DGF-55)

**No. 4W464.** Shpg. wt. 180.0 lbs. List $825.60. Each.....**$696.00**



## PORTABLE ELECTRIC HYDRAULIC DRUM DUMPER

- **For use with 30- and 55-gallon steel, plastic, or fiber drums**
- **Raise time is only 25 seconds**
- **1000 lb. capacity**
- **60" dispensing height**
- **Controlled dumping angle up to 135°**
- **Manual turn-in-place floor screws stabilize unit during dumping operations**



Overall height in fully rotated position is 135". One person can easily load, transport, and dump 30- and 55-gallon drums. Unit can be stopped at any angle during dumping cycle by simply removing finger from button. Electric limit switch safely stops unit when maximum dumping angle has been reached. Adjustable restraints secure drum to chute for maximum safety. Reliable displacement-style hydraulic cylinder enables dumping of drums weighing up to 1000 lbs. Hydraulic cylinder has an internally-mounted brass velocity fuse with stainless-steel spring which prevents chute from falling in the event of hydraulic system failure.

Heavy-duty 1½ HP, 110/208-230V, single-phase electric motor, pre-wired to 110V AC. Pushbutton hand control mounted on coil cord, 24V AC. Includes two rigid and two swivel casters. All welded steel construction. T & S brand (HDD-60-10-P).

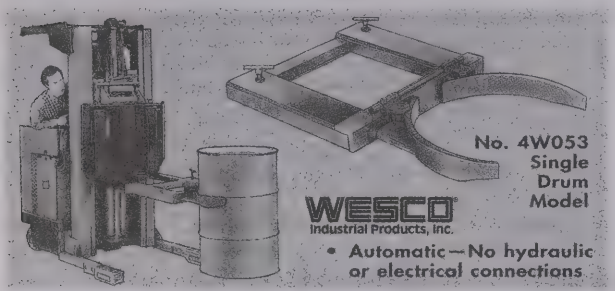
**No. 3KR69.** Shpg. wt. 950.0 lbs. List $2953.47. Each.....**$2807.00**

## PORTABLE ELECTRIC HYDRAULIC DRUM CARRIER/ROTATOR/BOOM

**800 lb. capacity boom, which includes a lifting swivel hook, can be used in various factory lifting applications. When not in use, the removable boom can be conveniently stored on lower support leg.**

- **Quick-change feature converts drum carrier into a boom**
- **Heavy-duty 12V DC electric motor powered by a deep-cycle marine-style battery (battery charger included)**
- **For use with 55-gallon steel drums only**
- **800 lb. capacity**
- **72" dispensing height (with drum in horizontal position)**
- **Foot-operated floor lock minimizes movement during dumping operations**

Portable, multifunctional unit can be used for a variety of factory/warehouse drum handling operations including lifting, transporting, and dumping. Drum is secured into the cradle assembly with a ratchet mechanism. Once unit is secured with the floor lock, drum can be rotated 360° with the use of a chain-rotation system that incorporates a gear-reduction mechanism for easy one-person drum rotation.



A displacement-style hydraulic cylinder is used in the lifting cycle. Hydraulic cylinder includes an internally-mounted brass velocity fuse with stainless-steel spring that prevents drum from falling in the event of hydraulic system failure.

Comes with 12V DC pushbutton hand control mounted on coil cord. Two rigid 8 x 2" and two 5 x 2" swivel casters. All welded steel construction. Overall size: 38W x 60L x 54"H. Inside clearence between support legs: 32". T & S brand (HDC-305-72-DC).

**No. 3KR67.** Shpg. wt. 480.0 lbs. List $2145.00. Each.....**$2036.00**

# DRUM EQUIPMENT

## FORK MOUNTED DRUM GRABS

Enable forklift operator to singlehandedly lift, transport, and deposit closed head steel drums. Drum grabs may also be used for open head steel drums that are not out of round or damaged, or that do not contain materials that can spill.

Driver simply approaches drum, lifts, transports, sets down, and backs truck away. Weight of drum holds grab jaws, preventing slippage. Choose from single or double drum styles. Both are secured to forks with hand-tightened lock screws mounted to each fork pocket. Fork pockets are 22" center to center.

Adjustable 30/55-gallon drum grabs adjust easily without tools to handle 30 or 55-gallon steel open or closed head drums. Two drum model should only be used with two same size drums.

All welded construction. Jaws are formed from steel bar. Orange enamel finish. Wesco Mfg. brand.

| Drum Grab Type | Drum Capacity No. of Drums | Gallons | Pounds | Diameter (In.) | Fork Pocket Size (In.) | Wesco Model | Stock No. | List | Each | Shpg. Wt. |

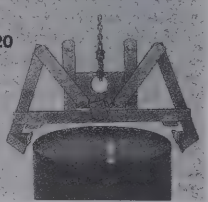
## VERTICAL DRUM LIFTER

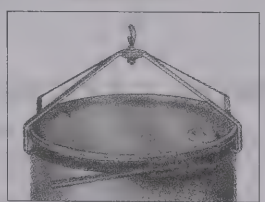


52.0Automatic drum lifter can be maneuvered over stacked drums and around obstacles to a selected drum, grab it, pick it up, and carry it to another location with the operator safely out of the way. Lift hook from crane engages lifter; grab hooks grab and hold drum securely until drum is set down in place. Grip pads help align on drum chime for secure operation. Comes fully assembled. Overall dim.: 18½H x 33W x 8"D. Orange enamel finish. Wesco Mfg. brand (DL-1).

**No. 3W391.** Shpg. wt. 52.0 lbs. List $198.60. Each .....**$155.75**

WESCO Industrial Products, Inc.

Replacement Parts Available 1-800-323-0620



- **Handles 55-gallon closed steel drums weighing up to 1000 lbs.**
- **Use with overhead hoist or crane**

## ECONOMY DRUM LIFTER

- **For 55-gallon closed head steel drums**
- **700 lb. lifting capacity**

WESCO Industrial Products, Inc.

Vertical drum lifter is simple to use. Attach hook of any overhead crane or hoist through 1½" dia. lifting eye mounted on top of four 1/4 x 1" hot rolled steel supports. Safety lock pin prevents accidental opening while transporting drums. Overall dim.: 13½H x 23W x 28¼"D. Wesco Mfg. brand (EDL-5).

**No. 5W683.** Shpg. wt. 15.0 lbs. List $133.50. Each .....**$106.20**

## SALVAGE DRUM LIFTER

- **For 55 and 85-gallon closed steel drums**
- **1000 lb. lifting capacity**

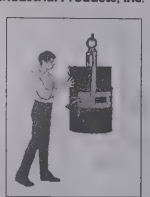
Replacement Parts Available 1-800-323-0620

WESCO Industrial Products, Inc.

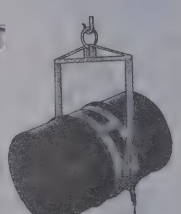
Easy-to-use, all-steel drum lifter has one moving part. Easily grabs drum just below chime. Special design enables lifter to place damaged 55-gallon steel drum into tight clearance 85-gallon steel or poly salvage/overpack drum. Shipped unassembled. Orange enamel finish. Wesco Mfg. brand (SDL-85).

**No 6W672.** Shpg. wt. 27.0 lbs. List $249.19. Each .....**$160.75**

## VERTICAL DRUM LIFTERS/DISPENSERS



One-man operation saves time, reduces spilling waste, and improves productivity. Simply attach or hang lifter on hook from an overhead hoist or crane, cinch saddle around drum, and raise to desired height and position. Come fully assembled. 39H x 28½W x 8"D. Orange color. Wesco Mfg. brand.



**No. 3W390 Manual Lifter/Dispenser** for low level pouring and dumping operations. Positive tilt locks on either side of drum saddle to hold drum upright in transit: when released operator can manually tilt drum to control pouring. Locks also hold drum in horizontal position. When released, drum can be rotated 360° in either direction.

**No. 4W462 Geared Lifter/Dispenser** for remote pouring operations. Geared chain control, low effort feature make this model usable at any height, and ideal for remote controlled dispensing and dumping. 10 foot control chain can be locked to secure drum in any position during transit and dispensing.

- **For 55-gallon steel drums**
- **Lift, transport, and pour from open and closed head drums**
- **800 lb. full, 500 lb. half-full drum capacity**
- **Fiber drum adapter No. 4W966 is available; see page 2323**

WESCO Industrial Products, Inc.

No. 3W390

| Lifter Type | Wesco Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| **Manual** | DL-55 | **3W390** | $224.90 | **$168.25** | 45.0 |

# DRUM DOLLIES AND CADDIE

Add mobility to heavy industrial drums and enable reusable drums to serve as convenient containers for scrap metal, liquids, parts, and refuse.

A No. 5W562 Structural Foam Dolly

B Nos. 2W269 (30-Gal.), 3W039 (45, 55-Gal.), & 3W040 (45, 55-Gal.) Welded Steel Dollies

C No. 3KR53 Round Steel Dolly with Nonprotruding Steel Casters

D No. 3KR76 Lo-Profile Welded Steel Caddie

### A STRUCTURAL FOAM DOLLY

- Structural foam construction will not rust or bend
- Solid bottom
- Five heavy-duty casters
- Rubbermaid brand

### B WELDED STEEL DOLLIES WITH CROSS-BRACING

- Circular frame of welded steel
- Cross-bracing on bottom of dolly
- Four heavy-duty double row ball bearing swivel casters
- Wagner brand

### C ROUND WELDED STEEL DOLLY WITH NONPROTRUDING STEEL CASTERS

- Four steel swivel casters are located completely underneath dolly for facilitating use in tight areas or limited floor space
- Steel casters resist wear and provide protection against potentially harmful solvents
- Drum platform is 3¾" high
- T & S brand

### D LO-PROFILE WELDED STEEL CADDIE WITH HANDLE

- Drum platform is only 1½" high to facilitate easy loading and unloading
- Hinged handle transfers pulling force to bottom of drum to maximize stability when moving
- Handle height is 38" from floor
- Two hard rubber wheels, one hard rubber swivel caster
- Overall size is 34" wide x 24" long
- Drum Saddle is 26" wide x 16½" deep for 55 gal. drums
- T & S brand

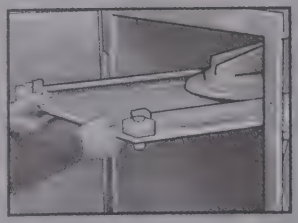
(*) Caddie also has two 6 x 2" hard rubber wheels

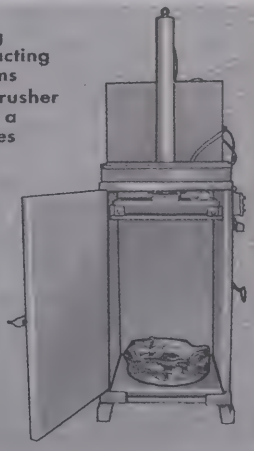
# ELECTRIC HYDRAULIC DRUM CRUSHER/COMPACTOR

- Dual-speed power unit for quick cycle-time
- Crushing force of 38,000 lbs.
- Pushbutton controls with key lockout
- Mushroom-head emergency stop button
- Hydraulic system overload relief valve
- Safety door-interlock system
- Built-in fork pockets for portability
- Protective plastic power unit cover
- Meets OSHA and JIC Specifications



T&S

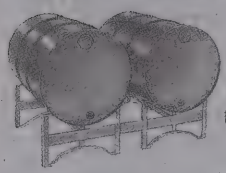
Reduces drum storage and disposal costs



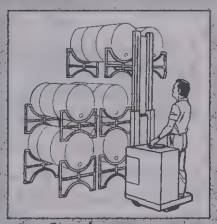
Hydraulic drum crusher/compactor will crush an empty 55-gallon steel drum from full size down to approximately 6" high and automatically reset itself in less than 20 seconds. Crushing platen has a spike to pierce the lid for pressure release of closed-head drums. Crushing feature may also be used with smaller drums. Compacting feature may be used for compacting contents of 55-gallon drums only. Compacting platen is 21" in diameter. Overall size: 36W x 44L x 95"H. Usable chamber size: 25W x 24L x 38"H. Electric 6.5 HP motor, 208-230/460V, 3-phase, pre-wired to 460V AC. T & S brand (HDC-900-IDC).

**No. 3KR68.** Shpg. wt. 1675.0 lbs. List $7590.00. Each.....$7210.00

- Use for crushing drums or compacting contents of drums
- Converts from crusher to compactor in a matter of minutes

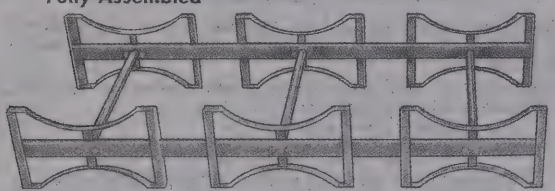


Drum crusher is converted to a compactor by simply removing crushing platen.



# DRUM STORAGE RACKS AND MIXERS

WESCO Industrial Products, Inc.



No. 2W582 Cradles Two Drums Horizontally

Stacks up to Four Units High

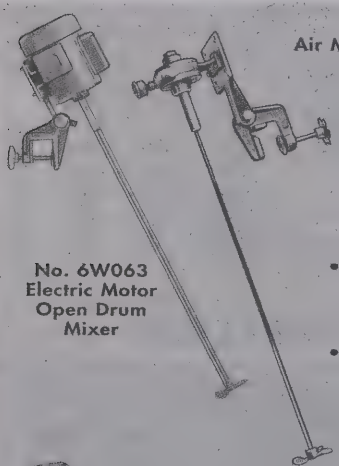
No. 4W459 Shown Fully Assembled

## HORIZONTAL DRUM STORAGE RACKS

- **Can be stacked and moved even when fully loaded**
- **Stacks up to four units high**

Uses space efficiently and reduces drum handling operations. Drums are stored horizontally to enable stacking and convenient dispensing of liquids. Water and dirt drain off naturally and will not collect around openings. Heavy gauge steel parts bolt together to form a rigid rack and later can be dismantled and stored in a small space if storage availability changes. Each unit will support 1600 lbs. and can be stacked four-high providing drums can support the combined load. Fork lift access from all sides. Orange enamel finish. Wesco Mfg. brand.

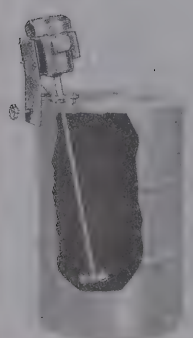
**No. 2W582** holds 2 drums. Dimensions assembled: 45½W x 30D x 12½"H. Disassembled boxed unit: 46L x 13D x 5"H.



**No. 4W459** holds 3 drums. Dimensions assembled: 71½W x 30D x 12½"H. Disassembled boxed unit: 72L x 13D x 5"H.

| Drum Capacity | Wesco Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| 2 | DR-2 | **2W582** | $108.00 | **$94.00** | 47.0 |
| 3 | DR-3 | **4W459** | 160.40 | **139.50** | 75.0 |

## DRUM MIXERS



No. 6W065 Air Motor Open Drum Mixer

Replacement Parts Available 1-800-323-0620

No. 6W063 Electric Motor Open Drum Mixer

- **Economy open drum mixers have 3-blade fixed propeller; mount to open head drums**
- **Bung entering mixers have 2-blade folding propeller for easy entry into 2" bung opening on closed head drums**

No. 6W066 Electric Motor Bung Entering Drum Mixer

No. 6W068 Air Motor Bung Entering Drum Mixer

Well suited for mixing/blending low viscosity fluids and suspending or dissolving low concentrations of solids in water or water-like liquids including light oils and syrups. Mixing is done directly in drums or tanks. Direct-drive mixers have a 32" long x 5/8" diameter, 316 stainless steel shaft and propeller; No. 6W063 has a 1/2" diameter shaft. Come standard with 1725 RPM, TEFC electric motor or variable speed air motor. Choose electric or air motor models in either economy open drum or bung entering styles. Shipped unassembled. Neptune Mixer brand.

**Economy Open Drum Mixers** have a 4" diameter, 3-blade fixed propeller and mount easily to open head drums. Can also be mounted directly to tanks or on rails with 1⅞" opening adjustable clamp. Mounting bracket adjusts for unlimited mixing angles. Electric motor models include junction box.

**Bung Entering Mixers** have a unique 2-blade folding propeller for quick, easy entry into the 2" bung opening on 55-gallon or smaller closed head drums. Propeller opens to 3¾" diameter when mixer is in operation. Special mounting bracket is designed to clamp to lip of standard steel drum. Electric motor models come complete with 8 ft. cord and 3-prong plug.

### VARIABLE HP FOR AIR MOTORS

*More ways to move and store products safely and securely.*

## 55-GALLON DRUM CRADLES

- **Simplifies storage, loading and unloading, and on-the-job dispensing of 55-gallon steel drums**
- **600 lb. load capacity with 15" drain height**

Four easy steps enable one operator to handle fully loaded drums: (1) Position cradle next to drum (2) Hook tipping lever on drum chime (3) Tip load on the curved rails (4) Move loaded cradle on its wheels to new location.

Cradle frame is box channeled steel, cross-braced for rigidity. Nonsparking oil and chemical-resistant wheels standard on both models. 32½L x 19½"W. Orange color. Shipped unassembled. Wesco Mfg. brand.

**No. 2W472** has four 2½" rigid polyolefin wheels mounted inside the frame.

**No. 4W458** has two 2½" rigid polyolefin wheels and two 3" polyolefin swivel casters for easy steering.

| Wheels | Casters | Wesco Mfg. Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|---|
| 4 | — | CW-10 | **2W472** | $102.58 | **$85.35** | 29.0 |
| 2 | 2 | CWS-10 | **4W458** | 134.10 | **104.05** | 37.0 |

## 30- AND 55-GALLON INDUSTRIAL DRUM CRADLE

- **Accommodates either 30- or 55-gallon metal industrial drums with ease**
- **Handles drums weighing up to 1000 lbs.**

Polyolefin rollers enable drum to be rotated for positioning. Horizontal position is 20" above floor surface. Drum hook and tapered toes are made of long wearing carbon steel. Cradle moves on four 4" polyolefin wheels that resist reaction with fats, oil, and chemicals. Unit comes partially assembled. Top section has welded steel construction that bolts to the uprights. 25½H x 19"W. Orange. Wesco Mfg. brand (CW-20).

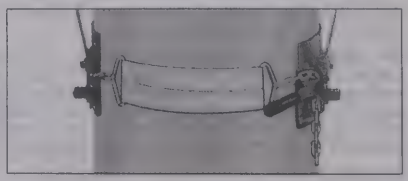
**No. 3W399.** Shpg. wt. 50.0 lbs. List $187.00. Each.....**$144.30**

## INDUSTRIAL DRUM CARRIER

- **Allows single operator to lift, transport, tilt, rotate, and drain 55-gallon steel drums**
- **Can be used with 800 lbs. full or 500 lbs. half-filled drums**
- **Fiber drum adapter No. 4W966 is available; see listing below**

Easy to maneuver and operate. Operator secures saddle around drum, lowers handle to lift drum, then rolls load to new location or tilts drum for dispensing. Two sets of locks provided for easy operation: lift locks hold drum securely in raised position; tilt lock holds drum in horizontal or vertical position.

Carrier rolls on two 8" polyolefin load wheels and one 4" polyolefin swivel caster. Transporting and dispensing heights are adjustable to a maximum drum-to-floor clearance of 11½" vertical and 18" horizontal drain height. All steel welded construction. Shipped partially assembled. 41½H x 35W x 37"D. Orange. Wesco Mfg. brand (ML-55).



**No. 3W398.** Shpg. wt. 105.0 lbs. List $533.80. Each .....**$412.25**

## WESCO FIBER DRUM ADAPTER

Industrial Products, Inc.

Adapts 55-gallon steel drum lifters/dispensers Nos. 3W390, 4W462, and 4W464, and drum carrier No. 3W398 for use with fiber drums. Strap protects fiber drum from damage by chain. Handles drums from 21 to 23" diameter. Adapter consists of nylon webbing, rings, and chain. Yellow color. Wesco Mfg. brand (FBA).

**No. 4W966.** Fiber Drum Adapter. Shpg. wt. 1.7 lbs. List $35.10. Each ..... **$34.85**

# DRUM EQUIPMENT

## 55-GALLON STEEL DRUM HAND TRUCKS

**No. 3W393 55-GALLON DRUM TRUCK/DISPENSER.** Four wheel barrel truck can transport steel industrial drums weighing up to 1000 lbs. Specially designed undercarriage allows one operator to tilt and lower a full drum to its horizontal position for dispensing or storage. 16½" drain height. Four polyolefin rollers simplify rotating drum for positioning faucet over a container (not included). Long wearing beveled steel nose prongs and an adjustable slide hook hold drum in place by its top rim. Wheels are made of oil and chemical-resistant polyolefin; 10 x 2¼" front and 6 x 1½" rear. Frame is structural pipe size tube 56½"H, 24"W at the handles, and 16¼"W at the nose. Orange enamel finish. Wesco Mfg. brand (30BTW).

**No. 3W393.** Shpg. wt. 66.0 lbs. List $230.50. Each.....**$197.75**

**No. 3W071 DRUM HAND TRUCK.** For manually transporting upright 55-gallon steel barrels and drums up to 1000 lbs. Saves time and manpower, plus maneuvers easily in space too small for power driven forklifts. Especially useful on loading and receiving docks, industrial storerooms, warehouses, and distribution centers. Specially designed steel frame has double forks, adjustable chime hook, and wide spread handle bars for leverage and handling ease. Steel kickstand holds truck upright. 10 x 2½" molded rubber tires on cast iron wheels. 16¼"W nose. Overall dimensions: 62"H x 24½"W. Orange color. Wesco Mfg. brand (5BT).

**No. 3W071.** Shpg. wt. 68.0 lbs. List $248.40. Each.....**$205.75**

**No. 3W392 EASY HANDLING DRUM TRUCK.** One of the best designed, easiest handling 55-gallon steel drum trucks available. Heavy-duty industrial design and construction is suitable for the shop, warehouse or on the dock. Spring loaded floating replaceable axle helps absorb heavy loads. Provides excellent balance enabling one man to handle 55-gallon steel drums weighing up to 1000 lbs. Adjustable self-storing chime hook. Replaceable hard faced nose prongs machined from a steel bar. Heavy-duty mold-on rubber wheels are 10 x 2½" with 1" roller bearings. Upright truck can stand alone without kickstand. Frame is structural pipe size tube 61"H, 23¾"W at handles, 16¼"W at the nose. Orange enamel finish. Wesco Mfg. brand (20BT).

**No. 3W392.** Shpg. wt. 74.0 lbs. List $336.10. Each.....**$275.00**

**No. 4W332 FOUR-WHEEL DRUM TRUCK** allows one man to handle 55-gallon steel drums weighing up to 1000 lbs. easily. Rear wheels also simplify moving drums to and from pallets. Heavy-duty steel frame has adjustable self-storing chime hook, replaceable hardened nose prongs machined from a steel bar, kickstand for upright storage, and combination handle for easy operator control. Truck is equipped with two 10 x 2½" mold-on rubber front wheels and two 6 x 1½" mold-on rubber rear wheels. Overall dimensions: 60H x 24"W at handle; 16¼"W at nose. Orange. Wesco Mfg. brand (15BT).

**No. 4W332.** Shpg. wt. 79.0 lbs. List $355.70. Each.....**$296.50**

## 55-GALLON POLY DRUM TRUCKS AND DISPENSER

Enable one man to handle 55-gallon poly/plastic drums weighing up to 1000 lbs. or 21 to 23" diameter fiber drum with minimum height of 30". Nose pads pick up drums reducing danger of punctures and provide a large support area to fit any drum configuration. Drum is secured to truck with easy to use, one-way belt system. Belt is placed around drum and tightened by an easy pull on oversized handle. Belt slides easily through one-way belt lock securing drum to truck. Drum is released by depressing release side of belt lock. Belt is stored on hooks behind handles. Orange enamel finish. Wesco Mfg. brand.

**No. 6W011 Poly Drum Truck.** Heavy-duty structural pipe truck is 59½H x 23½W x 23½"D. Spring loaded floating replaceable axle helps absorb load and provides excellent balance. Oversized nose pads are replaceable. Heavy-duty mold-on rubber wheels are 10 x 2½" with 1" roller bearings. Upright truck can stand alone without kickstand.

**No. 6W012 Poly Drum Truck/Dispenser.** Four wheel barrel truck has large, welded nose pads. Specially designed undercarriage allows one operator to tilt and lower a full drum for dispensing or storage. Wheels are mold-on rubber with 1" roller bearings, 10 x 2½" front and 6 x 1½" rear. Frame is structural pipe 58H x 23¾"W at handles x 24⅝"D. Comes with kickstand for easy upright storage.

| Description | Wesco Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| Drum Truck | 40BT | 6W011 | $379.80 | $318.00 | 82.0 |
| Drum Truck/Dispenser | 50BT | 6W012 | 328.10 | 274.50 | 86.0 |

Heavy-duty rigid self-closing faucet can be used with oils up to 30W, noncorrosive flammables and nonflammables. Features external flame arrestor, Teflon O-ring seal rigid shank will fit 3/4" NPT (19mm) bung. For use with drum in horizontal position. FM approved. Wesco International brand (272081). NPT (19mm) bung. For use with drum in horizontal position. FM approved. Wesco International brand (272081).

**No. 5A503.** Adjustable Stainless Safety Faucet. Shpg. wt. 1.4. lbs.
List $43.00 Each.....$42.85

## RIGID BRASS SAFETY FAUCET

Industrial duty 3/4" self-closing rigid faucet designed for safely dispensing flammable liquids from 30 and 55-gallon drums. Hand pressure on spring-loaded lever opens valve, releasing hand pressure closes valve liquid-tight. Teflon O-ring valve seal. Perforated metal flash arrestor. Cast brass body. Fits 3/4" NPT drum bung opening. Drum must be stored horizontally for gravity flow dispensing. Factory Mutual System approved. Protectoseal brand (531G).

**No. 1A244.** Rigid Brass Safety Faucet. Shpg. wt. 1.1. lbs.
List $49.70 Each.....$45.20

## GATE VALVE FOR VISCOUS LIQUIDS

Self-closing brass safety gate valve is designed for use with viscous noncorrosive liquids heavier than 30W motor oil (2000 SSU). Wide mouth opening permits maximum flow. Knife style spring activated Teflon blade has fast positive shut off when handle is released. 4½" wide handle provides easier opening and more precise control . Fits 2" NPT (51mm) bung in steel or plastic drums. For use with drum in horizontal position. FM approved. Wesco International brand (272034).

**No. 5W685.** Gate Valve. Shpg. wt. 6.9. lbs. List $139.96 Each.....$121.40

## VISCOUS LIQUID VALVE FOR FLAMMABLES

**Covers Opening and Seals Out Contaminants**

Self-closing valve specifically designed for handling viscous flammables such as rubber cement, oils, oven-dry paints, etc. Full-floating metal shoe covers the 1¾" diameter opening and provides a reliable seal. Self-closing feature cuts off flow to prevent spillage. Wire safety guard. Built-in lock tab. Valve body is gray iron, shoe is red brass. 2" NPT. Factory Mutual approved. Protectoseal brand (545A).

**No. 2A106.** Viscous Liquid Valve. Shpg. wt. 4.9. lbs.
List $139.58 Each.....$131.65

# DRUM ACCESSORIES

## DRUM DEHEADER

Cuts top off standard 30 to 55-gallon industrial steel drums. Can be operated by one man. Leaves clean edge around drum so container can be reused. Deheader is not sparkproof. Removing top with cutter reduces fire hazard cased by torch-cutting. Forged steel construction. Replaceable alloy steel blade. Wesco International brand.

**No. 1A122.** (272018). Shpg. wt. 6.05 lbs. List $65.48. Each.....**$57.70**

**No. 4A443.** Replacement Blade. (272012). Shpg. wt 0.5 lbs. List $11.77. Each.....**$11.77**

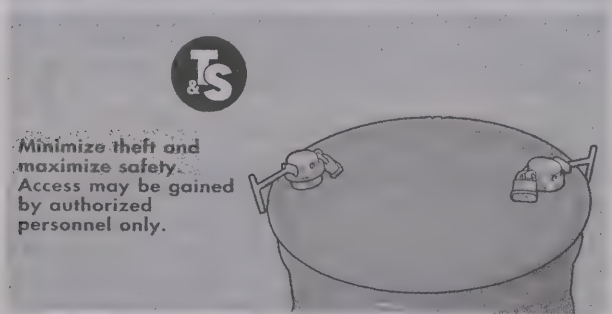
## UNIVERSAL DRUM PLUG WRENCH

Long lasting iron alloy universal drum wrench fits all types of industrial drum plugs and bung nuts; male or female, metal or plastic. Heavy-duty construction will not bend or chip in normal use. Angled handle protects knuckles in most positions. Wesco International brand (272017).

**No. 5A500.** Shpg. wt. 3.8 lbs. List $34.07. Each .....**$29.55**

## DRUM PLUG WRENCH

Removes or tightens plug on most industrial drums, including those with hexagonal or square plugs, male or female type bungs, fittings and plugs with lugs or crossbars. Wrench is made of strong nonsparking bronze alloy, stronger than aluminum, more corrosion-resistant than steel. 9" long offset handle clears drum chime. Wesco International brand (272016).



**No. 1A121.** Shpg. wt. 1.8 lbs. List $29.25. Each .....**$25.35**

## DELUXE DRUM PLUG WRENCH

Nonsparking bronze alloy wrench opens and closes most industrial drums as does the No. 1A121, but it will also tighten and remove faucets from drums. Extra-purpose wrench eliminates the need for extra tools with the 1¼" open wrench feature for tightening most faucets into drums. Can be used on faucet Nos. 5A501, 5A502, 5A504, and 5A505. Wesco International brand (272086).

**No. 6A240.** Shpg. wt. 2.0 lbs. List $32.70. Each .....**$28.90**

## DRUM LOCK

- **Well suited for meeting lock-out and tag-out requirements**
- **Solid brass construction for security and durability**
- **Heavy-duty 1/2" zinc-plated steel rod prevents drum lock from turning**
- **Fits both 2¼" and 1" standard diameter drum threads**
- **Two drum locks are required for most drums**

Prevent unauthorized access to drum contents. Simply screw drum lock into place, insert zinc-plated steel rod, and secure with padlock (padlock not included). Steel rod is pre-drilled with a 5/16" diameter padlock hole. Drum lock seals are replaceable. T&S brand (BLD-80).

**No. 3KR44.** Shpg. wt. 5.0 lbs. List $42.00. Each.....**$33.60**

## PLASTIC DRUM PALLET

- **Lightweight, yet durable—can handle 4 full 55-gallon steel or plastic drums**
- **Chemical-resistant HDPE**
- **Nestable design allows them to be easily stacked for storage**
- **Stacking feature locks tops of drums in place to create stable, unified load**
- **True 4-way entry for easy transportation from any side**
- **Constructed of 100% recyclable plastic materials; 12-gallon spill retention**
- **2800 lb. dynamic load capacity; 8400 static load capacity**
- **Measures 48 x 48"**

Designed for safe and easy transportation of environmentally hazardous liquids. Pallets themselves are constructed of 100% recyclable materials approved by FDA/USDA. Made in the USA. Priced each, sold only in quantities of 5.

***New*** **No. 4TH96.** Plastic Drum Pallet. Shpg. wt. 27.0 lbs. List $94.21. Each .....**$89.75**

## 2" VISCOUS LIQUID FUNNEL

Permits safe, rapid filling of viscous liquids into 55-gallon drums without clogging. For use in collecting sludge, waste paint, and other viscous flammable materials. 9½" dia. brass funnel guides flow of liquids into the drum and prevents overflow. 2" male NPS threaded unit fits supplier's original 2" bung flange. Only for 55-gallon drums. Liquid flow tube inside discharge tube guides liquids past vapor venting slots of discharge tube flame arrestor and prevents slots from clogging. Hinged cover with fusible link closes automatically at 160°F to extinguish flames in the event of a fire. Brass and steel construction. Factory Mutual Approved. Protectoseal brand (5510).

**No. 2W906.** Shpg. wt. 13.0. List $365.87. Each ..... **$349.00**

## DRUM FUNNEL

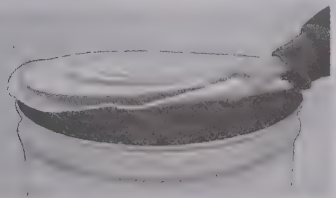
Large 21" diameter drum funnel allows drainage of large quantities of fluids. Filled containers and buckets can be easily placed on the funnel to allow for extended drainage. Virtually indestructible, heavy-duty polyethylene funnel has excellent chemical resistance. Sloped, scalloped design and large 1¾" inside diameter spout allows fast, nonclogging flow of viscous and nonviscous liquids. Top edge splash guard helps hold in 2½ gallons of draining fluid with no overflow. Fits over top of 30 or 55 gallon steel or plastic drums. Funnel features a molded-in side hook for convenience in hanging optional funnel cover No. 5AK75 listed below. Cleans easily. Gray color. Justrite brand (28210).

**No. 5AW54.** Shpg. wt. 5.0. List $28.63. Each..... **$27.80**

## DRUM FUNNEL COVER

All polyethylene funnel cover for use with drum funnel No. 5AW54 listed above. Prevents contamination of drum funnel surface and keeps rainwater from drum contents if left outside. Cover conveniently hangs on funnel side hook when funnel is being used. Gray color. Dimensions: 19" O.D. x 1¾"H. Justrite brand (28215).

**No. 5AK75.** Shpg. wt. 5.0. List $21.99. Each ..... **$21.35**



## SAFETY DRUM FUNNEL

Wide mouth funnel is ideal for transferring hazardous liquids into drums. Fits into 2" drum bung to allow fast dumping while minimizing spills. 6" flame arresting brass tube protects contents from exterior ignition source. Hinged cover reduces spread of vapors. In case of fire, fusible link on cover melts and snaps cover closed. Made of durable steel with red powder paint finish to resist chemicals, corrosion, and humidity. Accommodates a padlock to prevent unauthorized access to contents. 10¾" diameter x 10" high. Factory Mutual Approved. Justrite brand (08207).

**No. 3AM06.** Shpg. wt. 9.2. List $174.00. Each..... **$165.50**

## POLYETHYLENE DRUM COVER

T&S

For use with 55-gallon closed-head steel drums. Drum cover fits easily over top of drum. Flexible clear 60 mil thick polyethylene construction for easy installation and years of reliable use. Ultraviolet screener. Temperature range: -50 to 212°F. Come in packages of 5 drum covers. T&S brand (DC-TP).

**No. 3KR52** .Shpg. wt. 10.0lbs.. List $72.85.
Each Pkg. of 5..... **$58.30**

WESCO Industrial Products, Inc.

## DRUM LEVEL GAUGE

Visually gauges drum contents when drum is in horizontal position. Sight tube is constructed of heavy gauge glass, mounted in a plated steel body with Buna-N seals. Special plated fitting threads into 3/4" NPT (19mm) drum bung and has female 3/4" NPT (19mm) provision to fit faucet of your choice. Fitting also permits uninterrupted flow of contents with level gauge in place. Drum gauge cannot be used with chlorinated solvents, high concentrated acids, or alkalies. Wesco International brand (272005).

**No. 5A507.** Shpg. wt. 2.7lbs.. List $79.10.
Each ..... **$75.50**

# DRUM ACCESSORIES

## GROUND AND BOND WIRES

Prevents static electricity buildup and sparking during movement flow and transfer of hazardous liquids. Both ground and bond wires are 3 ft. long and made of heavy-duty wire rope. Bonding and grounding of containers with hazardous liquid (flash point less than 140°F) and flammable liquid (flash point less than 100°F) during movement flow and transfer is required by OSHA. Wesco International brand.

**No. 4A442 Ground Wire** is insulated and has a "C" clamp on one end which attaches to ground stake and an alligator clip on the other end to attach to drum.

**No. 4A441 Bond Wire** has an alligator clip on each end to attach between drums or dispensing drum and receiving container.

### GROUND AND BOND WIRE ORDERING DATA

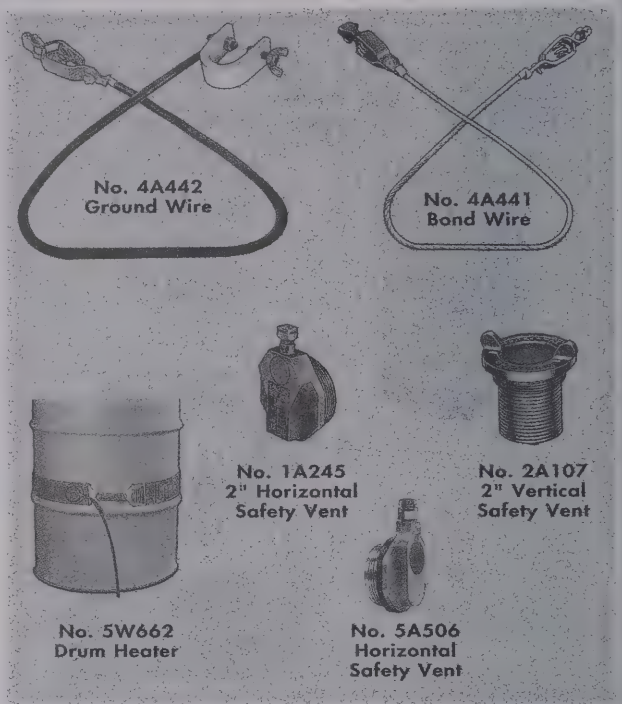
|---|---|---|---|---|---|
| Ground | 272032 | **4A442** | $24.06 | **$24.06** | 0.6 |
| Bond | 272033 | **4A441** | 24.01 | **20.76** | 0.4 |



## ELECTRO-FLEX METAL DRUM HEATERS

- **Provide even heat for standard 5, 15, 30, and 55-gallon metal drums**
- **Suitable for freeze protection, viscosity control, melting, or maintaining materials at elevated temperatures**
- **Thin, flexible design with a nickel alloy heating element and built-in electrically grounded screen covered with fiberglass reinforced vulcanized silicone rubber insulation**
- **High potential dielectric tested at 1250V for safety**
- **6 ft. cord set with 3-prong molded plug on 115V models, 230V models do not have plugs**
- **3" wide heater wraps around drum and is retained with a simple spring and hook device**
- **Nos. 5W662, 5W664, 5W666, 5W668, and 5W669 have a built-in thermostat with a control range of 60° to 425°F, and temperature control stem with 305° rotation**
- **Components used in construction of these heaters are UL Recognized and CSA Certified**
- **FOR USE ON METAL DRUMS ONLY. Many non-metal drums can be easily damaged by overheating**
- **Actual temperature is affected by thermostat setting, heater wattage, type of drum and contents, ambient temperature, and other system characteristics. Multiple heaters may be required for some applications**

## 2" HORIZONTAL SAFETY VENT

Especially suited for 30 and 55-gallon horizontal storage drums with 2" bung opening at end. Automatic pressure relief at approximately 5 PSI. Vacuum relief is obtained by lifting and rotating valve stem. Fusible emergency relief plug melts at 135°F (57°C) venting pressure and preventing drum rupture in case of fire. Perforated metal flash arrestor prevents accidental ignition of vapor within drum. Brass construction 2" male NPS threads. Factory Mutual Approved. Protectoseal brand (5522).

**No. 1A245.** 2" Horizontal Safety Vent. Shpg. wt. 1.0 lbs. List $64.94
Each **$61.00;** Lots 6 ..... **$57.95**

## HORIZONTAL SAFETY VENT

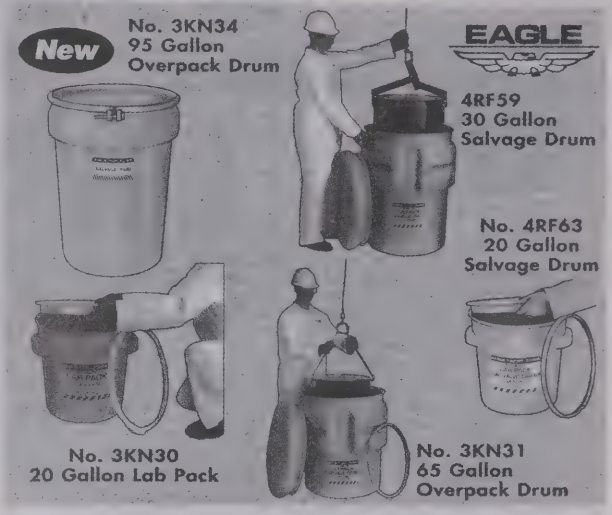
FM Approved brass drum bung vent for use with drums in horizontal (pouring) position. Automatically relieves pressure buildup at 5 PSI. Equipped with flame arresting baffel, to prevent sparks and flames from igniting the contents and fusable plug that melts at 135°F, to provide emergency relief in case of fire. Manual vacuum relief by lifting and rotating valve stem. Maximum content flow of 220 CFM at 20 PSI. Vent fits steel or plastic drum with 2" NPS (51mm) bung. Wesco International brand (272030).

**No. 5A506.** Horizontal Safety Vent. Shpg. wt. 1.0 lbs. List $52.05.
Each ..... **$52.05**

## 2" VERTICAL SAFETY VENT

Especially suited for 30 and 55-gallon drums in vertical position. Provides automatic pressure relief and manual vacuum relief. Pressure valve opens between 5 to 8 PSI. Vacuum relief is obtained by manually loosening valve one half turn to permit air to enter drum as liquid is drawn out. Plate type flash arrestor. Brass and aluminum construction. 2" male NPS thread. Factory Mutual Approved. Protectoseal brand (522).

**No. 2A107.** 2" Vertical Safety Vent . Shpg. wt. 2.0 lbs. List $73.62.
Each **$69.45;** Lots 6 ..... **$65.98**



# SPILL CONTAINMENT

## POLY OVERPACKS, SALVAGE DRUMS AND LAB PACKS

**20 Gallon Lab Pack.** United Nations certified. Can be used with packing groups I, II and III of hazardous materials. Meets performance requirements of DOT 49CFR173.12(b) [1992]. Chemical resistant to most materials, 100% high-density polyethylene with UV inhibitors. Handles suitable for forklift use. Lightweight, nestable for easy storage of 5 gallon pails or smaller containers. Eagle brand.

**30 Gallon Lab Pack.** United Nations certified. All plastic construction. Open-head drums can be stored outside with no rusting. Blow-molded plastic won't dent, rust, crack or corrode. Provides superior strength, impact resistance and environmental stress crack resistance. Incinerates completely and clearly. Stackable to save storage space. Can be used as a shipping container, lab pack or spill kit container. Eagle brand.

**20, 30, 65 and 95 Gallon Poly Overpack Salvage Drum Containers.** Meet 3 PSI Pressure Test. United Nations certified.Can be used with packing groups I, II and III of hazardous materials. Meets performance requirements of DOT 49CFR173.3(c) [1992]. Chemical-resistant to most materials. Blow-molded high density polyethylene with UV inhibitors. Suitable for forklift use and nestable for easy storage. Suitable for 55 gallon drums or smaller containers. Overpack good for secondary containment storage, transportation and cleanup. **Safety yellow color with removable head and metal band.** Eagle brand.

List $116.00. Each **$104.50**; Lots 2.....**$99.28**

# SPILL CONTAINMENT

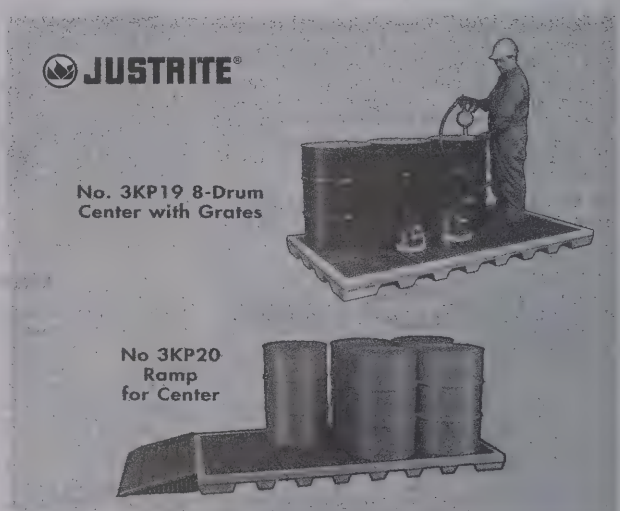
## SPILL CONTROL PALLETS AND POLY SALVAGE CONTAINERS

**Justrite Spill Control Pallets** provide an economical solution to the need for secondary containment of hazardous liquids. Designed for use indoors or in a weather-protected environment, pallets allow safe transport and temporary storage of environmentally hazardous liquids and can accommodate up to four 55-gallon drums. Low profile, broad base of 4-drum pallet makes it ideal for satellite waste accumulation, convenient dispensing, and easy drum loading.

Sturdy polyethylene base with removable grating resists chemicals and stands up to abuse. Translucent natural color sidewalls for ease in detecting leaks. Sump capacity exceeds EPA requirements. Transportable by fork lift. Static load rating of 4-drum pallet is 5000 lbs., 2-drum pallet is 2500 lbs.

**Overpac™ Salvage Drums** provide a safe, economical means for transport and temporary storage of damaged or leaking containers of hazardous liquids, including PCB. Drums are designed to safely contain a broad range of hazardous chemicals including acids, caustics and other corrosives. Designed to meet HM-181 performance oriented packaging regulations. Meet UN requirements for use in overpac applications and DOT 49 CFR 173.3. UN Marking 1H2/X295/S/95/USA/M4339.

Constructed of high-density polyethylene and can accommodate conventional 55-gallon drum. Twist-on lid spins on, turns down tight and seals with hand pressure only. No tools needed.



### SPECIFICATIONS AND ORDERING DATA

(*) Will accept all steel drums up to 55 gallons.

## HAZMAT ACCUMULATION CENTER

- **Serves as a waste accumulation area or spill control base for pumping stations**
- **Use as a satellite area for dry or liquid organization and storage for recyclables**
- **Staging zone for projects**
- **Holds drums awaiting transfer**
- **Excellent accumulation center for lead acid batteries, motors, or equipment for parts washing**

**Work center has 8,000 lb. load bearing capacity** to cover a wide range of applications. Organizes materials in different types of containers ranging from bags and boxes to 5 gallon pails and 55 gallon drums. A single center accommodates up to eight 55-gallon drums creating an instant spill protection zone. Generous 60 gallon capacity meets EPA requirements. All polyethylene construction is impervious to attack from most solvents, acids and caustics. Four removable polyethylene non-skid grates make sump clean-up quick and easy. Molded-in positive grate positioners assure grates stay in place and don't ride up. Gray color.

**For capacities of 16 drums or more,** multiple centers could be locked together with optional Accumulation Center Links, No. 3KP21, sold in pairs. Optional ramp No. 3KP20 simplifies drum handling and can be located in any of six positions on base. Justrite brand.

# SPILL CONTAINMENT

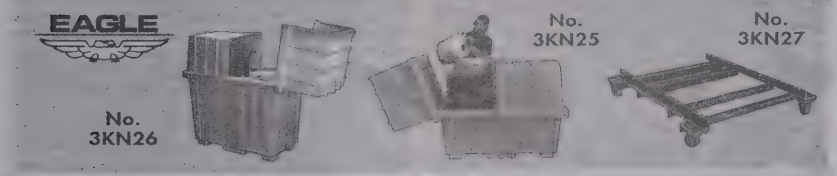
## SPILL CONTAINMENT PALLETS AND PLATFORMS

**Eagle Drum Containment Units** provide containment of hazardous chemicals as a storage area, dispensing area, transfer station or a waste collection station. Help eliminate costly clean ups. Feature 100% polyethylene construction for excellent chemical resistance.

Safety yellow tub with black patented blow molded high density polyethylene grating. Translucent tub and open grating permit quick inspection. Grating has 1¾" square openings and removes easily for cleaning.

All containment units have built-in internal and perimeter structural supports to ensure strong stability for drum storage.

6 and 8 drum platform units are designed for larger storage quantities in factories and warehouses.



Polyethylene Ramp for use with Nos. 4RF62, 3KN32, and 3KN33 only.

**All units meet EPA requirements for secondary spill containment of hazardous materials. 40CFR264.175.**

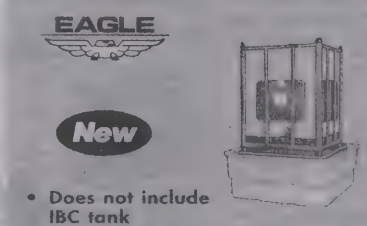
(*) Polyethylene ramp for use with Nos. 4RF62, 3KN32 and 3KN33 only.

## TWO-DRUM WORK STATIONS

**Two-Drum Secondary Containment Work Station.** For inside or outside drum storage as well as security. Safety yellow color, yet translucent for inspections for leaks. Heavy-duty polyethylene unit provides secondary containment to store/dispense most hazardous chemicals. Use as a collection center or dispensing center. Features large secondary spill capacity. Transport with fork lift truck. Holds two 55-gallon drums. No. 3KN26 permits lids to close while pump is in place. Both models include locks.



**Meets EPA Requirements for Secondary Spill Containment of Hazardous Materials. 40CFR264.175.**

**Optional Work Station Dolly** to make work station mobile. Welded construction with 4 swivel wheels. Fits both models. Holds 1200 lbs.

### TWO-DRUM WORK STATION SPECIFICATIONS AND ORDERING DATA

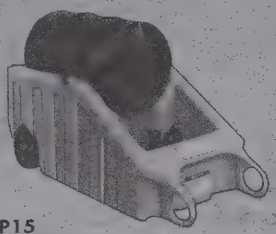
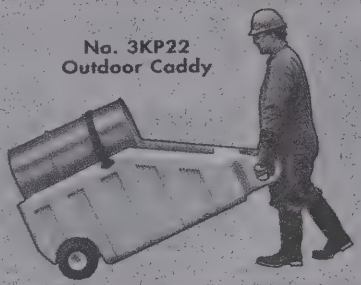
## IBC SPILL UNIT



- **Does not include IBC tank**

IBC Spill Containment Unit is constructed of high density polyethylene with a reinforced heavy metal IBC platform. Unit has a 400 gallon secondary spill capacity and the platform has a 10,000 lb. static load capacity. Width of containment unit helps contain side puncture-type leaks. Large shelf on platform unit accepts a variety of IBC tanks, from 38-50"W by 38-50"L. Dimensions: 67W x 67D x 26"H. Meets EPA 40CFR264.175. Eagle brand (1680).



***New* No. 4RF64.** Shpg. wt. 250.0 lbs.
List $1600.00. Each...**$1280.00**; Lots 2 **$1216.00**

# SPILL CONTAINMENT

## SPILL CONTAINMENT CADDY

No. 3KP15
Indoor Caddy

No. 3KP22
Outdoor Caddy

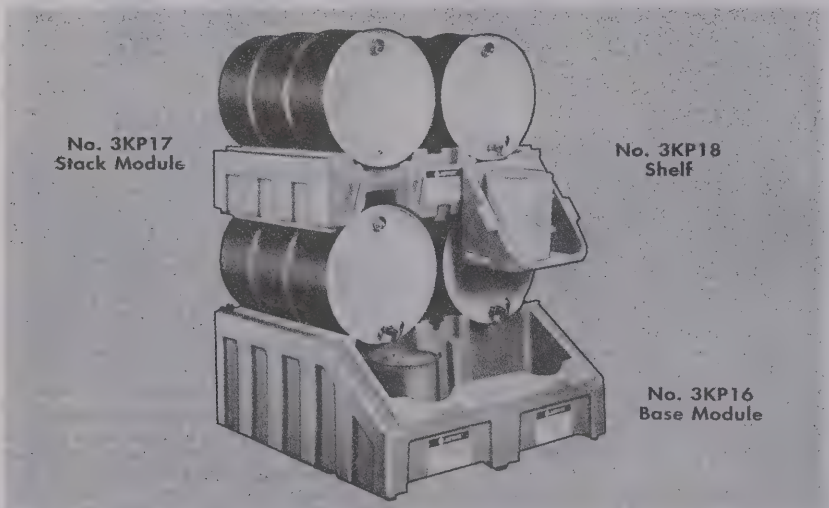
JUSTRITE®

- Move a 600 lb. drum, reduce back injuries and muscle strains
- Provides spill control as required in 40CFR 264.175, reduces the risk of high clean up and liability costs

**Provides a single solution** for drum handling safety, mobile dispensing capability, and built-in spill containment. Ergonomically designed polyethylene caddy makes it easy to load and move heavy 55-gallon drums. Double loop strap safely holds drums in place. Unit is forkliftable to speed moving great distances within a facility.

When tilted to the horizontal position, caddy can be used to safely and easily dispense drum contents. Deep dispensing well is wide enough to hold safety cans, bench cans, plunger cans, and five-gallon pails. Well catches incidental spills and can be cleaned quickly with sorbents. Main sump area holds liquids from a major spill or drum failure. 80 gallon containment capacity exceeds EPA requirements. Polyethylene construction for durability and exceptional chemical compatibility. Gray color. Justrite brand.

**Indoor Caddy No. 3KP15** features 10" wheels to roll smoothly over shop floors, facilitating hand portability.



**Outdoor Caddy No. 3KP22** features 10" pneumatic wheels to absorb bumps to roll easily over rough, irregular terrain.

**Optional Caddy Well Liner No. 3KP23** is removable for easy cleaning.

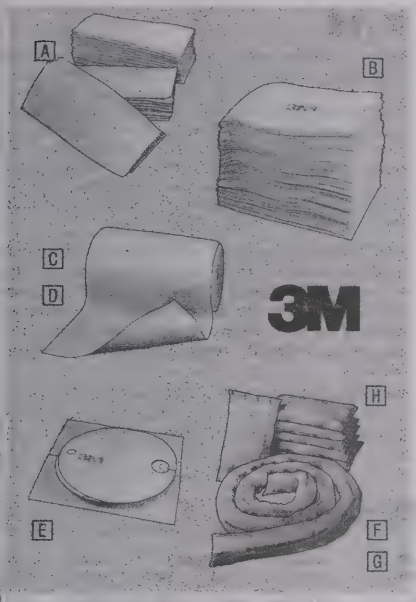
## DRUM MANAGEMENT SYSTEM

No. 3KP17
Stack Module

No. 3KP18
Shelf

No. 3KP16
Base Module

JUSTRITE®



**Drum Management System** meets environmental protection requirements while organizing drum storage for maximum safety, efficiency, and productivity. Unit provides racking, dispensing, and spill containment for 55 gallon drums. Stacking capability saves valuable factory floor space. System consists of three components: Base Module, Stack Module, and Dispensing Shelf. Base Module can be used alone or in combination with Stack Module. Double dispensing well accommodates a variety of containers including safety cans and five gallon pails. Incidental leaks are contained in dispensing well while major drum spills are safely held in oversized, 100 gallon containment sump which exceeds EPA requirements. All polyethylene construction for maximum chemical compatibility and protection against rust or corrosion. Forkliftable when empty. Gray color. Justrite brand.

### DRUM MANAGEMENT SYSTEM SPECIFICATIONS AND ORDERING DATA

## MAINTENANCE SORBENTS

**3M brand maintenance sorbents** for use in production facilities and maintenance shops to handle routine leaks, drips, sprays and splashes of fluids. Sorbents are non-granular and may be used on equipment and machinery. Pads, rolls, booms, pillows and rugs allow use at the source of a leak, preventing leak from spreading onto and across floor. Sorbent material allows rapid absorption of most industrial fluids and may be wrung out to recover valuable liquids, reducing the amount of material which would be disposed.

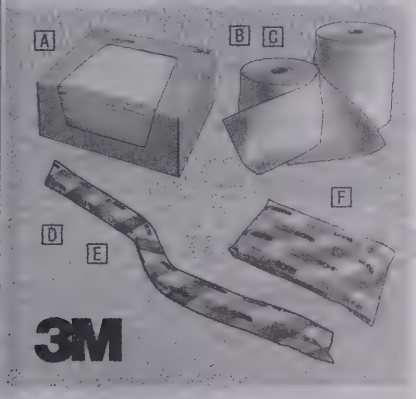
A, B **Pads.** Fit neatly around equipment and can be cut or folded to use for wiping and final clean-up. Available in two sizes.

C, D **Rolls.** For covering larger surfaces or can be cut to custom fit a smaller area. For lining drawers, covering workbenches, or protecting areas from overspray. Available in two sizes.

E **Drum Cover.** Two-piece design includes die-cut drum cover to absorb fluids from top of leaking drums. Remaining skirt is placed around base of drum to catch any drips that spill onto floor. Pre-cut for standard bung and vent openings. Fits 55 gallon drums.

F, G **Mini-Booms.** For placing around base of equipment. Helps contain leaks and prevents liquid from spreading to adjacent work areas.

H **Pillows.** Used to absorb larger volumes of liquids such as production areas where chronic leaks are a problem. Also for confined areas such as sump or spillway.



I, J **Rugs.** Sorbent rug provides absorbent surface around equipment with leaks, drips, or sprays. Prevents tracking of oils and fluids away from equipment and helps maintain cleanliness and safety. Available with or without coating on back of rug. (Not illustrated.)

**WARNING: Failure to properly handle and dispose of sorbents contaminated by hazardous materials can result in serious physical injury or death and/or environmental harm. 3M maintenance sorbents must not be used with aggressive liquids including caustics, acids, oxidizers and reactive chemicals.**

FOR MORE INFORMATION on the applications of these products, call 3M OH&ESD Technical Service toll free, 1-800-243-4630.

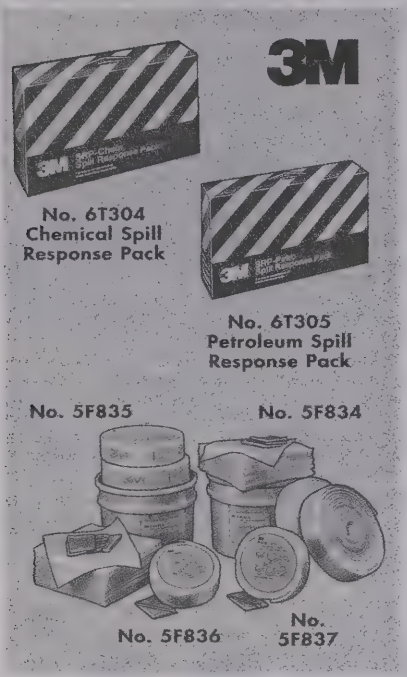
## CHEMICAL SORBENTS

**3M brand chemical sorbents** for absorbing acids, bases, and most other hazardous liquids. Sorbents are chemically inert and will not react with most harsh chemicals. Applications for emergency response include laboratories, plants, loading docks, anywhere chemical spills may occur.

A **Pads.** Used for absorbing small spills, wiping equipment and final clean-up.

B, C **Rolls.** For covering larger areas such as shelves and bench tops, or can be rolled out for maximum coverage of a major spill. Can be cut to fit drawers or around equipment. Available in two sizes.

D, E **Mini-Booms.** Helps contain and control a spill from spreading. Available in two lengths.



F **Pillows.** For absorbing larger volumes of liquids or in areas where a need for control of steady leaks or drips exists. Each pillow absorbs 1/2 gallon.

**WARNING: Always exercise extreme care when handling, storing or disposing of any sorbent material containing oil or any other hazardous liquid. Dispose of only in accordance with local, state and federal regulations.**

FOR MORE INFORMATION on the applications of these products, call 3M OH&ESD Technical Service toll free, 1-800-243-4630.

# SPILL CONTROL AND BATTERY SAFETY KIT

## SPILL KITS

**Spill Response Packs.** Designed for use in containing small spills. Available in Chemical Sorbent and Petroleum Sorbent kits. Both kits include carrying case which can be used as a visual warning device at the spill site. 3M brand.

**Chemical Spill Response Pack.** For use in laboratories, shipping docks or other areas where hazardous chemicals are shipped, stored or transferred. Includes three No. 4T893 booms, ten No. 4T890 pads, poly bag and carrying case.

**Petroleum Spill Response Pack.** For use in loading docks, manufacturing facilities, fuel carriers or trucking companies which require a sorbent that will not pick up water. Includes three No. 5T573 booms, five No. 4T896 pads, poly bag and carrying case.

**Folded Sorbent Roll Spill Kits.** Available in 5 gallon and 31 gallon sizes, Chemical or Petroleum versions. 5 Gallon Spill Kits store easily and are ideal for rapid response. 5 Gallon Kits include folded sorbent roll, temporary disposal bag and tie. 31 Gallon Spill Kits are packed in a 20 gallon drum for easy identification. 31 Gallon Kits include two folded sorbent rolls, 30 pads, three temporary disposal bags and ties, and yellow drum for No. 5F835 Chemical Kit or white drum for No. 5F834 Petroleum Kit. 3M brand.

**WARNING: Failure to properly handle and dispose of sorbents contaminated by hazardous material can result in serious physical injury or death and/or environmental harm. Dispose of only in accordance with local, state and federal regulations.**

FOR MORE INFORMATION on the applications of these products, call 3M OH&ESD Technical Service toll free, 1-800-243-4630.

## SPILL CONTROL STATION

For industrial, hospital, school and laboratories requiring fast easy cleanup of emergency chemical spills. Station provides a convenient source for everything needed to soak up hazardous liquids. Cabinet includes 10 standard and 2 hydrofluoric acid pillows, each with absorbing capacity of 1 quart; 2 pairs of chemical splash goggles; 15 sorbent pads for small spills; 15 hazardous waste bags with labels and ties, 2 pairs of gloves; and 2 total body Saranex®-laminated Tyvek® coveralls for head-to-toe protection of personnel.

Standard pillows absorb and hold most liquids, except hydrofluoric acid. Hydrofluoric pillows can be used for absorbing hydrofluoric acid. Sellstrom brand.

**CAUTION: Dispose of only in accordance with local, state, and federal regulations.**

**Instructions Included Inside Cabinet Door**

**Cabinet Dimensions: 15W x 9½D x 30¾"H**

**Replacement Parts Available 1-800-323-0620**

## PETROLEUM SORBENTS

**3M brand petroleum sorbents** "selectively" remove floating oil from water, and are used for both marine and on-land oil recovery. For use in recovering oils and petroleum-based liquids from effluent discharge, streams, ponds, lakes, rivers and other bodies of water. Also for use on in-plant spills under leaking equipment and machinery.

A **Rolls.** For use on all size spills and discharges. Can be cut to cover smaller areas or can be laid on open waters, shorelines, or discharge streams.

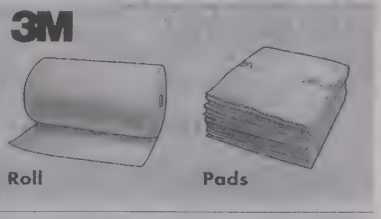
B **Pads.** Versatile product used to cover the greatest surface area for the least amount of material. Can be cut or folded to place around equipment or for final wiping and clean-up.

C **Pillows.** For use in absorbing larger, concentrated volumes of petroleum based liquids. Also for use in confined areas where fluid build-up is anticipated.

D **thru** F **Booms.** Mini, single and double booms available depending on application. Use on water to contain/absorb floating oils, or on land, to form an absorbent barrier to prevent the spread of spills.

G **Drum Covers.** Two-piece design includes die-cut drum cover to absorb fluids from top of leaking drums. Remaining skirt is placed around base of drum to catch any drips that spill onto floor. Precut for standard bung and vent openings. Fits 55 gallon drums.

**WARNING: Always exercise extreme care when handling, storing, or disposing of any sorbent material containing oil or any hazardous liquid. Dispose of only in accordance with local, state, and federal regulations.**



FOR MORE INFORMATION on the applications of these products, call 3M OH&ESD Technical Service toll free,1-800-243-4630.

## HIGH PERFORMANCE STATIC RESISTANT PETROLEUM SORBENTS

3M High Performance Static Resistant Petroleum Sorbents are designed to be used for the safe clean up of highly flammable petroleum-based liquids because they resist static charge build-up. Can be used effectively and efficiently in low humidity conditions or when temperatures fall below freezing.

| Type | Dimensions W | Dimensions L | Qty. Per Pkg. | Gallons Sorbed Per Pkg. | 3M Model | Stock No. | List | Each | Lots 3 | Shpg. Wt. |

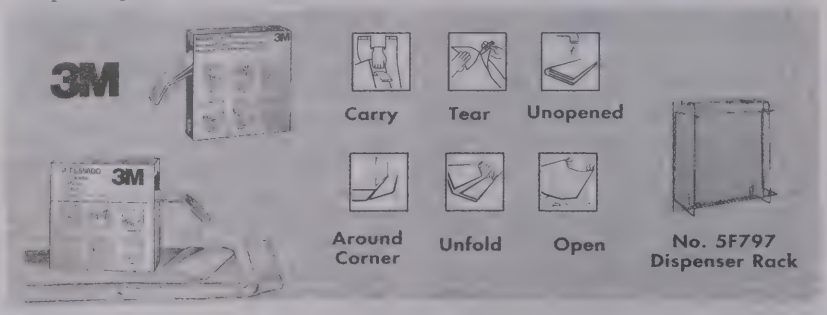
## FOLDED PETROLEUM, MAINTENANCE AND CHEMICAL SORBENTS

**For cleaning** spills, drips and fluid leaks. Four sorbents in one box: Use as a boom, pillow, pad or roll. Folded sorbents can be left closed to use as boom, unfolded once to use as pillow, or unfolded all the way for use as pad or roll. Perforations every 16 inches allow selection of required length, reducing sorbent waste. High water repellency in petroleum sorbents recovers oil, repels water. Allows reclamation of valuable liquids for recycling. 10.5 gallons sorbed per dispenser box.

**No. 1CD40.** Folded Petroleum Sorbent.
Shpg. wt. 6.0 lbs. List.....$34.92.
Each. **$31.75** Lots 3.....**$30.16**



**No. 3AJ34.** Folded Maintenance Sorbent.

Each. **$39.10;** Lots 3.....**$37.15**

### 3M FOLDED SORBENT DISPENSER RACK

**Durable metal rack** that can be mounted anywhere. Use for hanging 3M folded sorbents in convenient locations, allowing quick response to drips and spills.

**No. 5F797.** Folded Dispenser Rack.
Shpg. wt. 8.9 lbs. List.....$105.76.
Each...**$96.15;** Lots 3.....**$91.34**

# PETROLEUM LIQUID CLEANUP PADS

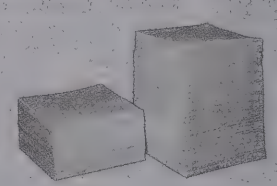
SPC sorbents quickly handle the cleanup and removal of oil where alternative cleanup methods are not economically useful. Convenient, lightweight and cost effective, sorbents can absorb 25 times their weight. Absorbs solvents, solvent based paints, vegetable oils and many more non-water soluble chemicals.

## PADS

Can be used in applications varying from major spills to routine drips, leaks and splashes. Available in various weights for maximum efficiency. Flame resistant, but will incinerate to less than 0.02% ash. Unaffected by temperature changes and will not rot or mildew.

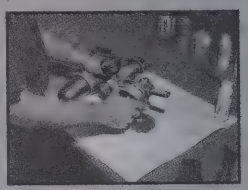
- **Wringable for reuse, cuts disposal cost**
- **Dustless, does not pose a health hazard**

## HALF PACKS



Economize with half pack pads. Save space and cost with same size pad at a lower cost. Provides same quality characteristics of full size pads.

## BLANKETS



Ideal for wide area coverage on land, water or in industrial environments. Easily cut to size to fit anywhere. Available in full weight or lightweight, economy roll. Rolls out quickly for ease of handling.

## BOOMS

For use on water to soak up and contain floating spills. Booms can be linked together to form any length. Lint free and easy to handle even when saturated.

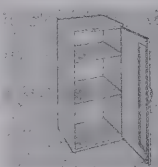
## SXT INDUSTRIAL SORBENT

Sorbents are perforated to ensure use of only what is needed. SXT has three times the tensile strength of ordinary polypropylene products and is fifteen times more absorbent than clay. Sorbents are chemically inert, they will not absorb water. Low linting and abrasion resistant, they can withstand demanding industrial environments. Wringable for repeated use. Blue and white color. 16 x 20". 100 sorbents per case. SPC brand (SXT600).

**No. 5FZ74.** Shpg. wt. 16.0 lbs. List .....$98.95.
Each **$89.05**; Lots 3.....**$84.60**



## EMERGENCY SPILL KIT

Absorbs oil, water, or chemical spills on land. Each Attack Pac™ contains: (15) UXT 500 sorbent pads, (3) Cobra Coils™, (1) pair of safety goggles, (1) pair of nitrile gloves, (1) large refuse bag, and (1) set of instructions. Packaged in a puncture-resistant 18 x 18 x 4" foil bag. SPC brand (SKA-ATK).

**No. 3AP01.** Shpg. wt. 2.5 lbs. List .....$58.55.
Each **$52.70**; Lots 4 .....**$50.07**

## SPILL CONTROL CABINET

DURHAM

- **Provides convenient storage for spill pillows, absorbent pads, hazardous waste bags, neoprene gloves and other safety equipment**
- **Features two adjustable shelves**
- **Full length plexiglass window allows easy inventory of contents**
- **Unit can stand alone or be wall mounted using keyhole slots**
- **All steel construction for maximum strength**
- **White baked enamel finish**
- **Dimensions: 12¾D x 13¹³⁄₁₆W x 30¹⁄₁₆"H**
- **Durham brand (052-43)**

**No. 3KR09.** Shpg. wt. 31.0 lbs. List.....$130.04.
Each .....**$94.25**

## UNIVERSAL SORBENTS

UXT "Xtra Tough" sorbents for chemical, hazmat and maintenance use. High performance sorbent with unique bonding process that makes it ten times stronger than other universal sorbents. Designed for use with both oil-based and water-based fluids. Chemically inert to handle solvents, acids, coolants, bases, chemicals and antifreeze. Twelve to fifteen times more absorbent than clay and other cleaners. Wringable for reuse. Gray texture and fiber design hides stains longer.
SPC brand.

### FULL SIZE PADS

Perforated full size, use only what is needed. Convenient big count dispenser box.

### SMALLER PADS

Perforated smaller size. Convenient dispenser box.

### BLANKET

For wide area coverage.

### SOCKS

Mini-booms for a variety of uses and configurations. Wrap around machines to contain leaks.

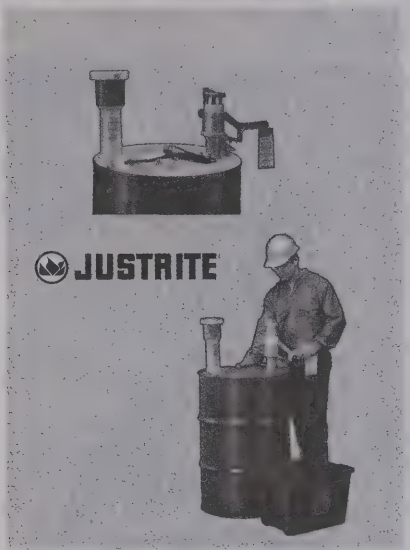
## DRUM TOP COVERS

Eliminate messy drips and overflow discharges when mixing or pumping fluids into drums. Easy to install, pre-cut holes to fit standard 55 gallon drum. Drum Top Cover 22" dia., **25 per case.** SPC brand (DTA25).

**No. 5FZ83.** Shpg. wt. 8.0 lbs. List .....$86.55.
Each box **$77.90;** Lots 3.....**$74.01**
Lots 6.....**$70.11**

## UNIVERSAL SORBENT

- **Passes environmental protection guidelines for waste disposal in landfills**
- **Nonbiodegradeable—will not release liquids under 50 PSI**
- **Absorbs oil, water, and coolants**



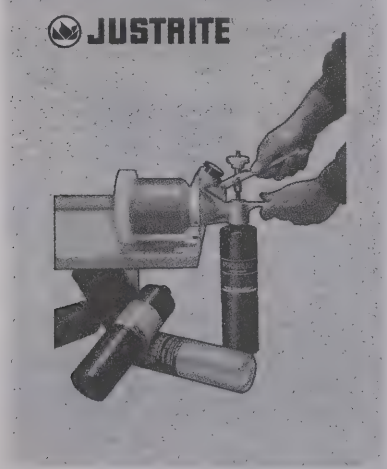
**Cobra Coil™ universal sorbent** bends around corners and conforms to any shape. Consists of diatomaceous earth encased in a dust-free 3" x 4 ft. casing. **12 coils per box.** SPC brand (CC400).

**No. 5AZ81.** Shpg. wt. 26.0 lbs. List $45.10.
Each **$40.55;** Lots 3.....**$38.52**
Lots 6.....**$36.50**

# HAZARDOUS WASTE RECYCLING AND SPILL CONTROL

## AEROSOLV™ AEROSOL CAN DISPOSAL SYSTEM

- **System includes puncturing unit, coalescing/carbon filter, anti-static wire, goggles**



Aerosol can disposal system provides a safe, highly cost-effective means of relieving pressure from spent aerosol cans. System takes spent aerosol cans from a hazardous state to non-hazardous state resulting in decreased waste streams and increased recycling opportunities. One 55-gallon drum can collect the residuals of over 4,000 spent aerosols.

Made of aircraft aluminum, all moving parts of 308 stainless steel. Puncture pin is carbide-tipped to withstand repeated, long term use. Unit is hand operated and can accommodate a wide variety of industrial aerosol can sizes and shapes including 200 series, 300 series, and 6 oz. cans. Threads directly into the 2" bung of any standard drum. Combination filter threads into 3/4" bung. Coalescing lower portion removes liquid particulate while activated carbon upper portion adsorbs odor. Complies with EPA regulations 40CFR261.23(a)(6). Justrite brand.

### SPECIFICATIONS AND ORDERING DATA

| Description | Justrite Model | Stock No. | List | Each | Lots 2 | Shpg. Wt. |
|---|---|---|---|---|---|---|
| **Aerosolv Recycling System** | 28202 | **3KP13** | $576.90 | **$560.00** | **$504.00** | 9.0 |

## PROSOLV™ PROPANE CYLINDER RECYCLING SYSTEM

- **System includes fuel canister venting device, activated carbon filter to adsorb odors, 40 recycling certification tags, anti-static wire, safety goggles, sleeve removal tool**

Propane cylinder recycling system reduces solid waste disposal expenses while increasing recycling opportunities. Hand operated unit removes the sealing sleeve and internal valve stem from propane, propylene, mapp and calibration gas cylinders. It empties and filters the propellant, taking the cylinder from a hazardous to non-hazardous state. Complies with EPA regulations 40CFR261.23(a)(6).

Built-in pressure gauge reads green when the valve stem should be removed. A red level reading indicates useable levels of remaining fuel at which time the canister must be put back into normal service until a green reading is obtained. Once the valve stem is removed, recyclable certification tag is attached and cylinder can be recylced as scrap steel. Justrite brand.

# SAFETY CANS

## TYPE I AND II SAFETY CANS

EAGLE

Factory Mutual System Approved

### METAL AND POLYETHYLENE SAFETY CANS

**Eagle Flammable Liquid Safety Cans.** For use in handling, dispensing and storing liquids such as gasoline, benzene, naphtha, and oil. Type I Safety Cans feature a single opening and are designed for carrying and storing of flammable liquids. Type II Safety Cans feature a double opening to dispense flammable liquids through a flexible metal spout. Faucet Safety Cans dispense flammable liquids into smaller capacity containers. Eagle brand.

**TYPE I AND TYPE II STEEL CANS** have galvanized steel bodies to resist corrosion, dents and punctures. Reinforced bottom on both series. Type II safety cans allow venting of fill spout and easy release of liquid flammables through 12" pour spout. Enamel finish.

**Type I Steel Safety Cans.** Galvanized steel cans have reinforced bottom, carrying handle, brass pour spout and flame arrestor. Squeeze handles are featured on Nos. 2W429, 2W313, 4RF73, 4RF74, and 4T031. No. 2W428 has trigger grip handle. UL and ULC (Canada) Listed (MH5018, CMH1168), FM Approved and meet OSHA requirements 29CFR1910.106. 5 gallon can available in red, blue (for kerosene), and yellow (for diesel).

**Type II Steel Safety Cans.** Feature a carrying handle on top. Body is seamless drawn dome shape top with double lock bottom seam which serves as a heavy-duty shock rim protecting the can bottom. Squeeze handles are featured on Nos. 2W314 and 2W683. Brass flame arrestor and brass nonsparking pour spout end tip. Cans are equipped with an air vent to eliminate back pressure, 1" O.D., flexible metal pour spout to permit convenient nonspill pouring and an easy working valve for positive control. Made from 24-gauge steel. Red enamel finish. UL and ULC (Canada) Listed (MH5018, CMH1168), FM Approved and meet OSHA requirements 29CFR1910.106

**TYPE I POLYETHYLENE SAFETY CANS.** High density polyethylene safety cans are impact resistant, won't rust, and are non-corrosive. Impervious to many liquid chemicals, solvents, and corrosives. Metal fittings and flame arrestor are stainless steel. FM Approved and meet OSHA requirements 29CFR1910.106.

**FAUCET SAFETY CAN.** Dispenses flammable liquids into smaller capacity containers for laboratory or shop use. Normally kept in a safety cabinet, on a workbench, or on an elevated shelf. Self-closing faucet near bottom of can. Galvanized steel with brass faucet. FM Approved.

**FUNNEL SPOUTS.** For use with Type I safety cans. Self-ventilating, self-locking, made of high density polyethylene. 9" long overall; small end is 7/8" I.D., 1⅛" O.D. No. 6X853 is yellow for use with steel cans. No. 3KN48 is white for use with polyethylene cans. FM Approved.

### TYPE I AND TYPE II SAFETY CANS

Safety cans are required for the safe transfer and temporary storage of flammable liquids such as gasoline, kerosene, lacquer thinner and diesel oil.

All Justrite Type I and Type II cans feature heavy-duty terne plate and double-lock seams to prevent leaks. Ergonomic handle design makes pouring easy. High-gloss powder coat red paint finish provides excellent chemical resistance and minimizes effects of scuffs, impact, corrosion and heat.

Free-flow, double mesh flame arrestors protect contents from sparks and other external sources of ignition. Cans feature leak-tight, self-closing spouts and automatically vent when internal pressure builds up to protect against rupture or explosion. FM Approved, UL and C-UL Listed. Meet OSHA and NFPA regulations.

**Type I Safety Cans.** Economical design with single spout for filling and pouring. Allows transfer of flammable liquids that will be poured into containers with wider openings. No. 6AV78 1-gallon can features fixed handle design with trigger release cap. Remaining Type I cans have swinging handle design for easy handling. Available in 1, 2, 3 and 5-gallon capacities. FM Approved, UL and C-UL Listed.

**Laboratory Faucet Safety Can.** 5-gallon can features brass faucet that provides convenience and controlled dispensing from shelf level for lab or workbench use. Fill spout has self-closing pressure relief cap with built-in vacuum breaker and double mesh flame arrestor. FM Approved.

**Type II Safety Cans.** Feature one opening for pouring and one for filling. Flexible metal hose for smooth, accurate, spill-free pouring into small bottle, plunger can or engine openings. Rear opening permits filling. Available in 2, 3 and 5-gallon capacities. FM Approved, UL and C-UL Listed.

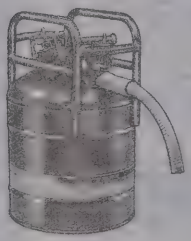
# TYPE II TRANSPORT/DISPENSING CANS



JUSTRITE®

Factory Mutual System Approved

Replacement Parts Available 1-800-323-0620

No. 1BX14
2½ Gallon Can

No. 6AN94
5 Gallon Can

**Type II Transport/Dispensing Cans.** Feature same construction of the standard red Type II cans with added features to provide safe transport of hazardous liquids. For use when remote usage of flammables is necessary or any situation where gas fired equipment is used. Heavy-duty roll bar construction protects the fill and pour mechanisms from damage in a fall, while providing additional heavy-duty handholds to standard handle. Dual, fusible-linked bracket with easy to operate hand mechanism provides protection against spillage while providing explosion-proof protection in major fire situations. A second hand-actuated mechanism secures pour spout valve against content spillage in shock load conditions. Durable powder paint finish provides maximum chemical and abrasion resistance. Meets D.O.T. and HM-181 requirements. UN Approved (Marking 1A1/Y1.2/100), FM Approved. Justrite brand.

# PLUNGER AND BENCH CANS

Replacement Parts Available 1-800-323-0620

No. 5AV31
Terne Plate
Plunger Can

No. 6AR07
Polyethylene
Plunger Can

JUSTRITE®

Factory Mutual System Approved

No. 5AP05
Terne Plate
Bench Can

**Plunger Cans** permit fast, easy moistening of cleaning cloths when applying solvents to parts. Pushing down on plunger fills upper pan with an adjustable amount of flammable liquid. Surplus liquid drains back into reservoir. Brass pump assembly. Perforated pan screen serves as flame arrestor. Top rims have molded edge protectors for trouble-free moistening. Available in terne plate with red powder paint finish or polyethylene construction. Polyethylene for use with more corrosive liquids or alcohol. FM Approved and meet OSHA requirements. Justrite brand.

**Bench Cans** permit easy cleaning of small parts in solvents. Feature spring-loaded, perforated dasher plate that also serves as flame arrestor. Hinged cover minimizes evaporation loss. Protected rim reduces possibility of hand injury. Terne plate cans feature red powder paint finish for added durability and chemical resistance. FM Approved and meets OSHA requirements. Justrite brand.

# DISPENSER CANS

JUSTRITE®

Factory Mutual System Approved

No. 2AG42 1/2 Pint
Dispenser Can

No. 2AF92 1 Quart
Dispenser Can

Dispenser cans for use when small amounts of hazardous liquids are required directly on work. For production line use or anywhere quick dispensing is needed. One-hand action makes liquid transfer safe, fast, and accurate. Polyethylene body provides excellent chemical resistance. Brass valves are leakproof and self-closing to minimize spills and control excess liquid. FM Approved. Justrite brand.

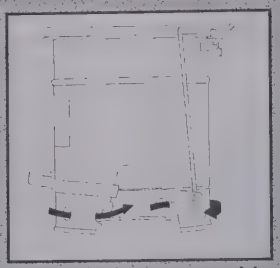
# SAFETY CANS



## OILY WASTE CANS

No. 2AX55 6-Gallon Oily Waste Can

JUSTRITE®

Factory Mutual System Approved

Elevated bottom required by both FM and UL allows for circulation of air around can

For use wherever waste solvent cloths and wiping rags are used. Cans feature self-closing lids; containers stay closed when not in use, isolating contents from stray sparks or careless smokers. One-piece lid cover opens to approximately 60° angle by using foot treadle. Red powder paint finish provides added durability and chemical resistance.

Unique round construction and elevated bottom encourages circulation of air around can to disperse heat, preventing spontaneous combustion and ignition of combustibles beneath can.

Meets OSHA 29 CFR 1910.108 (f)(2) which requires use of approved metal waste cans for disposal of waste rags. FM Approved, UL Listed. Justrite brand.

## DISPOSAL CANS

No. 3AH67

JUSTRITE®

Factory Mutual System Approved

No. 3AH01

For safe, efficient disposal of flammable and corrosive wastes. Impact resistant, high density polyethylene construction with stainless steel fittings stands up to chemicals, tough acids, and corrosives. Large 4" diameter mouth opening helps control filling or pouring operations. Fixed position on handle allows lid to stay open for easier pouring. Inside flame arrester guards against outside ignition sources. When closed, cap automatically vents at five PSIG. Justrite brand.

## METAL OILY WASTE CANS

For safe disposal of oily waste and rags. Eagle oily waste cans are designed and engineered to prevent fires from solvent and oily waste, rags, swabs and other materials subject to spontaneous combustion. Eagle brand.

**Heavy steel cans** feature a triangular shape that is very sturdy and resists tipping over. Nos. 2W560, 4T080 and 2W274 remain stable even when foot lever is used to open lid. Lid is of one-piece construction with a hand lift and carry handle. Ventilated bottom lets air circulate under can so that heat from a fire inside the can will not ignite a wooden floor or combustibles under it. UL Listed (MH7500). FM Approved. Red enamel finish.

## METAL AND POLYETHYLENE SAFETY DISPOSAL CANS

**Safety Disposal Cans.** Used to collect and dispose of contaminated or dirty flammable liquid wastes at the work station or in the laboratory. Constructed of 24-gauge galvanized steel for economy and practical everyday use with ordinary flammables. Wide 4" diameter opening fills easily and empties completely. Spout cap can be locked open for conveniently emptying many types of containers without use of a funnel. Flame arrestor reduces possibility of ignition of vapors from external sparks. Cap assembly opens automatically to relieve excessive vapor pressure. Free-swinging handle balances the can when carried full or empty. Red enamel finish. Eagle brand.

**Polyethylene Disposal Cans.** High density cans are impact resistant, won't rust and are non-corrosive. Impervious to many liquid chemicals, solvents, and corrosives. Stainless steel metal fittings and flame arrestor give superior performance over containers with cadmium plated fittings. Red heavy-duty polyethylene. Eagle brand.

## LAB SAFETY CANS

**Stainless Steel Lab Can.** For industrial, scientific, and hospital use to reduce danger of explosion from flammable liquids. Use with alcohols, acetone, ethers, toluene, exylene, and other liquids that do not attack stainless steel. **Do not use with strong acids, hydroxides or solvents which are known to corrode stainless steel.** 316 stainless steel body has electrically welded seams. Rolled edge pour spout has squeeze grip controlled cap for easier pouring. Teflon gasket. Stainless steel flame arrestor. Eagle brand.

**Terne Coated Steel Lab Can.** Similar to stainless steel can 2W905 except made from terne coated steel for use with ordinary flammable liquids and for lower cost. Baked on red enamel finish. Eagle brand.

**Red High Density Polyethylene Lab Can.** Used in scientific, industrial and hospital laboratories to reduce the danger of explosion resulting from ignition of vapors of flammable liquids. FM approved and meet OSHA requirements. Oblong shape conserves space. Eagle brand.

# SPECIALTY SAFETY STORAGE CABINETS

### SPECIALTY STORAGE CABINETS

Complies with OSHA CFR1910.106d and NFPA 30. Special color finishes help quickly identify contents and segregate liquids. Justrite brand.

### FLAMMABLES CABINETS
**Yellow Finish**

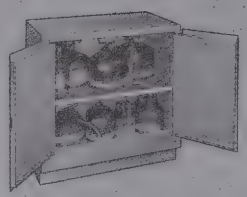
**Countertop cabinets** store up to 4 gallon and are ideal for laboratories or anywhere where space is at a premium.

**Piggyback cabinets** stack or mount on top of standard 30-gallon cabinets to provide expanded or segregated storage. Can also be wall or bench-mounted.

**Wall/Bench cabinets** are ideal for storing small containers without taking up extra floor space. Features five adjustable shelves.

**Undercounter cabinets** mount flush with other cabinetry. Vent openings in back wall for increased air flow. Stores 22 gallons.

### PAINT/INK CABINETS
**Red Finish**



Cabinets offer three shelves and are the best utilization of space for storage of 1 gallon paint cans. Ideal for printing/painting operations.

### ACID/CORROSIVE CABINETS
**Blue Finish**

Ideal for laboratories and other facilities using acids and bases. **Steel Cabinets** include removable polyetyhlene spill catcher trays fitted to shelves and bottom for easy cleaning of incidental spills. **Nonmetallic Laminated Cabinet** is ideal for storage of phenol, nitric acid or sulfuric acid. **Lockable Polyethylene Cabinets** provide maximum protection against corrosion and leaks. Poly undercounter style has compartmentalized storage and removable sumps for easy cleaning of incidental spills.

## SAFETY STORAGE CABINETS

**Fully compliant: All cabinets meet or exceed OSHA requirements and NFPA Code 30. Most have undergone rigorous independent 3rd party fire testing. Self-closing cabinets also meet the Uniform Fire Code.**

Safety storage cabinets are designed to provide segregated and expanded storage of flammable and hazardous materials. Organize liquids and keep them near point-of-use for efficiency. Built-in safety features minimize employee exposure, provide smooth operation and prohibit unauthorized access. No drip, high gloss yellow powder paint finish maximizes chemical resistance. Doors on self-closing units shut when temperature reaches 165°F.

**Value Features standard on all Justrite steel cabinets:**

- **Double walled 18 guage steel with 1 1/2" air space**
- **Unitized, welded construction**
- **Safety yellow powder paint finish**
- **High Visibility, trilingual warning label**
- **3-point lock with double key set**
- **Self-latching—easy close doors**
- **Spill catcher shelves adjust at 2 1/4" increments and interlock onto welded hagers to prevent "shelf slippage"**
- **2" Liquid tight sump**
- **Dual vents with built-in flame arresters**
- **4 Adjustable leveling feet**
- **Outside grounding connector**
- **Fusible link actuation and concealed automatic close mechanism on self-closing models only**

## ACID/CORROSIVE & PESTICIDE SAFETY STORAGE CABINETS

**Acid/Corrosive & Pesticide Storage Cabinets** feature high density polyethylene shelf trays and bottom platforms for additional protection against spills. Acid/Corrosive cabinets and shelves are finished with blue epoxy powder coating which is superior to epoxy painted or enamel painted surfaces. The pesticide storage cabinet (No. 4RF71) has a green high gloss powder finish and white labeling providing quick designation of product storage. Acid/Corrosive cabinets are available in 30, 45 and 60 gallon sizes. The pesticide cabinet has a 45 gallon capacity. **Not recommended for storage of phenol, nitric or sulphuric acid. Prolonged exposure to these vapors or spills could cause the cabinet finish to deteriorate.**

**Eagle Acid/Corrosive Safety Storage Cabinets** are constructed of 18-gauge welded steel. Feature double wall panel construction with 1½" air space between panels and 2" raised leakproof sill at bottom. 2" diameter pipe fitting with fire baffle and cap for outdoor venting. Adjustable shelves support 500 lbs. each. Four adjustable leveling feet. Three-point key lock.

# DRUM AND HAZARDOUS WASTE SAFETY STORAGE CABINETS

## DRUM SAFETY STORAGE CABINETS

No. 3KN39 1 Drum
Manual Closing Horizontal Cabinet

Factory Mutual System Approved

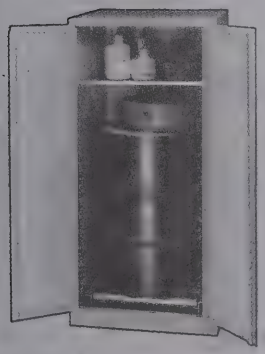
New

EAGLE

- Meet NFPA Code 30 Requirements
- Meet OSHA Requirements

**Drum Storage Cabinets** comply with NFPA Code 30 and meet OSHA's requirement 29CFR1910.106(d)3. Double wall 18 gauge steel construction with 1½" air space. Cabinets have upper and lower vents which provide connections for 2" threaded fittings. Equipped with built-in ground connectors. Eagle brand.

**Vertical 1 and 2-Drum Safety Storage Cabinets** come complete with drum supports inside bottom. Yellow high gloss powder finish with red warning label "Flammable—Keep Fire Away".



**Horizontal Drum Safety Storage Cabinet** is equipped with drum cradle guide rails. Yellow high gloss powder finish with red warnings. Not Factory Mutual System approved.

**Optional drum cradle No. 2W472 available, see Index.**

# FLAMMABLE LIQUID DRUM STORAGE CABINETS

## INDOOR DRUM STORAGE CABINETS

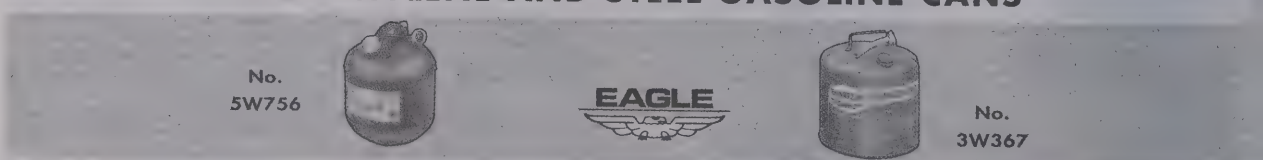
Drum safety cabinets allow for storage and dispensing of bulk liquids. Cabinets are designed in accordance with NFPA Code 30 and comply with OSHA regulations. Manual closing cabinets have sturdy 18 gauge steel walls with 1½" insulating air barrier, 2" leakproof sill, three-point lock, capped vents, ground connection, and adjustable leveling feet. Labeled "Flammable—Keep Fire Away". Durable yellow powder paint finish is chemical and abrasion resistant. Quality welded construction. Justrite brand.

**Horizontal Drum Cabinet.** Designed to house drums used for gravity flow dispensing of liquids. Includes tracks to guide drum into cradle position.

**Vertical Drum Cabinet.** Accommodates 55-gallon drum equipped with drum pump. Includes heavy gauge galvanized steel spill catcher shelf. FM approved.

**Double Drum (30 Gallon) Vertical Cabinet.** Accommodates two 30-gallon drums side by side. Includes spill catcher shelf and drum rollers on bottom of cabinet for ease in maneuvering heavy drums. FM approved.

**Double Drum (55 Gallon) Vertical Cabinet.** Accommodates two 55-gallon drums side by side. Includes spill catcher shelf.



**Drum Cradle.** Fits inside No. 5AJ72 Horizontal Drum Cabinet or use free standing. Loading bar grips drum chime, permitting smooth shifting of drum into horizontal position.

## POLYETHYLENE AND STEEL GASOLINE CANS

### POLYETHYLENE GAS CANS

High-density polyethylene cans are impact-resistant, non-rusting, and non-corrosive. Dome-shaped rounded body. Finger groove in bottom for easier pouring. Vent cap and flexible spout with built-in screen store inside can. **Not for diesel fuel. Note: These cans do not meet shipping or safety can requirements.**

| Can Capacity (Gal.) | Eagle Model | Stock No. | List | Each | Lots 4 | Shpg. Wt. |
|---|---|---|---|---|---|---|
| **2½** | PG-3 | **5W755** | $7.18 | **$4.67** | **$4.32** | 2.0 |
| **5** | PG-5 | **5W756** | 11.68 | **7.59** | **7.02** | 3.0 |

### GALVANIZED STEEL GAS CANS

Strong, durable galvanized steel cans with double-seamed bottom resist leakage and withstand rough use. No seams on top or sides. Flip vent equalizes pressure for pouring. Detachable 7" long flexible pour spout with filter screen. Approved by Massachusetts State Fire Marshal. Red cans with white lettering. **Not for diesel fuel. Note: These cans do not meet shipping or safety can requirements.**

# OUTDOOR DRUM STORAGE CABINETS

**Rugged, weatherproof cabinets** provide safety, security, segregation, and secondary containment storage for hazardous materials, chemicals, and waste. 55-gallon drum storage capacity ranges from two to eight drums. For outdoor use to keep contents safe from rain, wind, and snow. Outside storage frees up valuable inside space and creates a safer environment. Weather resistant exterior finish and chemically resistant interior. Large 54" single door opening facilitates loading and removal of 55-gallon drums, whether full skids or single drums. 8-Drum Cabinet features double doors for full access via ramp or forklift. Portable cabinets are relocatable with standard fork lift truck.

**Accessories include** Diamond Plate Steel Ramp No. 3KP05 which makes drum loading easy. For organization of smaller containers, optional Shelving Kit No. 3KP06 is available for use on 6 or 8-drum cabinets. For added protection, Fire Suppression System No. 3KP10 is offered on 8-Drum cabinet.

**Constructed of unitized-welded, heavy-gauge steel** for strength. Fully factory assembled. Large spill containment sump conforms to NFPA standards and surpasses EPA 40 CFR requirements. Hydrostatically tested to be liquid tight. Removable sectional flooring allows for easy sump inspection and cleaning. 250 PSF floor load, steel grate floor on 2 and 4 drum units; plywood floor with steel grate at threshold on 6 and 8 drum units. Gravity ventilation provided with 2 and 4 drum units with one vent on back wall; 6 and 8 drum units include 2 vents, one on each side of cabinet. Three point key latch for security. Seismic hold-down plates included for improved stability in areas prone to earthquakes. Meets EPA requirements, FM approved except for storage of Class 1A or dispensing of Class 1B flammable liquids as defined by NFPA 30. Justrite brand.

# FIRE EXTINGUISHERS

### UL FIRE CLASSIFICATIONS

**A** Common combustibles, such as wood, paper, cloth, rubber, trash and most plastics. May occur in homes, offices or business.

**B** Flammable Liquids, gasoline, kerosene, oil grease, solvents and gases. Commonly strike in kitchens, garages, manufacturing plants or warehouses.

**C** Live electrical equipment. Often occurs in computers, motors, wiring, and appliances. Requires a non-conductive extinguishing agent.

### EXPLANATION OF RATINGS

An extinguisher's rating, rather than its size, is the measure of fire fighting capability. This rating is assigned after testing by Underwriters Laboratories, Inc., and is shown on the label as a number followed by a letter, e.g., 1A

The number indicates the extinguisher's relative power against that specific class of fire. For example, an extinguisher rated 2A is twice as powerful against ordinary combustible fires as one rated 1A.

The same holds true for Class B ratings. No numerical rating is assigned to Class C, since these fires are basically Class A or Class B plus live electrical equipment.

## DRY CHEMICAL DEFINITIONS

### TRI-CLASS "ABC" DRY CHEMICALS

- **The only agent capable of handling class A, B, and C fires and is non-toxic**
- **It is a Mono-ammonium phosphate based material which is yellow in color and treated to insure free flowing and water-repellency characteristics**
- **Unique in its performance on class A fires by not only smothering the material, but the powder also melts to form a sticky coating which secures the fire and prevents reflash.**

### REGULAR "BC" DRY CHEMICAL

- **Capable of handling class B fires and has a C rating as well due to its non-conductivity.**
- **High percentage sodium bicarbonate material, white in color is treated for free flowing and water-repellency characteristics which is non toxic.**
- **Large heavier particles enhance range capabilities, while small particles absorb heat and smother the fire.**

## WATER FIRE EXTINGUISHER

- **UL rated 2A protection, 5 year limited warranty**
- **Excellent fire fighting agent for class A fires only**
- **Use in areas where ordinary combustibles are present, such as wood, paper, cloth, rubber, and most plastics**
- **Lightweight stainless steel construction cylinder (corrosion resistant)**
- **Chrome plated brass valve**
- **Rechargeable-easily filled with standard air chuck**
- **Tanks are shipped empty (certain local ordinances may require certification after filling with water)**
- **UL listed chemical engine hose**
- **Kidde Brand (PRO2.5 WM)**

**No. 4T305.** Shpg. wt. 8.0 lbs. List $89.00. Each **$74.95**; Lots 3 ..... **$71.20**

## AUTO FIRE EXTINGUISHER

- **UL rated 5-BC, Two year limited warranty**
- **Features the no-drill car mount bracket - installs in seconds**
- **For uncarpeted trucks, two velcro adhesive strips are provided**
- **Fights grease, gasoline, oil and electrical fires**
- **Protective fire extinguisher hood**
- **Push button pressure check**
- **Kidde Brand (Auto 5X)**

**No. 1M794.** Shpg. wt. 3.1 lbs. List $19.00. Each **$14.95**; Lots 6 ..... **$14.20**

## HEAVY DUTY BRACKETS

**Required for U.S. Coast Guard Approval on Certain Models**

No. 4T307

No. 5T909

- **Strap brackets are required for U.S. Coast Guard approval on all units not identified as U.S. Coast Guard approval**
- **Used with Kidde fire extinguishers to allow mounting on walls, vehicles and boats**
- **For heavy traffic and rough usage locations**
- **Steel bracket with enamel finish**

# FIRE EXTINGUISHERS

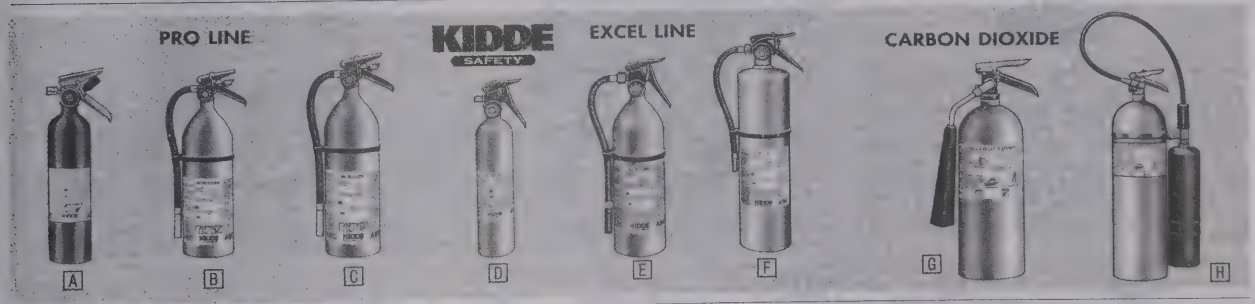
## PRO AND EXCEL LINE DRY CHEMICAL EXTINGUISHERS

- Easy to read pressure gauge allows instant, accurate pressure checks
- Squeeze grip provides ease of operation
- Lever locks to valve to prevent accidental discharge
- Seamless aluminum or steel cylinders have chip resistant epoxy finish
- Mar-resistant pictogram mylar label
- Fits all standard cabinets
- All extinguishers are rechargeable (Except No. 5X662)
- Rechargeable extinguishers are easy to service
- Hose comes standard on 5, 10 and 20 pound units

## VALVE COMPARISON

### PRO LINE

- Strong, machined aluminum valve
- Two rivets used in handle/lever system for added strength



### EXCEL LINE

- Nylon valve (Du Pont Zytel® St) provides superior strength and toughness for hostile environments
- Will never corrode
- Will not bend or break under extreme pressures or temperatures
- Ideal for coastal applications and other extreme conditions

## CARBON DIOXIDE FIRE EXTINGISHERS

- UL rated 5B:C and 10B:C,
- 5 year limited warranty
- Likely replacement agent for Halon 1211 applications
- Seamless aluminum cylinder with chip resistant epoxy paint
- Meeting many non-magnetic applications
- Forged aluminum chrome plated brass valve
- Fully rechargeable
- Hose and horn standard
- Recommended for data processing centers, laboratories and chemical manufacturing plants
- Clean agent will not contaminate food, valuable materials or electronics-considered environmentally safe
- Non-conductive agent for electrical equipment without risk to operator

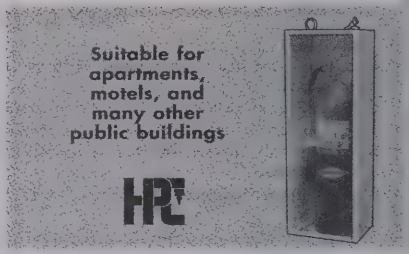
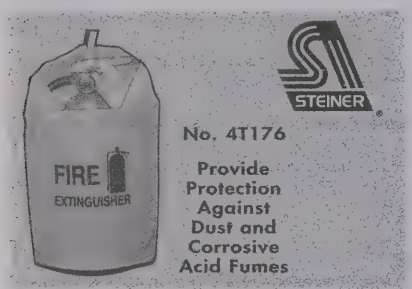
(†) These models exceed Compliance Requirements for 2A10BC fire extinguishers.



(*) Bracket necessary for USCG approval, see facing page.

❸ These products are covered by OSHA Hazard Communication Standard, and Material Safety Data Sheets (MSDS) are available. See page opposite inside back cover.



# FIRE EXTINGUISHER CABINETS AND FIRE EQUIPMENT SIGNS

## FIRE EXTINGUISHER CABINETS

**Protect your fire extinguisher** with a surface mount break-plexi glass cabinet. These cabinets are attractive and well constructed. Includes hammer (attached to top of unit), cam lock keyed alike, and "break glass" decal. White baked enamel finish. Safer clean plexiglass pane breaks easier and with fewer small pieces. Four mounting holes. White finish. HPC brand.

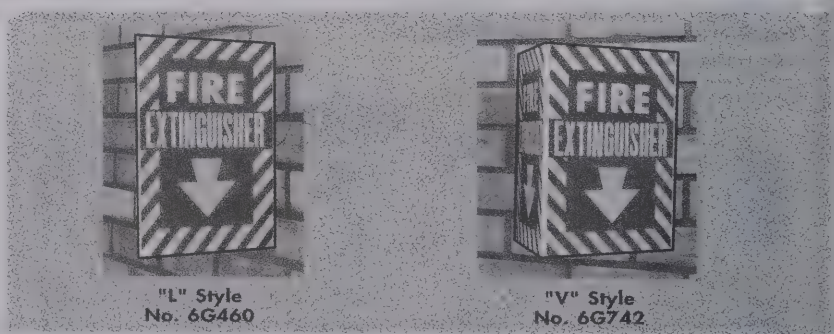
## FIRE EXTINGUISHER COVERS

**Can be used with most types of fire extinguishers.** Heavy-duty clear plastic window with securely stitched vinyl-coated binding on all seams and edges. Flame resistant vinyl-coated fabric is impenetrable by oil and grease. Won't crack, chip or peel. Easily wipes clean with sponge or cloth.



Covers protect valves, fittings and gauges from dust and corrosive acid fumes. Keep extinguishers clean and ready for use. Bright red color provides high visibility and complies with OSHA requirements. Velcro self-adhering nylon fasteners, which overlap in back permit quick and easy removal with a quick jerk of pull handle. Steiner brand.

## SMOKE DETECTOR TESTER

CRC Smoke Test™ Brand Smoke Detector Tester is a smokeless aerosol spray that provides a true functional test for both commercial and residential smoke detectors. Smoke Test does not contaminate or discolor detectors or ceilings, will not damage plastics and won't leave a smoky residue. It increases user safety by extending reach over 4 feet, eliminating use of ladders, stools, or chairs. UL Listed. 6 oz. can, .30 net wt., CRC brand (02105).

KIDDE SAFETY

No. 3KN55

**Continuous duration piercing 85 decibel horn** alerts the presence of smoke or fire. All models except No. 3KN54 feature single or multiple station capability up to 24 devices (when one alarm sounds, all interconnected alarms sound), quick-disconnect AC-type connector, and separate trim ring to fit all standard electrical box configurations.

All models feature tamper-proof locking pin to deter theft and a bi-lingual owner's manual (English/Spanish). Ionization type detection method with MOS integrated circuit provides maximum stability and minimum power consumption. Complies with UL, Federal Housing Authority, Housing and Urban Development, National Fire Protection Association, and California State Fire Marshal. Fyrnetics brand.

**No. 3KN54. Battery Powered Smoke Alarm.** Test button tests circuitry and horn, red LED light flashes every 30-40 seconds to indicate that smoke alarm is receiving power. Low battery indicator chirps at 30-40 second intervals continuously in the event of a low battery. Features twist-off mounting bracket for easy installation and battery replacement. 9-volt battery included.

**No. 4RR03. Battery Powered Smoke Alarm.** Long life lithium battery (included) provides worry-free protection for up to ten years. Features Hush button to temporarily silence false alarms caused by nuisance smoke from cooking, fireplace or cigarettes. Alarm resets automatically after approximately 7 minutes.

**No. 3KN56. AC 120 Volt Smoke Alarm.** Features 120VAC Wire-In. Test button tests circuitry and horn, red LED alarm light flashes rapidly indicating which unit in multi-station installation is the originating alarm. Green AC power light indicates when 120VAC power is being delivered to alarm.

**No. 3KN57. Double Protection Smoke Alarm.** Features 120VAC wire-in and 9-volt battery back-up. Test button tests circuitry and horn, red LED alarm light flashes rapidly indicating which unit in multi-station installation is the originating alarm. Green AC power light indicates when 120VAC power is being delivered to alarm. In the event of low or absence of alarm battery, low battery indicator chirps at 30-40 second intervals continuously. 9-volt battery included.

**No. 3KN58. Double Protection Smoke Alarm.** Features 120VAC wire-in and 9-volt battery back-up. Test button tests circuitry and horn, red LED alarm light flashes rapidly indicating which unit in multi-station installation is the originating alarm. Green AC power light indicates when 120VAC power is being delivered to alarm. **Features Hush Button** to temporarily silence false alarms caused by nuisance smoke from cooking, fireplace or cigarettes. Alarm resets automatically after approximately 7 minutes. In the event of low or absence of alarm battery, low battery indicator chirps at 30-40 second intervals continuously. 9-volt battery included.

**No. 3KN59. Triple Protection Smoke Alarm.** Features 120VAC wire-in, 9-volt battery back-up and safety light. Safety light automatically turns on when alarm sounds as a guide to safety. Test button tests circuitry and horn, red LED alarm light flashes rapidly indicating which unit in multi-station installation is the originating alarm. Green AC power light indicates when 120VAC power is being delivered to alarm. In the event of low or absence of alarm battery, low battery indicator chirps at 30-40 second intervals continuously. Two 9-volt batteries are included.

**No. 3KN60. Carbon Monoxide Detector.** Features 120VAC wire-in. Test/Reset button to test circuitry, horn and reset detector after alarm is triggered, red alarm light and green "power on" light. Detector monitors CO levels every 2.5 minutes. Low level warning feature emits a low level "beep" at levels less than 60 ppm. Single or multiple station capability up to 24 devices; when one alarm sounds, all interconnected alarms sound. Features originating alarm indicator. No batteries required. UL listed. Fyrnetics brand.

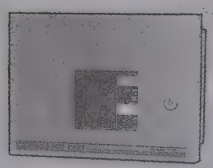
**No. 3KN61. Heat Detector.** Features 120VAC wire-in with 9-volt battery back-up. Piercing 85 decibel horn alerts quickly when room temperature rises above "normal" range (135° fixed temperature). Test button tests circuitry and horn. Green AC power light indicates when 120VAC power is being delivered to heat detector. Single or multiple station capability up to 24 devices; when one alarm sounds, all interconnected alarms sound. Red LED alarm flashes rapidly indicating which unit in multi-station installation is the originating alarm. Low battery indicator chirps when battery is low or absent. Features quick-disconnect 120VAC connector, separate trim ring to fit all standard electrical box configurations and tamper resistant locking pin to deter theft. 9-volt battery included.

Specifications: AC 120VAC, 60 Hz, 80mA, 9V battery back-up. UL Maximum Ambient Temperature at Detector: 100°F; UL Recommended Coverage: 2500 sq. ft.; UL Recommended Spacing: 50 feet; Maximum Distance from Wall: 25 feet. Complies with UL 539, National Fire Protection Association 72.2, and California State Fire Marshal 7254. Fyrnetics brand.

**Hearing Impaired Strobe Lights.** Provides visual alarm to the hearing impaired. Bright 177 candela light is activated when any interconnected smoke, heat, or carbon monoxide alarm is triggered. 60 flashes per minute. Features quick disconnect 120VAC connector, separate trim ring to fit all standard electrical box configurations and tamper proof pin to deter theft. Wall or ceiling mounting. Temperature limits of 32°F to 120°F. Complies with UL 1971, ADA, ANSI 117.1, and National Fire Protection Association 72. Available in 2-Wire Direct Connect model and 3-Wire Interconnect model. Fyrnetics brand.

**No. 3KN62. 2-Wire Direct Connect** unit will connect with any approved interconnectable alarm provided alarm has an approved relay module. Requires relay compatible with brand of alarm to which strobe will be connected. Electrical rating is 120VAC, 60 Hz, 500mA when operating.

**No. 3KN63. 3-Wire Interconnect** unit will interface directly with Nos. 3KN56, 3KN57, 3KN58, and 3KN59 Smoke Alarms, No. 3KN60 CO Detector, and No. 3KN61 Heat Detector. Electrical rating is 120VAC, 60 Hz, 80mA standby-580mA when operating.



**No. 3KN55. Relay Module.** For use in conjunction with Fyrnetics 120VAC Multiple Station Smoke Alarms, CO Detectors, Heat Detectors, and Hearing Impaired Strobe Lights to activate auxiliary warning devices such as external sirens and bells, or to activate hallway and stairwell lighting. Fyrnetics brand.

Specifications: 120VAC, 60 Hz, 0.08 amp. Relay contacts: 1 isolated form "C" set (SP DT, No. Com. & Nc). 10 amps at 120VAC, 5 amps at 30 volts DC. Connection means: 10" 18 ga. pigtail leads (6 pieces). Dimensions: 3"L x 1.7"W x 0.7" thick.

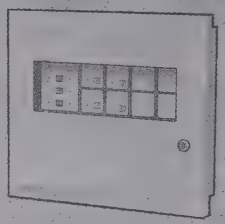
# FIRE ALARM CONTROL PANELS



California State Fire Marshal (CFM) Approved

No. 1P013
One Zone
Control Panel

No. 1P011
Two Zone
Control Panel

No. 1P009
Four Zone
Control Panel

No. 1P007
Eight Zone
Control Panel

- Separate alarm & trouble indicators
- Form C alarm and trouble contacts
- Built-in high voltage transient protection
- Lightning protection
- Ground fault detection
- 24V regulated DC auxiliary power for two to eight zones
- Filtered power source is resettable for use with 4-wire smoke detectors
- Field programmable signal circuits
- Low/no AC power and battery detection
- Built-in battery charger
- Separate indicators for power ON, trouble signal silenced and alarm signal silenced
- Signal silencing is field programmable
- Power limited Class B alarm initiating and signaling circuits, convertible to Class A in two, four and eight zone panels
- Surface mounted
- City-Tie Module optional for all control panels

**Fire Alarm Control Panels** are designed for use in buildings that require a supervised fire alarm system for up to eight zones. Meets all performance and operational requirements of UL standard 864 and National Fire Protection Association Standard 72. Complete with back box, control switches and indicator LED's. Standby battery must be added to operate the control panel and in case of power failure—order separately, see "Accessories" below. Red finish. Edwards brand.

## ORDERING REFERENCE

1. Determine number of zones in area to be monitored (i.e.,one per floor).
   a. Select appropriate Control Panel.
2. Choose type and number of Initiating (Input) Devices.
   a. Add total electrical *standby current* requirements for all input devices. (Total *input standby current* must not exceed Control Panel's maximum of 1500 microamps).
3. Choose type and number of Signaling (Output) Devices.
   a. Add total electrical *alarm current* requirements for all output devices. (Total *alarm current* must not exceed Control Panel's maximum of 2.5A per zone or 4.0A for panel, 1.5A for No. 1P013).
4. Determine if City Tie Module is required to signal remote location (i.e., fire dept., police dept., security service,etc.).

**NOTE:** Although the installation and wiring procedures for these components may be similar to other electrical products, certain jurisdictions require Fire Alarm Systems, or components used therein, be installed, tested, certified, serviced or repaired by licensed personnel. Prior to Fire Alarm installation, it is strongly recommended you contact the local Fire Marshal with jurisdictional responsibility to determine all applicable code requirements.

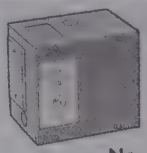
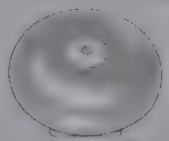
# FIRE ALARM SYSTEM COMPONENTS

No. 1N982



No. 1N980



No. 1N978

No. 1P005

No. 1N966

No. 1N974

## INITIATING (INPUT) DEVICES

### FIRE ALARM STATIONS Nos. 1N982 and 1N980

- STANDBY CURRENT: 0 micro amps
- Output Rating: 3A/120 VAC (No. 1N982), 3A/30 VAC (No. 1N980), SPST-N.O. (No. 1N982), 2 SPST-N.O. (No. 1N980)
- No. 1N982 is die cast with red and silver finish. Mounts on a 4" square single gang electrical box
- No. 1N980 is molded lexan plastic with red finish. Mounts on a 4" square single gang electrical box
- No. 1N982 is Break Glass Type
- No. 1N980 is Pull Handle Type

### HEAT DETECTORS Nos. 1N978 and 1N976

- STANDBY CURRENT: 0 micro amps
- Output Rating: SPST-N.O. 3A @ 125 VAC
- Coverage: 2500 sq. ft., 50 ft. spacing
- Surface mount • Factory Mutual (FM) Approved
- No. 1N978 has combination fixed temperature and rate-of-rise. Activates at 135°F or with a temperature rise exceeding 15° per minute
- No. 1N976 has fixed temperature and activates at 194°F

### SMOKE DETECTORS Nos. 1P005, 1P003 and 1P001

No. 1P005 Ionization Type:

- STANDBY CURRENT: 30 micro amps
- Senses airborne combustion particles
- For use where smoke or flames may be minimal
- Coverage: 900 sq. ft., 30 ft. spacing

No. 1P003 Photoelectric Type:

- STANDBY CURRENT: 50 micro amps
- Senses dark, thick smoke or larger flames
- Coverage: 900 sq. ft., 30 ft. spacing

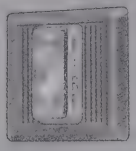
No. 1P001 Photoelectric Type with Heat Detector:

- STANDBY CURRENT: 50 micro amps
- Heat detector operates at 135°F
- Coverage: 900 sq. ft., 30 ft. spacing

### DUCT SMOKE DETECTOR No. 1N996

- STANDBY CURRENT: 100 micro amps
- Activates when combustion particles exceed 2.3% per ft.
- Air Velocity Range: 300 to 4000 FPM
- Includes housing, detector, and test switch

### SMOKE SAMPLING TUBE No. 1N998



- 6½ ft. sampling tube for shorter distances, trim to size

## ELECTRIC DOOR OPENERS

- Keeps door locked until actuated, then releases lock so door can open
- Mortise units are installed in place of the regular door strike plate
- Nos. 1P017 and 3ZR13 mortise units have roller nosing for smooth operation, withstand 35 lbs. nosing pressure
- Nos. 1P019 and 3ZR12 rim units install on door facing, operate with 5 lb. nosing pressure
- Recommended transformer if needed is No. 4X744, see General Catalog Index
- UL Listed

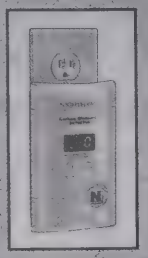
# CARBON MONOXIDE (CO) DETECTORS AND CARBON DIOXIDE($CO_2$) DETECTOR

## CARBON MONOXIDE DETECTOR

- **Digital Readout: Continuous digital display of all CO levels from 0-999 ppm.**
- **Test/Reset Button: Depress to test unit's electronics. Depress to silence sounder alarm.**
- **Peak Level Button: Depress to recall highest CO level detector has recorded since unit was last reset.**
- **9V Battery Back-up: In the event of a power outage, the battery back-up will operate the unit for up to twelve (12) hours.**
- **Sensor: Highly sensitive and accurate metal dioxide sensor. Samples air every 2.5 minutes and updates digital reading. Never needs replacing.**
- **85db Sounder Alarm: Unit sounds a loud alarm if it senses high CO levels.**
- **Pullout Adapter: Exclusive pullout adapter allows user multiple installation possibilities as follows: direct plug, mounted on a wall, or on a tabletop by pulling out stand on back of unit.**
- **Temperature operating Range: 10°C (14°F) to 40°C (140°F).**
- **Power: 120 VAC units.**
- **UL 2034 Listed. 5 year limited warranty.**
- **NightHawk brand (900-0071).**

**No. 5U747.** Shpg. wt. 1.2 lbs. List $92.00. Each.....$49.95▲

## HARDWIRE CARBON MONOXIDE DETECTOR



- **Designed for hardwire installation instead of plug-in. Suitable for new construction or remodeling.**
- **Features digital readout, test/reset and peak level buttons.**
- **Easily mounts to standard junction box.**
- **Mounting plate and hardware included.**
- **UL 2034 Listed. 5 year limited warranty.**
- **NightHawk brand (900-0026).**

**No. 5U748.** Shpg. wt. 1.2 lbs. List $84.00. Each.....$49.50▲

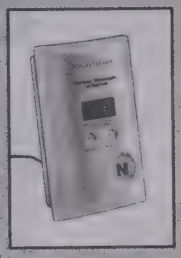
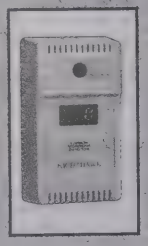
No. 5U747 NightHawk™ CO Detector

Direct Plug

Wall Mount





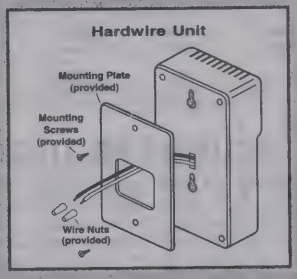


Table Top

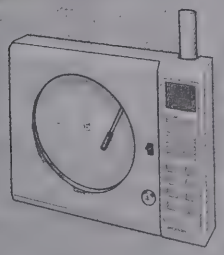

No. 5U748 Hardwire Carbon Monoxide Detector

No. 5U748

## CARBON DIOXIDE DETECTOR

**DICKSON**
*The Leader In Recorders*

No. 4B369

Measures carbon dioxide in PPM and documents the readings on a circular chart. Ideal for checking building ventilation levels to monitor indoor air quality. Keypad and dip switches set recording parameters, changeable as often as needed. Portable and easy-to-use.

- **Sensor: Non-dispersive infrared**
- **Accuracy (type.): 5% of full scale (0-2000)**
- **Allows choice of rotation time (1 or 7-day) and carbon dioxide range 0-1100 PPM or 0-2200 PPM**
- **User calibration**
- **15-min. warm-up time, average**
- **Power supply: 120V AC**
- **Features high/low audio-visual alarm**
- **Includes pen and one box of 100 charts (0-2200/7 day)**
- **Dickson brand ($CO_2$X)**
- **Dimensions: 10.5H x 13.2W x 2.8"D**

**No. 4B369.** Shpg. wt. 7.0 lbs.
Each.....$979.00

## SPECTRA® AND SPECTRA® II PROTECTIVE EYEWEAR

**Comfortable, good looking, protective eyewear.** Replaceable polycarbonate unitary lenses protect against 100% UV rays as defined by ANSI. Special frame design and antiscratch coating protect lens. Lightweight with adjustable temples. Wide angle lens for improved field of vision. Meets ANSI Z87.1-1989 and CSA Z94.3-1992 standards. TSR® gray and double gradient mirror lenses meet color traffic signal recognition requirements of ANSI Z80.3. Fogban anti-fog coating resists humidity, heat and cold. Fog resistant properties maintained after cleanings. Willson brand.

**Spectra and Spectra Small**—Caramel plastic frames with close-fitting permanent sideshields.

**Spectra II**—Black metal frames with removable sideshields.

**WARNING: All tinted lenses decribed on this page are not designed for burning, cutting, welding, furnace or molten metal operations, or any other operation which exposes the eyes to harmful levels of ultraviolet and infrared radiation. Tinted lense should not be worn indoors unless called for by nature of application.**

# UVEX ASTROSPEC 3000® PROTECTIVE EYEWEAR

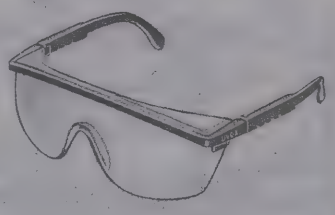
- **Eyewear meets ANSI Z87.1-1989 and CSA Z94.3-1992 Requirements**
- **Gray lens also meets Z80.3 Sunglass Requirements**
- **Feature nylon frames with adjustable temple length**

Protective eyewear for most industrial and construction needs. Polycarbonate, unitary lens absorbs more than 99% of ultraviolet light. Feature universal nosebridge, adjustable lens angle and lens replacement. Also available in slim size. Meet ANSI Z87.1-1989 and CSA Z94.3-1992. Gray lens also meets Z80.3 sunglass requirements. Uvex brand.

**Uvextreme® AF Coating**—Permanently bonded coating that is anti-fog, anti-scratch and anti-static. Provides more than 99% protection from ultraviolet radiation.

**Ultradura® Scratch-Resistant Coating (UD)**—Permanently bonded silicate-based coating with scratch-resistance is also resistant to a wide range of chemicals.

**SCT® Gray Lens**—Absorbs more than 99.9% of ultraviolet light and depresses blue light transmission from 400-500 nm for long-term outdoor exposure or shortburst arc radiation. Maintains optimal color recognition.



**SCT® Vermilion Lens**—Absorbs blue portion of spectrum to enhance detail and contrast. Aids in inspection and reduces eye fatigue.

**Infradura® Welding Lens (ID)**—For protection against ultraviolet and infrared radiation. Provides filtration requirements outlined in ANSI Z87.1-1989. Available in 3.0 and 5.0 welding shades.

**UVEX LIFETIME ASTROSPEC FRAME WARRANTY**

Text of warranty available upon request, see page opposite inside back cover.

**Replacement Parts Available 1-800-323-0620**

- **Registered to ISO 9001**

## FECTOIDS™ PROTECTIVE EYEWEAR

Lens design closely follows contours of the face for complete coverage, allowing wearer to see entire work area without the distraction, distortion or obstruction caused by parting lines and sideshields. DX™ lens coating is anti-fog, anti-scratch, anti-static, and anti-chemical attack. Lightweight, frameless, comfortable safety glasses are available in two lens sizes, medium and large. Duralite® polycarbonate lens is easily replaceable. Angle of the lens can be adjusted to one of three different positions, even while on the wearer's face—optimizes coverage, fit, and comfort. Length of temples can be adjusted to four different settings to minimize pressure on the temples while helping to prevent sliding on the nose. Meets ANSI Z87.1-1989 requirements. Gray lens also meets Z80.3 sunglass requirements. Maximum UV and impact protection. AOSafety brand.

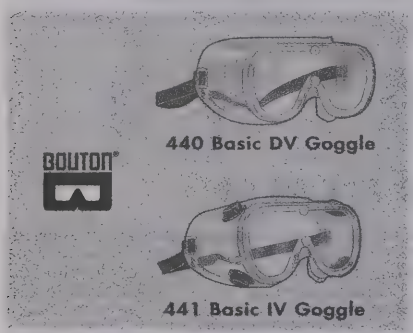
# SAFETY GOGGLES



## STEALTH™ GOGGLE

**Offers lightweight comfort, low profile and contemporary style.** Features durable polypropylene frame with soft, flexible elastomer that seals comfortably and conforms gently to most facial contours. Impact-resistant polycarbonate lens can be easily replaced or exchanged. Toric lens design offers close fit, superior optics and improved peripheral vision. Quick-adjust headband clips permit fast and easy fitting, even on hardhats. Indirect ventilation system channels and directs air flow over the lens, minimizing fogging and improving vision while still providing superior splash and impact protection.

Light gray frame color with clear or gray lens. Features Uvextreme®AF lens coating to provide anti-fog, anti-scratch, anti-static, and anti-UV protection. Meets ANSI Z87.1-1989 and CSA Z94.3-1992 high impact protection standard. Made in USA. Uvex brand.

# FACESHIELDS

A **Sentinel™ Ratchet Headgear.** Lightweight headgear is equipped with Sure-Lock® ratchet and absorbent Sportek® browpad. Crown strap conforms to shape of head. Multi-position feature for visor. Available with black crown protector or black crown and chin protector. Meets ANSI Z87.1-1989 when used in conjunction with Bullard visors **(sold separately below). No. 1F442 will only accept visor No. 1F430.** Bullard brand.

B **Gold Line® Bracket.** Anodized aluminum bracket allows attachment of various visors directly to hard hat. Features locking mechanism to securely keep visor in down, up or in-between positions. For applications not involving electrical hazards. Fits Bullard series 3000, 5100 and 4100. Meets ANSI Z87.1-1989 when used in conjunction with Bullard visors (sold separately below). Bullard brand.

C **Dielectric Faceshield Bracket.** Made of lightweight molded plastic. Use with Bullard series 3000, 5100, 4100 and Advent® hard hats. Meets ANSI Z87.1-1989 when used in combination with Bullard visors (sold separately below). Also available with slotted cap blades. Bullard brand.

D **Faceshield Visors.** Fit all Bullard headgear and brackets previously listed. Acetate, polycarbonate and polyester visors protect against splash, spray or light impact. Acetate visors provide good scratch and chemical resistance, while polycarbonate visors provide a higher degree of heat and impact resistance. Mesh screen visor provides increased ventilation for high heat work applications. Visors are available flat or formed. Formed visors provide superior optics. Multifit visors fit most competitor brackets. Visors meet ANSI Z87.1-1989 when used in conjunction with proper Bullard brackets. Bullard brand.

E **Flat Fold Faceshield.** Complete headgear and faceshield visor. Folds flat and assembles quickly. Use for protection from splash, spray and flying particles generally encountered in light machine work, chipping, grinding and sanding. Size adjustment uses pin-lock system. Meets the requirements of ANSI Z87.1-1989 standard. North brand.

F **Ratchet Headgear.** Used to hold faceshield visor No. 5X609 **(sold separately).** Ratchet adjustment assures perfect fit for all head sizes. When used in combination with visor No. 5X609, meets the requirements of ANSI Z87.1-1989 standard. North brand.

G **Clear Faceshield Visor.** Fits Nos. 5X373 ratchet headgear and 5X799 flat fold faceshield. When used with one of the above, wearer is protected from splash, spray, and flying particles generally encountered in light machine work, chopping, grinding and sanding. 8 x 15.5 x 0.055". North brand.

H **Full Faceshield with Drop Down Ratchet Headgear.** Top and bottom molded plastic caps and lightweight high impact spark guard give extra protection. Antiwarp construction with good internal window clearance. Includes 7 x 19 x .040" replaceable clear window No. 4T540 with keyhole mounting. Free-floating ratchet headgear with full tension adjustment for comfortable fit. Meets ANSI Z87.1-1989 standard. Sellstrom brand.

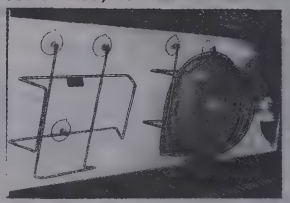
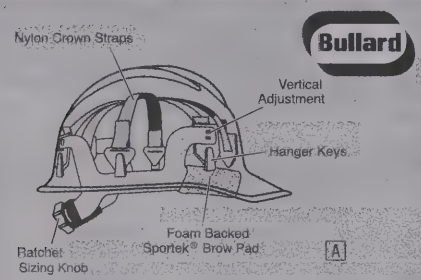
## SIPCO® Products, Inc. HARD HAT RACKS



No. 5T444, Seat Model

No. 5T445, Wall Model

No. 5T445, Wall Model with No. 5T446, Window Mount Kit



Safe and economical way to carry and store safety hard hats and caps in cars, work vehicles or storage facilities. Complies with recommendations contained in ANSI Z89.1-1997. Hard hats should not be stored or carried on the rear window shelf of an automobile since sunlight and extreme heat may cause degradation that will adversely affect the degree of protection they provide. Also, in case of emergency stop or accident hard hats may become hazardous missiles. Rack is made from high grade nickel-plated, heavy-duty wire with spot welds at cross points. Can be shaped to fit any shape of hard hat. Seat model No. 5T444 fits snugly over seat top and will not damage seat material. Wall model No. 5T445 may be permanently mounted in passenger compartments of work vehicles or as storage racks in offices. Window mount kit No. 5T446 consists of three suction cups and hardware. Attaches to wall model No, 5T445 to permit direct mounting of unit to window. Order No. 5T445 and 5T446 Separately to create window model. Sipco brand (STR-1SM, STR-2VM, WMK).

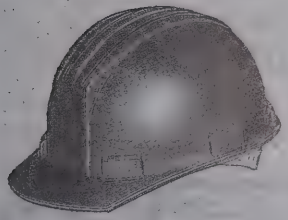
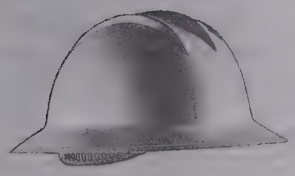
# HARD HATS



- High-density polyethylene hard hats meet ANSI Z89.1-1997 Class E and G requirements, including impact, penetration, and electrical insulation
- Certified by Safety Equipment Institute
- Registered to ISO 9001

Bullard

**Hardhats come complete with Suspensions. No need to order separate suspension.**



A

B

C

D

**A Classic-Style Hard Hats** are versatile for most industrial applications and government agency uses. Wide profile and brim provide ventilation and protection from sun.

Available with 6-point self-sizing suspension or 6-point Sure-Lock® ratchet suspension and Sportek® brow pad. Equipped with accessory slots that accept many attachments including welding helmets, earmuffs, communication devices, and faceshields.

**B Economy-Style Hard Hats** have one of the lightest designs available. Trim profile with rain trough for protection against snow, rain, and dirt.

Available with 4-point self-sizing suspension or 4-point Sure-Lock® ratchet suspension. Equipped with accessory slots that accept many attachments including welding helmets, earmuffs, communication devices, and faceshields. Microporite brow pad.

**C Traditional-Style Hard Hats** feature anatomically designed, rounded-front shell that allows increased air circulation. Available with 4-point self-sizing or 4-point Sure Lock® ratchet suspension. Accessory slots accept most commonly used attachments. Microporite brow pad.

**D Full-Brim Classic-Style Hard Hats** offer traditional hard hat protection plus extra coverage at sides and back of neck. Available with 6-point self-sizing suspension or 6-point Sure-Lock® ratchet suspension and Sportek® brow pad.

## SKULLGARD® PROTECTIVE HEADWEAR

For use in steel and other industries where metal splash and high temperatures are common. Shell and suspension construction offers comfortable fit and limited resistance to top impact and penetration. Layers of resin-impregnated textiles, laminated under pressure, offer heavy-duty protection. Available in two sizes to fit almost any wearer. Meets or exceeds applicable requirements for a Type I helmet (top impact) as outlined in ANSI Z89.1 1997 Class G (formerly Class A). MSA brand.

## THERMALGARD® SLOTTED CAP

Lightweight protection for use in elevated temperatures. Shell and suspension construction offers comfortable fit while providing limited resistance to top impact and penetration. Slotted so accessories can be mounted on cap. High-strength helmet increases wearer acceptance and level of confidence by offering impact and low voltage protection. Injection-molded, rivetless shell of glass reinforced nylon features Staz-On suspension. Meets or exceeds applicable requirements for a Type I helmet (top impact) as outlined in ANSI Z89.1-1997 Class G (formerly Class A). White color. MSA brand (486965).

***New!* No. 4LN98.** Shpg. wt. 0.8 lbs. List $18.92. Each.....**$17.20**

## TOPGARD® CAPS

Shell and suspension construction provide comfortable fit and limited resistance to top impact and penetration. Uni-ridge styling promotes employee acceptance. Slotted so accessories can be mounted on cap. High dielectric strength helps protect workers from electrical shock. Injection-molded, impact resistant polycarbonate shell available with either Staz-On or Fas-Trac ratchet suspension. Meets or exceeds applicable requirements for a Type I helmet (top impact) as outlined in ANSI Z89.1-1 1997 Class E and G (formerly Class A and B). MSA brand.

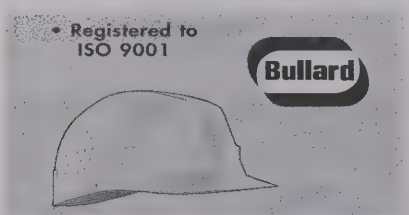
## ADVENT® ADVANCED INDUSTRIAL HELMET

Design and construction include polycarbonate alloy outer shell, expanded polystyrene inner foam core, and ABS inner liner. Plus an expanded polyethylene molded crown cushion and an 8-point Sure-Lock® ratchet suspension system.



In addition to the top impact and penetration protection offered by conventional hard hats, Advent helmets also protect side, front, and the back of head. Construction designed to minimize the rate and level at which forces of impact are transmitted to the brain, neck, and spine. Helmet's outer shell provides superior impact and penetration protection. Permanently attached 2-point chin strap helps provide secure fit.

Meets or exceeds ANSI Z89.1-1997, Type II, Class E and G, and CSA Z94.1-1992 Class G. Bullard brand (A1).

Replacement 8-point Sure-Lock® ratchet suspension available. Bullard brand (ADRTSL).

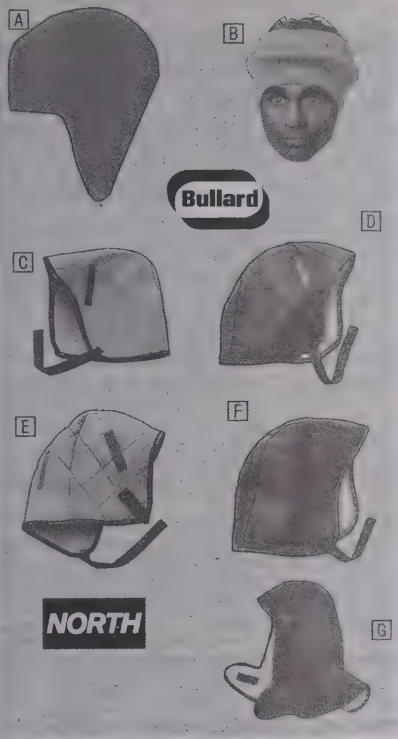
## COOL STUFF™ HEAT RELIEF PRODUCTS



Cool Stuff™ products utilize the evaporation principle to provide a cooling sensation without refrigeration or freezing and without the bulkiness and inconvenience of ice, freezer gels, or spongy material. All items contain two unique types of crystal polymers that absorb over 250 times their weight in water. These polymers absorb water and evaporate at difference rates which enhances the product's ability to stay cool throughout the day. All items are activated by soaking in ice cold water for 20-30 minutes to provide cooling benefits all day long. Items are made of lightweight, breathable cotton and feature a channeled design that eliminates rolling. Neck wrap features a quick release velcro attachment. Bandanas feature a unique full head design. AO Safety Brand.

# WINTER LINERS AND SWEATBANDS

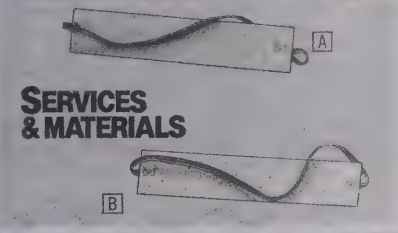
## WINTER LINERS

A **Orion acrylic knit winter liner** slips onto hat suspension, permitting air to circulate through material. This creates a warm air barrier between head and shell without bulky weight. Protects forehead, ears, part of cheeks and nape of neck. Easy to install and remove. Available for 4-point and 6-point suspension systems. One size fits all. Washable, resists fading, flame-retardant†, and dielectric (will not conduct electricity). Bullard brand.

B **Cap-Style Liner** fits all styles of hard caps. Snug fitting style keeps wind out. Flame resistant spun polyester and spandex. Knitted style traps warmth while allowing moisture to evaporate. Available in navy or orange. North brand.

C **Lightweight Liner** provides protection in moderate temperatures. 100% cotton shell with black fastener straps for easy attachment to safety cap suspensions. Napped flannel interior for warmth and comfort. North brand.

D **Fleece Liner** features red heavyweight lining for extra warmth. 100% cotton, 8 oz. blue twill outer shell with black fastener straps. North brand.



E **Thermal Quilted Liner** features quilted blue nylon outer shell with black trim and fastener straps and heather red fleece lining. Standard sizing. North brand.

F **Thermal Long Nape Liner** is styled to provide warmth in sub-freezing temperatures and against wind chill. Longer nape covers neck. 100% cotton, 8 oz. blue twill outer shell and red heavyweight fleece lining. North brand.

G **Thermal Extra-Long Nape Liner** for use in coldest climates. Full head and neck coverage with extra-long nape and wrap-around cape. 100% cotton, 8 oz. blue twill exterior with black trim and fastener straps. Thick 16 oz. sherpa lining for maximum warmth. North brand.

## DISPOSABLE EARPLUGS

C No. 6T546
E•A•R® E•Z•Fit Earplugs

D No. 3AX81
E•A•R® Express™ Pod Plugs

**A E•A•R® Disposable Earplugs** are made of soft, energy-absorbing polymer foam. Foam design allows plug to gradually expand and conform to size and shape of ear canal. Demonstrate consistently high attenuation values and low variability. Plugs are washable and can be comfortably worn for extended periods of time. Corded models feature bright blue cord welded to plug to provide emergency break-away. Dermatologically safe and non-irritating. Attenuation tested in accordance with ANSI S3.19-1974. Yellow color. Also available with bright blue cord. **200 pair per box.** E•A•R brand.

**CLASSIC™**—Noise Reduction Rating (NRR): 29 dB.

**GRANDE™**—Offers highest available Noise Reduction Rating (NRR): 33dB.

**AMIGO™**—Noise Reduction Rating (NRR): 29dB. For medium to smaller ear canals.

**D E•A•R® Express™ Pod Plugs** incorporate the InstaSeal™ system which provides quick and proper fit. Combines attenuating benefits of slow recovery foam with push-in convenience of premolded plugs for a custom, secure, comfortable fit. Eliminates excess foam and excess pressure often experienced by standard polyurethane earplug wearers. Reusable or disposable design provides for less distortion of desired sounds (speech), no rolling or touching of foam, easy cleaning, and instant protection. For dirty work environments and noisy areas where vocal communication is essential. Earplugs tested in accordance with ANSI S3.19-1974. Dermatologically safe and non-irritating. Noise Reduction Rating (NRR): 25dB. Blue grips with yellow foam. Also available with bright blue cord. **100 pair per box.** E•A•R brand.

## METAL DETECTABLE EARPLUGS

**E•A•R Tracers Metal Detectable Reusable Earplugs** incorporate all the specifications of the E•A•R. UltraFit Plugs (No. 4T149) with additional advantages/differences. Molded in bright blue non-food color, they feature an attached cord and contain a surgical-grade stainless steel ball-bearing securely positioned in the stem. This allows them to be "traced" by most standard metal detectors. This combination of, color cord and detectability combined with the UltraFit design makes them ideal for the food processing industry. Earplugs tested in accordance with ANSI S3.19-1974. Noise reduction Rating (NRR): 21 dB. E•A•R brand. (340-4007)

**No. 2AC59.** Shpg. wt. 0.1 lbs. List .....$2.10. Each **$1.76;** Lots 25 .....**$1.67**

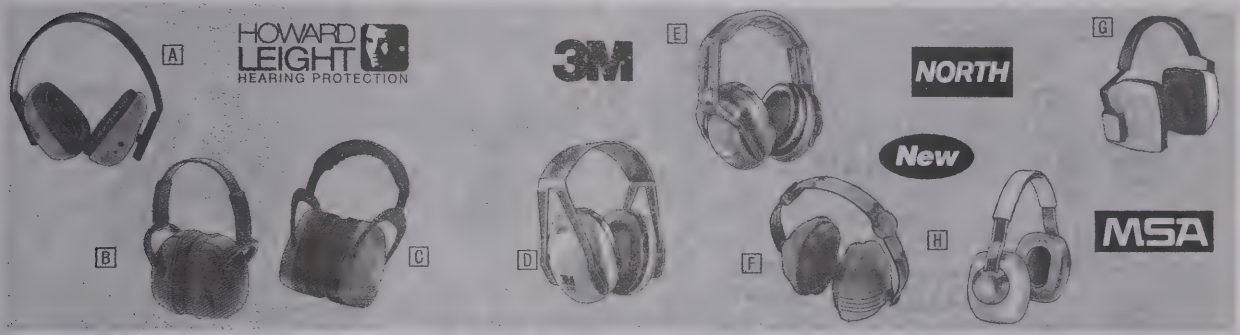
## DECI 4300® SEMI-AURAL CANAL CAP

The Deci 4300® is a lightweight, reusable hearing protector designed to be worn under the chin. Thermoplastic pods provide good canal sealing and distinctive color aids in determining whether the product is being worn properly. Ideal for workers who are in and out of harmful noise level areas and for plant tours. (NRR): 16. North brand (28-43-00).

*New!* **No. 4RL99.** Shpg. wt. 4.0 List ..... $4.07.
Each **$3.04;** Lots 12 ..... **$2.89**

## BILSOM COOL II™ EAR MUFF PADS



**Bilsom Cool II™ Absorbent Ear Muff Pads** fit all Bilsom ear muffs and most other competitive muffs on the market. For hot environments to absorb moisture and in cold environments to keep vinyl cushions away from skin surface. Use when muffs are shared by groups of visitors.

Holds 15 times its own weight in moisture. Inner cellulose layer features super-absorbent fibers to pull moisture away from skin. Reusable after overnight drying. Surface layers are dermatologically tested polypropylene non-woven material for maximum comfort and hygiene. Acrylic adhesive for positioning and easy removal. No affect on attenuation characteristics. Bilsom brand (3456).

**No. 6AV10.** Shpg. wt. 0.1 lbs. List ..... $2.51.
Each **$2.28;** Lots 20 ..... **$2.17**

# HEARING PROTECTION

## EAR MUFFS

A **Multiposition Ear Muff** features unique swivel action. Fully dielectric. Built-in detents secure cups in place, giving wearer a positive fit in any position, over the head, under the chin or behind the head. Soft foam cushions for long term use, and washable for months of hygienic use. Cushions pop off for easy replacement. Attenuation tested in accordance with ANSI S3.19-1974. Noise Reduction Rating (NRR) is 26 dB. Glo-Orange color. Howard Leight brand.

B **Folding Ear Muff** has a compact design for easy storage when not in use. Fully dielectric construction and high noise rating make it suitable for virtually any noise environment. Replaceable and washable soft foam-filled cushions for extended use. Attenuation tested in accordance with ANSI S3.19-1974. Noise Reduction Rating (NRR) is 28 dB. Red color. Howard Leight brand.

C **Thunder 29 Ear Muff** has a Noise Reduction Rating (NRR) of 29 dB. Fully dielectric with extra long padded headband for a comfortable fit. Oversized vinyl cushions help distribute pressure evenly around the outer ear for maximum user comfort. Can be worn comfortably with eye protection or spectacles. Replaceable and washable soft foam ear cushions ideal for extended use. Attenuation tested in accordance with ANSI S3.19-1974. Gray/black color. Howard Leight brand.

D **Multiposition Ear Muff** features large ear cup and soft sealing cushions for greater comfort and fit. Wide, forked headband creates a comfortable and consistent ear-cup seal. Tested in accordance with ANSI S3.19-1974. Noise Reduction Rating (NRR) is 23 dB. Black/orange color. 3M brand.

E **Contoured Ear Muff** offers multiple positions and sliding headband tension adjustment system for greater comfort and fit. Contoured ear-cushion seal provides improved sound insulation and fit. Wide, padded headband adds comfort and creates consistent ear-cup seal. Tested in accordance with ANSI S3.19-1974. Noise Reduction Rating (NRR) is 24 dB. Black/blue color. 3M brand.

F **Dielectric Ear Muff** has no metal parts making it completely safe for use in electrical atmosphere by construction and electrical contract workers. Lightweight 8 oz. construction and 360° headband provide comfort and convenience, enabling muff to be worn over the head, under the chin or behind the head. Two-piece ratchet headband for custom fit without pulling of snagging hair. Noise Reduction Rating (NRR) is 23/23/22** dB. North brand.

G **Industrial Ear Muff** is lightweight with minimum headband pressure and foam-filled ear cushions for added comfort. 360° rotatable headband has ratchet mechanism to lock-in chosen position. For use in plants, shops, mills, airports and construction sites where high frequency noise can be hazardous. Frequency protection range allows wearer to hear fellow workers and warning signals without sacrificing protection. Noise Reduction Rating (NRR) is 25/24/23** dB. North brand.

H **Sound Blocker™ Ear Muff** is lightweight and easily adjustable. Can be worn alone or with other protective accessories. Tested in accordance with ANSI and EPA requirements. Noise Reduction Rationg (NRR): 26 dB. MSA brand.

# HEARING PROTECTION

## EAR MUFFS

A **Cap Mounted Ear Muff** fits most slotted hard hats. Designed to give a secure fit, can be easily snapped into rest position when not in use. Suitable for a wide variety of noise environments with a Noise Reduction Rating (NRR) of 25 dB. Soft foam cushions are washable for months of hygienic use. Cushions pop off for easy replacement. Attenuation tested in accordance with ANSI S3.19-1974. Packaged in poly-bag with header card. Glo-Orange color. Howard Leight brand.

B **Cap Mounted Ear Muff** fits a variety of hard hats with no additional adaptors required. Ear muff flips up and locks in place when not in use. Beveled ear cups fit comfortably under hard hats. Multiposition ear cup for fit and comfort. Black/blue color. 3M brand.

C **Cap Mounted Ear Muff** is designed to fit virtually all slotted hardhats. Eliminates necessity of purchasing separate adapters. When muffs are not in use they swing up and seal against hardhat preventing dirt and debris from entering dome. Peltor brand.

D **Cap Mounted Ear Muff** is economical, lightweight, and designed to be worn with Nos. 4X637, 5X808, and 4T885 thru 4T888 hard hats (order hats separately). Ear cups, contoured with large seal areas, are individually adjustable for greatest comfort. North brand.

E **Bilsom 718™ Cap Mounted Ear Muff** features dielectric protection with lightweight construction. Locking height adjustment for custom fit. Extra wide cups and replaceable soft cushions for wearer comfort. Black cups with blue trim. Bilsom brand.

F **Cap Mounted Ear Muff** fits virtually all slotted hardhats. Can be used in rest, usage and storage positions. Dual shell design allows cup to minimize resonance and achieve maximum high frequency attenuation. Black cups with red trim. Peltor brand.

G **Sound Blocker®** Cap Mounted Ear Muffs mounts directly to MSA slotted caps to become working part of helmet. For use where air compressors, turbines and jack hammers are used. Arms can be rotated upward so that the muff can rest on the hard hat when not in use. Tested in accordance with EPA and ANSI requirements. MSA brand.

H **EAR 2000H Cap Mounted Ear Muff.** Mounts to most hard hats without adapter. Lightweight, durable plastic dielectric construction. Muffs swing up and out of the way quickly, special "at rest" position eliminates contact with dirty hard hats and reduces contamination and risk of cushion distortion. Disassembles quickly for easy cleaning and replacement. EAR brand.

I **Backband Ear Muff** is a lightweight, low profile hearing protector that fits under a welding helmet, safety cap, sandblast helmet, or industrial hard hat. Patented liquid/foam ear cushion allows wearer total comfort. Peltor brand.

J **Stow-Away Ear Muff** for metal workers, carpenters, construction workers, and competitive shooting teams. Folds up for easy storage; fits easily into tool boxes and gun cases. Stays hygienically clean because dirt cannot enter ear cup chamber when muff is folded. Peltor brand.

K **LumberJack™ Combination Unit** is a trifunction unit which offers head, face and hearing protection. Especially designed for logging and tree trimming industry, it is now extremely popular with homeowner chain saw users. Exclusive patented front visor sealing eliminates saw dust and debris from falling between mesh screen and hardcap. Mesh screen and muffs can be placed in either up or down position. International orange color for high visibility. Peltor brand.

# HEARING PROTECTION

## EAR MUFFS

A **E•A•R Ultra 9000® Noise Activated Ear Muff** offers protection along with natural sound quality and the ability to hear normal communications and other low and moderate level sounds. Ideally suited for those who have a critical need to hear machinery sounds and verbal communications. Patented valve system consists of precision orifices in a tuned acoustical duct allowing muff to react to high-level impulses (greater than 120dB) with increased attenuation. No electronics, batteries, microphones, or moving parts are required. Features soft, foam-filled cushions and a no-snag, adjustable headband. Black cup color. Included crown strap should be worn when muff is used behind-the-head or under-the-chin. Attenuation tested in accordance with ANSI S3.19-1974. E•A•R brand.

B **E•A•R 1000 Ear Muff** is constructed of lightweight, dielectric rugged plastic. Features soft-foam filled cushions, pivoting earcup connections for comfortable seal and large earcup openings to fit more users. Reinforced headband automatically adjusts in all three positions. Attenuation tested in accordance with ANSI S3.19-1974. Dark red cup color. E•A•R brand.

C **E•A•R 820 Ear Muff** provides economical dielectric protection for many applications. All plastic construction with soft, foam-filled cushions. Universal headband provides secure fit in three positions while providing effective attenuation for most environments. Adjustable large volume earcups. Attenuation tested in accordance with ANSI S3.19-1974. Dark red cup color. E•A•R brand.

D **E•A•R 3000 Ear Muff** is constructed of lightweight, non-conductive (dielectric) rugged plastic. Features soft foam-filled cushions, pivoting earcup connections for comfortable seal, and larger earcup openings to fit more users with greater ease. Reinforced plastic headband automatically adjusts for a snug, comfortable fit in all three positions. Crown strap included and should be worn when muff is used behind-the-head or under-the-chin. Dark red cup color. Attenuation tested in accordance with ANSI S3.19-1974. E•A•R brand.

E **Bilsom Warrior™ Ear Muff** offers economical dielectric protection for extreme noise levels. Three wearing positions for over the head, under the chin and behind the head applications. Lightweight 6.5 oz. unit for added comfort. Teal cup color. Bilsom brand.

F **Bilsom 717 Low Protector Ear Muff** comes in black with a royal blue trim. Lightweight (weighs only 6 oz.). Durable dielectric protection for a variety of applications. Broad ear cushions increase comfort and fits over the entire ear lobe. Replaceable ear cushions. Bilsom brand.

G **Bilsom 727™ Ear Muff** offers dielectric protection for applications with high noise levels. Lightweight design enables prolonged wearing times without discomfort. Flexibly mounted cups ensure a close, leak-free fit and provide generous space for ears. Quick-Click locking adjustment for customized fit. Wide replaceable cushions. Bilsom brand.

H **Bilsom Viking 29™ Ear Muff** offers di- electric protection for many applications. Excellent low frequency protection. Lightweight 8.8 oz. construction and low pressure for user comfort. Three wearing positions allows muff to be worn over the head, under the chin or behind the head. Black cup color. Bilsom brand.

I **Peltor Universal Ear Muff** features lightweight stainless steel headband. Each dome has two-point suspension to provide even, comfortable alignment to head. Bright yellow color for easy visibility. Peltor brand.

J **Peltor High Noise Ear Muff** for use in extreme high noise areas such as airports, mills, and various industrial applications. Provides excellent protection at both extreme high and low frequency levels. Muff has stainless steel headband with wide padded head cushion. Patented liquid/foam ear cushions allow low head pressure and lightweight comfort. Dark green cup color. Peltor brand.

K **Peltor Deluxe High Noise Ear Muff** features wide softly padded headband with individual stainless spring steel wires for comfortable fit. Wide foam-filled ear cushions are replaceable and provide excellent sealing properties, good fit and low surface pressure. Hygenically textured plastic outer layer allows for ventilation and durability. Black/red cup color. Peltor brand.

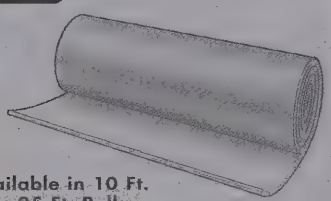
# NOISE CONTROL PRODUCTS

## SORBA-GLAS® NOISE-ABSORBING WALL BLANKETS

Multiple Blankets Shown

- **For use on walls or ceilings**
- **Abrasion resistant silver facing is impervious to water, dust, oil, grease, and most solvents**



Noise-absorbing ceiling or wall coverings used in areas with excessive noise and echoing. Fiberglass center is quilted between a tough silver facing that is highly resistant to abrasion and is impervious to water, dust, oil, grease, and most solvents. Blanket is 4'W x 8'H and 1" thick. Four grommets along the 4 ft. side of each blanket accept standard hardware for installation.

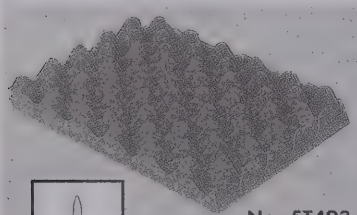
Sorba-Glas® meets ASTM E-84 Class I Fire Rating. NRC*: 0.75. Industrial Noise Control Brand (110).

**No. 5T498.** Shpg. wt. 14.0 lbs. List.....$158.91. Each...**$143.10**; Lots 2.....**$135.95**

(*) Noise Reduction Coefficient (NRC) values are reported per ASTM C 423-84a to the nearest 0.05 Sabins/ft².

## ALUMINIZED MYLAR ACOUSTICAL FOAM

Available in 10 Ft. or 25 Ft. Rolls



- **Maximum sound absorption**
- **Reflects light and heat**
- **Wipe-clean aluminized film surface resists moisture, lubricants, and fuels**
- **Flame-retardant finish**

Provides maximum sound absorption while reflecting heat and light. Combines the advantages of flexible, strong foam with a wipe-clean, light reflective 1 mil aluminized film facing. Recommended for use in dirty environments, as aluminized film protects against moisture, lubricants, and fuels. Meets or exceeds Flame Retardant Tests UL-94 and ASTM D1692-74. Temperature limits are -20°F to 120°F continuous. Sold in 1" thick rolls. NRC*: 0.55. Industrial Noise Control brand.

| Roll Size W | Roll Size L | INC. Model | Stock No. | List | Each | Lots 2 | Shpg. Wt. |
|---|---|---|---|---|---|---|---|
| **54"** | **10 ft.** | K10-M10 | **5T510** | $126.63 | **$107.60** | **$102.21** | 10.0 |
| **54** | **25** | K10-M25 | **5T511** | 257.78 | **219.50** | **208.35** | 21.0 |

(*) Noise Reduction Coefficient (NRC) values are reported per ASTM C 423-84a to the nearest 0.05 Sabins/ft².

## ACOUSTICAL CONVOLUTED FOAM

No. 5T493 Acoustical Convoluted Foam

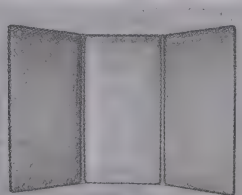
No. 5T495 Foam Adhesive

**Convoluted foam sheets** are scientifically developed to absorb low frequency sound when nailed or glued on walls, machine enclosures, ducting systems, privacy panels in offices, sound traps, and computer rooms.

**Cone shape** deflects sound waves striking at an angle and allows them to be reflected and reabsorbed by other cones, thus effectively "entrapping" sound.

**Excellent chemical resistance** to most oils, alkali, and mild acids. Temperature resistance is -45°F to 250°F. Foam meets UL-94 Rating (self-extinguishing). Gray color. Sold four 54 x 27" sheets per box. Industrial Noise Control brand.

| Thickness (In.) | NRC* | Stock No. | List | Each Box | Lots 2 | Shpg. Wt. |
|---|---|---|---|---|---|---|
| **1** | 0.70 | **5T492** | $84.79 | **$76.35** | **$72.53** | 13.0 |
| **2** | 0.80 | **5T493** | 163.13 | **146.90** | **139.56** | 18.0 |
| **3** | 0.85 | **5T494** | 232.63 | **209.75** | **199.26** | 23.0 |



(*) Noise Reduction Coefficient (NRC) values are reported per ASTM C 423-84a to the nearest 0.05 Sabins/ft².

**Foam Adhesive.** Simply spread adhesive on back of foam and allow to set for one minute. Packaged in 11 oz. cartridge for use with any standard caulking gun. Industrial Noise Control brand (PA-02).

**No. 5T495❸.** Shpg. wt. 1.1 lbs.. List $8.10. Each **$7.30**; Lots 12.....**$6.94**

❸ These products are covered by OSHA Hazard Communication Standard, and Material Safety Data Sheets (MSDS) are available. See page opposite inside back cover.

## MODULAR ACOUSTICAL SCREEN

Three Screens Shown

Free-standing, portable units can be used individually or in groups to enclose or divide noisy areas. Completely modular design accommodates changing production layouts. Great around cut-off saws, grinders, small compressors, and fans.

Each unit includes a snap-lock tubular steel frame with no loose connections, reinforced loaded vinyl barrier curtain, and quilted fiberglass noise absorber panel. Mechanical fasteners along each curtain edge seal screens to one another.

Metallic gray curtain measures 54"W x 8'H. Tubular steel black epoxy coated frame. Frame measures 4'W x 8'H. Curtain is flame retardant and weighs 1 lb. per sq. ft. Random Noise Reduction Coefficient (NRC): 0.75. Industrial Noise Control brand (NS-117PKD).

**No. 5T512.** Shpg. wt. 52.0 lbs. List .....$322.92. Each **$274.25**; Lots 2.....**$260.40**

# NOISE CONTROL PRODUCTS

## BAFL-SORB OVERHEAD SOUND BAFFLES

- **Reduce overall noise levels**
- **Eliminate totally enclosing machinery or employees**

Baffles are hung vertically from the ceiling, therefore, not interfering with existing ventilation, lighting, or sprinklers. They act as noise absorbers designed to dissipate reflected noise. Improve acoustical comfort and ease of communication by reducing noise levels and echoing over large areas.

Baffles are a viable and economical noise control solution; specifically around noise areas that will not allow for the placement of a screen, curtain, or total enclosure. White color.

**Acoustical Absorption:** 9.0 sabins per baffle. Entire baffle meets ASTM E-84 Class I fire rating. Flame spread 5. Smoke density 5.

**Installation:** 2' x 4' x 1.5" baffles are suspended from cable and should be hung at ceiling level. If sprinklers are present, the top of the baffles should be a minimum of 18" below the sprinkler heads. Coverage should be approximately one baffle per every 10 sq. ft. of ceiling area. **Each box contains 10 baffles** and provides approximately 100 sq. ft. coverage. Industrial Noise Control brand (24G).

**No. 5T496.** Shpg. wt. 26.0 lbs. List ..... $147.97.
Each(Box of 10 baffles)**$133.00;** Lots 2 ..... **$126.32**

**Baffle Hanging Kit.** Support System used to hang baffles. Includes 50 ft. of stranded cable, 5 turnbuckles, and 10 cable sleeves. Industrial Noise Control brand.

**No. 5T497.** Shpg. wt. 1.0 lbs. List ..... $32.82.
Each**$29.60;** Lots 6 ..... **$28.12**

## STEEL ENCASED ACOUSTIC PANELS

No. 4RC07

Easily mounted on walls, ceilings or partitions, panels offer superior acoustical performance with a Noise Reduction Rating of 1.05. Bright white finish over durable steel construction, suitable for production facilities, warehouses or office areas.

Panels feature 22 gauge zinc-coated steel top and bottom mounting rails and 3 lb./cu. ft. density fiberglass noise absorbing core encased in steel. Components meet flammability ASTM E-84 Class I (A).

Panels mount directly to walls, ceilings, or any flat surface via bottom mounting channel and top header (mounting fasteners not included). For best results, 40-50% wall coverage is recommeneded, 3-6" space between adjacent units maximizes performance. Packaged one 2D x 30W x 60"H or 96"H* panel per box. Industrial Noise Control brand.

***New*** **No. 4RC07.** 60" White Acoustic Steel Panel. Shpg. wt. 34.0 lbs. List ..... $207.74.
Each $176.50; Lots 2 ..... **$167.47**

***New*** **No. 4RC08.** 96" White Acoustic Steel Panel. Shpg. wt. 54.0 lbs. List ..... $289.82.
Each **$246.00**, Lots 2 ..... **$233.57**

(*)Mounting channel adds 2" to overall panel length.

## DECORATIVE FABRIC ACOUSTIC PANELS

No. 4RC06

Neutrally-colored blue or gray panels blend with many office decors. Panels provide Noise Reduction Coefficient of 0.70. Feature 6-lb./cu. ft. density fiberglass noise absorbing core, completely covered with fabric. Both components meet flammability ASTM E-84 Class I (A).

Panels mount easily to walls, partitions or any flat surface using adhesive or standard hardware, not included. One 1D x 24H x 48"W panel per box. Industrial Noise Control brand.

***New*** **No. 4RC05.** Blue Acoustic Panel. Shpg. wt. 9.0 lbs. List ..... $107.01.
Each $90.90; Lots 2 ..... **$86.32**

***New*** **No. 4RC06.** Gray Acoustic Panel. Shpg. wt. 9.0 lbs. List ..... $107.01.
Each $90.90; Lots 2 ..... **$86.32**

## SELECT QUALITY PRODUCTS FROM LEADING MANUFACTURERS WITH PROVEN PERFORMANCE

**Grainger features quality products from the brand name manufacturers you know and trust. More than 900 national brands are listed in the Brand Index at the back of this catalog.**

# GUIDE TO RESPIRATOR SELECTION

## TYPES OF RESPIRATORS

Respirators may be grouped into three major categories, air-purifying, supplied air (or airline) and self-contained breathing apparatus (SCBA). These major categories are defined by how the respirators work to protect the wearer from airborne contaminates. These categories can also be used as a basic guide in understanding the level of protection provided by the respirator. Air-purifying respirators provide lower levels of protection. If greater protection is required, a supplied air respirator may be used. An SCBA or a pressure demand airline respirator with an emergency escape bottle provide the highest level of protection. Instances when this protection factor is required include when an atmosphere is immediately dangerous to life or health (IDLH), or the contaminants and/or their concentrations are unknown. (An IDLH atmosphere is an atmosphere concentration of any toxic, corrosive or asphyxiant substance that possess an immediate threat to life, would cause irreversible effects on health, or would interfere with the ability to escape from a dangerous atmosphere.)

The following are very brief descriptions of the three categories. These definitions should be used for general information only, and do not replace the thorough understanding of respiratory protection required before selecting the appropriate respirator.

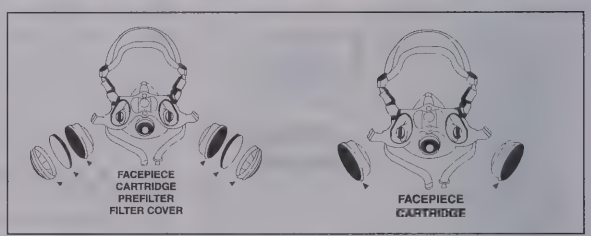
### AIR PURIFYING RESPIRATORS

These respirators are used only in environments that contain enough oxygen to sustain life (at least 19.5% oxygen). These units make use of special filters and cartridges that remove specific gases, vapors and/or particulates from the air. In order to be effective, the level of contaminants must be within the concentration limitations of that respirator. Also, the respirator chosen must be appropriate for the specific contaminant(s) of the environment in which it will be used. The useful life of these respirators depends upon the concentration of the contaminants, the breathing volume of the user, the capacity of the air-purifying filter medium, relative humidity and room ventilation. NIOSH Certified air-purifying respirators do not protect against all air contaminants in the various approval categories. Air purifying respirators should be used for protection against only the types of contaminants listed on the filters and cartridges, and on the NIOSH approval label which is affixed to each respirator carton and replacement filter/cartridge carton. Types of air purifying respirators include: No maintenance, Low maintenance, Reusable, and Powered Air-Purifying Respirators.

No Maintenance

Low Maintenance

Reusable



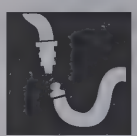
PAPR

### CARTRIDGES AND FILTERS

Cartridges contain carbon which absorbs certain toxic vapors and gases. When the wearer detects any taste or smell that indicates the charcoal's absorption capacity has been reached, this means the cartridge can no longer remove the contaminant.

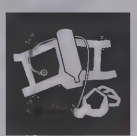
Filters remove particulates such as dusts, mists, and metal fumes by trapping them within the filter material. Filters should be changed when it becomes difficult to breathe.

Depending on the contaminants, cartridges can be used alone or in combination with a filter/pre-filter and filter cover. Cartridges are also available with a P100 filter permanently attached.



### SUPPLIED AIR RESPIRATORS

These respirators are used in toxic environments. Some supplied air respirators can also be used in environments that are immediately dangerous to life and health (IDLH) as long as they're equipped with an air cylinder for emergency escape. These respirators provide a supply of air, for extended periods of time, via a high pressure hose that is connected to an external source of air such as a compressor, compressed air cylinder, or portable breathing pump. Supplied Air Respirators offer a higher level of protection in atmospheres where air purifying respirators are not sufficient. Types of supplied air respirators are: continuous flow and pressure demand.



Continuous Flow

Pressure Demand

Couplers & Hoses

### SELF CONTAINED BREATHING APPARATUS (SCBA)

SCBA's provide the highest level of respiratory protection available. They protect workers in oxygen deficient atmospheres (below 19.5% oxygen), in poorly ventilated or confined space areas, and in atmospheres that are immediately dangerous to life and health (IDLH). These respirators provide a supply of air (30 or 60 minutes in duration) from a compressed air cylinder worn on the user's back. SCBA's allow free movement making them particularly suitable for emergency response situations. Emergency Escape Breathing Apparatus' are a smaller version of a SCBA cylinder to be used only for escape from hazardous environments as described above. These units generally provide a supply of air that is 5 or 10 minutes in duration.

SCBA

EEBA

### AIR SOURCES

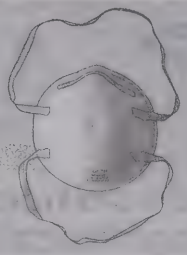
Provide a source of Grade 'D' or better breathing air to supplied air respirator users. There are four main types of air sources: filtration systems, portable systems, pumps, and compressors.

Air Sources

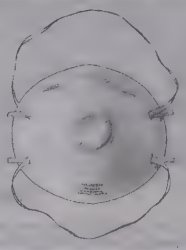
### TRAINING/ACCESSORIES

Video tapes provide an effective supplement to personal respirator training. Respirator detergent and wipes provide a means for maintaining and cleaning respirators. Fit test and seal check kits provide necessary materials for qualitative fit tests.

Training



Close it, lock it, keep it safe — You'll find the right stuff right here.



# RESPIRATORY PROTECTION

**NO MAINTENANCE RESPIRATORS**

No. 3A181

New

No. 4RM10

NORTH Registered to ISO 9001

## N95 PARTICULATE RESPIRATOR

**No. 3A181. Lightweight, low profile design** provides worker comfort, minimizes interference with eye protection. Collapse resistant outer shell and low breathing resistance increase life of respirator. Maintenance free. **20 respirators per package.** NIOSH approval TC-84A-160 for protection against non-oil particulates. North brand (7175N95).

**No. 3A181.** Shpg. wt. 0.4 lbs. List $25.62. Each **$19.20; Lots 6.....$18.24**

## N95 PARTICULATE RESPIRATOR WITH EXHALATION VALVE

All the features of the N95 respirator above plus a built-in exhalation valve to provide easier breathing. Also reduces moisture build-up and facilitates positive pressure fit check. NIOSH approval TC-84A-160 for protection against non-oil particulates. **10 per package.** North Brand. (7176N95).

***New* No. 4RM10.** Shpg. wt. 1.0 List $23.08. Each **$21.98; Lots 6 .....$20.89**

## WELDING RESPIRATOR FOR NON-OIL PARTICULATES

Low-profile design provides excellent field of vision and fits under most welding helmets. Large filter surface area provides low breathing resistance and features a patented inhalation/exhalation system that keeps the worker dry and cool. Replaceable filters available. NIOSH approval TC84A-2460. North Brand. (7190N99).

**No. 4RM12.** Shpg. wt. 0.2 lbs. List.....$11.55.
Each **$11.00; Lots 12**.....**$10.45**

**Replacement Filters for 4RM12. Two filters per package.**

**No. 4RM11.** Shpg. wt. 0.2 lbs. List.....$6.11.
Each **$5.50; Lots 12**.....**$5.23**

**COMPLETE INDEX AT BACK OF CATALOG WILL HELP YOU QUICKLY LOCATE YOUR NEEDS**

- **Minimal Acceptable Respiratory Program according the 29 CFR 1910.134(b). OSHA has set fourth four requirements for a Respiratory Protection Program.**

1. The employer shall establish a written program with worksite specific procedures that are updated as necessary.
2. Certain procedures must be followed for voluntary use of respirators in non-hazardous atmospheres.
3. The program must be administered by a trained program administrator.
4. Respirators, training and medical evaluators must be provided at no cost to the employee.

- **There are nine specific elements that are required to be in the written program.**

(I)Procedures for selecting respirators for use in the workplace

### OSHA REQUIREMENTS

(II) Medical evaluations of employee required to wear respirators

(III) Fit testing procedures for for tight fitting respirators.

(IV) Procedures for proper use of respirators in routine and reasonably foreseable emergency situations.

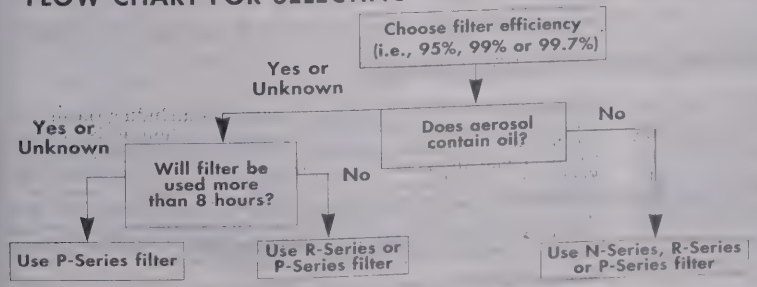
(V) Procedures and schedules for cleaning, disinfecting, storing, inspecting, repairing, discarding, and otherwise maintaining respirators.

(VI) Procedures to ensure adequate air quality, quantity, and flow of breathing air for atmosphere-supplying respirators.

(VII) Training of employees in the respiratory hazards to which they are potentially exposed during routine and emergency situations.

(VIII) Training of employees in the proper use of respirators, including putting on and removing them, any limitation on their use, and their maintenance.

(IX) Proceduers for regularly evaluating the effectiveness of the program.



- **If a respirator is used voluntarily, the employer must:**

(I) Make a determination that the respirator will not create a hazard to the wearer.

(II) Have a written respiratory program that includesthe elementslisted above that are necessary to ensure that the user is medically fit to wear the respirator, and that the respirator is clean, stored and maintained in such a manner that it does not create a hazard to the user.

- **If the respirator used voluntarily is of the filtering facepiece type, then no written program is needed.**

## FLOW CHART FOR SELECTING PART 84 PARTICULATE FILTERS

## NIOSH 42 CFR84 NINE FILTER CLASSIFICATIONS

**N For solid particulates and non-oil aerosols that do not degrade filter performance.**

**R For solid particulates and degrading oil-based aerosols. R filters have "Use Limitations."**

**P For solid particulates and degrading oil based aerosols. P filters have no "Use Limitations" other than those normally associated with particulate filters.**

Three Efficiency Levels:
95% 99% 99.97%

# RESPIRATORY PROTECTION

## WELDING RESPIRATORS

**N95** approved for solid and liquid aerosols that do not contain oil. For use when welding, torch cutting, soldering, brazing, and working with molten metals. Helps provide protection when welding on galvanized and stainless steel. Easily fits under a welding hood. Features adjustable straps, faceseal, Cool Flow™ exhalation valve, and cake resistant filter media for added comfort and durability. May replace 4T109, 3M Brand (9920) for certain applications. **Sold in boxes of 10 respirators each.** NIOSH 42 CFR 84 Approval TC-84A-0454. 3M brand (8212).

**No. 4JG36.** Shpg. wt. 0.9 lbs. List $56.54. Each box ..... **$51.40**

**N95** approved for solid and liquid aerosols that do not contain oil. Provides all the features of No. 4JG36 with a chemical adsorbent for relief from nuisance-level welding odors. Cool Flow™ exhalation valve improves worker comfort. May replace 3T963, 3M Brand (9925) for certain applications. **Sold in boxes of 10 respirators each.** NIOSH 42 CFR 84 Approval TC-84A-0454. 3M Brand (8214).

***New*No. 4MH63.** Shpg. wt. 1.0 lbs. List $69.75. Each box ..... **$62.80**

**N95** approved for solid and liquid aerosols that do not contain oil. Provides all the features of No. 4JG36 without a faceseal. May replace No. 4T109, 3M Brand (9920) for certain applications. **Sold in boxes of 10 respirators each.** NIOSH 42 CFR 84 Approval TC-84A-0454. 3M brand (8512).

***New*No. 4MH65.** Shpg. wt. 0.6 lbs. List $52.25. Each ..... **$47.05**

**N95** approved for solid and liquid aerosols that do not contain oil. Provides all the features of the No. 4MH63 wihtout a faceseal. May replace No. 3T963, 3M Brand (9925) for certain applications. **Sold in boxes of 10 respirators each.** NIOSH 42 CFR 84 Approval TC-84A-0454. 3M brand (8514).

***New*No. 4MH66.** Shpg. wt. 0.6 lbs. List $65.60. Each box ..... **$59.10**

## ODOR-REMOVING RESPIRATORS

**R95** approved for solid aerosols including oils. 3M recommended nuisance level chlorine, hydrogen fluoride, and sulfur dioxide relief. Time restriction of eight hours of continuous or intermittent use may apply when oil aerosols are present. For use in primary aluminum reduction, chemical processing, glass etching, paper mills, and petrochemical industries. Do not use in situations where the chlorine, hydrogen fluoride, and sulfur dioxide exposure exceeds the OSHA PEL. May replace 3T937, 3M Brand (9906) and 3T940, 3M Brand (9915).**Sold in boxes of 20** respirators each. NIOSH Approval TC-84A-1350. 3M brand (8246).

**No. 4JG01.** Shpg. wt. 0.7 lbs. List $58.41. Each box ..... **$53.10**

**R95** approved for solid and liquid aerosols including oils. 3M recommended nuisance level organic vapor relief. Time use restriction of eight hours of continuous or intermittent use may apply when oil aerosols are present. For use in applications such as foundries, undercoating, petroleum operations, and agricultural situations where particles are present with concentrations of organic vapors below the OSHA PEL. May replace 3T939, 3M Brand (9913). **Sold in boxes of 20** respirators each. NIOSH Approval TC-84A-1350. 3M brand (8247).

**No. 4JG02.** Shpg. wt. 0.7 lbs. List $64.95. Each ..... **$59.05**

**P95** approved for solid and liquid aerosols including oils. 3M recommended nuisance level chlorine, hydrogen fluoride and sulfur dioxide relief. 3M time use restriction applies when oil aerosols are present. Features conformable "M" nose clip to help provide a good fit and Cool Flow™ exhalation valve to reduce heat and moisture build up inside the respirator. For use in primary aluminum reduction, chemical processing, glass etching, paper mills, and petrochemical industries whn adverse conditions and prolonged use are a concern. Do not use in situations where chlorine, hydrogen fluoride or sulfur dioxide exposures exceed the OSHA PEL. May replace 5F762, 3M brand (9916). **Sold in boxes of 10 respirators each.** NIOSH Approval TC-84A-1166. 3M brand (8576).

***New*No. 4MH58.** Shpg. wt. 0.6 lbs. List $37.50. Each ..... **$33.95**

**P95** approved for solid and liquid particles including those containing oil. 3M recommended nuisance level organic vapor relief. 3M time use restriction applies when oil aerosols are present. Features conformable "M" nose clip to help provide a good fit and Cool Flow™ exhalation valve to reduce heat and moisture build up inside the respirator. For use in applications such as foundries, undercoating, petroleum operations and agricultural situations where adverse conditions and prolonged use are a concern. Do not use in situations where organic vapors exceed the OSHA PEL. May replace 3T939, 3M Brand (9913). **Sold in boxes of 10 respirators each.** NIOSH Approval TC-84A-1166. 3M brand (8577).

***New*No. 4MH59.** Shpg. wt. 0.6 lbs. List $40.50. Each box ..... **$36.55**

## OSHA SUBSTANCE SPECIFIC RESPIRATORS

**N100** approved for solid and liquid aerosols that do not contain oil. For use when grinding, welding, working with lead, or situations where arsenic or cadmium are present up to 10X the OSHA PEL. Features adjustable straps, Cool Flow™ exhalation valve and a conformable faceseal for added comfort and durability. May replace 4T909 & 4T910, 3M Brands (9970M, 9970L) in certain applications. **Sold in bags of 1 respirator each.** NIOSH 42 CFR 84 Approval TC-84A-1298. 3M brand (8233).

**No. 4JG03.** Shpg. wt. 0.1 lbs. List $7.44. Each ..... **$6.76**

**P100** approved for solid and liquid particles including those containing oil. 3M time use restriction applies when oil is present. For use when grinding, welding, working with lead or situations where arsenic or cadmium are present up to 10X the OSHA PEL. Features adjustable straps, Cool Flow™ exhalation valve and a conformable faceseal for added comfort, durability and fit. May replace 4T909 & 4T910, 3M Brands (9970M, 9970IL) in certain applications. **Sold in bags of 1 respirator each.** NIOSH 42 CFR 84 Approval TC-84A-2561. 3M brand (8293).

***New*No. 4MH54.** Shpg. wt. 0.1 lbs. List $8.15. Each ..... **$7.35**

## 3M™ PARTICULATE RESPIRATORS 42 CFR 84 RESPIRATORS

42CFR84 RESOURCE TEAM

All 3M half facepiece particulate respirators are NIOSH approved and recommended for up to 10 x PEL, or the appropriate OSHA standard, whichever is lower. For more information on respirators or specific questions regarding your application, call 3M Technical Assistance at 1-800-243-4630.

No. 3KP43 N95 Respirator | No. 4JF99 P95 Respirator | No. 4MH64 R95 Respirator | No. 4JG30 P95 Respirator

## GENERAL INDUSTRIAL RESPIRATORS

**N95** approved for solid and liquid **aerosols that do not contain oil.** For use in sanding, grinding, processing of minerals and grains handling when few or no adverse conditions (high heat, humidity, sparks, etc.) are present and/or the respirator is used for short periods of time. May replace 4T106, 3M Brand (8710) for certain applications. **Standard size sold in boxes of 20** respirators each. NIOSH 42 CFR 84 Approval TC-84A-007. 3M Brand (8210).

**No. 3KP43.** Shpg. wt. 0.7 lbs. List $20.24. Each box.....**$18.40;**
Lots 8 .....**$17.48**

**N95** approved for solid and liquid **aerosols that do not contain oil.** For use in sanding, grinding, processing of minerals and grains handling when few or no adverse conditions (high heat, humidity, sparks, etc.) are present and/or the respirator is used for short periods of time. May replace 3KP33, 3M Brand (8110) for certain applications. **Small size sold in boxes of 20** respirators each. NIOSH 42 CFR 84 Approval TC-84A-007. 3M Brand (8110S).

**No. 4MH52.** Shpg. wt. 0.5 lbs. List $18.95. Each box.....**$17.10;**
Lots 8 .....**$16.25**

**N95** approved for solid and liquid **aerosols that do not contain oil.** Features innovative "M" nose clip to help provide a good fit and Cool Flow™ exhalation valve to reduce heat and moisture build up inside the respirator. Worker will appreciate the added comfort and durability when bagging, grinding, sanding and sawing. May replace 4T107, 3M Brand (8715) AND 4T106 3M Brand (8710) for certain applications. **Sold in boxes of 10** respirators each. NIOSH 42 CFR 84 Approval TC-42A-1299. 3M Brand (8511).

**No. 4JF99.** Shpg. wt. 0.5 lbs. List $19.51. Each box.....**$17.74;**
Lots 8 .....**$16.85**

**R95** approved for solid and liquid aerosols including oils. Time use restriction of eight hours continuous or intermittent use may apply when oil aerosols are present. Features innovative "M" nose clip to help provide a good fit and a collapse resistant shell to withstand use in hot and humid conditions. Workers will appreciate the added comfort and durability when bagging, grinding, machining, sanding and sawing. May replace 4T107, 3M Brand (8715) AND 4T106 3M Brand (8710) for certain applications. **Sold in boxes of 20** respirators each. NIOSH 42 CFR 84 Approval TC-84A-1350. 3M Brand (8240).

***New* No. 4MH64.** Shpg. wt. 0.7 lbs. List $24.95. Each box.....**$22.50;**
Lots 8 .....**$21.38**

**P95** approved for solid and liquid aerosols including oils. 3M time use restriction applies when apply when oil aerosols are present. Features comfortable "M" nose clip to help provide a good fit and Cool Flow™ exhalation valve to reduce heat and moisture build up inside the respirator and faceseal ring to promote comfort and fit over a broad range of face sizes. For use when bagging, drilling, grinding, sanding and sawing. May replace 4T111, 3M Brand (9900) AND 4T107 3M Brand (8715). **Sold in boxes of 10** respirators each. NIOSH 42 CFR 84 Approval TC-84A-1166. 3M Brand (8271).

**No. 4JG30.** Shpg. wt. 0.6 lbs. List $25.66. Each box.....**$23.34;**
Lots 8 .....**$22.17**

## HEALTH CARE RESPIRATORS/SURGICAL MASKS

**N95** approved for solid and liquid aerosols that do not contain oil. For use in hospitals/clinical setting including surgery. Minimizes wearer exposure to airborne particles generated by electrocautery, laser surgery and other powered medical instruments. Meet CDC guidelines for TB exposure control and is registered as a FDA Medical Device. Features soft inner shell for greater comfort to the fluid-resistant outer shell. Complies with OSHA Bloodborne Pathogens Standard when worn properly and in combination with protective eyewear. **Standard size sold in boxes of 20** respirators each. NIOSH 42 CFR 84 Approval TC-84A-0006. 3M Brand (1860).

***New* No. 4MH50.** Shpg. wt. 0.5 lbs. List $20.95. Each .....**$18.95;**
Lots 6 .....**$18.00**

**N95** approved for solid and liquid **aerosols that do not contain oil.** For use in hospitals/clinical setting including surgery. Provides all the features and uses of 4MH50. **Small size sold in boxes of 20** respirators each. NIOSH 42 CFR 84 Approval TC-42A-0006. 3M Brand (1860S).

***New* No. 4MH51.** Shpg. wt. List $20.95. Each .....**$18.95;**
Lots 6.....**$18.00**

## N9500C™ PARTICULATE RESPIRATOR

**• Meets NIOSH 42 CFR 84 Regulations for N95 particulate respirators**

Shell does not absorb as much moisture from exhaled breath as other masks—maintains shape and low breathing resistance all day long. **N95** approved. Offers protection from exposure to non-oil based dusts, mists, metal fumes, and microorganisms. Adjustable nosepiece and foam inner seal. Soft inner facepiece layer.

Moisture resistant double-shell construction with welded center. Heavy-duty head straps are ultrasonically welded to the respirator for less breakage. **20 respirators per box.** AO Safety brand (50240).

**No. 4HC73.** Shpg. wt. 0.7 lbs. List .....$22.95.
Each **$20.66;** Lots 12.....**$19.62**

AOSafety®

No. 4HC73

**• Registered to ISO 9001**

## AFFINITY® PLUS MAINTENANCE FREE RESPIRATORS

NO MAINTENANCE RESPIRATORS

New

No. 4LR91

MSA

N95.- For use in steel and construction industries, utilities, textile manufacturing and poultry processing plants. Respirators provide basic protection of up to 95% efficiency for 0.3 micron particles of dry, non-oil aerosols. Meet new NIOSH certification standard 42 CFR Part 84. Features AnthroCurve™ face-sealing surface with latex-free fixed head straps and pre-shaped metal nose band. Available with or without exhalation valve, two sizes. MSA brand.

| Description | Size | With Exhalation Valve | With Nose Clip | MSA Model | *New!* Stock No. | Quantity per Package | List | Each | Shpg. Wt. |

## AFFINITY® ULTRA MAINTENANCE FREE RESPIRATORS

MSA

New

No. 4LR93

Respirators provide basic protection of up to 95% efficiency for 0.3 micron particles and dry, non-oil aerosols. Meets NIOSH certification standard 42 CFR Part 84. "N" Series protects against non-oil based particulate aerosols, "R" Series filters protect against oil based particulate aerosols. AnthroCurve™ face sealing surface with additional soft, compliant foam face seal. Features wide adjustable latex-free head straps. Exhalation valve removes exhaled breath, making respirator cooler and more comfortable to wear. Available in three sizes. MSA brand.

# RESPIRATORY PROTECTION

NO MAINTENANCE RESPIRATORS

## NORTH 3000 SERIES RESPIRATORS

Facepiece features a lightweight, face-conforming design for maximum worker acceptance and comfort. Cradle suspension and contoured, low profile design provide a secure, balanced fit and wide field of vision. Re-breathing of exhaled air is virtually eliminated because of low dead air space within the respirator, improving worker productivity. Maintenance free. NIOSH approved.

**Each respirator includes permanently attached cartridges, filters, or P100 filter/cartridges combinations. N95 prefilters are replaceable.**

**CAUTION: AIR PURIFYING RESPIRATORS SHOULD ONLY BE USED FOR PROTECTION AGAINST THE CONTAMINANTS LISTED ON THE FILTERS AND CARTRIDGES AND ON THE NIOSH/MSHA APPROVAL LABEL WHICH IS INCLUDED WITH EACH RESPIRATOR AND ON EACH REPLACEMENT FILTER CARTON.**

**NIOSH/MSHA certified respirators do not protect against all air contaminants in the various approval categories.**

No. 5T982 Respirator

No. 5T973 Respirator

**Respirator includes permanently attached cartridges, filters, or P100 filter/cartridges combinations.**

# RESPIRATORY PROTECTION

## 3M MAINTENANCE FREE 5000 SERIES RESPIRATORS

Cradle suspension comfortably holds respirator in place for less pressure on bridge of nose and back of neck. Uniform weight distribution provides greater comfort and maximizes worker acceptance and use. Low profile on face facilitates wider line of vision. Comfortable to wear with glasses or goggles. Facepieces are color coded and marked by size for easy identification by supervisor and worker. NIOSH approved.

**Caution: Respirators must be properly selected, based on the contaminant present and its concentration level; be properly fitted and used in accordance with all of the manufacturer's instructions and use limitations. The respirator must be worn during all times of exposure. Respirator misuse may result in sickness or death.**

The following information is designed to be a starting point for selecting the proper respirator. For information on respirators or specific questions regarding your application, call 3M Technical Assistance at 1-800-243-4630.

## NO MAINTENANCE RESPIRATORS

May be a cup shaped filter or a half mask with cartridges or filters permanently attached. The entire respirator is discarded when the cartridges or filters are spent. These respirators do not require a complete maintenance program and require a minimal inventory investment.

# FREEDOM® 2000 DISPOSABLE HALF MASK RESPIRATORS

WILLSON® New

Willson Freedom 2000 disposable half mask respirator-OV/P95 combination is a 100% disposable half mask with Organic Vapor Cartridge and P95 prefilter. Features a perspiration port to reduce facepiece slippage and face irritation, a soft pliable facepiece sealing flange with rolled edges for added comfort, and a sliding suspension system for easy donning. Provides very low breathing resistance and is up to 30% lighter than reusable half mask respirators. Preassembled to eliminate assembly time and errors.

Willson Freedom 2000 disposable half mask respirator with unisorb cartridge or unisorb P100 stacked cartridge. Features a perspiration port to reduce facepiece slippage and face irritation, a soft pliable facepiece sealing flange with rolled edges for added comfort, and a sliding suspension system for easy donning. Up to 30% lighter than reusable half mask respirators, and provides up to 51% lower breathing resistance than other multi-use contaminant-specific cartridges. Approved for up to 16 specific contaminants.

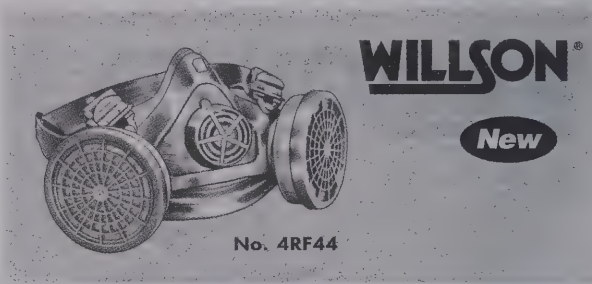
## DUST MASK DISPENSER

Compact design easily holds over 30 dust masks (not included). Unique cutout design allows easy access to the masks. Keeps them clean and sanitary until ready to use. Clear view acrylic dispenser can be either wall or countertop mounted for maximum convenience. 12⅜H x 6W x 6"D. Prinzing brand (M420).

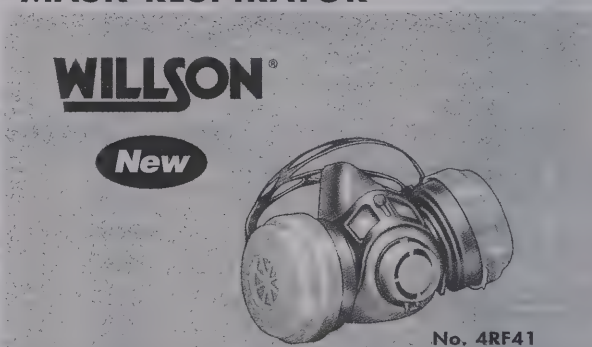
**No. 3ZM57.** Shpg. wt. 3.1 lbs. List $53.00. Each ..... **$44.80**



## LOW MAINTENANCE RESPIRATORS

These respirators use cartridges and filters which can be replaced. They are made from less durable materials and are not designed as reusable respirators. For applications that do not call for constant and heavy respirator usage.

## PREMIER PLUS HALF MASK RESPIRATOR



100% silicone half mask respirator features wide wrap around facepiece design with strategic lateral positioning of cartridges for unequaled field of vision. Triple sealing flange provides excellent seal. High quality cradle suspension with four-point floating yoke eliminates pressure points, adjusts easily. Pleated chin area ensures easier communication while maintaining strong seal. Extremely low breathing resistance. Large face piece allows air to circulate and help cool inside of mask. Willson brand (6800). For use with Unisorb cartridges sold below or cartridges/filters on page 2413.

| Size | Willson Model | *New!* Stock No. | List | Each | Lots 10 | Shpg. Wt. |
|---|---|---|---|---|---|---|

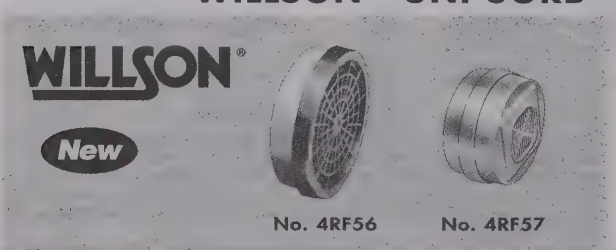
## VALUAIR® PLUS HALF MASK RESPIRATOR



Economical, reusable half mask respirator has extremely low breathing resistance and uses the same cartridges and filters as the Premier respirator. It has an improved 3-piece sliding suspension system for quick and easy donning with no hooks, loops, or extra parts to break or lose. The 2-point headband suspension adjustment means no loose straps on facepiece to block vision. Perspiration port reduces facepiece slippage and face irritation. A soft sealing flange with rolled edges means best comfort and fit and a forward angled nose piece is compatible with eye wear. Audible locking cartridges confirms cartridge attachment—no more cross threading or tightening problems. For use with unisorb cartridges sold below or cartridges/filters on page 2413.

## WILLSON® UNI-SORB™ MULTI-USE CARTRIDGES

Willson Uni-Sorb multi-use cartridges are engineered to meet standards for multiple contaminant exposures. These cartridges are approved for up to 16 specific contaminants.

All Uni-Sorb cartridges feature the audible "locking" bayonet connection for confirmed attachment and are usable with other Willson air-purifying respirators. All cartridges are designed to offer low inhalation resistance for easier breathing and less fatigue, and a low profile that won't interfere with vision.

Multi-contaminant cartridge reduces the variety of different cartridges necessary at a location, eliminating the potential for a worker to accidentally grab the wrong contaminant specific cartridge.

# RESPIRATORY PROTECTION

## REUSABLE RESPIRATORS

Offer the frequent user of respirators a more economical choice over the long term. Available in both half mask and full facepiece styles. The full facepiece offers greater eye and face protection. These respirators require the replacement of cartridges, filters and respirator parts as well as a complete respirator maintenance program. In most cases, both styles of respirators use the same cartridges and filters so only one inventory is required.

## DUAL CARTRIDGE HALF MASK RESPIRATOR

NORTH

Replacement Parts Available 1-800-323-0620

Hypoallergenic silicone facepiece offers the worker superior fit and comfort even after repeated cleanings. Cradle suspension system reduces respirator slippage and provides easy adjustment of headstraps. Low profile design increases field of vision and allows for use of eye protection. Exhalation valve offers exceptionally low breathing resistance, low dead air space limits the re-breathing of exhaled air thereby increasing worker efficiency and comfort. Maintenance program required. **NIOSH Approved. These facepieces must be worn only with North cartridges and/or filters. North cartridges and filters approved for use with these facepieces are listed on page 2407.**

| Size | North Model | Stock No. | List | Each | Lots 6 | Shpg. Wt. |
|---|---|---|---|---|---|---|
| **Small** | 7700-30 | **4T549** | $21.79 | **$20.72** | **$19.69** | 0.5 |
| **Medium** | 7700-30 | **3A182** | 21.79 | **20.73** | **19.69** | 0.6 |
| **Large** | 7700-30 | **4T550** | 21.79 | **20.73** | **19.69** | 0.6 |

## BACKPACK HALF MASK RESPIRATOR

NORTH

Replacement Parts Available 1-800-323-0620

Offers the same features as the North half mask respirators above; however, the cartridges and/or filters are suspended on the worker's back by flexible breathing tubes. Suited for use under welding helmets and faceshields because of the low profile design. Cartridges and/or filters are held away from the work area where there are higher concentrations of contaminants. Maintenance program required.

**NIOSH Approved. These facepieces must be worn only with North cartridges and/or filters. North cartridges and filters approved for use with these facepieces are listed on page 2407.**

| Size | North Model | Stock No. | List | Each | Lots 2 | Shpg. Wt. |

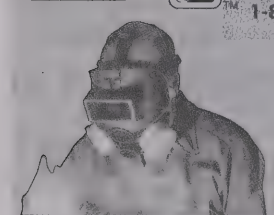
## FULL FACEPIECE RESPIRATOR

NORTH

Replacement Parts Available 1-800-323-0620



Provides respiratory protection plus protects the user's eyes and face against irritating gases, vapors, and flying particles. Scratch resistant, polycarbonate lens provides a 200° field of vision. Lens fogging is kept to a minimum with the oral/nasal cup. Hypoallergenic silicone facepiece provides worker with superior fit and comfort while the five strap head harness helps maintain facepiece-to-face seal. Speaking diaphragm allows for clear communication. Neck strap allows the user to rest the lightweight unit on chest when not in use. Maintenance program required. **NIOSH Approved. These facepieces must be worn only with North cartridges and/or filters. North cartridges and filters approved for use with these facepieces are listed on page 2407.**

| Size | North Model | Stock No. | List | Each | Lots 2 | Shpg. Wt. |

## WELDING FULL FACEPIECE RESPIRATOR

NORTH

Replacement Parts Available 1-800-323-0620

Offers the same features and benefits of the full facepiece respirator above and is specialized for welding applications. Clear 2" x 4¼" polycarbonate lens offers 200 degree field of vision and has a specially darkened section on the bottom of the lens. Welding attachment is made from fire resistant thermoplastic material and is designed to be flipped up or removed for a wider field of vision when not welding. Low profile design closely conforms to shape of respirator lens allowing the user to work in tight spaces. A welding conversion kit is also available to convert your current North respirator to a welding respirator. Maintenance program required. Shade plates not included, see Index under Welding Helmets.

**NIOSH Approved. These facepieces must be worn only with North cartridges and/or filters. North cartridges and filters approved for use with these facepieces are listed on page 2407.**

# 3M™ 6000 SERIES LOW-MAINTENANCE HALF AND FULL FACEPIECE RESPIRATORS*

LOW MAINTENANCE RESPIRATORS

## HALF FACEPIECE RESPIRATORS

Reusable half facepiece respirators can be cleaned and reworn. Soft, lightweight facepiece features adjustable headstraps to increase worker comfort. Low profile design permits better visibility and allows safety glasses to be worn comfortably. Storage bag included. 3M brand.

## FULL FACEPIECE RESPIRATORS

Lightweight, well balanced full facepiece respirator. Soft, lightweight facepiece material, three facepiece sizes and easy-to-adjust headstraps allow maximum comfort. Large lens provides excellent visibility and is hard-coated to reduce scratches that impair vision. Requires only limited maintenance time, clean as directed between uses. 3M brand.

## ACCESSORIES

**No. 4JG35 Spectacle Kit.** Special frame for prescription lenses, to be worn with full facepiece respirator.

**No. 4JG07 Lens Covers.** Protect lens from getting soiled or damaged. **Package of 100.**

## HALF FACEPIECE RESPIRATORS

Half facepiece with bayonet attachments is a soft silicone with a matte finish designed to reduce slippage. Lightweight construction reduces pressure points and neck strain. Adjustable heavy-duty headstraps for long life. Maintenance is easy with fewer pieces to disassemble. 3M brand.

## FULL FACEPIECE RESPIRATORS

Soft, pliable facepiece features standard nosecup to prevent fogging, scratch resistant polycarbonate lens for greater durability and speaking diaphragm for excellent communication. Double flap face seal and six adjustable straps help ensure proper fit and protection. Easy to clean silicone material. 3M brand.

## ACCESSORIES

**No. 5AZ96 Spectacle Kit.** Special frame for prescription lenses, to be worn with full facepiece respirator.

**No. 4AV26 Welding Kit.** Shroud converts respirator facepiece into welder's faceshield.

**No. 4JG08 Lens Covers.** Protects lens from getting soiled or damaged. **Pack of 25.**

# DUAL CARTRIDGE AIR PURIFYING RESPIRATORS

REUSABLE RESPIRATORS

**WILLSON®**
**Premier® 6000 Series**

Cartridges and Filters Must Be Ordered Separately Using Selection Guide Below

Replacement Parts Available 1-800-323-0620

**No. 5T374 Half Mask Facepiece (shown with cartridges/filters)**

- Nonslip adjustable cradle suspension

**No. 5T376 Full Mask Facepiece (shown with cartridges/filters)**

- Quick-adjusting ratchet Tite-Seal® headgear

**Silicone half mask facepiece,** dual cartridge respirators are designed for low breathing resistance and maximum comfort. Bayonet-style cartridge connection system allows cartridges to seal directly on facepiece eliminating gaskets. Audible "click" assures proper cartridge attachment. Nonslip adjustable cradle suspension for wide range of fit. Retainer doubles as fit check cover. Certified by NIOSH/MSHA when used with cartridges and/or filters listed below. **These facepieces must be worn with cartridges and/or filters listed below.** Willson brand (6100).

| Size | Stock No. | List | Each | Lots 10 | Shpg. Wt. |

# RESPIRATORY PROTECTION

## REUSABLE RESPIRATORS

Offer the frequent user of respirators a more economical choice over the long term. Available in both half mask and full facepiece styles. The full facepiece offers greater eye and face protection. These respirators require the replacement of cartridges, filters and respirator parts as well as a complete respirator maintenance program. In most cases, both styles of respirators use the same cartridges and filters so only one inventory is required.

## PAINT SPRAY/PESTICIDE RESPIRATOR KIT

Kit offers protection from paint sprays and mists, lacquer, enamel, organic vapors and many commonly used pesticides. Features the North reusable half mask respirator which offers the worker superior fit and comfort even after repeated cleanings. Cradle suspension system reduces respirator slippage and provides easy adjustment of headstraps. Headband yoke helps position cartridges in such a way that field of vision is increased and allows for use of eye protection. Exhalation valve offers exceptionally low breathing resistance, low dead air space limits the re-breathing of exhaled air thereby increasing worker efficiency and comfort. Kit provides two organic vapor cartridges, two prefilters and two filter covers. Maintenance program required. NIOSH approval TC-84A-1099. **Not for use with paints containing isocyanates, fumigants, or atmospheres containing oil.** For replacement cartridges order No. 4RM24, for replacement prefilters order Nos. 4RM31 or 4RM32, all listed on page 2407. North brand.

### SPECIFICATIONS AND ORDERING DATA

| Size | North Model | Stock No. | List | Each | Lots 6 | Shpg. Wt. |
|---|---|---|---|---|---|---|
| **Small** | 7701N95S | **4T870** | $38.34 | **$36.55** | **$34.71** | 1.0 |

**For more information on the selection of North Respirators, call 1-800-581-0444**

## ACCESSORIES FOR NORTH AIR PURIFYING RESPIRATORS

### SPECTACLE ASSEMBLY

Contains a spectacle frame which is inserted into holes inside the full facepiece respirator. Fits both Nos. 5AC56 and 3A183 (on page 2406). North brand (7600-22).

**No. 1D918.** Shpg. wt. 0.1 lbs. List.....$65.49. Each **$63.40;** Lots 4.....**$60.17**

### PEEL AWAY WINDOWS

For use with full facepiece respirator in applications where the respirator lens is easily soiled, such as painting. Windows attach directly to the facepiece and can be peeled off when soiled. 3 peelable layers per window, 5 windows per package. North brand (80836).

**No. 1D913.** Shpg. wt. 0.2 lbs. List .....$15.27. Each Pack **$14.71;** Lots 4 .....**$13.98**

### WELDING CONVERSION KIT

For those who want to convert their current North full facepiece Nos. 5AC56 or 3A183 (listed on page 2406) to a welding facepiece. This is easily accomplished by replacing the standard lens and fastening the welding attachment onto the full facepiece respirator. Shade plates not included, see Index under Welding Helmets. North brand (8404).

**No. 4GM35.** Shpg. wt. 1.3 lbs. List.....$152.17. Each **$136.95;** Lots 2.....**$130.10**

### VIDEO TRAINING TAPE

Reviews the proper selection, fit, use, cleaning and storage of North Air Purifying Respirators. 12 minutes. 1/2" VHS. North Brand (80812).

**No. 4GM30.** Shpg. wt. 0.5 lbs. List $53.86. Each **$46.90;** Lots 2 .....**$44.55**

**No. 4GM35 Welding Conversion Kit**

**No. 4GM30 Training Tape**

## 5500 SERIES RESPIRATORS

Facepiece made from soft material that offers excellent conformity and fit to the worker while resisting distortion that can occur after use. Exhalation valve assembly provides low breathing resistance; low dead air space limits the rebreathing of exhaled air, both of which improve worker comfort and efficiency. Cradle suspension adjusts easily and cartridges located lower and further back provide an increased field of vision. Offers easily replaceable parts. Minimal maintenance required. NIOSH/MSHA Approved. North brand.

REUSABLE RESPIRATORS

WILLSON®

- Soft molded silicone rubber
- Ratchet style headgear
- Sturdy carrying case
- Canister sold separately below

Replacement Parts Available
1-800-323-0620

## CANISTER AIR PURIFYING RESPIRATOR

Chin-style gas mask provides longer service life and is NIOSH approved for emergency escape from IDLH atmospheres that contain more than 19.5% oxygen. Molded in soft silicone rubber; comes with ratchet-style headgear for easy donning and adjustment. Supplied with sturdy carrying case with space to hold an additional replacement canister. Canisters are sold separately (See Canister Selection Guide below). Willson brand (W6600GM).

**No. 4T137.** Shpg. wt. 8.0 lbs. List.....$293.60. Each **$272.00;** Lots 2.....**$244.65**

## CAUTIONARY INFORMATION

Respirators are not to be worn in atmospheres immediately dangerous to life or health, or in atmospheres containing less than 19.5% oxygen.

Gas masks or cartridge respirators should not be used for respiratory protection against materials which lack sufficient warning properties.

The user should be aware of applicable OSHA standards as well as information related to the materials the user is handling. Maximum use concentrations are determined by applicable regulatory agency. If there are any doubts concerning the respirator or applications, contact a qualified safety or industrial hygiene professional.

The respirator selected must properly fit the wearer. Carefully follow the fitting instructions, fit tests and fit checks contained in the instruction booklet accompanying each respirator.

### CANISTER SELECTION GUIDE

| Contaminant | Color Coding | NIOSH Approval No. | Willson Model | Stock No. | Limitations |
|---|---|---|---|---|---|
| Organic vapors and N95 | Black | TC-14G-0240 | 61N | 4T138 | Protection against organic vapors; and dusts, fumes and mists as those encountered during field spraying of pesticides having a TWA not less than 0.05 milligrams per cubic meter or 2 million particles per cubic ft. |
| Organic vapors / acid gases and N95 | Yellow | TC-14G-0243 | 65N | 4T139 | Protection against organic vapors/acid gases, and dusts and mists having a TWA not less than 0.05 milligrams per cubic meter or 2 million particles per cubic foot. |
| Chlorine and N95 | White | TC-14G-0241 | 62N | 4T386 | Protection against chlorine; and dusts, fumes and mists having a TWA not less than 0.05 milligrams per cubic meter or 2 million particles per cubic foot. |
| Ammonia, methylamine and N95 | Green | TC-14G-0242 | 64N | 4T387 | Protection against ammonia and methylamine; and dusts, fumes and mists having a TWA not less than 0.05 milligrams per cubic meter or 2 million particles per cubic ft. |
| P100 | Magenta | TC-84A-2716 | 73P | 4T388 | Protection against dusts, mists and fumes having a TWA less than 0.05 milligrams per cubic meter including radionuclides and asbestos containing dusts and mists. |

## POWERED AIR PURIFYING RESPIRATORS (PAPR)

Use battery operated blowers to pull outside air through the cartridges and filters attached to the respirator assembly. Air blowers can either be mask or belt mounted. Designed to filter particulates, dusts, fumes and mists from the air and/or certain gases and vapors depending upon the cartridges selected. PAPR's provide enhanced comfort under working conditions because the constant flow of air over the worker's face provides a cooling effect.

# POWERED AIR PURIFYING RESPIRATOR

Provides user with comfort, protection and vision. Protects the user's eyes and face in addition to providing respiratory protection. Scratch resistant, polycarbonate lens provides a 200 degree field of vision, lens fogging is kept to a minimum with the oral/nasal cup. Hypoallergenic silicone facepiece provides worker with superior fit and comfort while the five strap head harness helps maintain facepiece-to-face seal. Speaking diaphragm allows for clear communication.

High performance twin mask mounted blowers provide quiet, easy breathing without a breathing tube. Lightweight lead acid gel battery offers eight hours of continuous use when fully charged and can be replaced in the field. The battery comes in a water resistant case and LED battery life indicator lets the user know when the battery needs to be replaced. Durable, urethane harness assembly is comfortable and easy to decontaminate.

Complete PAPR unit includes facepiece with blowers and cable assembly, urethane harness assembly, battery pack, flow measuring device and battery charger. HEPA filters sold separately. Approved for respiratory protection against dusts, fumes and mists having time-weighted average less than 0.05 mg per cubic meter, asbestos containing dusts and mists and is not to be used at contaminant concentration levels in excess of those allowed by applicable OSHA or EPA regulations. NIOSH/MSHA approval TC-21C-481. Maintenance program required. North brand.

**HEPA FILTERS.** PAPR Filters for highly toxic particulates including asbestos and radon daughters. **Sold in packages of four.** North brand.

**WELDING CONVERSION KIT.** For those who want to convert their current North PAPR full facepiece to a welding facepiece. This is easily accomplished by replacing the standard lens and fastening the welding attachment onto the full facepiece respirator. When the worker is not welding, it can be lifted upward for wide angle viewing. North brand.

| Description | North Model | Stock No. | List | Each | Lots/ Qty. | Shpg. Wt. |
|---|---|---|---|---|---|---|
| Respirator | 9800-70C | 5T279 | $733.39 | $708.50 | $672.74/2 | 10.0 |

# POWERED AIR PURIFYING RESPIRATOR

**Incorporates a low-profile, water-resistant, belt-mounted blower and battery** for comfortable weight distribution behind and out of worker's way. Constant flow of filtered air creates a positive pressure inside facepiece and eliminates "work" of breathing through a negative pressure respirator. Equipped with economical HEPA filter. Utilizes a reliable, low-maintenance lead-acid gel battery and a battery charger (order separately from chart below, not included with PAPR) with automatic shut-off to prevent overcharging. Lightweight battery and blower provide up to 6 hours of continuous use. NIOSH/MSHA TC-21C-452.

**Silicone, six-strap full facepiece** has an antifog/antiscratch coated lens. Specially designed tissot tubes channel inhaled air across facepiece to help prevent fogging.

**For particulate protection** in asbestos abatement, as well as nuclear, pharmaceutical, and lead industries. HEPA filter, battery, flow indicator, and comprehensive instruction booklet included. **Battery charger purchased separately.** Willson brand.

| Description | Willson Model | Stock No. | List | Each | Lots 2 | Shpg. Wt. |
|---|---|---|---|---|---|---|
| Respirator | W6783/6HR | 5T264 | $430.82 | $399.00 | $358.94 | 9.0 |
| Battery Charger | RP42 | 5T265 | 105.00 | 97.30 | 87.54 | 2.6 |
| Replacement Battery | RP40 | 5T266 | 87.86 | 81.40 | 73.26 | 3.0 |
| HEPA Filters (Box/6) | R73 | 4T388† | 99.28 | 92.00 | 82.80 | 1.5 |

(†) Priced and sold in quantities of 6 per box.

**CAUTION: Do not use if air flow falls below 4 cubic feet per minute. Recharge battery and/or replace filter. Respirators are not to be worn in atmospheres immediately dangerous to life and health, or in atmospheres containing less than 19.5% oxygen. The user should be aware of applicable OSHA standards as well as information related to materials the user is handling.**

# 3M™ BELT-MOUNTED POWERED AIR PURIFYING RESPIRATORS

POWERED AIR PURIFYING RESPIRATORS

3M

Replacement Parts Available 1-800-323-0620

**Belt-Mounted Powered Air Respirator (PAPR)** combines a high level of protection along with great performance, versatility and mobility. Design is compatible with six different helmets, hoods and facepieces: Whitecap General Purpose Helmet, Whitecap Welding Helmet, Snapcap Hood and Snapcap Hood with Hardhat, 7800S Full Face Respirators and 7000 Series Half Mask Respirators.

**BELT-MOUNTED PAPR ASSEMBLY INCLUDES:** belt, motor blower, battery, charger, flow meter, power cord and plugs.

**COMPLETE PAPR SYSTEMS INCLUDE:** breathing tube, motor blower, battery, charger, web belt, shoulder strap, flow meter, power cords and plugs as well as corresponding hood, helmet or respirator described below.

No. 7A472 features Standard Snapcap Hood assembly with hardcap, No. 7A473 features Standard Snapcap Hood assembly with headband. Nos. 7A474, 7A475 and 7A476 PAPR Full Facepiece Systems include 7800S Full Face Respirator. No. 7A477 PAPR General Purpose Helmet System includes W-8000 General Purpose Helmet. Nos. 7A441, 7A442 and 7A443 PAPR Half Mask Respirator Systems include 7000 Series Half Mask Respirator.

**Offers a complete line** of filters and cartridges, allowing wearer the flexibility to work within a variety of environments and applications. A single cartridge system allows for reduced changeout costs. Battery provides up to eight hours of continuous use with overcharge protection. PAPR provides levels of airflow that surpass NIOSH requirements.

POWERED AIR PURIFYING RESPIRATORS

# 3M™ VEHICLE-MOUNTED POWERED AIR PURIFYING RESPIRATOR (PAPR)

3M

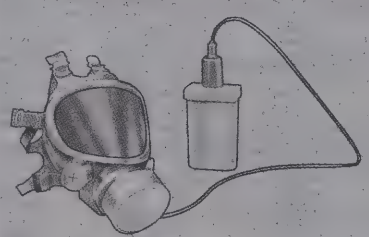
Replacement Parts Available 1-800-323-0620

The Vehicle-Mounted PAPR combines the simplicity and utility of the 3M Belt-Mounted PAPR with the ability to use a vehicle's power source (tractors, bulldozers, cranes, etc.). Easy to install bracket allows the PAPR to be mounted on the vehicle rather than worn on the worker's waist, allowing for greater comfort, freedom and reduced fatigue. May be used with either 12 or 24 volt DC energy source. NIOSH approved with several choices of facepieces/headgear and eleven cartridges/filters. High levels of airflow surpass NIOSH requirements. 3M brand (GVP-VM).

Note: To complete a PAPR System for vehicle operation, it is necessary to have the No. 4JG20 assembly and the appropriate facepiece/headgear, breathing tube and cartridges/filters.

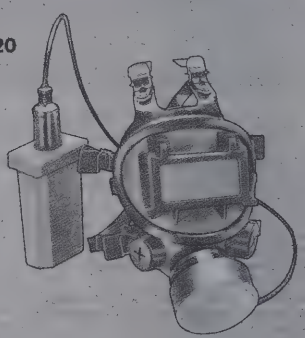
**No. 4JG20.** Shpg. wt. 6.1 lbs. List.....$830.50. Each **$755.00**; Lots 2.....**$717.25**

# 3M™ POWERED AIR PURIFYING RESPIRATOR (PAPR)



**Face-mounted powered air purifying respirator's** weight is evenly distributed for a comfortable and secure fit. Compact system is balanced by having motor blower inside the facepiece. Low profile design provides a good field of vision and makes working in tight spots easier. Face-mounted PAPR uses a single HEPA filter for dusts, fumes, mists, and radionuclides, making it ideal for asbestos, lead, and other hazardous particulate environments. NOTE: For use up to 1000 x PEL, or applicable OSHA or other government limits, whichever is lower. NIOSH/MSHA approval TC-21C-530.

Filter cover can be worn during use and in decontamination showers. Easy-to-use silicone facepiece can be used in many modes of operation, including negative pressure, low and high pressure supplied air, belt-mounted powered air and pressure demand escape systems.



Complete PAPR includes silicone facepiece with a six strap head harness in medium or large sizes, two facepiece plugs, battery charger, NiCad battery, and motor blower unit which provide up to eight hours of continuous use, vinyl belt, flow meter, and filter cover. HEPA filters sold separately below. Maintenance program required. 3M brand.

Replacement Parts Available 1-800-323-0620

No. 2AH78 Face-Mounted PAPR System

No. 5F766 Welder's Face-Mounted PAPR System

**Welder's PAPR** combines the benefits of the standard face-mounted PAPR with the ability to use a welder's face shield or an autodarkening welding lens. Suited for welding in areas where the extra protection and comfort of a positive pressure respirator is needed or desired. Includes the same items as No. 2AH78 standard large face-mounted PAPR with the welder's face shield.

**HEPA Filter.** PAPR filter for dusts, fumes, mists, and radionuclides. **Sold in packs of 36 only.**

## OPTIMAIR® 6A PAPR RESPIRATORS

Belt-mounted motor/blower requires only two filters. Operates on rechargeable, water-resistant Ni-cad battery pack, making it easy to decontaminate. Ideal for construction, asbestos, HazMat clean-up situations, chemical processing, foundry work, and nuclear facilities. Can be used with filters, chemical cartridges and combination cartridges to help protect against particulate matter, toxic gases and vapors. High air flow increases worker comfort. Available in half-mask, full facepiece style, or with Tyvek® hood. Facepiece and HEPA filters are interchangeable with other MSA respirators, reducing inventory. Nos. 4LR25, 4LR24, and 4LR23 facepieces include 1500-hour brush-type motor/blower module. MSA brand.

SUPPLIED AIR CONTINUOUS FLOW RESPIRATORS

# CC20 SERIES AIRLINE RESPIRATORS

CC20 Series hood-style airline respirators consist of five components: respirator hood, headband or hard hat, breathing tube, flow control device or climate control device, and air supply hose. Bullard brand.

**Lightweight Respirator Hood** covers the worker's entire head, face and neck, providing overspray protection and making cleanup quick and easy. Unique air delivery system includes inflatable air trough, which provides a snug, comfortable fit around the neck and delivers a continuous flow of air to the worker's breathing zone. New wide angle lens is 30% larger than previous models. Provides excellent peripheral vision through 6 x 17" viewing window.

**Headband or Hard Hat.** A standard suspension No. 5AC89 or Sure-Lock® ratchet suspension No. 6AG89 keeps the hood stable on a worker's head. With a Bullard hard hat, No. 3AJ96 meets ANSI Z89.1-1986 Class A and B head protection impact and penetration requirements. Hard hat not included, sold separately, see Index.

**Crush-Proof Breathing Tube** is coil-reinforced for strength. Anchorplate secures breathing tube to hood to prevent airflow cut-off.

**Flow Control Options:** CC20 respirators are approved with 8 quick-disconnect fittings, for compatibility with most workplace breathing air systems. Optional climate control devices allow workers to cool or warm incoming air to meet their own comfort requirements.

**Breathing Air Supply Hose** is a NIOSH-approved component of all Bullard respirators. V10 straight hoses are available for use with high pressure air sources, and V20 hoses are available for use with low pressure air sources. Both can be used in combinations up to 300 feet.

SUPPLIED AIR CONTINUOUS FLOW RESPIRATORS

# BULLARD 88 SERIES AIRLINE RESPIRATORS

**88 Series Airline Respirators** provide comfortable, reliable respiratory protection for abrasive blasters and painters. NIOSH/MSHA Approved as a Type C or CE Continuous Flow Class Respirator (TC-19C-293). Features durable helmet and cape that covers head, neck, face, and torso. **Helmet** meets ANSI Z89.1-1997 Class A (except weight) requirements for top impact and penetration. Features a lightweight inner-shell with an adjustable headband that holds the respirator firmly and comfortably on the wearer's head. The wide-angle window contains both an inner and outer lens positioned for optimum visibility. The inner lens meets ANSI Z87.1-1989 impact and penetration protection. The outer lens protects the main inner lens from abrasion. **Capes** help protect the worker's body from rebound. Designed for easy head movement. Sewn-in neck cuff provides a physical barrier to airborne contaminants and helps maintain positive pressure within the helmet. **Breathing Tube Assembly** controls the flow of air into the respirator. Configured for use with either compressed breathing air or ambient air pumps. Each assembly includes a coil-spring reinforced breathing tube, airflow control, and belt. **Cool Climate Control Assembly sold separately below. Breathing Air Supply Hose also sold separately below.** Bullard brand.

**Airline Repirators for use with Breathing Air Compressors.** Include E30 breathing tube assembly, 1/4" Industrial Interchange fitting and belt, respirator helmet with inner and outer lenses, and cape.

**Airline Respirators for use with Bullard Free-Air® Pumps.** Include E35 breathing tube assembly, 1/2" Industrial Interchange fitting and belt, respirator helmet with inner and outer lenses, and cape.

**Bullard 88 Series Airline Respirators include helmet, cape and breathing tube assembly. Air supply hose is sold separately below.**

**MSHA/NIOSH-Approved respirators consist of a properly assembled Helmet, Cape, Breathing Tube Assembly and Breathing Air Supply Hose.**

Golden Gate Cape Style 38" Length No. 6AK68

Traditional Cape Style 28"Length No. 5AW39

Portable Breathing Air Compressors and Ambient Pumps available See page 2437.

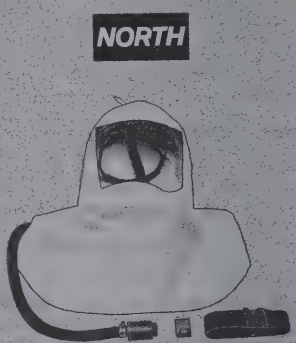
# RESPIRATORY PROTECTION

## SUPPLIED AIR CONTINUOUS FLOW RESPIRATORS

These respirators supply the air to the user in a constant stream. Because these types of respirators would drain a fixed source of air quickly, a pump or compressor is used to supply ambient air. A hose or series of hoses is used to deliver the air from the air source to the facepiece. Unless the pump or compressor is especially designed to filter the air, the unit must be located where there is breathable air (Grade D or better). Continuous flow respirators are available with tight fitting facepieces (half mask and full facepiece) and hoods (for applications such as paint spraying and in laboratories). The flow of air being supplied to the user may be adjusted either at the air source or on the respirator itself. The respirator which controls air flow at the air source is called Fixed Flow. The respirator that controls air flow on the respirator is called Adjustable Flow.



**CAUTION: All breathing air system couplers must be incompatible with non-breathing air/gas system couplers.**

## DISPOSABLE AIRLINE HOODS

Provides protection against airborne contaminants in a variety of applications including spray painting, abatement, pharmaceutical manufacturing and chemical handling. Offers an alternative for those users with mustache, beard, sideburns, long hair and glasses since there is no face-to-facepiece seal. Lightweight, comfortable headgear with ratchet and elastic collar provide a personal fit. Disposable hood and non-fogging lens reduce cleaning and maintenance costs. Non-kinking breathing tube reduces chances of collapse and air restriction. Available in two materials. Tyvek® is used for protection against particulates such as in clean rooms or labs.

Saranex® coated Tyvek®, is used for protection against chemical splashes.

NIOSH/MSHA approval TC-19C-196. Hoods are available in regular or extended (bib) length and can be easily replaced. These facepieces must be used with the couplers and air hoses listed on page 2438. Air hoses are available in 25, 50 and 100 foot sections for selected combinations up to 300 feet. Maintenance program required. North brand.

No. 4GM48

## AIRLINE HOOD ACCESSORIES

**Vortex** allows worker to warm or cool the breathing air by plus or minus 30°F. The tube is color coded, red for warm air and blue for cool air. Simply determine which temperature option is preferred and locate that color closest to the respirator muffler assembly. The tube is equipped with either Hansen, Schrader or Snap-Tite couplers and may be used with a 3/8" or 1/2" hose in length combinations up to 300 feet.

**Use only with North brand hoods, hoses and couplers.** North brand.

**Peel Away Windows for North Airline Hoods-** For use with hooded respirator in applications where the hood lens is easily soiled, such as painting. Windows attach directly to the hood and can be peeled off when soiled. **3 peelable layers per window, 5 windows per package.** North brand.

No. 4GM90

## PUMP PACKAGES

**Provide user with all components necessary** in setting up a continuous flow supplied air system. Packages that contain a full facepiece offer protection for the user's eyes and face against irritating gases, vapors and flying particles in addition to providing respiratory protection. Scratch resistant, polycarbonate lens provides a 200 degree field of vision, lens fogging is kept to a minimum with the oral/nasal cup. Hypoallergenic silicone facepiece provides worker with superior fit and comfort while the five strap head harness helps maintain facepiece-to-face seal. Speaking diaphragm allows for clear communication.

**Packages that contain Tyvek® hoods** offer an alternative for those users with mustache, beard, sideburns, long hair or glasses since there is no face-to-facepiece seal. Lightweight, comfortable headgear with ratchet and self-adjusting collar provide a personal fit. Disposable hood and non-fogging lens reduce cleaning and maintenance costs. Non-kinking breathing tube reduces chances of collapse and air restriction. Hoods provide protection against airborne contaminants in a variety of applications including spray painting, abatement, pharmaceutical manufacturing and chemical handling. North brand.

**No. 4GM67 One Man Pump Package with Full Facepiece Respirator** includes one full facepiece, 1/3 HP pump, 50 ft.-3/8" hose and Schrader coupler.

**No. 4GM62 One Man Pump Package with Tyvek® Hood Respirator** includes one Tyvek® hood, 3/4 HP pump, 50 ft-1/2" hose and Snap-Tite coupler.

**No. 4GM61 Two Man Pump Package with Full Facepiece Respirators** includes two full facepieces, 3/4 HP pump, two 50 ft.-1/2" hoses and two Snap-Tite couplers.

**No. 4GM65 Two Man Pump Package with Tyvek Hood Respirators** includes two Tyvek® hoods, 1½ HP pump, two 50 ft.-1/2" hoses and two Snap-Tite couplers.

**No. 4GM64 Three Man Pump Package with Full Facepiece Respirators** includes three full facepieces, 1½ HP pump, three 50 ft.-1/2" hoses and three Snap-Tite couplers.

FOR REPLACEMENT HOODS SEE PAGE 2424

# RESPIRATORY PROTECTION

## PRESSURE DEMAND RESPIRATORS (PDAR)

These respirators maintain a positive pressure and supply the air to the wearer "on demand" as the wearer inhales and fresh air is required. Air is supplied from a fixed source (cylinder or compressor) which is delivered by a hose or series of hoses. Pressure demand is also available with emergency escape cylinder. These respirators can be used in atmospheres that are immediately dangerous to life and health when used with approved auxiliary air cylinders. Available with full facepieces only.

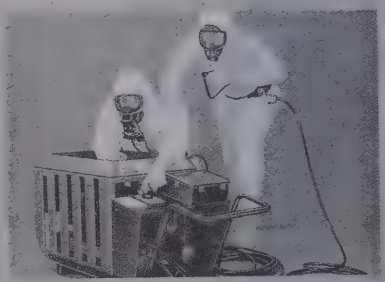
## PRESSURE-DEMAND AIR-LINE RESPIRATOR

MSA

New

Replacement Parts Available 1-800-323-0620

Pressure demand design allows slight positive pressure to be maintained inside facepiece at all times, helping to stop contaminated air from invading the facepiece, even when small breaks in face-to-facepiece seal occur. Comfortable fit allows user to wear for longer work periods. Features UltraVue® facepiece for excellent peripheral vision. Flexible breathing tube lets user move head without breaking face-to-facepiece seal. Web belt provides comfortable support of regulator and air-line hose. Quick-disconnect assembly attached to regulator inlet for easy hook up and retrieval. MSA brand (475218).



***New*** **No. 4LM63.** Shpg. wt. 4.5 lbs. List ..... $646.25.
Each ..... **$587.50**

## QUADAIR™ 4-PERSON PRESSURE DEMAND COMPRESSOR

MSA

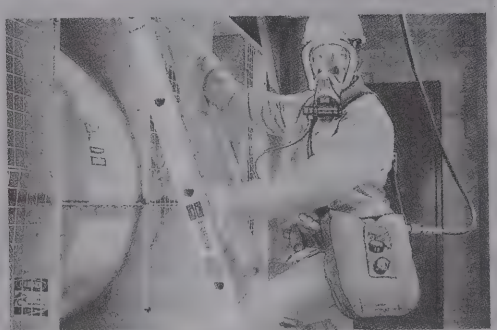
New

Replacement Parts Available 1-800-323-0620

Continuous air supply for up to four people eliminates need for compressed air cylinders and cylinder refilling. Wheelbarrow design allows one person to move unit. Compressor design is oil-free, no oil to contaminate air supply. Low-pressure alarm alerts users when receiver tank pressure drops below specified limit. Power for unit can be obtained from any 110V 20A power source. Includes hoisting eyelet that attaches to crane for use when moving unit. Compatible with MSA pressure-demand respirators. Power requirements: 110 volts, 60 hz, 20 amps. 27½H x 51½L x 22½"W. MSA brand (487688).

***New*** **No. 4LM55.** Shpg. wt. 315.0 lbs. List ..... $7410.62.
Each ..... **$6737.00**

## EMERGENCY ESCAPE BREATHING APPARATUS



Emergency Escape Breathing Apparatuses are approved for escape only from hazardous atmospheres. Units are available in 5 or 10 minute durations.

## PREMAIRE® XV SUPPLIED AIR RESPIRATOR

MSA

New

Replacement Parts Available 1-800-323-0620

No. 4LM65

Versatile respirator can be used as SCBA or air-line respirator with emergency escape capability. Lightweight, high-performance mask-mounted regulator provides high air flow and responds quickly to changing breathing requirements. Twin cylinders provide a rated service time of 15 minutes, well suited for confined space applications. Includes PremAire System manifold that allows choice of four options: escape cylinder, dual-supply, Duo-Twin or vortex tube. Self-contained air supply is approved for entry into and escape from IDLH environments. Carrying case available, order separately. MSA brand (813760).

***New*** **No. 4LM65.** Shpg. wt. 24.0 lbs.
List $2266.29. Each ..... **$2061.00**

No. 4LM67

Carrying Case for PremAire XV Respirator. Fits complete unit while not in use. MSA brand (813805).

***New*** **No. 4LM67.** Shpg. wt. 9.0 lbs. List .$130.61.
Each ..... **$118.75**

# RESPIRATORY PROTECTION

## PREMAIRE® SUPPLIED-AIR RESPIRATOR SYSTEM

MSA New

Create four different respirator configurations from one unit. Lightweight mask-mounted regulator provides regulated high pressure air flow and responds quickly to changing breathing requirements. PremAire® System allows four options: 1) Escape cylinder for immediately dangerous to life and health (IDLH) atmospheres, 2) Dual-supply option allows connection from one pressurized continuous air source to another without losing continuity of airflow, 3) Vortex tube option delivers whole-body temperature control for added worker comfort, 4) Duo-Twin option converts respirator into combination supplied air/air purifying device (allows workers in non-IDLH atmospheres to move from station-to-station without being tethered to air hose). When equipped with escape cylinder, system can be used for IDLH atmospheres. For use in construction, steel, chemical, nuclear and pulp and paper industries. MSA brand (496896).

***New*** **No. 4LM64.** Premaire® Supplied-Air Respirator System. Shpg. wt. 18.0 lbs. List .....$1546.45. Each .....$1406.00

## VERSA-HOOD™ AIR SUPPLIED HOOD

MSA New

No. 4LM80

For use in shipbuilding, utilities, chemical, petrochemical, pharmaceutical, welding and chemical handling industries. Features twin lens system, knit collar and easy, stable adjustment for hood suspension. Choice of shoulder- or waist-length hood. Disposable outer cover eliminates need for cleaning. Can be used with V-Gard® cap for extra head protection. Three-point Velcro system is easy to install and secures hood to cap. Hood has no facepiece seal, allowing worker to have a beard or other facial hair. Use with outside air source or Compress-Aire™ portable air compressor No. 4LM44 (sold separately). Draws air from air distribution system to keep lens fog-free.

Nos. 4LM80 thru 4LM82 are for use with plant air systems. No. 4LM83 is for use with Compress-Aire™ personal air compressor. MSA brand.

***New*** **No. 4LM80.** Shoulder length hood, adjustable valve connector with Snap-Tite quick-disconnect. Shpg. wt. 2.0 lbs. List $222.81. Each .....$202.75

***New*** **No. 4LM81.** Shoulder length hood, Snap-Tite aluminum quick-disconnect plug. Shpg. wt. 1.6 lbs. List $80.05. Each .....$72.80

***New*** **No. 4LM82.** Waist length hood, Snap-Tite aluminum quick-disconnect plug. Shpg. wt. 3.0 lbs. List $89.05. Each .....$81.00

***New*** **No. 4LM83.** Shoulder length hood, Snap-Tite connector. Shpg. wt. 1.5 lbs. List $88.93. Each .....$80.85

## VERSA-HOOD ACCESSORIES

### SHOULDER LENGTH TYVEK HOOD

Fits around shoulders to completely cover head for extra safety. Three-point system secures hood to cap. No facepiece seal, wearer can have beard or other facial hair. Features knit collar, twin lens system, disposable outer cover that eliminates cleaning. Easy-adjust hood suspension eliminates need for chin strap. Can be used with V-Gard®cap for added head protection. MSA brand (482612).

***New*** **No. 4LM79.** Shpg. wt. 0.3 lbs. List $28.14. Each .....$25.60

### VERSA-HOOD HOSE

Easy connection and disconnection of air-supply hose. Flexible hose will not restrict head movement. MSA brand.

***New*** **No. 4LM66.** 3/8" NPT hood hose for use with Versa-Hood® and personal compressor. MSA brand (483606). Shpg. wt. 0.7 lbs. List $22.58. Each .....$20.53

***New*** **No. 4LM70.** Hood hose with coupling nut for use with Versa-Hood® with adjustable valve (482703). Shpg. wt. 0.1 lbs. List $17.89. Each .....$16.27

### BASIC HOOD SUSPENSION

Velcro adjustments for easy sizing to many head sizes. MSA brand (482614).

***New*** **No. 4LM77.** Shpg. wt. 0.3 lbs. List $11.18. Each .....$10.17

### COVER LENS

Protects Versa-Hood® lens from scratches and abrasions so user can maintain clearer vision longer. Easy to mount, secures over lens. 10 lenses per pack. MSA brand (491600).

***New*** **No. 4LM71.** Shpg. wt. 0.5 lbs. List $69.23. Each .....$62.95

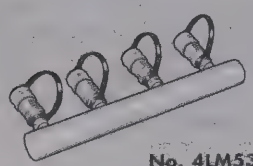
## CONNECTION ACCESSORIES

### TEE BLOCK AND PIGTAIL

Use to connect a bank of cylinders together to extend respirator users' air supply. Can be used anywhere pressure demand air-line respirators are connected to a large cylinder air source. MSA brand.

***New!* No. 4LM68.** Tee Block (68850). Shpg. wt. 0.8 lbs.
List $80.89. Each ..... **$73.55**

***New!* No. 4LM76.** Pigtail (68851). Shpg. wt. 1.1 lbs. List $108.05. Each ..... **$98.25**



No. 4LM68

No. 4LM76

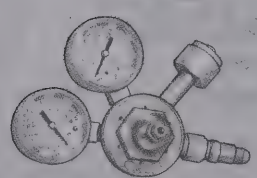
### FEMALE SOCKET QUICK-DISCONNECT ASSEMBLY

Connects air-supply hose to male plug on respirator. Female socket and union adapter are a complete assembly. Easy hook-up and disconnect. MSA brand (467044).

***New!* No. 4LM60.** Shpg. wt. 0.4 lbs. List ..$42.84.
Each ..... **$38.95**

No. 4LM53

### FEMALE SOCKET



Attaches air-supply hose to air-supply system. MSA brand (628770).

***New!* No. 4LM61.** Shpg. wt. 0.1 lbs. List ..$24.04.
Each ..... **$21.86**

### MALE PLUG WITH FEMALE 1/4" NPT

Connects female socket from air-supply manifold to union adapter attached to air-supply hose. MSA brand (55716).

***New!* No. 4LM46.** Shpg. wt. 0.1 lbs. List ....$5.14.
Each ..... **$4.68**

No. 4LM78

### MALE PLUG WITH MALE 1/4" NPT

Connects inlet pressure gauge to female socket from air-supply. MSA brand (56549).

***New!* No. 4LM47.** Shpg. wt. 0.1 lbs. List ....$3.63.
Each ..... **$3.30**

### UNION ADAPTER 1/4" NPT BY 3/4" UNF

Reducing adapter needed to attach air-supply hose to male plug or inlet pressure gauge leading to air supply. MSA brand (69542).

***New!* No. 4LM48.** Shpg. wt. 0.1 lbs. List ..$10.03.
Each ..... **$9.12**

### AIR-SUPPLY MANIFOLD

Connects up to four respirators to a single air source. Supplied with quick-disconnect sockets already attached. Features automatic air flow shutoff. MSA brand (47370).

***New!* No. 4LM53.** Shpg. wt. 4.1 lbs. List $330.29.
Each ..... **$300.50**

### AIR-CYLINDER PRESSURE REGULATOR

Regulates cylinder air. Necessary for pressure-demand air-line respirators operating from a cylinder. Dual gauge receives outlet pressure, reduces it and regulates it to help maintain breathable pressure. Works with most common pressurized cylinders or cylinder banks. Handles up to 3000 psig range. MSA brand (68858).

***New!* No. 4LM78.** Shpg. wt. 2.3 lbs. List $414.28.
Each ..... **$376.75**

## AUDI-LARM™ LOW-PRESSURE WARNING DEVICE

Alarm warns users of low air pressure in air-supply containers. Loud alarm is easily heard, even in noise environments. Rings briefly every time tanks are pressurized as a quick-check that alarm is working. Use alarm where pressure-demand air-line respirators are connected to large cylinder air sources. MSA brand (85078).

***New!* No. 4LM72.** Shpg. wt. 1.1 lbs. List $358.60. Each..... **$326.00**

## REPLACEMENT AIR-LINE FILTER KIT

Purifies air stream of dusts, mists, fumes, smoke and petroleum vapors. Can be used with BRAD systems (listed on page 2437) or plant air sources. MSA brand (484923).

***New!* No. 4LM56.** Shpg. wt. 0.7 lbs. List $80.30. Each..... **$73.00**

## COVER LENS FOR FULL FACEPIECE RESPIRATORS

Resists scratches that can occur during storage, handling, and everyday use. Clear lens does not obstruct vision, attaches to facepiece lens easily with adhesive backing. Ideal for chemical and nuclear industries. **25 per pack.**

***New* No. 4LN31.** Lens for Ultravue Facepiece (456975). Shpg. wt. 0.3 lbs. List $38.92. Each ..... **$35.40**

***New* No. 4LN32.** Lens for Advantage 1000 Facepiece (813832). Shpg. wt. 0.8 lbs. List $40.86. Each ..... **$37.15**

## ULTRAVUE® FULL FACEPIECES

**Facepieces are designed to fit many different MSA respirators.** Speaking diaphragm allows voice communication through facepiece. Five point adjustable suspension provides good face-to-facepiece seal. Available in three sizes to fit most users. Constructed of either silicone or Hycar rubber, facepieces feature a tough polycarbonate lens that resists damage and offers excellent peripheral vision. For use in construction, steel, chemical, nuclear, pulp and paper industries. Does not include nosecup. Black color.

***New* No. 4LN12.** Silicone, size Small (480251). Shpg. wt. 1.6 lbs. List $207.81. Each ..... **$189.00**

***New* No. 4LN11.** Silicone, size Medium (480247). Shpg. wt. 1.6 lbs. List $207.81. Each ..... **$189.00**

***New* No. 4LN10.** Hycar, size Medium (457126). Shpg. wt. 1.4 lbs. List $193.12. Each ..... **$175.75**

## WELDER'S ADAPTER

**For use with MSA full facepiece respirators.** Protects eyes from welding splatter. Molded of polycarbonate plastic for high resistance to heat, impact and welding splatter. Features integrated eye and respiratory protection to protect vision of user. Large vision area provides unobstructed view. Choice of integral or clip-on styles. Fits either Ultravue® or Ultra-Twin® facepieces. Includes cover lens. 4½" x 5¼" filter plate not included. MSA brand.

***New* No. 4LN39.** Integral adapter (470786). Shpg. wt. 0.7 lbs. List $127.13. Each ..... **$115.60**

***New* No. 4LN40.** Clip-On adapter(472859). Shpg. wt. 0.9 lbs. List $127.13. Each ..... **$115.60**

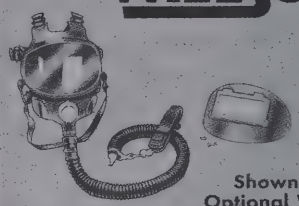
# RESPIRATORY PROTECTION

## SUPPLIED AIR CONTINUOUS FLOW RESPIRATORS

These respirators supply the air to the user in a constant stream. Because these types of respirators would drain a fixed source of air quickly, a pump or compressor is used to supply ambient air. A hose or series of hoses is used to deliver the air from the air source to the facepiece. Unless the pump or compressor is especially designed to filter the air, the unit must be located where there is breathable air (Grade D or better). Continuous flow respirators are available with tight fitting facepieces (half mask and full facepiece) and hoods (for applications such as paint spraying and in laboratories). The flow of air being supplied to the user may be adjusted either at the air source or on the respirator itself. The respirator which controls air flow at the air source is called Fixed Flow. The respirator that controls air flow on the respirator is called Adjustable Flow.



## WILLSON FULL-FACEPIECE CONTINUOUS-FLOW RESPIRATORS

**Full-facepiece Respirator** features an improved air distribution channel that directs the airflow against the lens to reduce fogging and increase wearer comfort. Each respirator is supplied with a Schrader quick-connect fitting. Blue silicone facepiece with a six-strap harness. NIOSH/MSHA Approval TC-19C-209. Willson brand.

**Welding Shield Attachment** snaps onto full facepiece. Can be attached and removed while wearing respirator. Shield includes flip-up Shade 10 replaceable welding plate. Willson brand.

**Air Hoses** have a 3/8" ID Sold below in 50- and 100-ft. lengths and up to 3 sections can be used in combinations up to 300 ft. Willson brand.

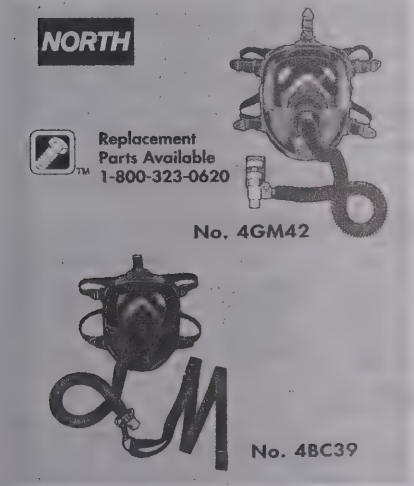
## SUPPLIED AIR CONTINUOUS FLOW RESPIRATORS

These respirators supply the air to the user in a constant stream. Because these types of respirators would drain a fixed source of air quickly, a pump or compressor is used to supply ambient air. A hose or series of hoses is used to deliver the air from the air source to the facepiece. Unless the pump or compressor is especially designed to filter the air, the unit must be located where there is breathable air (Grade D or better). Continuous flow respirators are available with tight fitting facepieces (half mask and full facepiece) and hoods (for applications such as paint spraying and in laboratories). The flow of air being supplied to the user may be adjusted either at the air source or on the respirator itself. The respirator which controls air flow at the air source is called Fixed Flow. The respirator that controls air flow on the respirator is called Adjustable Flow.



**CAUTION: All breathing air systems couplers must be incompatible with non-breathing air/gas system couplers.**

## HALF MASK RESPIRATOR

Suitable for applications in which eye and face protection can be supplied by using protective spectacles, goggles or a faceshield. Hypoallergenic silicone facepiece offers the worker superior fit and comfort even after repeated cleanings. Cradle suspension system reduces respirator slippage and provides easy adjustment of headstraps. Nos. 4GM38, 4GM37, and 4GM36 include a durable, belt mounted control valve which allows worker to adjust air flow. NIOSH approved. Nos. 4GM41, 4GM40, and 4GM39 have a fixed control valve which allows air flow adjustment only at the air source. NIOSH approved. These facepieces are NIOSH approved with the couplers and air hoses listed on page 2438. Air hoses are available in 25, 50 and 100 foot sections for selected combinations up to 300 feet. Maintenance program required. North brand.

## FULL FACEPIECE RESPIRATOR

Protects the user's eyes and face against irritating gases, vapors and flying particles in addition to providing respiratory protection. Scratch resistant, polycarbonate lens provides a 200 degree field of vision, lens fogging is kept to a minimum with the oral/nasal cup. Hypoallergenic silicone facepiece provides worker with superior fit and comfort while the five strap head harness helps maintain facepiece-to-face seal. Speaking diaphragm allows for clear communication. Nos. 4GM43, 4GM42, and 4GM44 include a durable, belt mounted control valve which allows worker to adjust air flow. Nos. 2AN36, 4BC39, and 4GM45 have a fixed control valve which allows air flow adjustment only at the air source.

Respirators are also available with the necessary attachments for welding applications. These facepieces must be used with the couplers and air hoses listed on page 2382. Air hoses are available in 25, 50 and 100 foot sections for selected combinations up to 300 feet. Maintenance program required. North brand.

## ACCESSORIES FOR CONTINUOUS FLOW RESPIRATORS

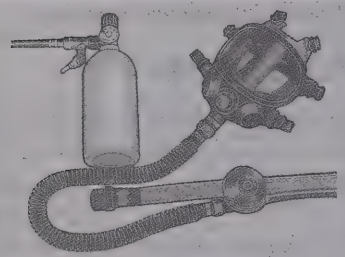
### WELDING CONVERSION KIT

Enables conversion of current North continuous flow full facepiece to a welding facepiece. This is easily accomplished by replacing the standard lens and fastening the welding attachment onto the full facepiece respirator. When worker is not welding, it can be lifted upward for wide angle viewing. North brand (8401).

**No. 4GM32.** Shpg. wt. 1.3 lbs. List.....$155.66.
Each **$135.40**; Lots 2.....**$128.59**

### TRAINING VIDEO TAPE

Describes the features and maintenance of continuous flow and pressure demand supplied air respirators. Reviews fit checking, fit testing, respirator use and limitations. 20 minutes. 1/2" VHS. North brand (80789).



**No. 4GM29.** Shpg. wt. 0.5 lbs. List $53.86. Each .....**$46.90**
Lots 2 .....**$44.55**

# RESPIRATORY PROTECTION

## PRESSURE DEMAND RESPIRATORS (PDAR)

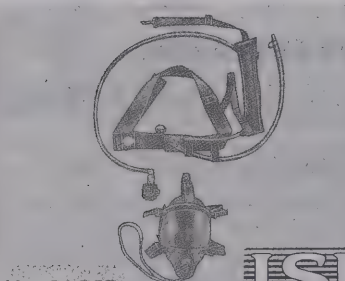
These respirators supply the air to the facepiece "on demand" as the worker inhales and fresh air is required. Air is supplied from a fixed source (cylinder or compressor) which is delivered by a hose or series of hoses. Pressure demand is also available with emergency escape cylinder. These respirators can be used in atmospheres that are immediately dangerous to life and health when used with approved auxiliary air cylinders. Available with full facepieces only.

## WILLSON AIRMASTER® PRESSURE-DEMAND RESPIRATORS

No. 6AG36 WILLSON®

Replacement Parts Available 1-800-323-0620

**Airline Respirator** is field serviceable for increased productivity. It provides positive pressure air on demand with a simple-to-use regulator that does not require calibration. A patented modular regulator valve can be cleaned or replaced in minutes. Unit features a wide operating range of 60-100 PSI and a large regulator diaphragm for quick response time. Features a Willson Series 6000 Silicone facemask with six-strap suspension headgear. Includes breathing tube assembly, waist belt and Schrader fittings. NIOSH/MSHA Approval TC-19C-256. Willson brand.



**The 5-Minute Escape Cylinder Assembly,** sold separately below, allows the airline respirators to be used in IDLH or oxygen deficient atmospheres.

**Air Hoses** have a 3/8" I.D. and Shrader fittings. Available in 50- and 100-ft. lengths. Fully certified for combinations up to 300 ft., maximum 3 sections.

## ISI PRESSURE-DEMAND AIRLINE RESPIRATOR

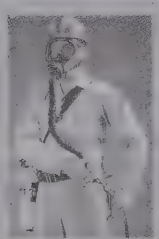
No. 2AG57 ISI

Replacement Parts Available 1-800-323-0620

**Respirators are designed** to provide breathing air where ambient air may be irritating. They offer mobility, low profile, positive pressure, high air flow, ease of use and a comfortable fit. ISI brand.

**The ARAP/C** is a type "C" airline respirator. Includes full facemask, harness, pneumatics with quick fit demand valve, and airline pigtail with Hansen fittings. Air supplied to the regulator between 80 and 130 PSIG is then supplied to the user in a positive pressure facemask. NIOSH/MSHA Approved TC-19C-189 for use up to 300 t. from a remote air supply.

**The ARAP/10** provides the maximum respiratory protection possible in hazardous atmospheres. Features same components as the ARAP/C plus a 10-minute cylinder for emergency egress. Approved for use by workers who must enter an IDLH environment. NIOSH Approved TC-13-F-296 Type C respirator.



**Air Hoses** with Hansen fittings are available in 25-, 50-, and 100-ft. lengths.

## HIP-AIR™ BREATHING APPARATUS

New

MSA

Replacement Parts Available 1-800-323-0620

NIOSH/MSHA approved for use in IDLH environments. Provides respiratory protection for entry into, extended work periods in, and escape from IDLH atmospheres. Lightweight (11.5 lbs.) unit is designed for good weight balance to maintain worker's center of balance. Airline inlet features quick-disconnect device for easy hook-up and disengagement from main air source. Includes 8.7 cubic foot cylinder with rated service time of 5 minutes. MSA brand (474954).

***New!* No. 4LM62.** Shpg. wt. 18.0 lbs. List $1326.90. Each ..... **$1207.00**

**Replacement 5-Minute Air Cylinder** for Hip-Air™ Breathing Apparatus. Fully wound composite cylinder is wound both laterally and longitudinally for added strength. 3000 psig contains more air than standard 2216 psig cylinders. MSA brand (485565).

***New!* No. 4LM49.** Shpg. wt. 4.3 lbs. List $446.22. Each ..... **$405.75**

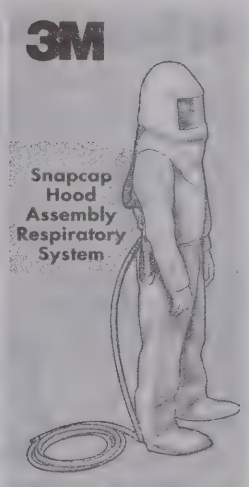
# 3M™ AIRLINE RESPIRATORY SYSTEM ORDERING DATA

### WHITECAP™ GENERAL PURPOSE HELMET

- Rugged polyethylene outer shell
- Removable inner shell
- Cotton inner shroud

### WHITECAP™ ABRASIVE BLASTING HELMET

- Unique double faceshield
- Removable inner shell
- Protective outer shroud
- Cotton inner shroud



### WHITECAP™ WELDING HELMET

- Designed for production welding
- Nomex inner shroud
- Welding outer shroud

### SNAPCAP HOOD ASSEMBLY

- Lightweight hood can be converted to a hood with a hard hat
- Extended length outer shroud

**Five components create a complete respiratory system. Select one from each of the following groups: Whitecap helmet or Snapcap hood assembly, breathing tube, air control devices, air hose, and filter and regulator panel. Systems listed on this page are for use with Breathing Air compressors only.**

[A] **Whitecap™ Series Helmets** offer three types of protection in one system: respiratory, faceshield and hard hat. Faceshields are liftable.

[A] **Snapcap Series Hood** assembly has a flexible design which allows the soft hood to be converted with a hard hat when head protection is required. Available in Tyvek™ (QC).

**Both styles** supply positive-pressure air and are NIOSH/MSHA Approved as supplied air respirators, continuous-flow class.

### WHITECAP AND SNAPCAP ACCESSORIES

[C] **High Pressure Vortex Cooling and Vortemp™ Heating Assemblies** are used to regulate the flow and temperature of compressed air to hoods and helmets. NIOSH/MSHA approved assemblies create comfortable positive pressure in hood or helmet. Requires 60-100 PSI. Assemblies include cooler or heater with quick disconnect, waist belt and assembly holder.

[C] **High and Low Pressure Air Regulating Valves** regulate the flow of compressed air to helmets and hoods. NIOSH/MSHA approved. High pressure valve requires 25-75 PSI, Low pressure valve requires 4-15 PSI. Low pressure valves for use with one length of hose only.

[D] **Compressed Air Hose with Hansen fittings.** Available in High Pressure, High Pressure Coiled or Low Pressure hoses, in 25-, 50- and 100-ft. lengths. Can be used in combinations up to 300 ft.

[E] **Compressed Air Filter and Regulator Panel** removes water, oil, particulates, odors and vapors from compressed air.

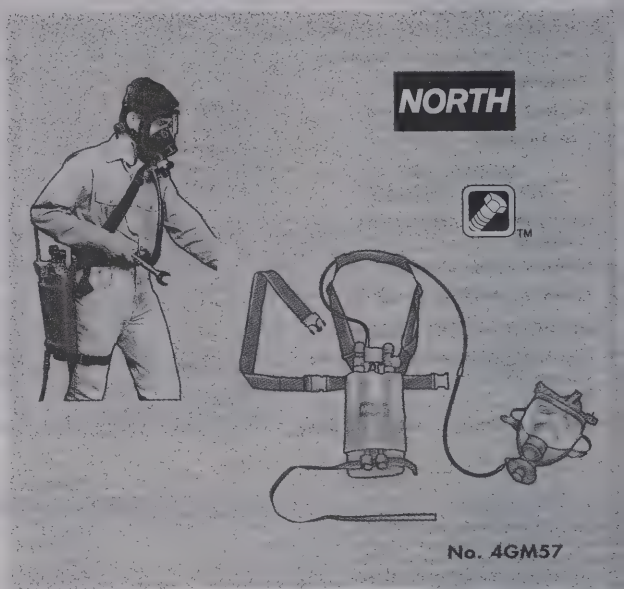
# RESPIRATORY PROTECTION

## PRESSURE DEMAND RESPIRATORS (PDAR)

**These respirators supply the air to the facepiece "on demand" as the worker inhales and fresh air is required. Air is supplied from a fixed source (cylinder or compressor) which is delivered by a hose or series of hoses. Pressure demand is also available with emergency escape cylinder. These respirators can be used in atmospheres that are immediately dangerous to life and health when used with approved auxiliary air cylinders. Available with full facepieces only.**

## PRESSURE DEMAND RESPIRATORS

85400 and 85500 Series are full facepiece pressure demand airline respirators. Scratch resistant, polycarbonate lens provides a 200° field of vision, and protects user's eyes and face against irritating gases, vapors, and flying particles. Hypoallergenic silicone facepiece, equipped with an oral/nasal cup to reduce fogging, provides worker with superior fit and comfort. Five strap head harness helps maintain facepiece-to-face seal. Speaking diaphragm allows for clear communication.



Facepiece mounted demand valve is first breath activated, which eliminiates loss of air while putting on or taking off the facepiece and eases donning. Manifold assembly on both series features two inlet ports, allowing worker to connect to a second air source before disconnecting from the first.

Nos. 4GM54 and 4GM55 may be used in atmospheres which are not immediately dangerous to life and health (Non-IDLH). Nos. 4GM57 and 4GM58 are suitable for us in IDLH atmospheres because units are equipped with an emergency escape air cylinder.

Low profile cylinders are for use in tight and confined spaces. Assembly offers a holster to carry cylinders either by worker's side, or in front when worker is entering or exiting a tight space. Assembly holds either one cylinder for a 5 minute escape or two 5 minute cylinders for a 10 minute escape. Replacement cylinders available below. North brand.

Air Hoses have a 3/8" ID and Hansen fittings. Available in 50 and 100 ft. lengths. Fully NIOSH certified for combinations up to 300 feet.

All North air hoses and respirators listed are compatible. North brand.

## ACCESSORIES FOR PRESSURE DEMAND RESPIRATORS

NORTH

### WELDING CONVERSION KIT

For those who want to convert their current North pressure demand full facepiece respirator to a welding facepiece. This is easily accomplished by replacing the standard lens and fastening the welding attachment onto the full facepiece respirator. When the worker is not welding, it can be lifted upward for wide angle viewing. North brand (8402).

**No. 4GM33.** Shpg. wt. 1.3 lbs. List $155.66. Each ..... **$135.40**
Lots 2 ..... **$128.59**

### TRAINING VIDEO TAPE

Describes the features and maintenance of continuous flow and pressure demand supplied air respirators. Reviews fit checking, fit testing, respirator use and limitations. 20 minutes. 1/2" VHS. North brand (80789).

**No. 4GM29.** Shpg. wt. 0.5 lbs. List $53.86. Each ..... **$46.90**
Lots 2 ..... **$44.55**

# RESPIRATORY PROTECTION

## AIR SOURCES

**There are four main types of air sources for supplied air respirators:**

**Filtration Systems:** Supplies Grade "D" or better breathing air through a connection to plant air or a mobile compressor.

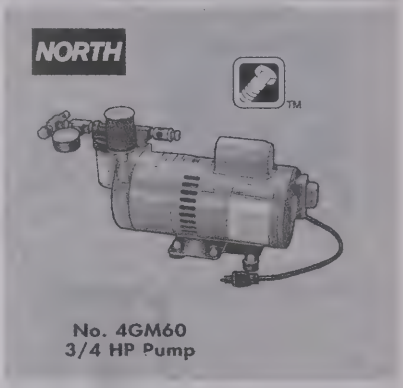
**Portable Systems:** Provide a mobile source of breathing air for users of pressure demand respirators.

**Pumps:** Air flows from the pump to the user. Mainly used with continuous flow respirators.

**Compressors:** Compresses air into sealed containers and then delivers air when required. Mainly used with pressure demand respirators.

## PUMPS

Wearing continuous flow airline supplies breathable air to workers using respirators in contaminated environments. For use with hoods and tight fitting facepieces. All pumps are oil-less with rotary vane. North brand.



**No. 4GM66 1/3 HP Pump** supplies air to one worker wearing a continuous flow full facepiece or half mask respirator.

**No. 4GM60 3/4 HP Pump** supplies air to one worker wearing a continuous flow hood or two workers wearing continuous flow full facepiece or half mask respirators.

**No. 4GM63 1½ HP Pump** supplies air to two workers wearing continuous flow hoods or three workers wearing continuous flow full facepiece or half mask respirators.

See page 2425 for pumps sold as part of a complete package including facepiece or hood and hoses.

## PORTAIRE™ PORTABLE AIR-SUPPLY SYSTEM

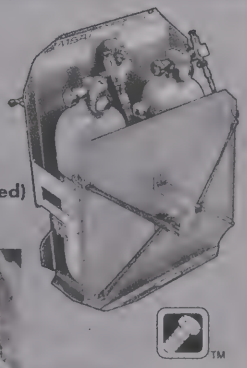
Provides uninterrupted air flow when empty cylinders are changed. Lightweight and portable, can be moved to job site whenever an air-line device is needed. Workers can quickly and safely relocate without disconnecting their air-supply. Features quick-disconnect assemblies and integral check valve that allows air supply to be safely switched between air sources for steady air flow. Unit holds two standard SCBA cylinders (not included). Storage area for air-supply hose (not included). Compatible with MSA cylinders. MSA brand (807052).

***New!* No. 4LM54.** Shpg. wt. 40.0 lbs. List $1845.87. Each.....**$1679.00**

## TRANSPORTAIRE HIGH-PRESSURE PORTABLE AIR-SUPPLY SYSTEM™

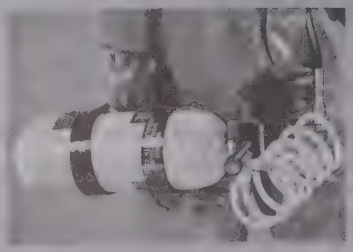
System provides convenient air source that can be transported within a work site and holds standard MSA high-pressure SCBA air cylinder. Designed for firefighters, industrial personnel, confined-space workers and other wearers of pressure-demand air-line devices. Features large, impact-resistant handle with urethane-coated nylon straps that fit around cylinder to hold it securely. When used with an MSA respirator equipped with dual-supply option, cylinder can be used to enter, leave and move from station to station in IDLH areas. Hook up to plant air source while IDLH atmosphere and wearer's air supply is never interrupted. Compatible with MSA high-pressure cylinders. MSA brand (812217).

***New!* No. 4LM69.** Shpg. wt. 3.6 lbs. List $596.12. Each.....**$542.00**



## COMPRESS-AIRE™ PORTABLE COMPRESSOR

Lightweight and portable, compressor supplies a minimum of 7 cubic feet per minute (cfm) to an operating pressure of 10 psig. For use with Versa-Hood™ air supplied hoods only. MSA brand (484828).



***New!* No. 4LM44.** Shpg. wt. 76.0 lbs. List $1466.35. Each.....**$1334.00**

# RESPIRATORY PROTECTION

## AIR SOURCES

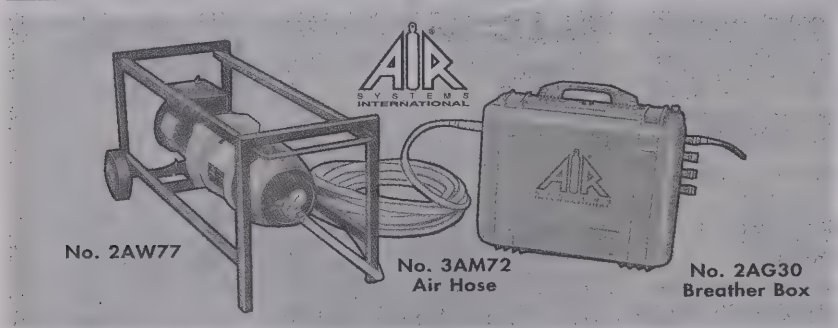
Provide a source of Grade "D" or better breathing air to supplied air respirator users. There are four main types of air sources: Filtration Systems, Portable Systems, Pumps, and Compressors.

Breather Box Filtration System

Calibration Kit

## BREATHER BOX™ FILTRATION SYSTEM

This portable Grade-D breathing air filtration system is designed to provide air for up to 4 workers. The first stage filters bulk water and particulate, second stage coalescing filter eliminates oil and ultra-fine particulate, third stage removes organic vapors and odors. Filter change indicators are standard on all three levels of filtration. Filtration efficiency is 99.99% @ .01 microns.



Filtration system can be connected to either a plant, air or mobile compressor to filter out water, oil, particulate, organic vapors, odors and tastes. A built-in carbon monoxide monitor operates on 9-volt or 115VAC for continuous detection. An external alarm and light signals workers of high CO content.

Standard features include: solid aluminum block manifold, 125 PSI safety relief valve, 0-160 PSI pressure gauge, adjustable locking pressure regulator, visual flow meter to monitor, easy-to-service filters and polycarbonate case. Designed to be used in closed position to prevent contamination and damage to internal components. Optional 4-Man Point-of-Attachment Box, No. 2AN80 sold below, extends respirator usage beyond 300 ft. from filtration system.

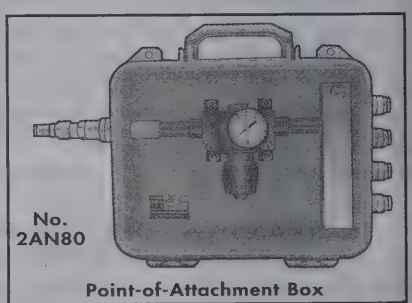
No. 2AG30 Breather Box

## PORTABLE BREATHING AIR COMPRESSOR

This high pressure three man breathing air compressor system is cart-mounted for easy transport to the job site—only weighs 120 pounds. NOTE: For use with pressure demand respirators only. Patented rotary vane delivers smooth, even compressed air at pressures up to 110 PSI. System pressures are controlled with a built-in adjustable pressure switch and monitored by built-in pressure gauge. Operates on standard 115 Volt/60 Hz/20 Amp electrical service. Steel frame features dual rear wheels and built-in retractable handle. The compact design measures 36L x 16W x 16¾"H. Air Systems brand (HP-4).



**No. 2AW77.** Shpg. wt. 140.0 lbs. List $3295.00. Each **$2995.00;** Lots 2 ..... **$2845.25**

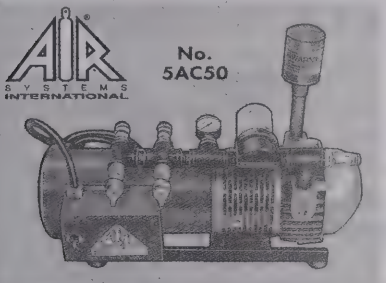
## AIR HOSE

Air hose is manufactured to meet stringent breathing air requirements. 1/2" ID, 50-ft. long. Hansen 5000 series male/female couplings. Order with proper quick connect couplings installed. Hose is yellow. Air Systems brand (H-50-5).

**No. 3AM72.** Shpg. wt. 11.0 lbs. List .....$130.00. Each **$115.00;** Lots 2 ..... **$109.25**

No. 2AN80 Point-of-Attachment Box

## FOUR-MAN POINT-OF-ATTACHMENT BOX



The point-of-attachment box provides a remote attachment for airline respirators. Attachment point can be an unlimited distance from air source as long as the required gauge pressure for the respirator can be maintained. Attachment box contains adjustable regulator, pressure gauge, safety relief valve, and outlet manifold block with respirator couplings. The entire assembly is contained in an unbreakable polycarbonate case. Includes 4 Hansen 3000 series couplings and dust caps. Air Systems brand (POA-4H).

**No. 2AN80.** Shpg. wt. 13.0 lbs. List .....$325.00. Each **$295.00;** Lots 2 ..... **$280.25**

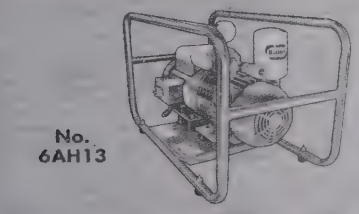
# RESPIRATORY PROTECTION

## AIR SOURCES

Provide a source of Grade "D" or better breathing air to supplied air respirator users. There are four main types of air sources: Filtration Systems, Portable Systems, Pumps and Compressors.

## PORTABLE BREATHING AIR COMPRESSORS

For use with constant flow respirators. Compressors are also called ambient air pumps. Applications include painting with Isocyanates, asbestos removal, spray paint booths, and confined space applications. Deliver a maximum of 15 PSI. Intake and compressor filters have a 95% DOP efficiency at 0.3-0.6 microns; 100% efficiency at 0.7 micron size. (Replacement filters, No. 1C103, sold below.) Adjustable pressure output and relief valves installed. Hansen fittings.



INTAKE/COMPRESSOR FILTERS. Box of 10. Air Systems brand (BAC-393).

**No. 1C103.** Shpg. wt. 0.7 lbs. List $100.00.
Each **$90.00**; Lots 2 ..... **$85.50**

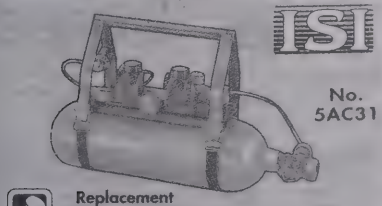
Replacement Parts Available 1-800-323-0620

## ELECTRIC-DRIVEN FREE-AIR® PUMPS

Electric driven, portable pumps can be moved quickly and easily and are a low cost way to supply breathable air to workers in contaminated environments. Transfer ambient air from a clean air location to a supplied air respirator. Features an exclusive Carbofine outlet filter. Medium efficiency inlet filter with activated carbon keeps particulates larger than 25 microns out of the air supply. Airline respirators used with pumps must be MSHA/NIOSH approved to operate at 15 PSIG or less. Pumps are oil-less and do not produce carbon monoxide, oil vapor or oil mist so monitors, calibrators or airline filters are not required.

**2-Man Pump** supplies air to 2 workers wearing continuous-flow airline half- or full-face mask respirators, or 1 worker wearing a continuous-flow airline hood or helmet respirator. Open drip-proof motor for use in clean dry areas. Air flow is 10 cfm at 5 PSIG. Bullard brand (EDP10).

**No. 3AM92.** Shpg. wt. 53.0 lbs. List ..... $775.01.
Each **$698.00**; Lots 2 ..... **$663.10**



**3-Man Pump** supplies air to 3 workers wearing continuous-flow airline half- or full-face mask respirators, or 2 workers wearing continuous-flow airline hood or helmet respirators. Totally enclosed fan cooled motor. For use in applications with oily, moist, or dusty conditions. Air flow is 16 cfm at 5 psig. Bullard brand (EDP16TE).

**No. 6AH13.** Shpg. wt. 111.0 lbs.
List $1552.46. Each ..... $1395.00
Lots 2 ..... $1325.25

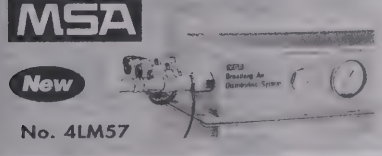
**Splitter Adaptor** converts single pump quick disconnect coupler to double 1/2" Industrial Interchange coupler (one flow-through, one shut-off). Bullard brand (V24).

**No. 1AZ57.** Shpg. wt. 2.0 lbs. List ..... $47.67.
Each **$42.95**; Lots 5 ..... **$40.80**

**No. 6AL41. Carbofine Outlet Filter.** Bullard brand (S17101). Shpg. wt. 1.0 lbs. List $16.28.
Each **$14.63**; Lots 5 ..... **$13.90**

Replacement Parts Available 1-800-323-0620

## AS 1 PORTABLE AIR SUPPLY SYSTEM



### AS 1 SINGLE

For confined space entry. Uses up to 3000 PSI cylinders (not included). When combined with Type C respirators with escape, it provides IDLH (Immediately Dangerous to Life and Health) protection. Dual cylinder capacity doubles as a rescue unit. With airline equipped SCBA, the AS1 Single becomes an extra cylinder of air. Cylinders can be replaced on the go, without interrupting the air supply.

Includes universal pressure reducer, coupled with 2 Hansen airline connections, and carrying frame with adjustable straps that fit any air supply cylinder with a standard CGA346 connector. International Safety Instruments brand (701.204.00L30).

**No. 5AC31.** Shpg. wt. 9.8 lbs. List $1167.50
Each ..... $1025.00▲

(▲) Net prices, not subject to discounts.

## BREATHING AIR DISTRIBUTION SYSTEM (BRAD)

Controls air supply to up to four air-line respirator users. Purifies, regulates and distributes air for multiple users. Features external controls and sealed stainless steel case to prevent contamination of interior component. For use in chemical and other industries using constant flow air-line systems. MSA brand (488113).

***New!* No. 4LM57.** Shpg. wt. 47.0 lbs. List $1407.38.
Each ..... $1280.00

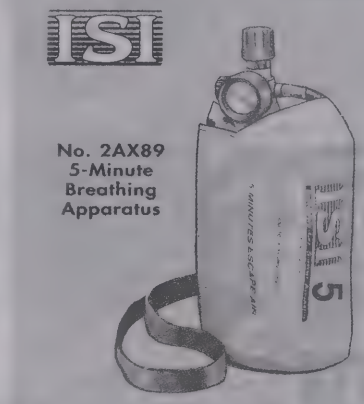
# RESPIRATORY PROTECTION

## EMERGENCY ESCAPE BREATHING APPARATUS



Emergency Escape Breathing Apparatuses are approved for escape only from hazardous atmospheres. Units are available in 5 or 10 minute durations.

## ISI EMERGENCY ESCAPE BREATHING APPARATUS

The ISI Escape unit provides fast emergency respiratory protection for escape from atmospheres that suddenly become Immediately Dangerous to Life and Health (IDLH). The clear polyurethane hood allows full 360° viewing capabilities. Unit has standard valve fittings of nickel-plated brass for reliability with separate refilling port for quick access to standard air sources without valve removal. Rated for use down to 20°F. Available in 5-minute and 10-minute models, with or without high density polyethylene storage case. ISI brand.

Nos. 2AX89 & 5AL31 feature 2216 PSIG air, with 5-minute minimum duration at NIOSH approved flow rates, carrying pouch and harness. No. 5AL31 includes storage case. NIOSH Approval TC-13F-111.

Nos. 3AG61 & 3AH84 feature 3000 PSIG air with 10-minute minimum duration at NIOSH approved flow rates, carrying pouch and harness. No. 3AH84 includes storage case. NIOSH Approval TC-13F-145.

## NORTH EMERGENCY ESCAPE BREATHING APPARATUS

Appropriate for use in any situation or industry where there may be a need for emergency escape. Transparent, durable polyurethane hood provides excellent visibility and minimizes fogging with a deflector that blows air onto the viewing area. High visibility carrying bag enhances the worker's ability to find the apparatus in an emergency situation. Versatile harness assembly can be worn around the neck or shoulder allowing the worker to move freely and carry other items. No. 5T396 provides air at a low flow for five minutes of escape. NIOSH/MSHA approval TC-13F-172. No. 5T397 has same features as No. 5T396 except for 10 minute duration. NIOSH/MSHA approval TC-13F-195. No. 4GM56 provides a five minute escape at a high flow supply of air for escapes requiring greater exertion. NIOSH/MSHA approval TC-13F-198. North brand.

### EEBA ORDERING DATA

# RESPIRATORY PROTECTION

## EMERGENCY ESCAPE BREATHING APPARATUS

**Emergency Escape Breathing Apparatuses are approved for escape only from hazardous atmospheres. Units are available in 5 or 10 minute durations.**

NORTH

### MOUTH BIT ESCAPE RESPIRATOR

For emergency escape from atmospheres containing chlorine, chlorine dioxide, sulfur dioxide and hydrogen sulfide. Lightweight unit attaches to belt or pants for easy access. North brand (7902).

**No. 4GM24.** Shpg. wt. 2.1 lbs. List $14.51. Each ..... **$12.59;**
Lots 10..... **$11.96**

New

MSA

### MOUTHPIECE RESPIRATOR

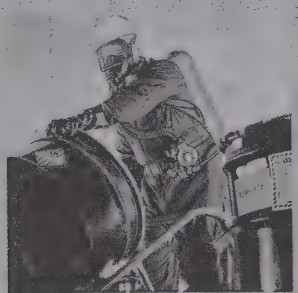
For use in areas that may become suddenly contaminated by chlorine, hydrogen chloride, sulfur dioxide or hydrogen sulfide. Belt clip keeps respirator close by in case of emergency. Lightweight for easy carrying. NIOSH/MSHA approved for safety. Respirator features soft, natural rubber mouthpiece for positive lip seal. Includes nose clip to ensure positive enclosure of nasal passages. Replaceable chemical cartridge. MSA brand (476338)

***New*No. 4LR11** Shpg. wt. 0.9 List $31.72. Each ..... **$28.85**

### SELF-CONTAINED BREATHING APPARATUS (SCBA)

SCBAs provide the wearer with the highest level of respiratory protection available. These units utilize either a thirty or sixty minute cylinder containing pressurized Grade D breathing air which is delivered "on demand" to the facepiece. Because the cylinders are worn on the back of the worker, SCBA's are completely portable, enabling the worker the maximum mobility for special applications such as emergency response and rescue. There are three different types of cylinders and two air flow supply options as follows.

**Full wrap (high pressure only)** Generally lightest in weight. Must be hydrostatically tested every three years.



**Hoop wrap (high and low pressure)** Must be hydrostatically tested every three years.

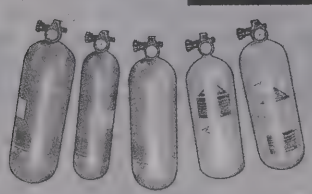
**Aluminum (low pressure only).** Generally heaviest in weight. Must be hydrostatically tested every five years.

## WORKMASK™ II SELF CONTAINED BREATHING APPARATUS (SCBA)

New

MSA

Designed for comfort, users can wear for longer work periods. NIOSH certified for use in environments that do not require compliance with NFPA-1981. For use in industrial facilities, agricultural grain fumigation, water and wastewater treatment plants, HazMat work and HVAC jobs. Features independent by-pass system, rugged, lightweight nylon harness and formed carrier. Available with either dual-purpose or standard regulator. Dual-purpose regulator has Foster fitting. MSA brand.



No. 4LM89 is Medium Size with black Hycar Ultravue® facepiece, dual purpose regulator with Foster fitting and aluminum cylinder. No. 4LM90 is Medium Size with black Hycar Ultravue® facepiece, standard regulator and aluminum cylinder.

***New*No. 4LM89.** WorkMask II with standard regulator (C-WB-311-1M01). Shpg. wt. 45.0. List $1704.71 Each ..... **$1550.00**

***New*No. 4LM90.** WorkMask II with dual purpose regulator (C-WB-341-1M01-1). Shpg. wt. 45.0. List $1959.33 Each ..... **$1782.00**

New

MSA

## CYLINDERS

For use with all MSA SCBAs. Choice of aluminum, Kevlar fully-wound or fiberglass fully-wound composite cylinders. Lightweight, versatile cylinders available with rated service times of either 30 or 60 minutes. MSA brand.

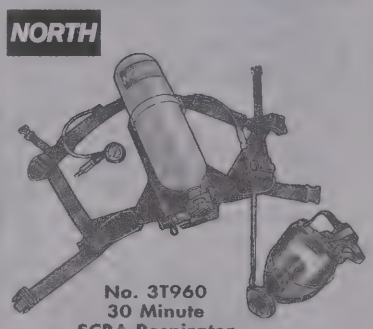
# NORTH SELF-CONTAINED BREATHING APPARATUS

For use in general industry, fire service, utilities, petrochemical and with hazardous materials. These National Fire Protection Association compliant units include full facepiece, cylinder, back plate with Kevlar/Nomex/PBI harness, donning procedure wall chart, training videotape (16 minutes), and polyethylene storage case. North brand.

### SCBA COMPONENTS:

**Full Facepiece.** Scratch resistant, polycarbonate lens provides a 200 degree field of vision, lens fogging is kept to a minimum with the oral/nasal cup. Hypoallergenic silicone facepiece provides worker with superior fit and comfort while the five strap head harness helps maintain facepiece-to-face seal. Speaking diaphragm allows for clear and safe communication.



**Reducer/Regulator.** Fail-open design assures user a supply of air as long as there is air in the cylinder. Protected design eliminates dirt and moisture from entering, resulting in trouble-free operation. Contains only three moving parts reducing the chance of malfunction.

**First Breath Demand Valve.** Allows the user to don facepiece in "standby position" before attaching demand valve, eliminating the waste of air. Features a quick connect facepiece mounting which keeps the demand valve from interfering with user's activity.

**Chest Mounted Warning Whistle and Pressure Gauge.** Whistle letting user know when only 1/4 of air remains in cylinder is positioned close to user's hearing range. Pressure gauge indicates cylinder pressure at all times, positioned in an easy-to-read location.

**Harness and Backplate System.** Durable and lightweight, the harness has fully padded shoulder straps providing exceptional user comfort and easy adjustment. Fully padded lower back support and backplate system evenly distribute weight over a large area for user comfort.

**Cylinders.** Contain Grade D breathing air and can be refilled at local compressed gas distributors, some dive shops, and fire stations. Air refills must meet the Compressed Gas Association Specification G-7.1 for Grade D quality air or better.

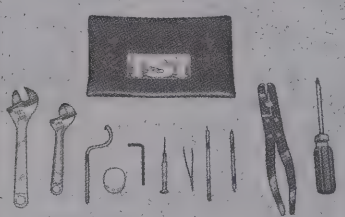
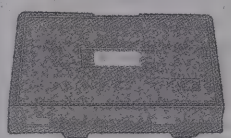
SELF-CONTAINED BREATHING APPARATUS

# ISI MAGNUM PLUS SELF-CONTAINED BREATHING APPARATUS



**The National Fire Protection Association** compliant Magnum Plus self-contained breathing apparatus (SCBA) is total respiratory protection for hazardous environments, including those deemed Immediately Dangerous to Life and Health (IDLH).



ISI

Replacement Parts Available 1-800-323-0620

No. 3AM33
Magnum Plus SCBA

Includes Carrying Case

No. 5AP22 Tool Kit
Sold Separately Below

**Available in two configurations:** 2216 PSI and 4500 PSI. Features a low-profile facemask mounted regulator with a minimum of moving parts. Unit is tested in a 2000°F open flame for 10 seconds simulating flashover conditions. First stage pressure reducer is a fail-safe piston type requiring no adjustment or calibration. Pneumatics system tested continuously over 1,200,000 breathing cycles. PBI/Kevlar shoulder straps are padded for comfort. Close-fitting stainless steel backframe with side arms distributes weight evenly. Waterproof pressure gauge and a loud audible alarm are mounted on right shoulder strap. Cylinder is held close to the body, increasing maneuverability and reducing fatigue. ISI Panaseal facemask features reverted edge seal which uses the facemask pressure to hold a seal against the face, while an inner mask helps breathing efficiency and eliminates visor fogging.

**Includes** full facemask, cylinder, pneumatics, stainless steel backframe. Kevlar harness, and carrying case.

### MAGNUM PLUS SCBA ACCESSORIES

**Pigtail airline adapter kit** allows user to switch between SCBA bottled air and an airline repirator. Hansen fittings. For Magnum Plus SCBA only. ISI brand.

**Tool Kit** for maintenance on the Magnum Plus SCBA. Includes bag, tri-wing screwdriver, 6" and 8" adjustable wrenches, 1/4 oz. Krytox grease, Oetiker clamp tool and O-ring tool, cuticle tool, jeweler screwdriver, 4mm allen wrench, S wrench, and tweezers. ISI brand.

# RESPIRATORY PROTECTION

## 3M™ RESPIRATOR CLEANING WIPES

OSHA recommends that respirators be cleaned and disinfected regularly, with those used by more than one worker being cleaned after every use. Cleaning wipes feature alcohol free formula that cleans respirators without negative effect on facepiece materials. Packaged individually in convenient dispenser box, wipes remain free of debris. 8½ x 11" size. 100 wipes per box. 3M brand (504).

**No. 1CD51.** Shpg. wt. 1.9 lbs. List $37.01. Each **$33.65**; Lots 5 ..... **$31.97**

## RESPIRATOR REFRESHER WIPE PADS

Supplement regularly scheduled respirator cleaning programs. Easy-to-use pads remove perspiration and body oils from respirator facepiece between cleanings. Packaged in dispensers of 100 individual foil packets. North brand (7003).

**No. 4T555.** Shpg. wt. 1.0 lbs. List $18.04. Each **$17.15**; Lots 5 ..... **$16.30**

## GERMICIDAL DETERGENT

Mix detergent with one gallon of water to create EPA-approved germicidal solution for routine cleaning and disinfecting of respirator facepiece. Each jar contains six individual packets of detergent. North brand (80992).

**No. 4T556**●. Shpg. wt. 0.2 lbs. List $25.24. Each **$24.02**; Lots 5 ..... **$22.82**

# RESPIRATORY PROTECTION

## QUALITATIVE FIT TEST APPARATUS

Apparatus offers simple and direct way to meet OSHA qualitative fit testing requirements. Can be used with any particulate or gas/vapor respirator with particulate prefilters to test face-to-respirator seal. Apparatus helps satisfy respiratory program requirements and can be used during respiratory training. Contents: one English/Spanish/French/Portugese laminated instruction booklet, one hood, one collar assembly, nebulizer #1 (sensitivity), nebulizer #2 (fit test), two sets replacement nebulizer inserts, fit test solution, and sensitivity solution. 3M brand.

**No. 1CD80❸.** Sweet Taste Solution (FT-10). Shpg. wt. 2.8 lbs.
List $161.37. Each.....**$146.70▲**

**No. 4JG31❸.** Bitter Taste Solution (FT-30). Shpg. wt. 2.8 lbs.
List $161.37. Each.....**$146.70▲**

(▲) Net prices, not subject to discounts.

## TRAINING AND FIT TESTING CASE

Combines training and fit testing materials needed to help satisfy OSHA requirements for respiratory protection programs. Contains all items in No. 1CD80 Qualitative Fit Test Apparatus listed above plus Universal Fitting Instruction VHS video, Animated Guide to Respiratory Protection VHS video, respirator fitting poster, Administrative Respiratory Protection Guide and molded black plastic case with inside hinge straps and pocket for extra literature. 3M brand (FT-20).

**No. 1CD47❸.** Shpg. wt. 12.0 lbs. List.....$573.10.
Each **$521.00;** Lots 2.....**$494.95**

## QUALITATIVE FIT TEST KITS

Provides an easy-to-use, portable package for testing wearers of air purifying respirators. When properly used, this kit will keep employers in compliance with OSHA regulations for qualitative fit testing.

### IRRITANT SMOKE KIT

Use with No. 6T454. Kit contains: Box of 10 banana oil fit-check ampules (2); Box of 6 fit test irritant smoke tubes (1); Smoke tube bulb (1); Smoke tube breaker (1); Respirator refresher wipe pads (20); Training video (1); Respirator fitting guide wall chart (1); Certificates of training and fit testing (20); Wallet versions of training and fit testing certificates (20); Requests for fit testing (4); Requests for respirator use training (4). North brand (7700-40).

**No. 4GM20❸.** Shpg. wt. 6.7 lbs. List.....$248.67.
Each**$216.50;** Lots 2.....**$205.46**

### BITREX SOLUTION KIT

Use with P100 filters. Kit contains: Fit test hood (1); Fit test solution and nebulizer (1 each); Sensitivity solution and nebulizer (1 each); Respirator wipe pads (20); Training video (1); Respirator fitting guide wall chart (1); Certificates of training and fit testing (20); Wallet versions of training and fit testing certificates (20); Requests for fit testing (4); Requests for respirator use training (4). North brand (86168).

***New*No. 4RM22❸.** Shpg. wt. 7.0 lbs. List.....$272.22.
Each **$245.00;** Lots 2.....**$232.75**

## RESPIRATORY PROTECTION COMPLIANCE SOFTWARE

Helps safety professionals generate necessary forms, procedures and workplace records to comply with OSHA/CSA regulations. Easy-to-learn, menu-driven for developing, documenting, and maintaining a respiratory protection program. Stores workplace records for easy retrieval, continuous monitoring. Software runs on IBM/IBM compatible PC (486 minimum), with Windows 3.1 or higher, Windows 95, Windows NT or Windows for Workgroups. Minimum requirements: 16MB RAM memory, additional 16MB virtual memory, 15MB free hard disk space for each module, VGA graphics adapter or compatible, Windows compatible printer and CD-ROM drive for installation. Available only on CD-ROM. 3M brand.

**No. 3KP32.** Shpg. wt. 1.0 lbs. List $185.35. Each.....**$168.50;**
Lots 3.....**$160.08**

## RESPIRATOR SEAL CHECKS AND FIT TESTS

### ISOAMYL ACETATE (BANANA OIL) SEAL CHECK AMPULES

Provide quick, easy method of checking facepiece to face seal of respirator. Ampules are filled with "banana oil" (amyl acetate) which produces a distinctive banana-like odor easily detected by respirator wearers if they do not have a proper seal. Ampules must be used with organic vapor cartridges. **10 ampules per package.** North brand (7002).

**No. 4T554.** Shpg. wt. 0.1 lbs. List.....$7.20.
Each **$6.86;** Lots 10.....**$6.52**

### ISOAMYL ACETATE (BANANA OIL) FIT TEST KIT

Provides instructions and technical supplies to perform OSHA accepted fit tests. Such testing is required for all employees wearing respirators. Kit is a simple, inexpensive method of determining respirator fit. Tests up to 40 employees. Use respirators with organic vapor cartridges when conducting fit test. Willson brand (14900601).

**No. 5T388.** Shpg. wt. 1.0 lbs. List.....$53.47.
Each **$49.60;** Lots 2.....**$44.61**

## SACCHARIN QUALITATIVE FIT TEST

Ensures that employees are getting a safe respirator seal. Testing hood eliminates need for special fit test chamber. Kit contains test hood, two nebulizer bulbs, fit test solution, sensitivity solution and two sets of replacement nebulizer inserts. Also included a 10-minute videotape detailing requirements for performing OSHA's Saccharin Qualitative Fit Test protocol. MSA brand (697287)

***New*No. 4LR26.** Shpg. wt. 1.7 lbs.
List $218.62.Each.....**$198.75**

## QUICKCHEK® I AND II ADAPTERS

For use with MSA respirators. Small, easy-to-use fit quantitative testing adapter ensures employees are achieving proper respirator seal. QuickChek I for use with MSA respirators equipped with demand-style Ultravue® facepieces. QuickChek® II for use with Comfo II, Comfo Classic, Comfo Elite, Duo-Twin or Ultra-Twin respirator. MSA brand.

***New*No. 4LR48.** Shpg. wt. 0.1 lbs.
List $45.52. Each.....**$41.40**

❸ These products are covered by OSHA Hazard Communication Standard, and Material Safety Data Sheets (MSDS) are available. See page opposite inside back cover.

# HAND PROTECTION

**A Cotton Flannel Gloves.** 8 oz., 100% cotton flannel (canvas) glove for general purpose wear. Provides basic protection. Knit wrist. Clute style. Natural color. Made in USA. North brand.

**B Canvas Work Glove.** Cotton flannel glove with matching knit wrist. Straight thumb. Available in 7, 8 and 12 oz. weights. Clute style. Natural color. Wells Lamont brand.

**C "Big Dog" Cotton Flannel Gloves.** Heavy-duty 12 oz. woven cotton flannel (canvas) fabric offers 50% more wear than conventional 8 oz. styles. Provides extra durability and comfort. Clute style. White color with blue knit wrist. Made in USA. North brand.

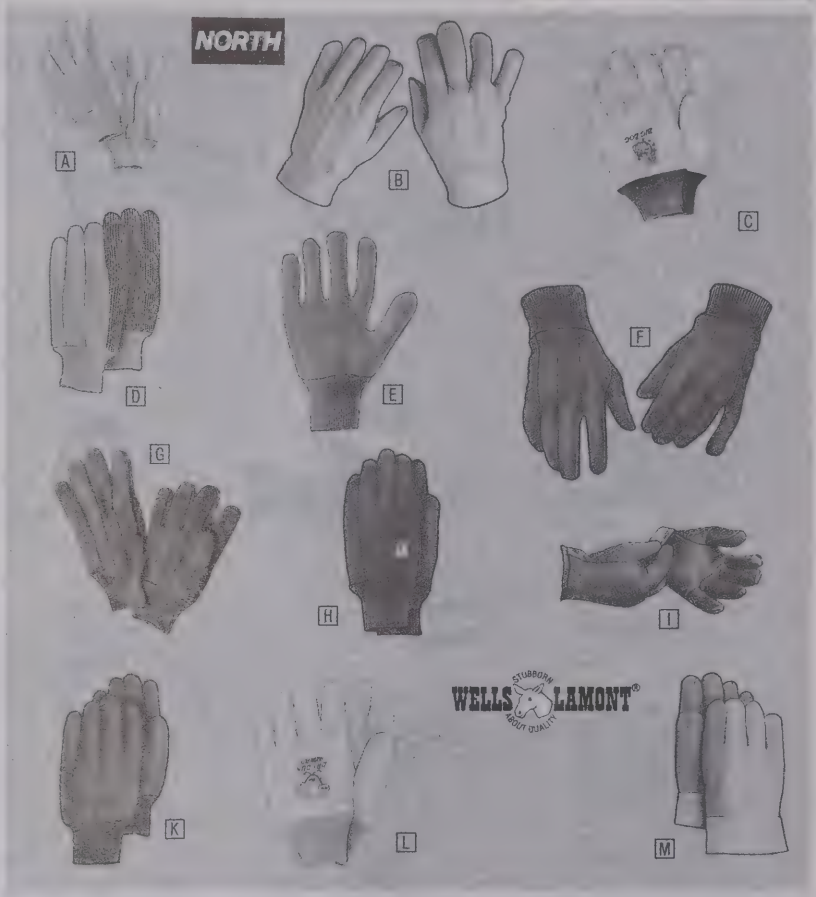
**D Canvas Plastic Dot Glove.** 10 oz. white cotton flannel with plastic grip dots on palm, thumb and forefinger. Matching knit wrist. Wells Lamont brand.

**E White Jersey Glove.** 7oz. 2-piece reversible polycotton knit glove with matching knit wrist. Natural color. Wells Lamont brand.

**F Brown Jersey Gloves.** Brown cotton jersey glove with matching knit wrist (Nos. 1AV08 and 5AX38 are 9 oz. polycotton). Stretches for comfort. Clute style. Wells Lamont brand.

**G Brown Jersey Gloves.** 9 oz. plush brown jersey glove hides dirt and factory grime. For routing work in plants, warehouses, or maintenance departments. Knit wrist. Clute style. Made in USA. North brand.

**H Brown Jersey Gloves with Dots.** 9 oz. brown polycotton jersey glove with plastic dots on palm and forefinger for good grip. Matching knit wrist. Clute style. Wells Lamont brand.



**I Fleece Lined Brown Jersey Gloves.** Polycotton jersey outer fabric bonded to red fleece cotton lining. Slip on gunn style. Wells Lamont brand.

**J Poly/Cotton Blended Jersey Gloves.** Feature Vellux lining, semi-wing thumb, slip-on styling. Gunn cut. Wells Lamont brand.

**K Chore Gloves.** 14 oz. golden brown double palm fleece glove with knit wrist. Nap out. Clute style. Wells Lamont brand.

**L "Dri-Duk" Rubberized Nap Out Gloves.** Double layered chore glove of 100% cotton "Dri-Duk" flannel. Excellent cushioning in double palm provides more comfort. For planting, stamping and similar applications. Water repellent (not liquidproof). 2½" knit wrist. Washable. Clute style. Golden color. Made in USA. North brand.

**M Double Palm Band-Top Gloves.** 18 oz. double palm glove with golden brown fleece palm, nap out, and white canvas back. 2½" band top. Wells Lamont brand.

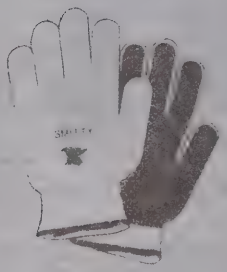
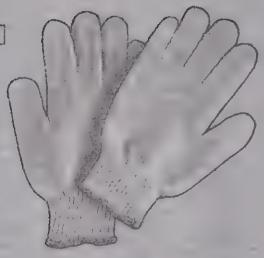
STEEL GRIP

## STEEL REINFORCED WORK GLOVES



Split leather five-fingered gloves. Palm and fingers are reinforced with steel staples over vertical strips of leather to keep abrasion wear above surface and prolong glove life. 4" long gauntlet. Excellent for handling heavy, sharp objects. **Sold in pairs.** Made in USA. Steel Grip brand (644-4).

**No. 5T395.** Work Gloves. Shpg. wt. 1.3 lbs. List $36.20. Each **$29.95**; Lots 6 ..... **$28.43**
Lots 12 ..... **$26.93**



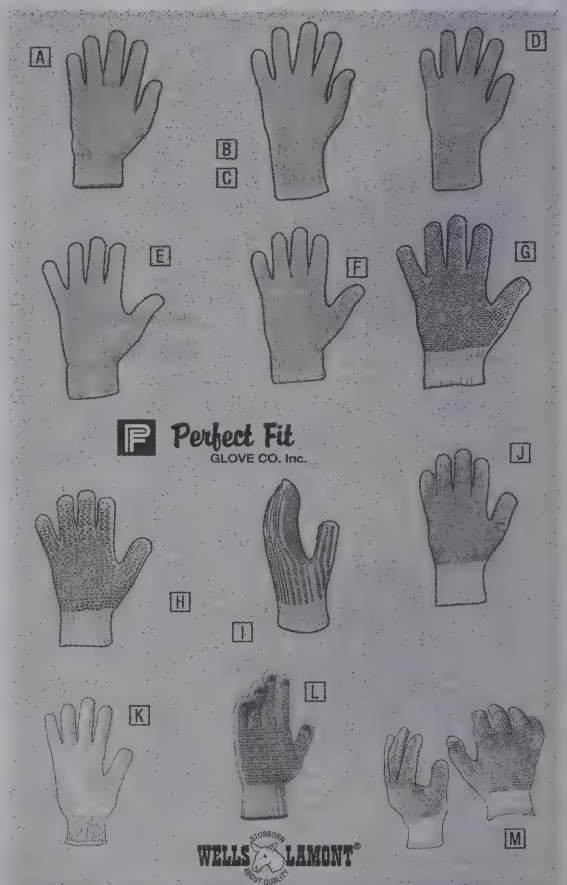
# STRING KNIT GLOVES

Ansell Golden Needles

A **Grip N® Gloves.** Polyvinyl chloride (PVC) "N" tread coating gives outstanding abrasion resistance and grip. Outwear ordinary cotton gloves 4 to 1. Shell fabric is a blend of cotton which absorbs perspiration and acrylic which can be washed with little shrinkage or shape loss. Reversible and coated on both sides to extend wear. Seamless construction for comfort. White/blue color. Made in USA. North brand.

B **Grip N® Nitrile Gloves.** Nitrile "N" tread coating improves grip and provides abrasion resistance and longer life. Seamless construction offers superior comfort and lessens hand fatigue. Precision blended cotton/acrylic knit shell absorbs perspiration and can be laundered or dry cleaned with minimal shrinkage. Ambidextrous design gives four wear sides per pair for maximum economy. Ideal for material handling, assembly and other general purpose applications. White/rust color. Made in USA. North brand.

C **Clean Grip® Gloves.** Replaces many cotton, fabric, and dot-coated gloves. Black PVC dot coating applied both sides of ten cut (closely knitted) shell keeps out more dirt than Grip N® gloves. Positive gripping, washable, reversible, and durable. Seamless construction for comfort. Popular in oil, food, and furniture industries. White/black color. Made in USA. North brand.



D **Smitty® Gloves.** Nitrile coated palm gives maximum abrasion resistance to this durable yet lightweight work glove and helps keep dirt off the palm. Seamless construction for greater comfort. Ten cut shell. Glove is strong enough for use in bottling plants and light metal fabricating industries. Nitrile coating allows glove to be dry cleaned or machine washed. White/rust color. Made in USA. North brand.

E **Kriss-Cross Coated Gloves.** Seamless, non-slip poly/cotton blend glove for comfortable, non-binding fit. PVC coating applied in Kriss-Cross pattern to front and back of glove, with smooth coating at thumb crotch, forefinger and fingertips for added protection. Coating won't become stiff or lose grip-enhancing properties. Hand-to-hand reversible. Shrink-resistant, machine washable. Made in USA. Ansell Golden Needles brand.

# HAND PROTECTION/CUT RESISTANT GLOVES AND SLEEVES

**A thru C Kevlar® Seamless Knit Gloves.** Cut, slash and abrasion resistance for sheet metal, glass handling, welding and steel manufacturing applications. Use alone or with another glove as a liner. Outlast cotton gloves and reduces down time and injuries. Launderable. Made in USA. **Sold by the pair.** Perfect Fit brand.

A Lightweight 13-cut glove for tactile sensitivity.

B Standard weight glove.

C Heavyweight glove with reinforced stitched thumb crotch.

**D, E PVC Coated Kevlar® Gloves.** Palm coated gloves feature added grip, slash and abrasion resistance. For slippery, greasy or hard to handle objects and applications with a high risk of cuts and lacerations. PVC coating provides additional wear surface and prevents grease and oil from penetrating glove, increasing life. Reversible to provide four wear surfaces. Made in USA. **Sold by the pair.** Perfect Fit brand.

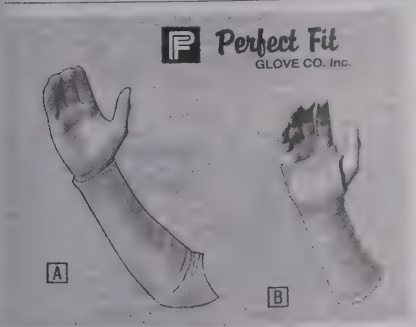
D Standard weight glove with brown PVC dots.

E Standard weight glove with blue PVC straight line coating and PVC reinforced thumb crotch.

**F Nitrile Coated Kevlar® Plated Gloves.** Lightweight glove with plated design puts Kevlar® on outside for better cut/slash protection and cotton/acrylic on inside for worker comfort. Yellow/rust color. Made in USA. **Sold by the pair.** North brand.

**G, H Nitrile Coated 100% Kevlar® Gloves.** 100% Kevlar® to provide protection from cuts. Also provides cushioning and heat protection. White/yellow/rust color. Made in USA. **Sold by the pair.** North brand.

G Lightweight glove. H Mediumweight glove.



**I Kevlar®/Cotton Blend Gloves.** Mediumweight glove with knit shell of blended Kevlar® and cotton for good cut/slash protection. Extra cushioning for increased comfort and heat resistance. White/yellow/rust color. Made in USA. **Sold by the pair.** North brand.

**J Tuff-Coat II™ 100% Kevlar® Gloves.** Cut and puncture resistance for use in glass handling, recycling, canning applications. Textured natural rubber palm provides safe sure grip and abrasion resistance. Coated fingertips and thumb crotch minimize wear to critical areas while open back offers superior ventilation. Conforms to natural contour of hand for comfortable fit and less hand fatigue. Fully launderable. **Sold by the pair.** Perfect Fit brand.

**K Junkyard Dog™ Leather Reinforced Kevlar® Gloves.** Cut, slash and heat resistance for use in metal stamping and fabricating, automotive assembly, sheet metal, glass handling, recycling and canning. 100% Kevlar®fiber shell. Treated 3.5 oz. select leather for abrasion and puncture resistance. Reinforced thumb crotch. Double locked stitched prevents unraveling. Seamless knit construction and ergonomically correct design for better fit, increased ventilation, and greater comfort. Made in USA. **Sold by the pair.** Perfect Fit brand.

# CUT RESISTANT GLOVES AND SLEEVES

A , B **NitraSafe™ Cut Resistant Gloves** combine nitrile and Kevlar® for use in handling sharp, oily, puncturing and abrasive objects such as castings, cores, metal fabrications, glass and lumber. Provides excellent cut, puncture and abrasion resistance. Ergonomic design provides increased flexibility and comfort. Superior dry grip improves material handling and reduces hand injuries. Palm coated gloves available with knitwrist or safety cuff. **Priced and sold by the pair.** Made in USA. Ansell Edmont brand.

C , D **Metalist™ Cut Resistant Gloves** are ergonomically molded for a natural, relaxed fit. Flexible nitrile coating resists cuts and provides sure grip on dry or oily surfaces. Soft cotton liner with Kevlar® woven into high stress areas. Lightweight nitrile safety cuff for extra wrist and forearm protection. Launderable, 9" length. C For use with dry surfaces. D Metalist Foam also features porous nitrile coating to channel oil away from glove surface for firm grip on light oil surfaces. **Priced and sold by the pair.** Ansell Edmont brand.

E **Polar Bear Supreme Gloves** combine cut-stopping strength of steel with superior flexibility. Lightweight, comfortable glove features three strands of steel. Easy to clean material for applications where launderability is critical. Hand-to-hand reversible. White color with color coded wrist trim to identify size. **Priced and sold individually.** Made in USA. Ansell Golden Needles brand.

F , H **Tuff Knit Steel™ Double Strand White Stainless Steel Cord Gloves and Sleeves.** For use in food handling, food processing, meat and poultry packing, paper, pulp, commercial fishing and canning applications. Flexible steel strands offer excellent cut and slash resistance while seamless construction provides comfort, fit and manual dexterity. Two strands of steel wound together and wrapped in white synthetic fiber for sanitary applications. Fully launderable and ambidextrous. **Priced and sold individually.** Made in USA. Perfect Fit brand.

G **Tuff Knit Steel™ Triple Strand Gold Stainless Steel Cord Gloves.** For use in glass handling, sheet metal, textile, food processing, meat and poultry packing, paper and pulp and commercial fishing applications. Triple strand stainless steel offers excellent cut resistance while seamless construction provides comfort, fit and manual dexterity. Blue Block PVC coating adds abrasion resistance and grip. Three strands of steel wound together and wrapped in synthetic fiber to insure comfort and dexterity. Fully launderable and ambidextrous. **Priced and sold individually.** Made in USA. Perfect Fit brand.

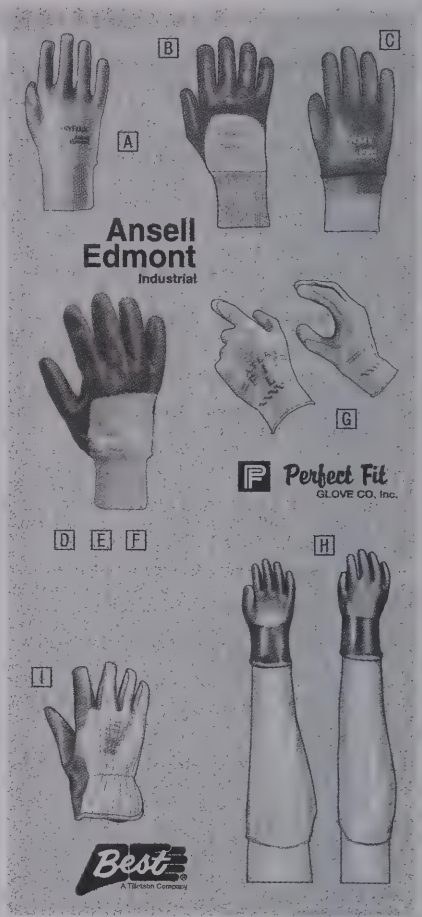
B Palm Coated, Knit Wrist.

C Fully Coated, Knit Wrist

**D thru F Hycron® Nitrile Coated Abrasion Resistant Gloves.** Protects hands from rough, abrasive materials, cuts, snags, punctures, grease, and oil. Soft jersey lining prevents hand irritation. Superior dry grip. Curved, preflexed fingers and wing thumb provide working ease. Use in handling castings, cores, fabricated metal, and building materials such as concrete block, brick, tile, and lumber. Knit wrist or safety cuff style. Component materials of gloves comply with 21 CFR177.2600 for food contact. Blue color. Made in USA. Ansell Edmont brand.

D Palm Coated, Knit Wrist. Made in USA.

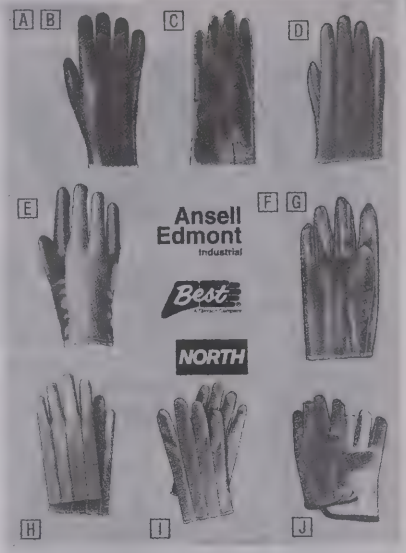


E Fully Coated, Knit Wrist. Made in USA.

F Palm Coated, 2½" Safety Cuff. Made in USA.

**G Atlas Fit™ Rubber Coated Seamless Knit Gloves.** For use in general maintenance, warehousing and assembly applications. Palm coating provides abrasion resistance and safe, sure grip while cotton/polyester shell provides excellent comfort and fit. Gray color won't show dirt or grime. Coated fingertips and thumb crotch minimize wear to critical areas. Conform to natural contour of hand for comfortable fit. Launderable. Perfect Fit brand.

**H Powercoat™ Seamless Double Dipped PVC Gloves with Vinyl Sleeve.** For use in petrochemical, general maintenance, commercial fishing and machining applications. Vinyl sleeve extension for applications requiring splash resistance. Double dipped PVC coating repels liquids and protects hand from chemicals. Anti-germ treated seamless knit liner reduces bacteria and fungus. PVC coating provides excellent grip while remaining flexible. Perfect Fit brand.



**I Strapper™ Nitrile Coated Gloves.** For general warehousing and maintenance applications, forklift operations, metal fabricating and material handling. Palm-laminated driver's style glove with textured finish. Gives excellent grip, wear and comfort while resisting punctures and snags. Features gunn cut, wing thumb to keep out particulate matter. Best brand.

## COATED GLOVES

A, B **Edge® Nitrile Coated, Knit Lined Gloves.** Porous nitrile coating is tough enough to protect hands against abrasions, cuts, and snags, but is soft and flexible. Molds to the hand for greater dexterity. Provides superior dry grip. Channels oil away from glove surface. Use in fabrication, assembly, maintenance, and shipping and receiving. Machine washable. Gray color. Made in USA. Ansell Edmont brand.
A Palm Coated, Slip-On Cuff. Made in USA.
B Palm Coated, Safety Cuff. Made in USA.
C, D, E **Hynit® Nitrile Impregnated Gloves.** Nitrile coating protects hands from abrasions and cuts. Superior dry grip. Interlock knit lining and flexible coating stretch for excellent dexterity. Machine washable. Ventilated style features perforated back panel for cooling comfort. Liquid (not chemical) repellent. Use in assembly, inspection, receiving, light fabrication, and material handling. Component materials comply with 21 CFR177.2600 for food contact. Blue color. Clute style. Ansell Edmont brand.
C Slip-On.
D Perforated.
E Ultra Cool Ventilated Mesh-Back.
F, G **Answer™ Gloves.** Five-piece construction for comfort, fit, stretch and dexterity. Offers cut, puncture and abrasion resistance. For use where silica contamination is a concern in material handling, manufacturing, assembly and general plant applications. Nitrile compound fused to polycotton base fabric. Launderable, and while not liquid proof, minimizes absorption of water, oils and greases. Best brand.
F Fully Laminated, Slip-On Cuff.
G Perforated Back, Slip-On Cuff.
H, I, J **Worknit® Gloves.** Nitrile coating on comfortable knit fabric. Tough and flexible for handling anything from abrasives to sheet metal. Can be dry cleaned for extended service life. North brand.
H Worknit® gloves with plain back.
I Worknit® with Perforated Back for extra coolness.
J Worknit® HD with heavy cotton back and cotton lining to absorb perspiration.

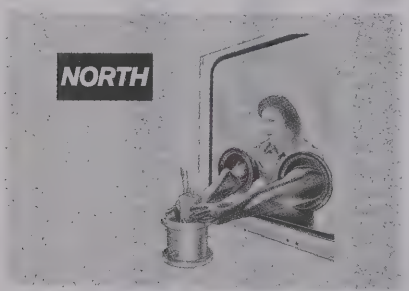
# NATURAL RUBBER COATED GLOVES

A **Golden Grab-It® Rubber Coated Crinkle Finish Gloves.** Natural rubber provides excellent cut resistance and long service life. Crinkle finish provides for safe handling of sharp-edged materials like glass, scrap and sheet metal, and abrasive building materials. Jersey lining for comfort and flexibility. Made in USA. Ansell Edmont brand.

B **Golden Grab-It II® Premium Rubber Coated Crinkle Finish Gloves.** Natural rubber, premium grade coating provides excellent cut resistance and long service life. Crinkle finish for safer handling. Soft knit jersey lining provides comfort and flexibility. Use in handling sharp edged materials such as glass, scrap and sheet metals, and abrasive materials such as concrete block, tile, and lumber. Yellow color. Ansell Edmont brand.

C , D **Nitty Gritty® Natural Rubber Coated Glove.** Cut-resistant, comfortable glove is recyclable and features soft, five-piece flannel liner for greater comfort and flexibility. Multidipped natural rubber coating for superior cut, abrasion, snag and puncture resistance and extended wear. Self-wrinkle finish for excellent wet and dry grip and ease of handling. For use in handling sharp-edged objects like glass, sheet metal, scrap metal or slippery and abrasive materials like lumber, tile, concrete block and brick. Made in USA. Best brand.



C Fully Coated, Wrinkle Finish.

D Palm Coated, Wrinkle Finish.

E **Cutlass™ Gloves Natural Rubber Coated Gloves** with nitrile overdip for excellent flexibility and cut resistance. Wrinkle-finish provides excellent wet or dry grip. Nitrile overgrip gives added resistance to oils, greases and chemicals. For handling sharp-edged objects like glass, sheet metal, scrap metal, tin plate, lumber, maintenance, concrete blocks and general building materials. Palm dipped with 2.5" rubberized safety cuff. Made in USA. Best brand.

# DRY BOX GLOVES

Available in three different materials. Neoprene for high tensile strength and flexibility; butyl for best impermeability to water, vapor, gases, many toxic chemicals, and resistance to oxygenated solvents and most oxidizing chemicals; hypalon for resistance to ozone and abrasion. 8" cuff diameter. Seamless one-piece construction. Used in laboratories and research on isolation boxes. Also for bead and sand blasting boxes. Cement dipped. Black color except hypalon, which is white. Made in USA. North brand.

## COATED GLOVES

A **Raised Finish Winter Monkey Grip™ Gloves.** Raised surface provides excellent wet and dry grip. Vinyl coating resists chemicals and abrasion, protects the nonwoven lining from wetness, and keeps warmth and dryness inside. Use in construction, cold storage, wintertime transportation and handling applications. Tan color. Knit wrist style. Ansell Edmont brand.

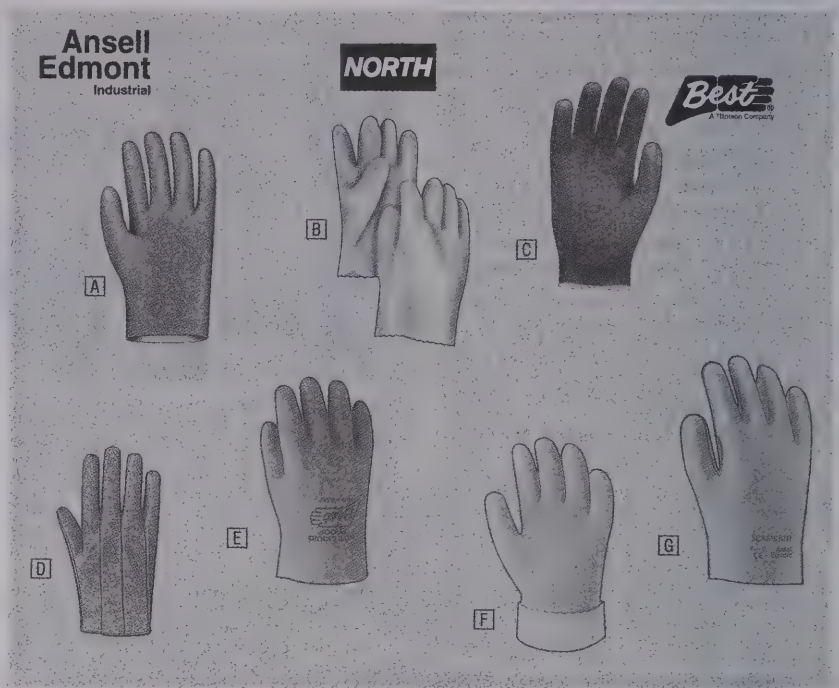
B **Foam Insulated Winter Monkey Grip™ Gloves.** Same features as A above, except for raised finish, plus foam insulation to lock out cold, seal in warmth. Available with knit wrist, fluorescent knit wrist, and gauntlet style. Ansell Edmont brand.

C **Powercoat™ Seamless Double Dipped PVC Gloves with fleece lining.** For use in contracting, petrochemical, and general maintenance applications. Double dipped PVC coating repels liquids and protects hands from chemicals and offers pliable grip even in cold temperatures. Fleece lining offers thermal protection. Fully launderable. Perfect Fit brand.

D **Snorkel® PVC Coated Gloves.** PVC/nitrile blend provides excellent chemical resistance. Rough finish with nylon particles increases cut and abrasion resistance. Curved, preflexed fingers and wing thumb for working flexibility. Jersey lining for cushioning and insulation. Fully coated 12" and 14" gauntlets. For petrochemical and refining applications, handling equipment and abrasive materials coated with acids, caustics, solvents, grease and oil. Dark green color. Made in USA. Ansell Edmont brand.

E **Petroflex® Economy PVC Coated Gloves.** For tough applications with excessive contamination by oils, grease, and chemicals. Rough nylon particle finish provides cut and abrasion resistance. Jersey lining for cushion and moderate insulation. Excellent wet grip. 2-piece lining eliminates seams from the working areas to prevent irritation and premature wearthrough. Curved, preflexed fingers and wing thumb give working ease and flexibility. Use in refining, petrochemicals, machinery, construction, forestry, mining, utilities, handling equipment and abrasive materials coated with oil, grease, acids, and solvents. Available in knit wrist and gauntlet styles. Black color. Ansell Edmont brand.

F **Black Knight™ Gloves.** PVC-coated, abrasion resistant glove for handling chemicals, oil and grease. Applications include use in petrochemical, refining, mining, automotive subassembly or construction industries. Fully coated with jersey liner. Available with rough or smooth finish. Black color. Made in USA. Best brand.



G **Hustler™ Gloves.** PVC coated and nitrile reinforced glove offers excellent abrasion resistance and protection against solvents and acids. Two-piece interlock liner enhances flexibility and comfort. Sanded-on rough finish provides non-slip wet grip. For use with petrochemicals, refining, and handling acids, oil, grease caustics and many solvents. Red color, elbow length gauntlet. Made in USA. Best brand.

H, I **PVC Gloves.** For use in safely handling materials coated or immersed in grease, oil film, mild acids, and caustics. Gloves are tough enough for abrasive tasks while remaining flexible, assuring comfort and dexterity. 12" or 14" length or knit wrist style. Smooth or rough finish. Black color. North brand.

J **Economy Black PVC Gloves.** For use in petrochemical, refining, automotive assembly, mining and construction applications that involve oils, grease and mild chemicals. Rugged coating resists abrasion while lining insures comfort and flexibility. Black color, smooth finish. Gauntlet and knit wrist styles. Perfect Fit brand.

# VINYL AND PVC COATED GLOVES

**A KSR® Vinyl Coated, Knit Lined Gloves.** Comfortable, flexible, long wearing. Excellent dexterity and grip. Liquid (not chemical) repellent. Machine washable. Use in receiving, assembly, inspection, packaging, and maintenance. Tan color. Made in USA. Ansell Edmont brand.

**B Comfort-Knit™ Gloves.** Cool, lightweight interlock knit liner coated with PVC for extra grip and long wear. Slip-on style cuff. Machine washable. Ideal for small parts handling, assembly operations, shipping and receiving. North brand.

**C Knit-Rite™ Plus Vinyl Coated, Air Conditioned Gloves.** Knitted lining and porous coating provide ventilation. Excellent hand dexterity and dry grip. Use in shipping, receiving, assembly, inspection, packaging, light fabrication and general maintenance. Machine washable. Tan color. Ansell Edmont brand.

**D STD® Vinyl Impregnated Super-Flexible Gloves.** Interlock knit lining and flexible coating stretch to provide snug fit. 100% cotton lining and formed fingers for comfortable fit. Longwearing and machine washable. For general plant applications, assembling small or delicate parts. Brown color. Ansell Edmont brand.

**E KPG™ Gloves.** PVC coating on comfortable, continuous-knit, 100% cotton liner provides abrasion resistance and flexibility. Seam free liner for greater comfort. Textured coating assures strong grip. Minimizes absorption of water, oil and grease. Recyclable. Both hands printed for easy size identification and pairing after washing. For furniture manufacturing, automotive subassembly and general maintenance applications. Made in USA. Best brand.

**F Fuzzy Duck™ Gloves.** PVC coating on soft, comfortable two piece jersey liner provides abrasion resistance and comfort. Textured coating provides excellent grip and minimizes absorption of water, oil and grease. Recyclable. Both hands printed for easy size identification and pairing after washing. For small parts handling, general maintenance and assembly applications. Made in USA. Best brand.

**G Seams-Rite® Gloves** feature soft jersey lining with seams on outside of glove. Vinyl coating offers excellent grip. Also available with reinforced thumb crotch for extended life. Machine washable. For general plant use, assembly, and maintenance applications. Made in USA. Ansell Edmont brand.

NORTH Ansell Edmont Industrial

A **Viton® Gloves.** For handling chlorinated, aromatic and aliphatic solvents which deteriorate natural rubber, neoprene, nitrile, and vinyl gloves. Superior resistance to PCB's. Used in aircraft maintenance, printing industry, synthetic fiber manufacturing, degreasing operations, and dry cleaning. Cement dipped. Black color. Made in USA. North brand.

B **Butyl Rubber Gloves.** Highest permeation resistance to gas and water vapor of any glove compound. Lasting protection, flexibility, and dexterity. Used with ketones (MEK, MIBK, acetone) found in machine shops, semi-conductor industry, propellant manufacturing and fuels. Also for use with esters (ethyl acetate and amyl acetate) found in laboratories and the manufacture of man-made fibers. Cement dipped. Black color. Made in USA. North brand.

C **Silver Shield® Gloves.** New lightweight formula offers unmatched flexibility. Made from Norfoil®, a lightweight, flexible laminate that resists permeation and degradation by more toxic/hazardous chemicals than any other type of glove. Excellent for chemical and petrochemical laboratories, photo finishing, and medical labs. Ideal for spill cleanup and hazardous material control operations. Silver color. Made in USA. North brand. **Priced and sold ten pair per package.**

D **PVA™ Polyvinyl Alcohol Coated Organic Solvent Resistant Gloves.** Resist strong solvents such as aromatics and chlorinates—the types that quickly deteriorate rubber, neoprene, and polyvinyl chloride coated gloves. Knit lined for added flexibility. Little absorption to cause swelling and little extraction to cause shrinking. Weighs half as much as a neoprene coated gauntlet. Use in electronics, laboratories, and handling strong organic solvents. **PVA is water soluble. Do not use in water or water based solutions.** Red color. Made in USA. Ansell Edmont brand.

E **Rubber Industrial Gloves.** For industrial applications that require liquidproof gloves. Heavyweights excellent for sand and bead blasting. Cement dipped. **Color of gloves may vary.** Made in USA. North brand.

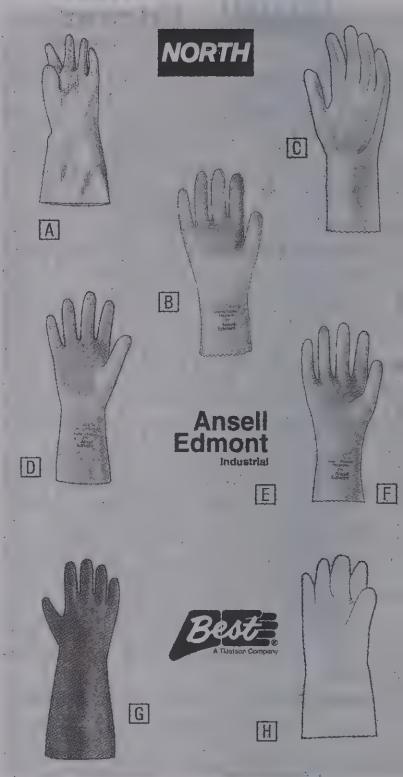
# LATEX AND LATEX BLEND GLOVES

A **Unsupported Natural Rubber Gloves.** For use in food processing, manufacturing applications and handling acids. Flock lining absorbs perspiration and makes glove easier to put on and remove. 12" length, 18 mil thickness for strength to resist punctures and snags. Yellow color. North brand.

B **Latex Rubber Industrial Gloves.** For general industrial and janitorial applications that require chemical resistance to acids, salts, caustics and detergents. Natural color. Unlined. North brand.

C **100% Natural Latex Gloves.** Offer excellent sensitivity plus high resistance to punctures and tears. Cotton flock lining absorbs perspiration, increases comfort. Pattern embossing gives a good grip, wet or dry. Resists acids, detergents, caustics, animal fats, and alcohol. A comfortable, general purpose style for restaurant and food processing work, light cleanup, and maintenance. **Priced and sold by the dozen.** Yellow color. Ansell Edmont brand.



D **Orange Heavyweight Unsupported Natural Latex Gloves.** Offer excellent abrasion, puncture and tear resistance while allowing tensile strength and sensitivity. Resists acids, ketones, salts, detergents, alcohols, alkalies and fats. 100% cotton flock lining increases worker comfort. Component materials comply with 21 CFR177.2600 for food contact. For chemical processing, petroleum refineries, plant maintenance, and clean up. Ansell Edmont brand.

E **Technicians™ Unsupported Neoprene®/ Natural Latex Blend Gloves.** Dexterity and sensitivity with good chemical protection. Pebble embossed design for added grip on wet and dry surfaces. Component materials comply with 21 CFR177.2600 for food contact. Resists animal fats, acids, alcohols, vegetable and mineral oils. For poultry/food processing and parts assembly. Ansell Edmont brand.

F **Omni® Unsupported Neoprene®/Natural Latex Blend Gloves.** Offers excellent chemical, tear, puncture and abrasion resistance. Pebble embossed for added grip on wet or dry surfaces. 100% cotton flock lined. Component materials comply with 21 CFR177.2600 for food contact. Resists caustics, animal fats, alcohols, acids, salts, detergents and petroleum-based solvents. For use in food processing, manufacturing, and chemical plants. Ansell Edmont brand.

G **Chem Master™ Gloves.** Unsupported neoprene over natural rubber glove has good resistance to a broad range of chemicals, and excellent abrasion, tear and puncture resistance. Self-flushing tractor-tread grip encourages run-off of fluids. 100% cotton flock lining for comfort. For use with acids, alcohols, grease, oils, caustics, salts, ketones, detergents, petroleum-based solvents, and animal fats. Black over blue color. Best brand.

H **Value Master™ Gloves.** Unsupported natural rubber glove for tactile sensitivity, comfort and flexibility. Embossed, self-flushing tractor-tread pattern encourages fluid run-off. Excellent wet or dry grip. Resists wide range of chemicals including animal fats, caustics, acids, oils, salts, alcohols and detergents. Air tested. Available unlined (amber color) or flock-lined (yellow color). Best brand.

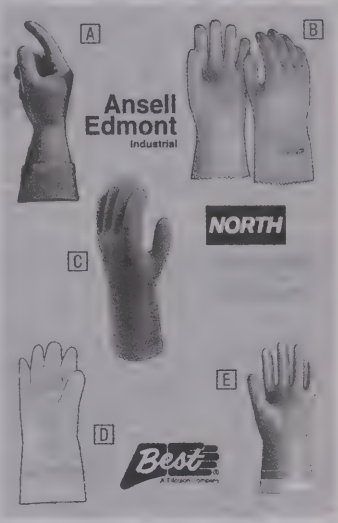
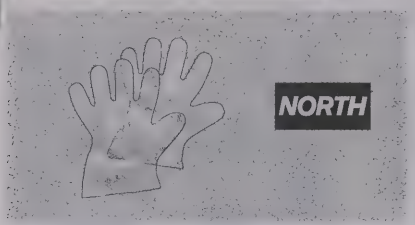
# NITRILE AND NITRILE COATED GLOVES



**A Sol-Vex® Unsupported Solvent Resistant Nitrile Gloves.** Nitrile coating provides longer wear, protection from chemicals, abrasions, cuts, snags, and punctures. Degradation and animal fat resistant. Does not promote contact dermatitis. Curved finger design and contoured palm reduce fatigue. Good wet grip. Available unlined and soft lined. Soft lined models have comfortable cotton flock lining to absorb perspiration. Use in chemical processing, oil refining, petrochemicals, food processing, degreasing, cutting operations requiring oil, battery manufacturing, and electronics. Green color. Ansell Edmont brand.

**B Sol-Knit™ Reinforced Nitrile Gloves.** Resists fuels, lubricants, acids, solvents, detergents, caustics, alcohols, fats and oils. Resistant to sharp edges and abrasive surfaces. Curved, preflexed fingers and wing thumb reduce hand fatigue. Textured palm and fingers for wet or dry grip. For use in automotive assembly, painting, petrochemical refining, degreasing and general maintenance work. Component materials comply with 21 CFR177.2600 for food contact. Ansell Edmont brand.



**C Nitrile Latex Gloves.** Superior resistance to abrasion, cuts, punctures. Effective replacement for neoprene, natural rubber, and vinyl gloves. Durable, but flexible for delicate work. Case-hardened. Flock lining for extra comfort, absorbs perspiration. FDA accepted material for food handling. 4TD77 and 4JD76 feature interlock knit liner. North brand.

**D NitriMaster™ Gloves.** Unsupported nitrile/latex offers good chemical resistance in flexible, low-modulus glove. Embossed tractor-tread finish for excellent grip in wet or dry applications. Two-tone configuration provides contrasting color of green when glove begins to wear. For use in food and chemical processing, general construction and laboratory applications. Best brand.

**E NitriSolve™ Gloves.** Unsupported nitrile provides excellent resistance to abrasions, punctures, cuts and snags, solvents, animal fats and chemicals. Non-slip grip for wet applications For use in food and chemical processing, refining, petrochemical and pesticide handling. Unlined and flocklined styles. Flocklined style made in USA. Best brand.

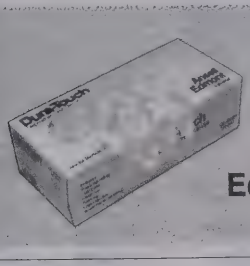
## N-DEX® NITRILE GLOVES

Best
A Tillotson Company

100% nitrile gloves contain no natural rubber proteins that cause allergic reactions. Hypoallergenic. Meet US Government CFR Specifications and are acceptable for use in food and pharmaceutical applications. Conform to hand, reducing hand pressure and fatigue, and giving cooler, drier feeling than with natural rubber or vinyl gloves. Resists wide range of chemicals. Ambidextrous. Blue color. Made in USA. Best brand.

**N-DEX® Gloves.** 4-mil, low-powder, low-modulus glove. 9 ½" long, disposable. **100 gloves per dispenser.**



**N-DEX® Powder-Free Gloves.** 4-mil, powder-free, low-modulus glove. 9 ½" long, rolled cuff, disposable. Meet government regulations for Class 1 Medical Device and made in an ISO 9002 facility. **100 gloves per dispenser.**

**Ultimate N-DEX® Gloves.** 6-mil, low-powder and powder-free, low-modulus glove. 11" long, disposable. **50 gloves per dispenser box.**

**N-DEX® Plus Gloves.** 8-mil, low-powder, low-modulus glove. 9 ½" long, disposable. **50 gloves per dispenser.**

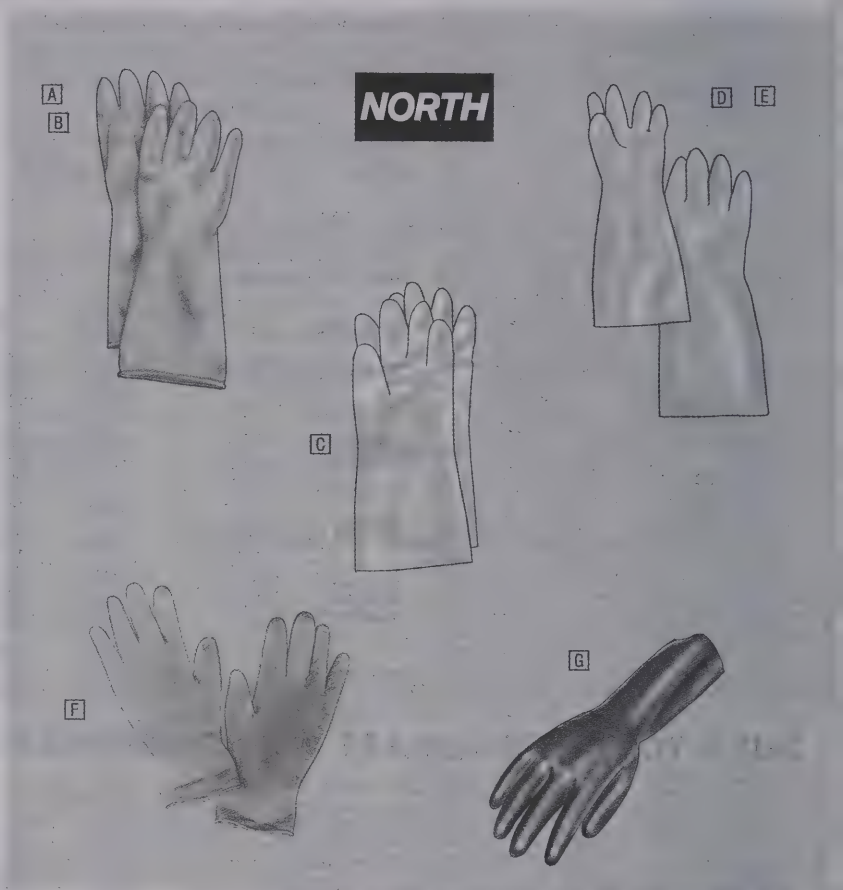
## CLEAN ROOM GLOVES



A, B **AK Clean Room Gloves.** 100% natural rubber latex, 20 mil thickness, 12" in white color, or 15" length in orange color. Superior cleanliness with excellent acid, puncture and tear resistance. Low extractables. For use in acid baths or in the semiconductor industry. Each pair individually packaged in a cleanroom. **Priced and sold per pair.** North brand.

C **SK Clean Room Nitrile Gloves.** 100% powder free, case hardened nitrile for excellent solvent, puncture and abrasion resistance. 9 mil thickness, 13" length. Bisque finish provides a positive grip in wet and dry applications. Sizes are embossed in gloves for permanent size marking. Packed in convenient snap tear package. White color. **Priced and sold per pair.** North brand.

D, E **HP100 Clean Room Gloves.** Specially formulated natural latex to control contamination in a clean room. 7 mil thickness for excellent tactile sensitivity. 12" or 15" lengths. Individually bagged in a clean room to protect against airborne contaminants. Natural color. **Priced and sold 10 pair per package.** North brand.

F **Washed Ambidextrous Natural Latex Gloves.** Special latex formulation enhances sensitivity and comfort. 5 mil thickness, 9½" length. Cleaned by multiple wash process for use in electronics industry or any application where particulate contamination is of concern. White color. Ambidextrous. **100 gloves per package.** North brand.

G **Static Dissipative Gloves.** 7 mil thickness, 12" length. Inherently static dissipative so gloves won't weaken with age, degenerate with rubbing. Do not depend on humidity for effectiveness. Powder free and washed for very low particulate count. $2X10^6$ ohms per square surface resistivity. Packaged in conductive bags so gloves can be taken into workplace. Black color. **Priced and sold per pair.** North brand.

# NEOPRENE® GLOVES

**A, B Scorpio® Neoprene® Coated Knit Lined Super-Flexible Gloves.** Interlock knit lining and flexible coating stretch to provide snug fit. 2-piece lining eliminates seams from working area to prevent hand irritation and premature wear. Curved, preflexed fingers and wing thumb for working ease. Excellent wet grip. Use in petrochemicals, refining, cleaning, utility and material handling, wet or dry. Available with 12" or 14" gauntlet. Green color. Ansell Edmont brand.

**C Neox® Neoprene® Coated Standard Gloves.** Reinforced neoprene coating protects from abrasion, cutting, and chemicals. Fabric lining aids in resisting punctures and snags. Curved fingers and wing thumb for a natural fit. 2-piece lining eliminates seams from working areas to prevent hand irritation. Use in refining, petrochemicals, degreasing, plating, metal fabrication, handling oils, acids, caustics, alcohols, and solvents. Hi-Lo Temperature Style is insulated to protect against heat and cold. Made in USA. Ansell Edmont brand.

**D Neoprene® Unsupported Soft-Lined Gloves.** Same as gloves above except with a soft, cotton flock lining which absorbs perspiration. Also includes embossed palm and fingers for gripping when wet. Straight cuff. Ansell Edmont brand.

**E, F, G Neoprene® Flannel Lined Gloves.** Provides protection against acids, caustics, oils, greases and many solvents. Good abrasion and cut resistance. Heavyweight styles feature five-piece flannel liner. Available in smooth or rough finish. Black color. Made in USA. Best brand.

**Lineman's Rubber Insulating Gloves.** Natural rubber gloves are cement dipped to protect wearer against electrical shock while working around energized systems and appliances. Rubber gloves meet requirements of ASTM D 120, "Standard Specifications for Rubber Insulating Gloves." Class 1, 2, and 3 gloves have red interior which shows through black outer layer when larger snags or cuts occur. Class 00 gloves are red. Class 0 gloves are solid black. **Gloves should be tested every 6 months in accordance with ASTM F496, "Standard Specifications for Testing Rubber Insulating Gloves" at a local authorized safety equipment testing facility.** Made in USA. North brand.

**Cowhide Leather Protectors.** These protectors are designed to be worn over rubber insulating gloves to protect the rubber against physical damage. Top grain cowhide. Made in USA. North brand.

**Summer and Winter Knit Glove Liners.** Cotton summer liners absorb perspiration from hands. Acrylic/wool blend winter liners keep hands warm in cold weather. Made in USA. North brand.

**Insulator Winter Liner.** Use in cold and/or damp environments. Lycra/Thermax construction with hollow fibers to remove perspiration. Keeps a layer of warm dry air next to skin. Wear alone or as a liner. Shrink and mildew resistant. Machine wash and dry. Fits either hand. White color. Made in USA. Ansell Golden Needles brand.

**Canvas Glove Bags.** Use for temporary storage of lineman's gloves and protectors while not being used on the job. Comes with clip for hanging bag on belt. Made in USA. North brand.

Ansell Golden Needles

## HEAT RESISTANT GLOVES

A, B **Green Hot Mill Gloves.** 30 oz. nap out gloves with burlap inner layer to improve heat resistance. Available with band top or gauntlet cuff. Clute cut. Wells Lamont brand.

C **Quilted Nap Out Double Palm Gloves.** 18 oz. nap out double palm increases insulation and abrasion resistance. Outside nap has soft comfortable feel. For use in cold glass handling, construction, light heat, and general industrial applications. Safety cuff. Brown color hides dirt and grime. Made in USA. North brand.

D, E **Hot Mill Gloves.** Traditional 24 oz. 100% cotton nap out glove with band top provides good insulation. Oversized style allows air circulation around hand during use. Available with band top or gauntlet cuff. White color. Made in USA. North brand.

F, G **Hot Mill Gloves.** 22 oz. 100% cotton nap out glove. Available with band top or gauntlet cuff. Natural white color. Clute cut. Wells Lamont brand.

H **thru** J **Seamless Terry Cloth Gloves.** For use in glass handling, injection molding, steel manufacturing, refining and hot mill applications that require heat, abrasion and cut resistance. Seamless knit construction eliminates weak points at seams. Allows worker comfort while lessening hand fatigue. Knit terry cloth stretches to provide good fit and ventilation to keep hands dry. Hand-to-hand reversible to provide four wear surfaces. Can be laundered to extend glove life. Ambidextrous. Loops offer cushion of air that insulates against elevated temperatures. Made in USA. Perfect Fit brand.

H Seamless Terry Cloth, Loop Out, 24 oz. 100% cotton.

I Seamless Terry Cloth, Loop In, 24 oz. 100% cotton.

J Seamless Terry Cloth, Loop In, 14 oz. Polyester/Cotton.

K **Terry Knit Hot Mill Gloves.** Terry knit provides good heat protection. Rugged design is more abrasion resistant than quilted or traditional hot mill styles. Comfortable, large glove with knit wrist. White color. Made in USA. North brand.

L **Kevlar® Blend Terry Cloth Gloves.** Seamless terry cloth, loop out. 24 oz. Kevlar®/cotton blend. Feature 100% Kevlar® loops for jobs that require added protection against cuts, slashes and abrasions as well as extreme heat. For use in glass handling, steel manufacturing and hot mill applications. Cotton interior absorbs perspiration and moisture. Ambidextrous for easy laundering. Made in USA. Perfect Fit brand.

M **Seamless Terry Cloth/Kevlar® Blend Gloves.** Heavyweight 24 oz. Terry Cloth/Kevlar blend fabric with knitwrist cuff. Reversible for longer wear. 200°F maximum temperature. Made in USA. Jomac brand.

N **Grip N® Hot Mill Gloves.** Outwears traditional 24 oz. hot mill gloves 4 to 1 and can be used in applications up to 400°F. "N" nitrile coating improves grip, extends wearability and is dry cleanable. Machine knit inner layer bonded to waffle design outer layer for maximum heat resistance and cushioning. Outer layer is 100% cotton for safety; inner layer is cotton/acrylic blend which absorbs perspiration. Seamless construction for additional comfort and long life. Ambidextrous design for added wear. For use in foundries, bottle manufacturing, sheet metal working, heat treat operations, castings and metal forming. White/rust color. Made in USA. North brand.

O **Grip N® Double Gloves.** Heavy duty string knit with nitrile "N-Tread" coating for outstanding grip and abrasion resistance. Seamless construction offers superior comfort. Can be dry cleaned. Made in USA. North brand.

P **Kevlar® Grip N® Hot Mill Gloves.** Same features as Grip N™ Hot Mill gloves except outer shell is Kevlar®/cotton blend for cut/slash protection. White/yellow/rust color. Made in USA. North brand.

Q, R **Thermoshield™ Seamless Thermal Gloves.** For use in glass handling, injection molding, plastic processing and refining. Glove within glove design offers thermal protection. Rust nitrile V coating for added thermal protection, grip and abrasion resistance. Seamless knit construction resists job stresses. Ergonomically correct design for better fit, increased ventilation and greater comfort. Ambidextrous and easily launderable. Cotton or Cotton/Kevlar knit available. Made in USA. Perfect Fit brand.

# HAND PROTECTION/ HEAT- AND CUT-RESISTANT GLOVES

**A Crusader® Flex Hot Mill Gloves.** For intermittent handling of medium hot objects up to 400°. Helps protect against abrasion, cuts and snags. Two piece construction eliminates outseams for improved comfort, dexterity, flexibility and grip. Nonwoven felt insulation on inner front for superior heat protection, comfort and breathability. Full length heat barrier extends length of glove. Launderable. Made in USA. Ansell Edmont brand.

**B, C Heat Resistant Terry Cloth Gloves.** Extra heavyweight material with 350°F maximum temperature. Reversible. Brown and white color. B has 5½" gauntlet cuff, C has safety cuff. Made in USA. Jomac brand.

**D, E Heat Resistant Terry Cloth Lined Gloves.** Extra heavyweight material with 450°F maximum temperature. Reversible. Brown and white color. D has 5½" duck gauntlet cuff, E has safety cuff. Made in USA. Jomac brand.

**F thru H Heavyweight Cut and Sew Terry Cloth Gloves.** 24 oz. terry cloth glove with 250°F maximum temperature. Reversible. Cut and sew design adds bulk for cut resistance. White color. F has knit wrist, mens standard size. G has knit wrist, mens jumbo size, H has band top cuff. Made in USA. Jomac brand.

**I Heat Resistant and Flame Retardant Terry Cloth Lined Gloves.** Extra heavyweight material with 450°F maximum temperature. 5½" gauntlet cuff. Reversible. Red color. Made in USA. Jomac brand.

**J thru M Terry Cloth Gloves** enhance wearer comfort by cushioning and protecting hand. Can be laundered without excessive shrinkage. Made in USA. Ansell Golden Needles brand.

J 24 oz. Reversible, knit wrist. K model is Jumbo. White color.

L Extra heavyweight, reversible, gauntlet style. White color.

M Jumbo 100% Kevlar, heavyweight, wool lined gauntlet style. Gold color.

**N Heavyweight Cut and Sew Terry Cloth Gloves.** 250°F maximum temperature. Rubberized 5½" gauntlet cuff. Cut and sew design adds bulk for cut resistance. White color. Made in USA. Jomac brand.

**O Heavyweight 100% Kevlar Outer Shell Flame Retardant Gloves.** Fully wool lined for high temperature protection. 900°F maximum temperature. 5½" flame retardant duck gauntlet cuff. Reversible. Made in USA. Jomac brand.

**P, Q Heat Resistant Leather Gloves.** Specially tanned to resist higher heat levels. Wool lined, Kevlar thread sewn. One size. Sold in pairs. Made in USA. Steel Grip brand.

P Leather cuff gloves feature long-wearing thumb strap and pull patch. Clute style with 4" cuff.

Q Duck cuff gloves are same as P above, with unlined duck cuff.

**R thru U Heat and Cut Resistant Terry Cloth Sleeves.** White color. Made in USA. **Priced and sold individually.** Jomac brand.

R Mediumweight with elastic top and knit wrist. 200°F maximum temperature. 15" length.

S Extra Heavyweight with open top and knit wrist. 350°F maximum temperature. 10" length.

T Extra Heavyweight with elastic top and hemmed bottom. 350°F maximum temperature. 12" length.

U Extra heavyweight with elastic top and hemmed bottom. 350°F maximum temperature. 19" length.

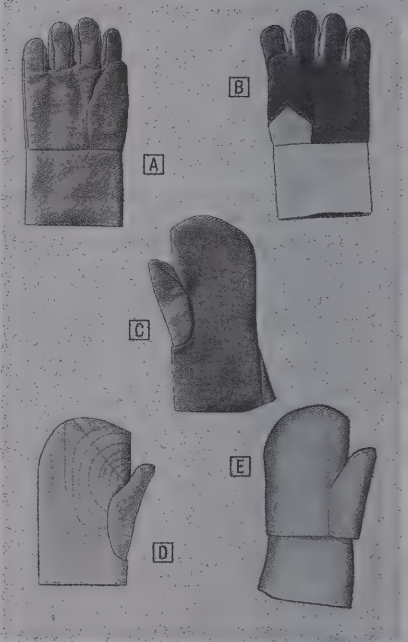
## THERMONOL HEAT PROTECTIVE GLOVES, MITTENS, AND COVERS

Made with 22 oz. thermonol, a combination of DuPont's "Kevlar® 29" yarn and other nonasbestos fibers. This cloth provides excellent protection against high heat, offers superior abrasion resistance, has excellent tensile strength, and resists mildew. Recommended as a suitable substitute for asbestos in many applications. Made in USA. Steel Grip brand.

A **Heat Protective Gloves.** Five fingered, wool-lined and Kevlar thread sewn. **Priced and sold per pair.**



B **Leather Reinforced Heat Protective Gloves.** Five fingered glove with fingers, palm, and thumb reinforced with special heat-resistant leather. Wool lined and Kevlar thread sewn. For use where more abrasion resistance is required in a high heat application. **Priced and sold per pair.**

C **Heat Protective Mittens.** Wool lined and Kevlar thread sewn. **Priced and sold per pair.**

D **Multi-Layered Reversible Mittens.** Double lined and quilted on wear surface, heavy wool lining, and Kevlar thread sewn. Mitten is reversible which doubles its life. Excellent for hot foundry jobs. **Priced and sold per pair.**

E **Reversible Mitten** Cover fits over most mitts. Closed-end style. **Priced and sold per pair.**

## NATIONWIDE BRANCH NETWORK WITH LOCAL ACCESS IS YOUR SHOPPING ADVANTAGE

**Grainger's network of more than 350 local branches provides you nationwide access to our broad selection of product offerings. And with 30-minute "Will Call" service or 24-hour shipping on in-stock items, help is as close as a phone call away. Check the Branch Locations listed in the front of this catalog for the location closest to you.**

## WELDING GLOVES

A **Terry Cloth Welding Gloves.** 24 oz. terry cloth glove protects up to 300°F and is intended for light welding operations. A cooler lightweight alternative to leather. 4" gauntlet cuff is made from flame retardant canvas and is sewn inseam to the glove. Deep terry pile also provides protection from cuts and abrasions when handling metals. Made in USA. Steiner brand.

B **Heavyweight Terry Cloth Welding Gloves.** Heat and flame retardant with duck gauntlet cuff. 250°F maximum temperature. Made in USA. Jomac brand.

C **Lined Leather Welding Gloves.** 14" brown cowhide welding glove. One-piece back construction with a full cotton lining. Continuous welting on thumb and forefinger and the tips of the other fingers to provide extra protection against burn-out of seams. Gunn cut pattern with a wing thumb for greater comfort and flexibility. Reinforced thumb strap. Steiner brand.

D **Lined Leather Welding Gloves.** Two-piece glove of special tanned split cowhide leather. Provides protection from welding slag. Full size and full lining for extra protection from heat. All critical seams welted for maximum life. Tough pigskin cuff. Gunn cut. North brand.

E **Economy Leather Welding Gloves.** Pearl gray standard shoulder split cowhide construction. One piece back with wing thumb. Reinforced welting and full sock lining. Wells Lamont brand.

F **Lined Leather Welding Gloves.** Premium select side split leather construction. 100% Kevlar sewn with double stitched reinforced wing thumb and palm. Full flame retardant sock and thermal foam lining, with welting on all seams. Wells Lamont brand.

G **Leather Welding Gloves.** Double tanned, heavy select side split cowhide construction. Full flame retardant hand sock lining. Reinforced wing thumb, full welting, sewn with Kevlar thread. Wells Lamont brand.

H **Grain Pigskin Tig Gloves.** Soft premium grain pigskin construction. 4" split leather cuff, gunn cut, straight thumb. Wells Lamont brand.

I **Grain Goatskin Tig Gloves.** Extra soft, unlined goatskin gloves for added protection with a sensitive touch. 3" pigskin cuff protects wrists. Goatskin contains natural oils that keep the glove soft and comfortable. Steiner brand.

J **Grain Sheepskin Tig Gloves.** Extra soft unlined sheepskin glove. Sewn inseam to a 4" cowhide cuff. Can also be used in other operations where the need for protection weighs equally with the need for a sensitive touch. Made in USA. Steiner brand.

## FINGER COTS

**Powdered White Finger Cots.** 3 mil thick cots for maximum sensitivity. Highest quality domestic natural latex of uniform thickness and tensile strength assures protection with confidence. For use where particulate is not a factor. 2¾" long. White color. **1440 per package.** Made in USA. North brand.

**Washed White Finger Cots.** For use when handling delicate components, especially electronic and other subminiature parts. Minimizes corrosive effects of perspiration, body salts, and soap residue on semiconductors, internal parts, transistors, high purity metal products, and optical devices in clean room environment. Cleaned by multiple water wash process. Comfortable, does not restrict circulation. For use where particulate contamination is a concern. Meets requirements of ASTM D3772 and IES-RP-CC-005-87-T. 2¾" long. White color. **720 per package.** Made in USA. North brand.

**Washed Anti-Static Finger Cots.** Suitable for use with static discharge-sensitive devices. Surface resistivity of 2X10 11 power ohms per square. 2¾" long. Packaged in electro-static-free polybag. **720 per package.** Made in USA. North brand.

**Washed Static Dissipative Finger Cots.** Same high quality as washed white finger cots plus they provide inherent static dissipation feature which is not affected by humidity and cannot be rubbed off. Cots bleed off 5000 volt charge in 0.01 seconds. Have a surface conductivity of $2 \times 10^6$ ohms per square, will not build up static, and will not smudge product being handled. Meets requirements of ASTM D3772 and MIL-P-82646A. 2¾" long. Black color. **720 per package.** Made in USA. North brand.

## INDUSTRIAL SAF-T-TAPE®

Perfect skin protector for industry. Large 30 yard roll of Saf-T-Tape® sticks to itself, not to skin or hair. Protects hands and fingers from heat, cuts, or abrasions without loss of finger sensitivity. Allows skin to breathe. Prevents bruises and skin burns. Lessens harmful effects of friction. Facilitates positive grip during assembly operations. Prevents contamination of polished parts by skin oils. Works well in both water and oil. Use in assembly line work, motor assembly, handling hot molds, grasping cut metals, and other general finger protection applications where gloves cannot be used. Safety green color. Modern Aids brand.

## KLEENGUARD® GENERAL PROTECTION COVERALLS

**General Protection In An All-Purpose Garment**

- Filters out many particles, resists water-based liquids
- Disposable, eliminates laundry/rental costs
- Breathable fabric allows air to pass through to evaporate perspiration and cool the skin
- Ideal for general industrial applications, asbestos abatement, manufacturing, assembly operations, pharmaceutical and food processing
- Nos. 5FW65, 5FW66, 5FW67, 5FW68 and 5FW69 feature a zipper front
- Nos. 5FW70, 5FW71, 5FW72, 5FW73, and 5FW74 feature hoods, boots, elastic backs, wrists and ankles

General Protection Zipper Front Coveralls

General Protection Hooded Coveralls

## KLEENGUARD® EXTRA PROTECTION COVERALLS

**Extra Protection Against Oils, Resins And Low Surface Tension Liquids**

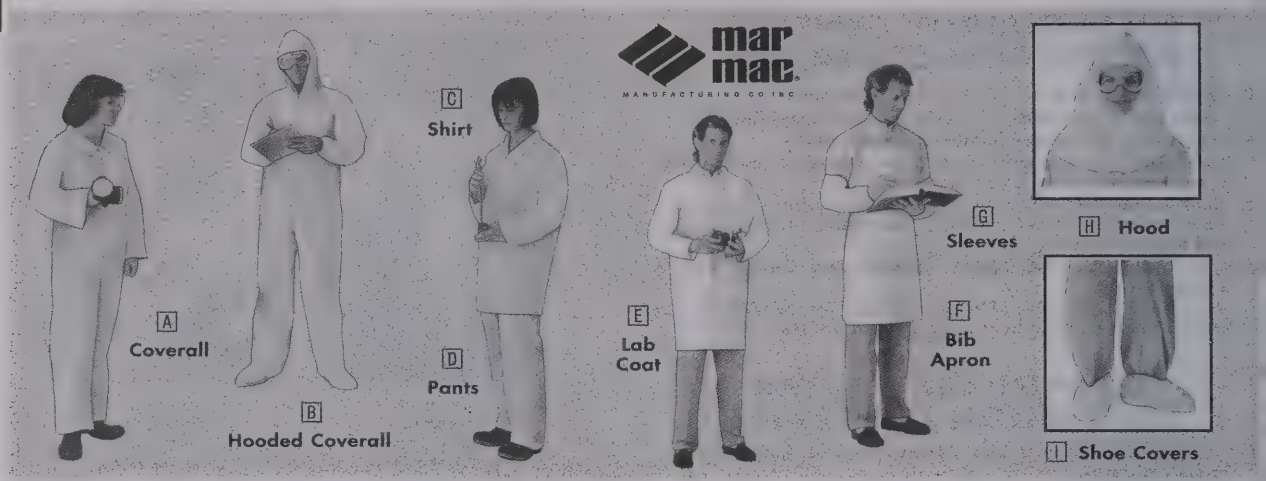
- Repels light liquid splash and spray of low surface tension liquids
- Low linting and antistatic
- Breathable fabric reduces the risk of heat stress
- Designed for total wearer comfort
- Ideal for paint manufacturing and spraying, electronics and aerospace, pharmaceutics and research laboratories
- Antistatic material with hip pocket, elastic back and wrists

Kimberly-Clark

Extra Protection Coveralls

Heavy-Duty Protection Coveralls

## KLEENGUARD® HEAVY-DUTY COVERALLS



**Proven Protection Against Fine Dusts, Fibers And Liquid Splash**

- Heavy-duty fabric is an effective particle barrier
- Durable enough for long duration tasks
- Repels liquid splash and spray of many water-based liquids
- Breathable fabric for worker comfort and productivity
- Ideal for dusty environments with grinding, filing or sanding
- Features hip and chest pockets, elastic back and wrists

# TYVEK® PROTECTIVE WEAR™ CLOTHING

**TYVEK® Protective Wear™ is a nonwoven material** by duPont, made by spinning together polyethylene fibers then bonding them under heat and pressure. Lightweight and soft, yet strong whether wet or dry, and resistant to abrasion, puncturing, and tearing.

**Provides excellent protective shield,** holding out 99.9% of all dry particulate down to 0.5 microns in size. Offers splash protection against many liquids. Being 100% polyethylene, Tyvek's physical properties are virtually unaffected by most organic and inorganic chemicals, including acids, bases, and salts. Clothing is comfortable, flexible and economical to wear.

**Typical applications include** general maintenance work, asbestos removal, fiberglass handling, paint spraying, sandblasting, drug and pharmaceutical manufacturing, nuclear, medical and research work, food handling and processing. FDA and USDA approved. White color. MarMac brand.

**DuPont's Tyvek® Protective Wear™ Material** meets OSHA requirements. Flammability: Rated Class 1 in tests by CS-101-153 for general wearing apparel. USDA and FDA approved for food handling use.

A **Zip-Front Coveralls.** Set-in sleeves allow wide range of shoulder motion without binding. Serged seams offer protection against many dry particulates and light sprays. Full-length, nonsparking, nylon teeth zipper. **Available in packs of 6 or 25 garments.** White color. MarMac brand (14120).

B **Hooded Coveralls.** Zipper-front coveralls have elastic wrists and ankles, attached hood with elastic face opening and nonskid boot covers. Garment has serged seams and set-in sleeves. Nonsparking nylon teeth zipper. **Available in packs of 6 or 25 garments.** White color. MarMac brand (14261).

C **Snap-Front Shirt.** Long sleeves with collar. **12 shirts per box.** White color. MarMac brand (14303).

D **Elastic Waistband Pants. 12 pants per box.** White color. MarMac brand (14350).

E **Lab Coats.** Low-lint and anti-static properties. Coats have 4-snap front, two pockets, serged seams and set-in sleeves that allow greater freedom of movement. **8 lab coats per box.** White color. MarMac brand (14301).

F **Bib-Style Apron.** Measures 28 x 36" to provide full front coverage. Bound neck with long ties. **100 aprons per box.** White color. MarMac brand (14470).

G **18" Long Sleeves. 100 pair of sleeves per box.** White color. MarMac brand (14500).

H **Elastic Opening Hood.** Shoulder length for greater coverage. One size fits all. **100 hoods per box.** White color. MarMac brand (14386).

I **Elastic Top Shoe Covers.** One size fits all. **100 pair of shoe covers per box.** White color. MarMac brand (14440).

# TYVEK® QC AND POLYPROPYLENE PROTECTIVE CLOTHING

## POLYPROPYLENE CLOTHING

**Polypropylene fabric** is soft, durable material made from spunbonded, extruded polypropylene filaments. Durable lightweight garments offer excellent inexpensive protection to wearers. Use when performing nonhazardous duties including general maintenance work, dirty and dusty jobs. **NOT RECOMMENDED FOR ABSESTOS.**

**Coveralls** have set in sleeves and full zipper front. Bouffant has full elastic headband; fits all sizes. White color. Kappler brand.

## POLYETHYLENE COATED TYVEK® QC CLOTHING

**Tyvek QC fabric has an additional coating** of liquid polyethylene applied to one side. Provides excellent splash protection for a midrange of chemicals and particulates. Garments made from Tyvek QC serve applications where hold-out is important: battery manufacturing, acid handling, tank cleaning, mixing concentrated agri-chemicals, oil refining, certain hazardous materials and waste cleanup.

More economical than rubber or PVC suits. Virtually unaffected by most organic and inorganic chemicals. 3 coveralls per box. Yellow color. Kappler brand.

**Coverall** has set in sleeves, full zipper front and serged seams.

**Coverall with Attached Hood** has same features as coverall, plus elastic wrists and ankles and attached hood with self-adjusting elastic face opening.

## SARANEX® 23P FILM-LAMINATED TYVEK® CLOTHING

**A layer of** chemical resistant Saranex 23P is film laminated to Tyvek fabric. This virtually impenetrable coated fabric offers the optimum barrier protection available in a range of limited-use protective clothing. Use Saranex-laminated Tyvek when encountering hazardous materials: PCB, nitric acid 70%, sulfuric acid 90%. Used where regular or PE-coated Tyvek does not offer sufficient hold-out protection.

Costs less than butyl/viton rubber suits. **3 coveralls per box.**

**Hooded Coveralls and Hooded Coveralls with Sock Boots** feature bound seam construction for better protection from liquid splash. Storm flap over zipper, elastic wrists and set in sleeve pattern provide additional comfort. White color. Kappler brand.

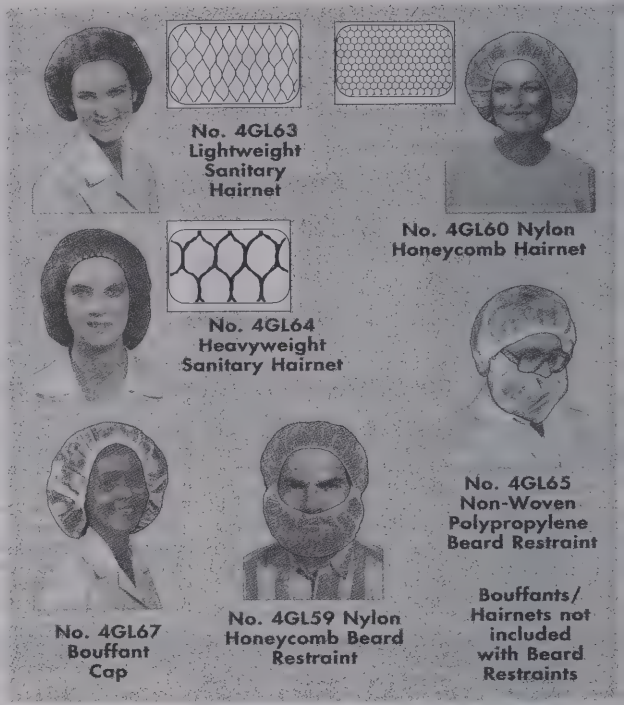
# PROTECTIVE CLOTHING AND DISPENSERS

CELLUCAP FRANKLIN DISPOSABLES

## SANITARY HAIRNETS

Soft, nylon hairnets protect both the wearer and equipment from injury and damage. Falling hair and dandruff are contained preventing product contamination and airborne particles are kept out of hair. These nets are fire-retardant and meet local, state and federal requirements. Lightweight hairnets are available in white, light brown or dark brown. Heavyweight hairnets are available in white or dark brown. **144 hairnets per box.** Cellucap brand.

## NYLON HONEYCOMB HAIRNETS



**Soft, flame-retardant,** 1/8" aperture nets provide high visibility and ensure maximum sanitation. Honeycomb nets have elastic band for easy fit and comfort. White color. **100 hairnets per box.** Cellucap brand.

## BOUFFANT CAPS

**Headcovers** made from breathable, non-woven polypropylene material which prevents contamination by keeping bacteria, falling hair, dandruff and dust completely contained within head covering. These caps are flame-retardant, lint-free and are for use when extra particulate protection is required. White color. **100 bouffant caps per box.** Cellucap brand.

## BEARD RESTRAINTS

**Choose from** breathable, lint-free non-woven polypropylene fabric or heavyweight nylon honeycomb mesh. For use when absolute sanitation is required. Both beard restraints are flame-retardant and cover facial area to help eliminate product contamination. **100 beard restraints per box.** Cellucap brand.

# CHEMICAL PROTECTIVE CLOTHING

CPF 1 Coverall with Serged Seams

CPF 2 Coverall with Bound Seams

CPF 3 Coverall with Strapped Seams

CPF 4 Fully Encapsulated Suit with Strapped Seams

RESPONDER Suit with Sewn and Heat Sealed Seams

## A CPF® 1 COVERALLS

Features increased physical strength and splash resistance over other competing fabrics by laminating a multilayered barrier film to a durable 1.2 oz. polypropylene substrate. This lamination process eliminates pin holes, which can sometimes be a problem with coated polypropylene products. Use for protection from dry particulates and light splash. Full zip front, elasticized hood, wrists and ankles. Set-in sleeves provide ease of motion. **Priced and sold in packs of 12.**

## B CPF® 2 COVERALLS

Coveralls offer greater tear resistance and hold-out by laminating a layer of co-extruded barrier film to a 1.5 oz. polypropylene substrate. For use against a wide variety of chemicals and where rip-out is a concern. Applications include remediation, chemical handling and clean-up operations. Features set in sleeves for ease of motion. Full zip front. Attached hood has self-adjusting elastic face opening, and attached boots feature elastic ankles for proper boot positioning. **Priced and sold in packs of 12.**

## C CPF® 3 COVERALLS

Constructed from a multilayer barrier film laminated to a durable 2.0 oz. polypropylene substrate to provide greater physical strength and chemical hold-out. For use in rigorous activities and where there is potential for chemical splash. Features include set-in sleeves for ease of motion, elasticized hood, wrists and ankles and full zip front. **Priced and sold in packs of 6.**

## D CPF® 4 FULLY ENCAPSULATED SUIT

Constructed of a multifilm composite laminated to a strong 2.3 oz. polypropylene substrate for one of the broadest ranges of chemical protection available for level B suits. Features 20 mil PVC faceshield, expanded back, exhaust ports and rear entry. Includes attached hood, attached sock boots, set-in sleeves for ease of motion, full zip front, elastic wrists and ankles. **Priced and sold individually.**

## E RESPONDER®

Limited use material designed to offer high degree of permeation resistance to a broad range of chemicals. Made of a multiple film and tough substrate composite material joined by durable sewn and heat sealed seams. Shows no permeation breakthrough for 8 hours against the ASTM F1001 chemical battery. **Priced and sold individually.** Kappler brand.

**LIMITED WARRANTY**
**Responder Suits listed on this page are warranted against defect in materials and workmanship for a period of 90 days after delivery of garment. See page opposite inside back cover.**

LaCrosse Rainfair SAFETY PRODUCTS®

Available in Sizes Small through XXX–Large

## COOL-AIR® RAINWEAR

**Cool–Air® fabric lets air circulate** inside garment while sealing out rain and water. Enables wearer to stay dry and comfortable even in wet, warm weather conditions. 200 denier oxford weave nylon fabric has its polyurethane moisture barrier inside where heavy work and abrasion cannot get to it.

**Garments are flexible and comfortable** even in cold weather. Flame retardant: meet Federal Standard 191b., Method 5903.2 with a flameout and afterglow of 2 seconds or less. Double-needle stiching with tape sealed seams. Yellow color. LaCrosse Rainfair brand.

**Jacket** has one–piece fly front with raglan sleeves and detachable hood. Storm fly front closure has four snaps.

**Jacket with Hood**—One–piece fly front jacket with raglan sleeves and attached hood. Storm fly front closure has four–snaps. 40" drawcord adjusts hood for facial comfort.

**Bib Overall**—Full cut overall with one snap storm fly front closure. Full elasticized adjustable suspenders.

*Close it, lock it, keep it safe — You'll find the right stuff right here.*

## PVC/POLYESTER SUIT

**Provides excellent protection** against oils, acids, and other industrial compounds that destroy rubber. PVC coated, tough polyester fabric resists abrasions. 0.35 mm thick suits are 100% waterproof with double heat welded seams.

**Three-piece suit** consists of jacket, detachable hood, and bib overall. Jacket has stormfly front with snap closure, cape back ventilation, raglan shoulder, two flap pockets with snap closure, and corduroy lined collar. Bib overall has snap-fly front. Yellow color. LaCrosse/Rainfair brand.

## DOUBLE-COATED PVC/NYLON SUIT

**Resists damaging exposure** from contact with salts, alkalies, alcohols, plus many acids. 0.35 mm thick, double-coated nylon has the tear and tensile strength to absorb abuse on the job. The PVC coating resists dirt and soil inside and out. 100% waterproof with lapped and locked seams. More durable than PVC/polyester suit.

**Three-piece suit** consists of jacket, detachable hood, and bib overall. Jacket has stormfly front with snap closure, cape back ventilation, take up snaps at wrist, two flap pockets with snap closure, and corduroy lined collar. Bib overall features fly front snap closure and take up snaps at ankles. Elastic inserts on adjustable suspenders provide for comfortable fit. Large PVC snaps. Yellow color. LaCrosse/Rainfair brand.

# RAINWEAR AND PROTECTIVE CLOTHING

## VULTEX® HEAVY-DUTY RAINWEAR

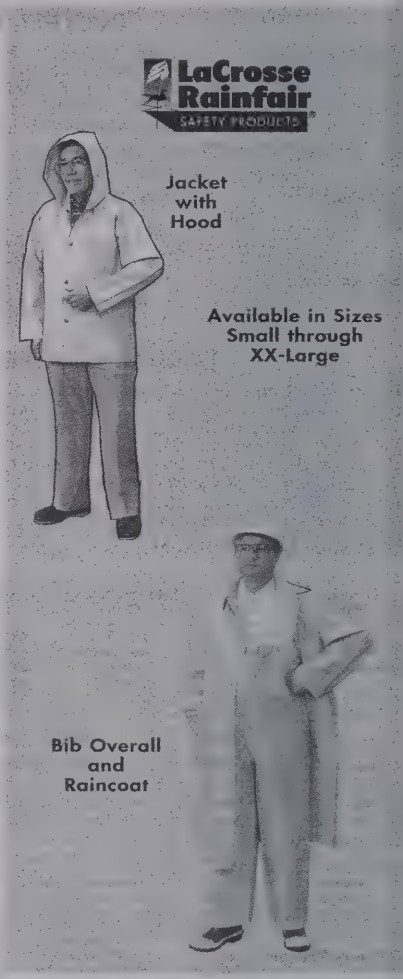
Tough, long wearing Vultex® garments are made from SBR/rubber coating on cotton/poly. Chemical resistant to keytones and organic esters. Guards against heavy abrasion, sheds heavy soil, and is acid and mildew resistant. Garments are 100% waterproof in heavy industrial use. Yellow color. LaCrosse Rainfair brand.

**Jacket**—Plain front styling with exclusive batwing construction that gives extra room to work, stretch and reach, and keeps cuffs from hiking up. Nickel plated brass hardware. Stand-up collar with corduroy lining.

**Jacket with Hood**—Same construction as jacket above except with attached parka type hood. Drawstring snugs hood up for greater protection to head and face.

**Bib Overall**—Full cut bib overall with one snap fly front protects legs and lower chest from water and wind. Generously cut for easy on and off over workclothes. Adjustable suspenders have nickel plated brass buttons and hooks.

**Raincoat**—Full length plain front raincoat with nickel plated snaps and two flapped pockets at the sides. Same durable, waterproof construction as garments listed above. Lined corduroy collar.



**Rain Hood**—For use with jackets and raincoats.

## CHAIN BRAKERS CHAIN SAW CHAPS

Nylon chain braking material offers great braking power with almost half the layers required of other braking materials resulting in a lighter, less bulky pad. Outer layer is 1000 denier DuPont Cordura® Nylon specially treated with a Teflon® coating to repel oil, water and dirt, plus defend against rips and tears from underbrush. Bindings and belting are double stitched and bartacked. Heavy-gauge belting with "quick clip" buckles for easy on and off. Exceed APA Class A minimum requirements for leg length and flare width. Measure from waist to top of foot. UL Classified in accordance with the American Pulpwood Association Standard 92-A-12 for Class A Leg Protection. Includes utility pouch made from 1000 denier Cordura® Nylon to keep tools and sharpeners close at hand. Orange color. Mar Mac brand.

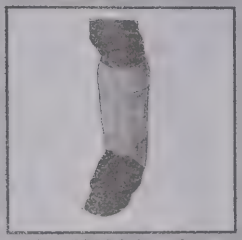
No. 5T342 Jacket

No. 5T436 Pants



No. 5T348 Sleeves

No. 5T349 Apron

STEEL GRIP

- "Wrap-around" design eliminates needs for snaps or buckles
- Special tempered spring for snug fit

No. 5T393 Leggings

- 9" High chrome leather design
- Features two overshoe buckles and instep strap for fit adjustment

No. 5T394 Spats

## TREATED 100% COTTON PROTECTIVE CLOTHING

Designed for long wear and comfort, these garments are made with 100% 9 oz. cotton treated with Proban FR-7A®. Garments retain flame retardancy after repeated laundering and resist minor sparks. Green color. Steel Grip brand.

**Jackets.** 30" long with snap front and wrist closures. Set-in sleeves, inside left breast pocket, and laydown style collar.

**Pants.** 32" inseam trousers include two front slash pockets and two rear patch pockets. Oversize cut, double stitched and inseamed for added durability.

**Coveralls.** Designed to be worn over work clothing. Snap front and wrist closures, two rear patch pockets, two front reach-in pockets, one left inside breast pocket, and opening slits at each hip. Provide excellent flame retardancy over work garments.

**Sleeves.** 18" long Kevlar® thread sewn sleeves with 2¼" elastic at top and wrists. **Sold in pairs.**

**Aprons.** Durable flame retardant 9 oz. cotton aprons.

## CHROME LEATHER PROTECTIVE CLOTHING

**Split Leather Leggings.** Heavy chrome leather 14" duo-wrap design. Tempered steel spring overlaps around calf of leg for safe, comfortable fit. Features a tucked tailored top, thread and steel sewn heavy rubber flare and metal instep clamp. Provides superior protection from heat, sparks, and light metal splash. **Sold in pairs.** Steel Grip brand.

**Split Leather Spats.** 9" high chrome leather spats with two overshoe buckles for fastening and adjustment. 2" elastic top with snap fastener. 6" flexo split leather flare with adjustable instep strap. Protects against molten metal splash. **Sold in pairs.** Steel Grip brand.

# HEAT AND FLAME PROTECTION CLOTHING

These garments are used for protection against radiant heat, sparks, and molten metal splash. For use in foundries, steel mills, casting shops, heat treating operations, and specialized welding shops. The duo-mirror aluminization reflects 90% of the radiant heat away from workers. Available in two aluminized materials. Steel Grip brand.

### MATERIALS

**Aluminized 15 Oz. Rayon (ARL).** This material offers economical radiant heat protection and long lasting wear.

**Aluminized 19 Oz. Thermonol (ATH).** Thermonol is a combination of "Kevlar® 29" yarn and other nonasbestos fibers. Offers radiant heat protection, excellent thermal protection, and is metal splash resistant. Excellent replacement for aluminized asbestos.

### STYLES

**Jackets.** 35" length, semi-raglan sleeve for maximum comfort, covered snap front in 5" spacing to minimize gaps, leather pull tabs, F/R cotton lined collar and front facing, snap adjustment at wrist, all Kevlar sewn.

**Pants.** Features leather belt loops, suspender buttons, covered snap fly, and reinforced waist band. All Kevlar sewn with 32" inseam.

**Boot Covers.** 12" high aluminized cover lined with flame retardant duck. Grip top sole, steel stitched, and Kevlar thread sewn with 9" zipper closing. One size fits all. Sold in pairs.

**Hoods.** Protective hood with swing open faceshield. Fits over face mask or glasses. Aluminized drape covers neck and head. Comes with ratchet headgear and has heavy-gauge replaceable 7 x 11" transparent plastic window. See No. 5T327 for replacement faceshields.

**Aluminized Back High-Temp Gloves.** Both styles are 14" long and wool lined. Aluminized on back of hands and thumbs top reflect radiant heat while offering high heat protection for palm. One size fits all. Sold in pairs. Steel Grip brand

**15 oz. Rayon Gloves** have tanned leather palms for longer pliability.

**22 oz. Thermonol Gloves** are sewn with Kevlar thread.

**Aprons.** Bib-style aluminized aprons reflect 90% of radiant heat while providing spark and metal splash resistance.

## NOMEX SWITCH PULLERS CLOTHING

**Switch Pullers Apparel** is utilized by workers in contact with high voltage operations, electrical circuits or switch panels. Coats and hood are made of 10 oz. Nomex®, a flame-resistant material which resists momentary high temperature flash exposure. Clothing is sewn with Kevlar® thread and launderable. Forest green color. Steel Grip brand.

**Coats** are 50" long with Velcro® closures on front and at the wrist. 2-Ply Nomex® front for added upper body protection.

**Hood** features an amber tint polypropinate lens for ultraviolet ray protection and a 2-ply Nomex front. Hard caps sold separately. See Index under Hard Hats.

## SILVER SHIELD® APRONS AND SLEEVES

**Silver Shield® Bib-Style Apron.** Made from Norfoil®, a lightweight, flexible laminate. Resists degradation and permeation by a wide range of aromatic, chlorinated, aliphatic solvents, ketones, esters, and water-based systems including most acids and bases. Ideal for chemical protection in laboratories or any environment where workers are exposed to above chemicals. Rust-resistant metal grommets, neck and side ties. Available with hemmed or economical unhemmed edges. 45L x 35"W. North brand.

**Silver Shield® Sleeves.** Made from Norfoil® which protects forearms from chemical splash exposure. Elastic top and bottom. 18" length. North brand. **Sold in pairs.**

## VINYL AND POLYETHYLENE APRONS

**7½ Mil Vinyl Apron.** Strong virgin material (not processed) provides flexibility and resistance to abrasion, oils, fats, chemicals, and punctures. Semi-opaque blue color.

Nylon neck and waist ties are extra long and preattached for immediate use. Plastic tips prevent fraying. Reinforced plastic grommets resist rusting. Edges are hemmed with continuous-filament nylon thread. 45L x 36"W. Ansell Edmont brand.

**Polyethylene Disposable Aprons.** Low cost protection for light-duty food processing and laboratory work. Can be reused or worn once and thrown away. One piece design eliminates folds, hems, and seams that trap bacteria, dirt, or liquids. Extra long ties and large opening for head. White color.

Chemical resistant. Resists many chemicals, fats, grease, and oils. Most liquids and stains wipe off easily with damp cloth. Compact dispenser box keeps them handy at work station. USDA accepted. Ansell Edmont brand. **100 per box.**

## APRONS

LaCrosse Rainfair aprons provide splash and spill protection for almost every need. These are constructed to meet the demands of industrial and commercial applications and to provide comfort for the wearer. LaCrosse Rainfair brand.

A **Acid Apron.** The ultimate in heavy-duty protection. Fabric is acid, caustic, and puncture resistant. Fabric meets Federal Standard 5903.2-191 for flame resistance. Adjustable neck loop. Ties attach to brass grommets for securing around waist.

A **Black and SBR Rubber Cotton Aprons.** Resist normal abrasion and are comfortable to wear all day long. Black rubber model is heavyweight with vulcanized hem; SBR is lightweight with stitched hem. Fabric resists acids, caustics, and chemicals for a wide choice of use. Ties sewn at neck and waist.

A **Nitrile-Coated Apron.** Popular choice for food industry, offers excellent protection for many food handling and commercial kitchen applications. Oil resistant. Black apron has ties sewn at neck and waist; white apron has ties that attach to brass grommets for securing around neck and waist.

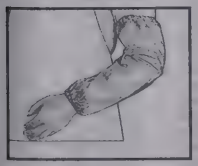
A **Belly Patch Apron.** Reinforced full belly patch. Neoprene coating provides the ultimate protection for exposure to animal fats and oils. A durable apron that offers extra protection for the professional. Ties attach to brass grommets for securing to neck and waist.

A **Double coated PVC on nylon apron.** Lightweight yet durable. Provides resistance to acids, various chemicals and caustics. Uses 4 PVC grommets and three twill ties for fastening.

A **SBR/Cotton Apron.** Durable, double coated apron withstands heavy abrasion and soil. Consists of cotton/poly coated with Styrene Butadeine Rubber (SBR) on the outside. Withstands heavy abrasion and soil. Apron has four metal grommets and three twill ties.

B **PVC Apron.** Made from the highest grade virgin vinyl. Grommets are electronically heat sealed for strength. Vinyl is reinforced at bib and waist grommets. Nylon ties secure apron. 6- and 8-mil vinyl resists acids, alkalis, various chemicals, solvents, oils, salts, fats and greases. Edges available raw or nylon serged. **Sold in dozens.**

## C VINYL COAT APRONS



Vinyl coat aprons feature sleeves with elastic wrists. The wraparound design has convenient open back and ties attached to the rear of the apron. Provide economical protection from various chemicals, solvents, oils, fats, greases and acids. Material is 8 mil thick. LaCrosse Rainfair brand.

## D DENIM APRONS

**Denim Apron.** The economical and perfect choice for any workshop application. Fastens with grommets and ties. One-pocket style features bib patch pocket with pencil stall; Two-pocket style has bib & waist pocket; Three-pocket style has bib and 2 waist pockets. Serged edges provide better durability and longer wear. Material is 12 oz. denim. LaCrosse Rainfair brand.

## SHOE SPIKES

Provide slip protection for all shoe styles and sizes. Studded pullover is constructed of rubber and steel. Uses small steel spikes to penetrate ice and snow. Pullovers fit any work or dress shoe, boots or overshoes- even women's high heels, without buckles or ties. Comfortable and lightweight, they don't interfere with driving, rubber heel tab makes pullovers easy to put on and remove. Fits men and women. Order next shoe size to fit large-size work shoes, boots, and insulated footwear. G.W. Russell brand.

## GRIT-LOC OVERSHOES

Long-lasting, ozone-resistant black rubber overshoes feature calendered waffle pattern outsole containing grit mineral that covers entire forepart and heel of outsole for excellent traction in icy and slippery situations. Added 1/8" rung guard on heel prevents slide through on ladders. Available in two styles. 3M™ brand retro-reflective material applied to heel counter increases visibility in low light conditions. ANSI Z41 PT91 EH rating. Grit is a slip reduction material. Manufacturer assumes no liability for accidents due to slips or falls. Can cause damage to some floor surfaces. Made in USA. LaCrosse Rainfair brand.

**2-Buckle Overshoes.** Feature nylon net lining for easy on and off. Includes heavy gauge toe guard.

**Fleecefoot Overshoes.** Feature wool fleece fabric lining for extra warmth. 1/8"needled felt midsole and calender coating on one side to block cold penetration. Feature heavy-duty YKK zipper.

# FOOT PROTECTION AND KNEE PADS

## FOOT AND TOE GUARDS

### FOOT GUARDS

**Aluminum Alloy Foot Guards** provide maximum protection to instep as well as toe. Light enough to be worn comfortably all day and designed to protect foot against falling, rolling and flying objects, as well as accidental tool blows. Will withstand a load of 75 lbs. dropped from a height of one foot.

To keep it properly positioned, foot guard features rubber toe clip, crossbar, and rubber strap. **Sold in pairs.**

**No. 2AZ83.** 5" Foot Guards. Ellwood Safety brand (200). Shpg. wt. 1.8 lbs.List..... $41.45. Each Pair **$37.35;** Lots 6 .....**$35.46**

**No. 5T454.** 51/2" Foot Guards. Ellwood Safety brand (200). Shpg. wt. 1.8 lbs.List..... $41.45. Each Pair **$37.35;** Lots 6 .....**$35.46**

**No. 3AK76.** 6" Foot Guards. Ellwood Safety brand (200X). Shpg. wt. 1.8 lbs.List..... $53.25. Each Pair **$47.95;** Lots 6 .....**$45.54**

**Aluminum Alloy Metatarsal Guards.** Provide comfortable metatarsal protection. To be worn with steel toe shoes only. **Sold in pairs.**

**No. 5T456.** Lace-on style. Ellwood Safety brand (800). Shpg. wt. 0.5 lbs. List .....$28.63. Each Pair **$25.80;** Lots 6 .....**$24.49**

**No. 1AG91.** Strap-on style. Ellwood Safety brand (801). Shpg. wt. 0.4 lbs. List .....$29.93. Each Pair **$27.00;** Lots 6 .....**$25.64**

**Steel Toe Guards.** Fit any shoe and provide maximum toe protection. Weighing just 12 oz., toe guards can withstand an impact of 75 lbs. dropped from a height of one foot. **Sold in pairs.** Ellwood Safety brand (702).

**No. 5T455.** Shpg. wt. 1.3 lbs. List $25.78. Each Pair **$23.45;** Lots 6 .....**$22.27**

**Plastic Foot Guards.** Lightweight, rugged thermofoam plastic foot guards are designed for protection where impact may be less severe. Withstands an impact of 35 lbs. dropped from a height of one foot. Rubber straps on sole and heel slip on and off easily. **Sold in pairs.** Ellwood Safety brand (500).

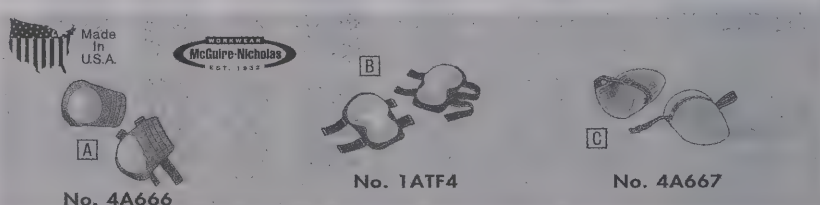
**No. 5T457.** Shpg. wt. 0.5 lbs. List .....$20.73. Each Pair **$18.86;** Lots 6 .....**$17.91**

### KNEE, SHIN, AND INSTEP GUARDS

**Plastic Shin/Instep Guards.** Made from polypropylene plastic. Provide maximum protection to both shin and instep. Shin guard is attached to 6" instep guard with web, sponge rubber hinge. Full guards measure 20" long. **Not intended to replace safety shoes. Sold in pairs.** Ellwood Safety brand (324).

**No. 5T458.** Shpg. wt. 1.0 lbs. List $93.04. Each Pair **$83.75;** Lots 3 .....**$79.55**

**Plastic Knee/Shin/Instep Guards.** Same features as No. 5T458 plus knee protection. Full guards measure 27" long. **Not intended to replace safety shoes. Sold in pairs.** Ellwood Safety brand (334).



**No. 5T459.** Shpg. wt. 1.5 lbs. List $136.09. Each Pair **$122.50;** Lots 3 .....**$116.36**

## KNEE PADS

[A] **Poly Shield™ Knee Pads.** Hard shell polypropylene cap and tough, durable fabric. Thick foam rubber padding. Quick release elastic closures.

[B] **Non-Marring Knee Pads.** Designed for use on all interior floors such as wood, marble, and tile surfaces. Will not mar, scratch, or scuff floors. Ergonomically designed cap flexes with knee. Extended cap covers entire knee joint area. Slip-resistant ridges on cap.

[C] **Foam Rubber Knee Pads.** Made of contoured foam rubber. Single strap. Soft water repellent.

| Key | Description | Nicholas Model | Stock No. | List | Each | Shpg. Wt. |

## ERGONOMICS: GENERAL INFORMATION

Ergonomics is the science of adapting workstations, tools, equipment and job techniques to be compatible with human bodies. Ergonomics fits the job to the worker rather than fitting the worker to the job. Ergonomic products and programs are designed to reduce the risk of injury and maximize productivity in situations where the physical requirements stress a person's body.

The types of injuries that ergonomic products and programs aim to reduce are called Cumulative Trauma Disorders or CTDs. These injuries occur over a period of time as a result of repeated trauma or exposure to a specific body part such as the back, hand, wrist or forearm. CTDs differ from simple muscle fatigue in that they don't go away after a short period of rest. CTDs are also referred to as Repetitive Strain Injuries (RSIs), Repetitive Motion Disorders, Overuse Syndrome, Musculoskeletal Disorders and Work-Related Disorders.

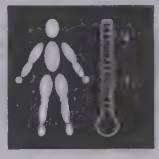
## RISK FACTORS

Some of the risk factors directly linked to the occurrence of CTDs include:

**Repetition:** Is the same motion performed every few seconds for more than two hours a day?

**Awkward Posture:** Is the body bent or twisted for more than two hours a day?

**Force:** Do body parts generate excessive contact for more than a total of two hours a day?



**Static Posture:** Is the body held in the same position for more than two hours a day?

**Mechanical Stress:** Is the body part in contact or resting on a hard surface for more than two hours a day?

**Vibration:** Is the body part in contact with a vibrating surface for more than two hours a day?

**Temperature:** Is the body part exposed to excessive temperature for more than two hours a day?

## INCURRED COSTS TO BUSINESS AND INDUSTRY

U.S. industry and business currently loses over $50 billion each year due to ergonomics-related problems. These costs in combination with an incident rate of CTDs that has increased at an annual rate of about 26% since 1983 provide cause for concern in the following areas:

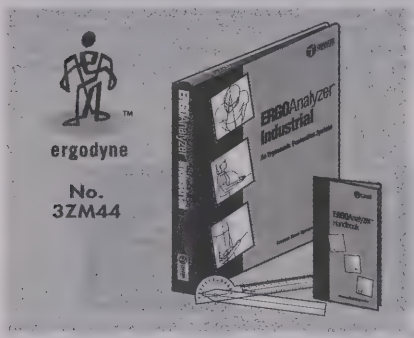
**Worker Health:** 62% of all recordable occupational illnesses are due to repetitive stress or CTDs, affecting more than 700,000 workers each year. (Source: U.S. Dept. of Labor)

**Worker's Compensation Costs:** OSHA estimates that by the year 2000, 50 cents of every dollar spent on worker's compensation will be for CTDs.

**Injury Costs:** The average cost per upper extremity CTD worker's compensation claim was $8,070-nearly twice the cost of the average claim for other injuries. (Source: Journal of Occupational Medicine). The average back injury cost $9,000 without surgery and $30,000 to $40,000 with surgery. (Source: Occupational Health & Safety).

## RECOMMENDED ERGONOMIC PROGRAM

Almost everyone is at risk of being exposed to a CTD. A person's occupation, lifestyle and personal characteristics can increase that risk. Unfortunately, CTD injuries cannot be completely prevented; however, the risk factors contributing to such injuries can be reduced through ergonomic programs and products.



An effective ergonomic program should include the following:

- **Worksite analysis to determine ergonomic hazards and job functions that are high risk**
- **Engineering controls, such as the design or redesign of the job environment and procedures**
- **Administrative controls, including job rotation, rest periods and decreasing the number of repetitions per worker**
- **Medical management, including taking past work illness and injury histories, monitoring work situations and providing education materials and seminars on leading a healthy lifestyle, such as proper nutrition, adequate rest, regular exercise and stress relief, and the role these have in reducing injuries**
- **Training and education on job procedures; causes, risk factors and symptoms of CTDs, and the health effect of exposure; and reporting procedures at all levels**
- **Personal Protective Equipment is used as a supplement to engineering and administrative controls**

# ERGONOMIC WEARABLES

## ERGONOMIC EVALUATION TOOLS

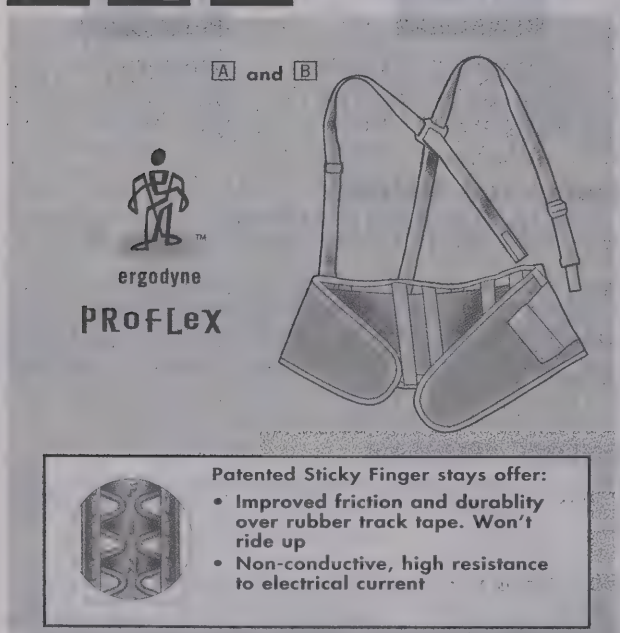
An effective ergonomic program should include a process to perform worksite analysis to determine ergonomic hazards and job functions in the workplace.

### ERGODYNE® ERGOANALYZER® JOB EVALUATION SYSTEM

An integral part of any ergonomics program is the worksite analysis and re-evaluation follow-up analysis. The Ergoanalyzer provides an easy-to-use, structured approach to the application of ergonomic principles, which, when put into action, helps reduce the costs of workers compensation and improves the ergonomics of a plant or warehouse. This all-inclusive compact tool uses a simple scoring system to quantify ergonomic risk factors, prioritize items to be corrected, and identify cost-effective solutions.

The Ergoanalyzer industrial evaluation system includes instruction manual, quick start guide, pack of 25 Ergoanalyzer forms, notebook to prioritize items, handbook with engineering solutions, and a goniometer to measure body angles. Additional evaluation forms sold separately; 25 per pack.

**No. 3ZM44.** ErgoAnalyzer Evaluation System (PAS). Shpg. wt. 2.5 lbs. List.....$349.00; Each **$299.00;** Lots 3.....**$284.05**



**No. 3ZM45.** ErgoAnalyzer Evaluation Forms (35555). Shpg. wt. 0.8 lbs. List.....$24.00; Each Pkg. of 25 **$19.95;** Lots 3.....**$18.95**

## WEARABLE SUPPORT TOOLS

Can be effective when used as part of a program approach to reducing workplace injuries. Can also be effective in situations where other abatement strategies are not feasible or practical, such as patient care, construction, or delivery settings.

### ERGODYNE® PROFLEX® BACK SUPPORTS

Suggested for reducing fatigue and the risk factors of Awkward Posture, Force, and Mechanical Stress.

**Patented Sticky Finger stays offer:**

- **Improved friction and durablity over rubber track tape. Won't ride up**
- **Non-conductive, high resistance to electrical current**

A **ProFlex 2000SF Ultra Deluxe Back Support.** The combination of the patented V-shaped design with the revolutionary Sticky Fingers® high friction stays make the support hug the body and reduce back support ride up for a comfortable, secure fit.

- **Patented Sticky Finger stays**
- **Detachable woven suspenders with adjustment guide**
- **Patented V-shape design**
- **Lightweight, flexible, breathable Spandex**
- **Machine washable**
- **Black color**

B **ProFlex 2006SF Ultra Deluxe High Visibility Back Support.** One of the most highly visible back supports on the market. The combination of a safety orange outer shell paired with new fluorescent lime green power panels and highlighted with silver reflective tape provides maximum visibility. Meets DOT Guidelines for high visibility clothing.

- **Patented Sticky Finger stays**
- **Woven suspenders with reflective tape**
- **Patented V-shape design**
- **Lightweight, breathable Spandex**
- **Machine washable**
- **High-visibility orange color**

# AMBIDEXTROUS WRIST SUPPORTS

Valeo® ambidextrous wrist supports are constructed of vented neoprene with terry lining for long-lasting comfort. Premium ribbed, non-metallic support stays located on the top and bottom of the wrist to stabilize the wrist in an ergonomically neutral position. Can be worn comfortably on either hand. **Priced and sold individually.** Valeo brand.

### SINGLE STRAP WRIST SUPPORT

Features a single elastic wrap stabilizing the wrist.

### DOUBLE STRAP WRIST SUPPORT

Features two elastic wraps for extra wrist stability.

# WEARABLE SUPPORT TOOLS

Can be effective when used as a part of a program approach to reducing workplace injuries. Can also be effective in situations where other abatement strategies are not feasible or practical, such as patient care, construction, or delivery settings.

## ERGODYNE® PROFLEX® FULL-FINGER ANTI-VIBRATION GLOVES AND LINERS

Suggested for reducing the risk factors of Vibration, Force and Temperature due to **externally created vibration** by the use of power-supplied tools and objects. Full-fingered gloves also help shield entire hand from minor cuts, abrasions, and cold temperatures.

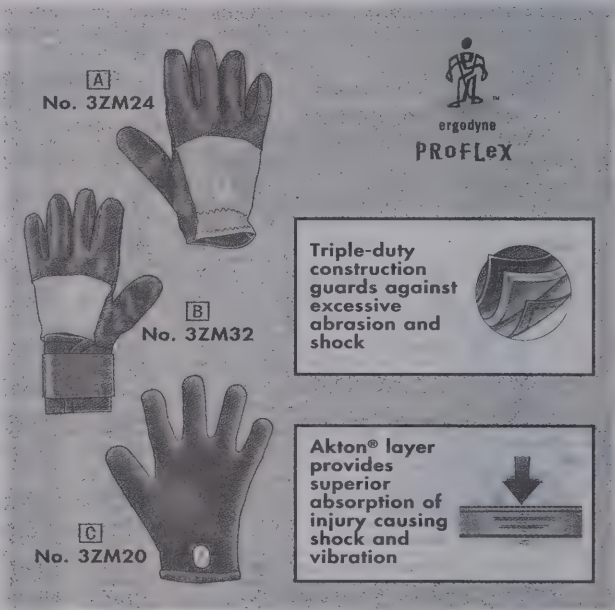
The hands, one of the most valuable tools, need protection from impact and vibration. Hand-arm vibration syndrome (HAVS) is a chronic disorder that can develop when the hand is subjected to repeated and prolonged exposure to vibration and impact, resulting in irreversible damage to the blood vessels, nerves and muscles. The use of Anti-Vibration Gloves can help reduce the risk of injury from prolonged exposure to vibration and impact forces.

ProFlex® Anti-Vibration gloves and liners use Akton, a visco elastic polymer insert, to absorb the injury causing shock and vibration. Akton® consistently retains its original shape without restricting grip.

**A ProFlex 902 Full-Finger Anti-Vibration Glove.** Suggested when using vibration tools such as grinders, power hammers, drills, deburrers or the objects which create vibration.

- **Durable cowskin leather**
- **Akton built into palm, thumb, and all fingers**
- **Anti-bacterial lining keeps hands dry**
- **Washable, black color**
- **Priced and sold individually**

**B ProFlex 912 Full-Finger Anti-Vibration Glove With Wrist Support.** Built-in patented open center stay for additional wrist support encourages neutral wrist posture.



- **Durable cowskin leather**
- **Akton built into palm, thumb, and all fingers**
- **Anti-bacterial lining keeps hands dry**
- **Washable, black color**
- **Priced and sold individually**

**C ProFlex 802 Anti-Vibration Glove Liners.** Turn traditional and specialty gloves into anti-vibration gloves. Liners can be re-used even when outer glove needs to be replaced.

- **Akton impact and vibration absorbing material**
- **Lightweight and breathable cotton/Spandex body cloth**
- **Akton built into palm, thumb and all fingers**
- **Washable, black color**
- **Priced and sold individually**

## WEARABLE SUPPORT TOOLS

Can be effective when used as part of a program approach to reducing workplace injuries. Can also be effective in situations where other abatement strategies are not feasible or practical, such as patient care, construction, or delivery settings.

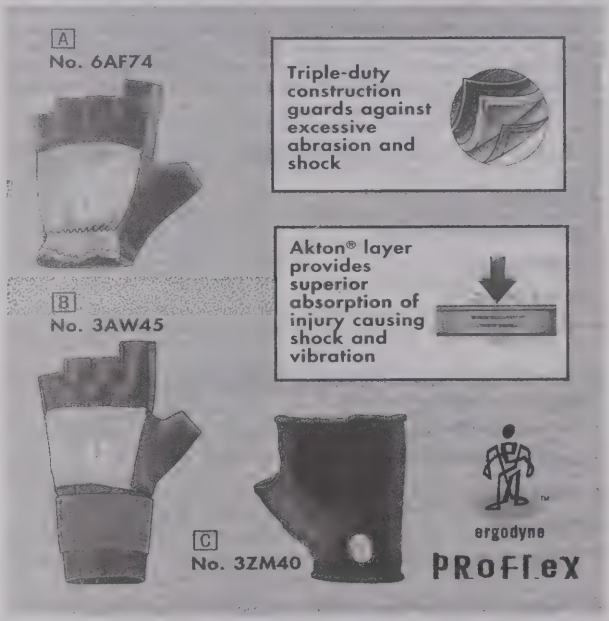
### ERGODYNE® PROFLEX® HALF-FINGER IMPACT GLOVES AND LINERS

Suggested for reducing the risk factors of Vibration, Impact, Force, and Temperature due to **internally created vibration** by the use of non-mechanical tools.

The hands, one of the most valuable tools, need protection from exposure to impact forces. Hand-arm vibration syndrome (HAVS) is a chronic disorder that can develop when the hand is subjected to repeated and prolonged exposure to forces from impact, resulting in irreversible damage to the blood vessels, nerves and muscles. The use of Impact Gloves can help reduce the risk of injury from prolonged exposure to impact forces.

ProFlex® Impact gloves and liners feature Akton®, a visco elastic polymer insert, to absorb injury causing shock and vibration. Akton consistently retains its original shape without restricting grip.

**A ProFlex 900 Half Finger Impact Glove.** Suggested when using non-mechanical tools such as hammers, chisels, striking tools and/or when repeatedly coming into contact with hard surfaces.



- **Durable cowskin leather**
- **Akton built into key contact points - palm, thumb, and forefinger**
- **Anti-bacterial lining keeps hands dry**
- **Washable, black color**
- **Priced and sold individually**

**B ProFlex 910 Half-Finger Impact Glove With Wrist Support.** Built-in patented open center stay for additional wrist support encourages neutral wrist posture.

- **Durable cowskin leather**
- **Akton built into key contact points - palm, thumb, and forefinger**
- **Anti-bacterial lining keeps hands dry**
- **Washable, black color**
- **Priced and sold individually**

**C ProFlex 800 Impact Glove Liners.** Turn traditional and specialty gloves into impact gloves. The liners can be re-used even when outer glove needs to be replaced.

- **Akton impact and vibration absorbing material**
- **Lightweight and breathable cotton/Spandex body cloth**
- **Akton built in palm and outside of hand**
- **Washable, black color**
- **Priced and sold individually**

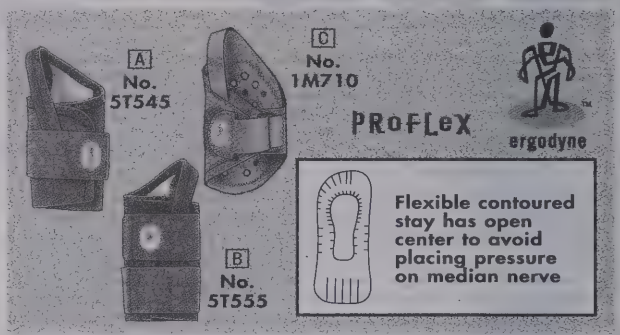
## ERGODYNE® PROFLEX® WRIST SUPPORTS

Suggested for reducing the risk factors of Awkward Posture, Force and Mechanical Stress.

ProFlex® wrist supports help reduce the risk of Carpal Tunnel Syndrome and other wrist injuries by encouraging a neutral wrist position. Limits extreme movements of the hand and wrist while maintaining dexterity and comfort. In addition all wrist supports have the new patented **open-center stay** which places less pressure on the median nerve than traditional stay configurations. Anti-bacterial lining wicks moisture away which keeps wrist and hand dry and comfortable.

**A ProFlex 4000 Flexion Limitation Support.** Limits downward movement.

- **Single strap**
- **Anti-bacterial lining**
- **Lightweight**
- **Washable**
- **Black color**



**B ProFlex 4010 Flexion/Extension Limitation Support.** Limits downward and upward movement.

## PROFLEX® ELBOW SUPPORTS

Suggested for reducing the risk factors of Awkward Posture, Repetition, Force, and Mechanical Stress.

**ProFlex® 500 elbow support** provides relief from muscle stress and pressure caused by repetitive motion in the elbow area. Laminated neoprene material won't bind or chafe. Easy slip on and adjustment for secure fit. Machine washable. Gray color.

| Size | Forearm Measure Inches | Forearm Measure CM | Ergodyne Model | Stock No. | List | Each | Lots 6 | Shpg. Wt. |

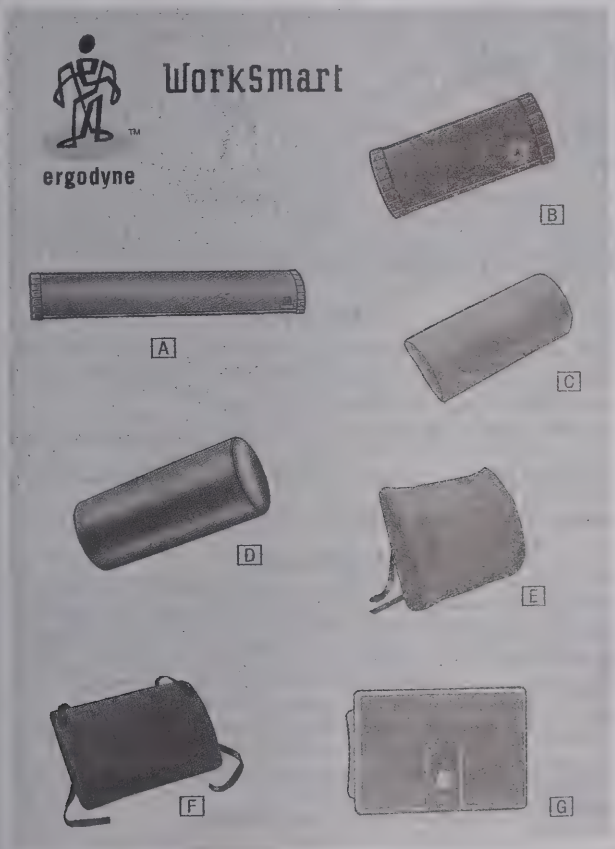
# COMPUTER SUPPORT TOOLS



Effective as an interim approach until other intermediate and long-term strategies, such as engineering and administrative controls, can be implemented.

## ERGODYNE® WORKSMART® OFFICE PRODUCTS

**Back rests/cushions and palm rests** suggested for reducing the risk factors of Awkward Posture, Force, and Mechanical Stress. **Foot rests** suggested for reducing the risk factors of Awkward Posture and Mechanical Stress.

### A, B WRIST RESTS

Curvilinear design and cushioned surface encourages neutral wrist posture while minimizing pressure points for maximum comfort throughout the day. Helps reduce the risk of carpal tunnel syndrome and ease the strain associated with prolonged computer use in the neck, shoulders, wrists, and back. Ultrifure covering keeps hands dry and comfortable.

A **No. 6T572.** 19" Keyboard Wrist Rest (5000). Shpg. wt. 1.0 lbs.
List $27.72. Each **$24.95;** Lots 6 ..... **$23.70**

B **No. 5AK35.** 10" Keyboard/Mouse Wrist Rest (5500). Shpg. wt. 0.9 lbs.
List $19.99. Each **$17.99;** Lots 6 ..... **$17.09**

### C, D, E, F BACK RESTS

Contour design supports lower back and conforms to any body type. Adjustable strap provides secure placement in preferred location. Gray color.

C **No. 6T574.** Half Lumbo Roll with horizontal strap, soft brushed exterior fabric (8414). Shpg. wt. 0.5 lbs.
List $18.88. Each **$16.99;** Lots 6 ..... **$16.14**

D **No. 6AG58.** Full Lumbo Roll with horizontal strap, soft brushed exterior fabric (8411). Shpg. wt. 0.5 lbs. List $19.99. Each **$17.99;** Lots 6 ..... **$17.09**

E **No. 6T573.** 14" High Profile Back Rest with horizontal strap, extra durable exterior fabric (8887). Shpg. wt. 1.0 lbs.
List $37.17. Each **$33.45;** Lots 6 ..... **$31.78**

F **No. 4AJ38.** 18" Low Profile Back Rest with vertical strap, extra durable exterior fabric (8889). Shpg. wt. 1.4 lbs.
List $35.83. Each **$32.25;** Lots 6 ..... **$30.64**

### G FOOT REST

Designed to encourage proper posture, while supporting the back and increasing circulation to the legs. Allows for height adjustments up to 5" and up to a 35 degree tilt angle for personalized comfort. Convenient foot lever allows for easy adjustment. Large, carpeted surface cushions feet. WorkSmart Foot Rest (7000).

**No. 6T575.** Shpg. wt. 4.2 lbs. List ..... $49.94.
Each **$44.95;** Lots 4 ..... **$42.70**

**NEED ASSISTANCE WITH PRODUCT SELECTION?**
**WE APPRECIATE THE OPPORTUNITY TO HELP YOU IN EVERY POSSIBLE WAY**

# MILLER® TOTAL SYSTEMS APPROACH TO FALL PROTECTION

Miller® fall protection products are designed to address specific fall protection hazards, but are based upon a more comprehensive total systems approach. Miller® products listed in this catalog meet applicable OSHA, ANSI, and CSA standards. To be most effective, the components should be applied as part of a complete safety system according to the worksite requirements.

MILLER®

## FOUR ASPECTS OF FALL PROTECTION

**Fall protection equipment generally addresses four different types of fall-related situations.**

Fall Arrest

Positioning

Retrieval

Suspension

• Miller products meet applicable OSHA, ANSI, and CSA standards.

## FALL ARREST

A fall arrest system is required if the risk of falling from an elevated level exists. Designed to be passive, equipment is activated only if a fall occurs. The following equipment should be used in a fall arrest system.

**Personal Protective Equipment**—Full body harness distributes forces throughout the body should a fall occur. The chance of internal injuries is reduced.

**Connecting Devices**—A shock absorbing lanyard softens the impact on the worker, dramatically decreasing the total fall arresting forces.

**Anchorage Point**—An eye bolt/beam ultimately supports the worker.

## POSITIONING

A personal positioning system allows workers to hold themselves in place, keeping their hands free to accomplish a task. Whenever worker leans back, system is activated. While a positioning system is not specifically designed for fall arrest, a fall arrest system should also be used. An effective positioning system includes the following components.

**Personal Protective Equipment**—A full body harness to distribute forces throughout the body should a fall occur.

**Connecting Device**—A rebar chain assembly attaches to worker's protective gear.

**Positioning Anchorage Point**—An attachment point such as a vertical rod supports the worker.

## RETRIEVAL

Retrieval systems are used mostly in confined spaces. Primarily used where workers enter tanks, manholes, etc. and may require retrieval from above if emergency occurs. An effective retrieval system includes the following components.

**Personal Protective Equipment**—A full body harness to distribute forces throughout the body.

**Connecting Device**—A retractable lifeline or rescue unit to attach to fallen worker.

**Anchorage Point**—Tripod eye bolt supports worker.

## SUSPENSION

A personal suspension system is used widely in the window washing and painting industry. Designed to lower and support a worker while allowing a hands-free work environment. This system is not designed to arrest a free fall, so a back-up fall arrest system should also be used to protect worker in the event of a fall. A typical suspension system includes the following components.

**Personal Protective Equipment**—Bos'n chair or harness to hold worker.

**Connecting Device**—Workline attaches to worker's personal protective gear.

**Anchorage Point**—An anchor bolt or carabiner.

## KEY COMPONENTS

Miller® Total Systems Approach involves three key components that must be in place if a worker is to receive maximum protection from a fall.

### BODY WEAR

Personal protective equipment worn by workers performing the job. It is recommended to use harnesses versus body belts whenever possible. Harnesses distribute fall forces throughout the worker's body, among shoulders, legs, torso and buttocks. This distribution of forces decreases the likelihood that worker will be injured. Miller® harnesses incorporate a sliding back D-ring to assist with force distribution as well as keeping worker upright and comfortable while awaiting rescue. Body belts concentrate all forces in the abdomen area and worker remains in uncomfortable and potentially dangerous position while awaiting rescue.

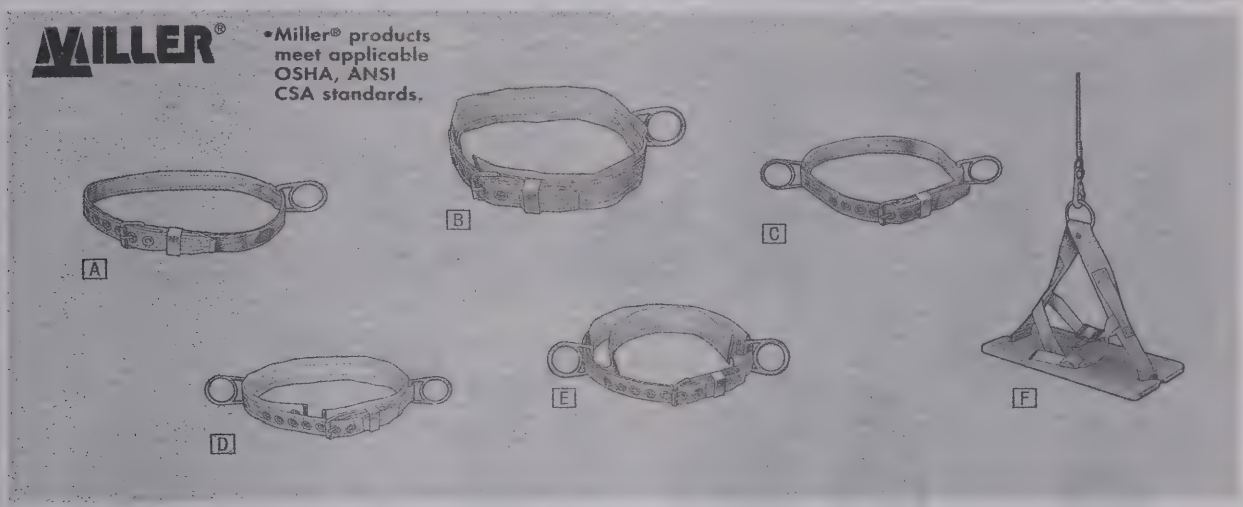
### CONNECTING DEVICES

Lanyards, rope grabs, retractable lifelines and rebar chain assemblies attach to worker's protective equipment.

### ANCHORING DEVICES

This area supports the entire weight of the system. Commonly called the tie-off point, the anchorage must be capable of supporting 5,000 lbs. per attached worker. Eye bolts, overhead beams and integral parts of building structures are all forms of anchorage points.

# FALL PROTECTION/POSITIONING BELTS



Miller® body belts restrain worker in a hazardous position and reduce possibility of falls. Use for positioning only. All body belts feature tongue buckles that attach to one of seven brass grommets for easily adjustable fit. Belts feature heavy-duty nylon webbing and drop-forged D-rings. Can be worn over layers of clothing.

**BODY BELT SIZING CHART**

| Waist Measurement (In.) | Belt Size |
|---|---|
| 32-40 | Small |
| 36-44 | Medium |
| 40-48 | Large |
| 44-52 | X-Large |

MILLER®

•Miller® products meet applicable OSHA, ANSI CSA standards.

### A, B SINGLE D-RING BODY BELTS

A Lightweight, economical belt provides positioning. Features tongue buckle connection and a back D-ring for the attachment of lanyards. 1¾" nylon webbing construction resists abrasion and environmental elements. Can be worn with layers of clothing.

B Single D-ring body belt. Same as above but including a 3" non-abrasive nylon comfort pad to distribute pressure over a greater area. Pad overlaps buckle assembly to eliminate discomfort during prolonged use. Miller® brand.

### C, D DOUBLE D-RING BODY BELTS

C Lightweight, economical belt that provides worker with positioning alternatives. Features tongue buckle connection and two-sided D-rings for positioning. 1¾" nylon webbing construction resists abrasion and environmental elements. Can be worn with layers of clothing.

D Double D-ring body belt. Same as above but including a 3" non-abrasive nylon comfort pad to distribute pressure over a greater area. Pad overlaps buckle assembly to eliminate discomfort during prolonged use. Miller® brand.

### E DUO PURPOSE BODY BELT WITH COMFORT PAD

For positioning applications. May be worn using waist strap alone or waist strap with 3" nylon sub-pelvic saddle that allows worker to "sit" in belt. 3" non-abrasive nylon comfort pad to distribute pressure over a greater area and overlaps buckle assembly to eliminate discomfort during prolonged use. Features tongue buckle connection, two side D-rings for positioning, and back D-ring for fall restraint. 1¾" nylon webbing construction resists abrasion and environmental elements.

### F BOS'N CHAIR

Provides compatible suspended work station with built-in belt. Slings and belt are nylon webbing construction. Forged steel hardware. Seat is 3/4" thick Marine Grade waterproof plywood. Safety belt must be attached to independent life-line. Miller® brand.

# FALL PROTECTION/HARNESSES

Miller® harnesses provide fall protection while allowing for maximum worker mobility on jobsite. Durable nylon webbing construction resists abrasions and environmental elements and provides some shock absorption during fall. All harnesses below feature adjustable leg and shoulder straps, color-coded leg straps, forged hardware for optimum strength, and sliding back D-ring which keeps worker upright should fall occur.

## HARNESS SIZING CHART

| Waist Measurement | Harness Size |
|---|---|
| 32–40" | Small |
| 36–44 | Medium |
| 42–48 | Large |
| 44–52 | X-Large |

UNIVERSAL SIZE FITS MEDIUM THROUGH EXTRA LARGE.

### A UNIVERSAL-FIT HARNESS

Fits a variety of wearers with one harness size. Features friction buckle shoulder straps, chest strap, tongue buckle leg straps and sub-pelvic strap for optimum force distribution. Can be worn with standard safety belt or tool belt. For use in installation, renovation and maintenance. Miller® brand.

### B, C, D DURALITE HARNESSES

Lightweight, economical protection for light construction, general industry, painting and maintenance applications. Feature friction buckle shoulder straps, chest strap, mating buckle leg straps, and sub-pelvic strap to provide optimum force distribution. Nylon tri-glide keepers on shoulder and leg straps provide secure adjustment. Miller® brand.

B **No. 1D815 Low Weight Harness** can be worn with standard safety or tool belt. Universal size.

C **No. 1D814 Positioning Harness** provides positioning alternatives with two side D-rings. Universal size.

D **No. 3AZ61 Harness** with chest and side positioning D-rings for attachment to climbing system or postioning devices.

### E SUB-PELVIC HARNESSES

For use when workers must be suspended, raised or lowered to perform job. Sub-pelvic straps provide support in buttocks area while relieving pressure from shoulders and legs. For confined spaces such as manholes, tanks and pipes. Feature friction buckle shoulder and leg straps, chest strap, tongue buckle waist strap for attachment of tool pouches, and sub-pelvic strap. Miller® brand.

### F ADJUSTABLE-FIT HARNESSES

For workers who must wear fall protection constantly throughout day. Features friction buckle shoulder, leg, and waist straps to allow for full adjustment depending on work, clothing, and mobility needed. Miller® brand.

### G HEAVY-DUTY HARNESS

For use in rugged environments such as pipeline construction, oil derrick work and confined space applications. Features tongue buckle shoulder and leg and waist straps to provide optimum force distribution. Miller® brand.

### H CONFINED SPACE HEAVY-DUTY HARNESS

Same features as Heavy-Duty Harness listed above, with additional shoulder D-rings to provide attachment points when using spreader bar and rope yokes. Permits quick, easy rescue of worker. Miller® brand.

# STRETCHABLE MILLER® DURAFLEX™ HARNESSES

**Miller DuraFlex® harnesses** are easy to wear because the webbing is a blend of nylon, polyester and a specially formulated elastomer designed to stretch. Flexible, lightweight and soft, harnesses feature solid colored leg straps to help user orient the harness for quicker and easier donning. All DuraFlex® harnesses meet or exceed all applicable OSHA, ANSI, and CSA requirements. All models available in orange or lime green. Miller® brand.

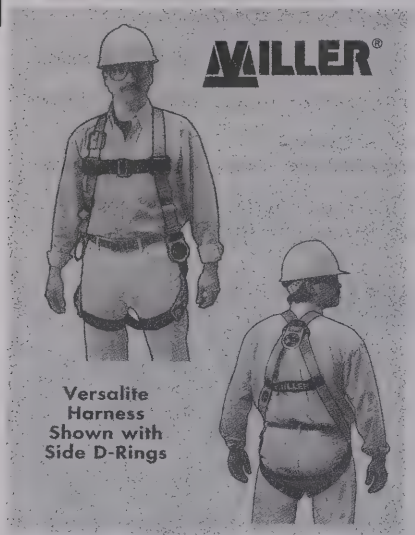
- **Totally integrated design has an increased effect on comfort, safety and productivity**
- **Synthetic webbing material stretches with worker for greater mobility and comfort with less fatigue**
- **Bright, stylish design is readily visible from a distance**
- **1¾" back strap on non-belted models keeps shoulder straps in place and prevents back D-ring from slipping**
- **Injection molded Santoprene® D-ring pad is soft and flexible**
- **Labeling includes inspection tag and space for personal identification**

A **Nos. 3ZL78 and 3ZL79** feature elastic webbing in leg, shoulder, and body straps. Feature friction buckle shoulder straps, mating buckle leg, and chest straps. Adjustable lanyard clip keeps lanyard out of way when not in use. One Universal size. Forged steel sliding back D-ring keeps worker upright after arresting a fall.

B **Nos. 3ZL80 and 3ZL81** offer same features as A above with additional forged side D-rings that provide positioning alternatives.

C **Nos. 3ZL72 and 3ZL73** feature elastic webing in shoulder and body straps, and friction buckle shoulder straps. Type 19 standard nylon webbing in grommeted leg straps with tongue buckles provide sizing alternatives. One universal size. Adjustable lanyard clip keeps lanyard out of the way when not in use. Can be worn with standard safety belt or tool belt.

D **Nos. 3ZL74 and 3ZL75** offer same features as C above with additional forged side D-rings that provide positioning alternatives.



E **Nos. 3ZL76 and 3ZL77** feature elastic webbing in shoulder and body straps. Feature friction buckle shoulder straps, chest strap, tongue buckle leg straps, and sub-pelvic strap for optimum force distribution. Can be worn with standard safety belt or tool belt. One universal size.

F **Nos. 3ZL82 and 3ZL83** feature elastic webbing in leg, shoulder, and body straps. Feature friction buckle shoulder straps, chest strap, mating buckle leg straps, and sub-pelvic strap to provide optimum force distribution. One universal size.

G **Nos. 3ZL84 and 3ZL85** offers same features as F above with additional forged side D-rings that provide positioning alternatives.

H **Nos. 3ZL86 thru 3ZL93** feature elastic webbing in leg and shoulder straps, and friction buckle leg and shoulder straps. Type 19 standard nylon webbing in grommeted waist belt with tongue buckles. Features built-in waist belt. For use when workers must be suspended, raised or lowered to perform job. For use in spaces such as manholes, tanks, and pipes.

# VERSALITE HARNESSES

Universal sizing fits a wide range of individuals, eliminating the need to stock multiple sizes. Meet all applicable OSHA and ANSI standards and are designed for workers in general construction and other industries. Miller® brand.

### 650 VERSALITE HARNESS

Made of type 7 Duralite nylon webbing. Features friction buckle shoulder straps and easy-to-use mating buckles at chest and leg straps to hold webbing securely in place. Forged steel sliding back D-ring keeps worker upright after arresting a fall.

### 650-7 VERSALITE HARNESS

Offers same features as the 650 above, with additional forged steel side D-rings that provide positioning alternatives.

### 650-4 VERSALITE HARNESS

Made of nylon webbing. Features easy-to-use mating buckles at chest and friction buckle shoulder straps to hold webbing securely in place. Tongue buckle straps provide sizing alternatives and may be preferred by some workers. Easily adjustable lanyard clip keeps lanyard out of the way when not in use. Forged steel sliding back D-ring keeps worker upright after fall occurs.

### 650-58 VERSALITE HARNESS

Offers same features as the 650-4 above, with additional side D-rings for positioning alternatives.

# VERSALITE HARNESS ACCESSORIES

MILLER®

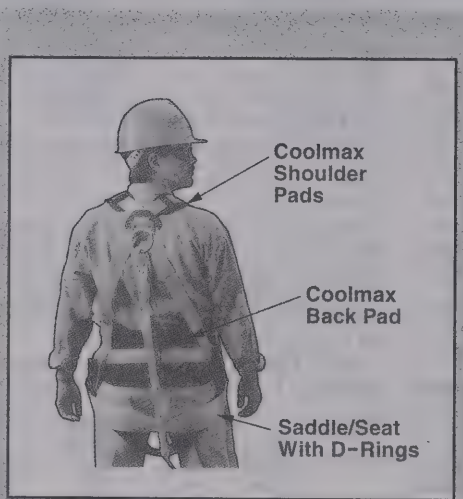
### BACK PADS

Coolmax™ back pads provide comfortable support in a breathable pad. Field retrofittable and treated to resist stains. Six and eight-inch styles. Miller® brand.

### SHOULDER PADS

Coolmax™ shoulder pads provide comfortable support in a breathable pad. Anti-slip bars keep pads in place. Field retrofittable and treated to resist stains. Miller® brand.

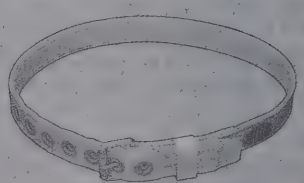
### SADDLE SEAT



When used with Versalite harnesses, seat provides additional support while positioning. Features nylon webbing and forged steel D-rings. Miller® brand.

### LANYARD CLIP

Provides convenient place for worker to keep lanyard out of the way when not in use. For use with Versalite and Duraflex™ harnesses. Miller® brand.



### BODY BELTS

Add belt to harnesses to carry tools. Nylon webbing construction secures with a tongue buckle. In situations where employees share equipment, the universal size fits medium through extra large. Also available in XXS through XXL for other applications. Meets all applicable OSHA and ANSI standards. Miller® brand.

## QUICK-CONNECT HARNESS

Make fall protection easy with only one set of buckles to connect. Worker dons harness by placing it over the shoulders and connecting the mating buckle leg straps. Chest strap is fed through a pass-through buckle. Lightweight model is comfortable enough to be worn all day. Meets all applicable ANSI, OSHA, and CSA standards. Miller® brand.

### SPECIFICATIONS AND ORDERING DATA

| Description | Size* | Miller® Model | Stock No. | List | Each | Lots 6 | Shpg. Wt. |
|---|---|---|---|---|---|---|---|
| Quick-Connect Harness | Small/Medium | 751 | 3KN16 | $50.65 | $47.95 | $45.55 | 2.0 |
| | Large/X-Large | 751 | 3KN15 | 50.65 | 47.95 | 45.55 | 2.0 |

(*) Refer to sizing chart on page 2504

## STEP-IN HARNESS

Lightweight harness features looped leg straps that allow worker to step into harness to put it on. Once worker steps into harness, it is pulled up over the shoulders and the chest strap is connected. Tightening the shoulder straps adjusts webbing throughout harness. Meets all applicable ANSI, OSHA, and CSA standards. Miller® brand.

## TEMPORARY HORIZONTAL LIFELINE SYSTEM

Simple, effective, and economical means for achieving complete fall protection and worker mobility in a variety of elevated work sites. Suspended between two approved anchor points, lifeline system permits worker to freely traverse horizontal distances to perform an array of construction, maintenance, or inspection duties.

Designed for use by one worker and available in 30 and 60 foot lengths. Approved components comprising system are a 5/8" polyester lifeline, anchorage lanyard, and lifeline tensioner. Workers using the system should be equipped with full body harness and lanyard (sold separately).

May be installed or disassembled in a matter of minutes. Snap hook at one end of the lifeline and anchorage lanyard snap hook at other are attached to approved anchor points. The tensioner, easily adjusted with a wrench, takes slack out of lifeline and holds it taut.

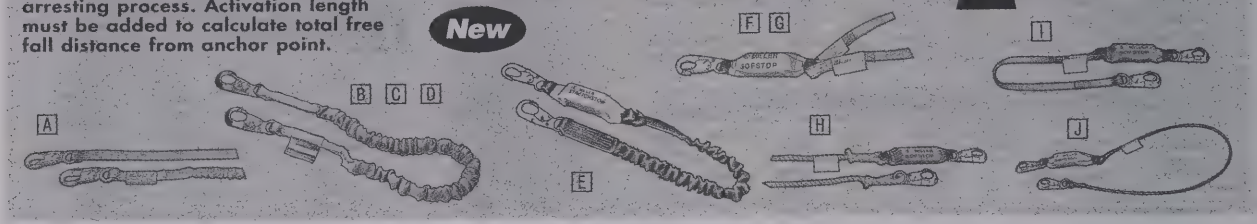
For use in such applications as construction, roofs, catwalks, elevated platforms, unguarded piperacks, and many other industrial or warehouse structures. System meets applicable OSHA and ANSI standards. Miller® brand.

### LIFELINE SPECIFICATIONS AND ORDERING DATA

| Description | Length (Ft.) | Miller® Model | Stock No. | List | Each | Lots 3 | Shpg. Wt. |
|---|---|---|---|---|---|---|---|
| Temporary Horizontal Lifeline | 30 | RHL30 | 3ZM02 | $448.25 | $405.50 | $364.69 | 11.0 |
| | 60 | RHL60 | 3ZM03 | 498.15 | 450.25 | 405.09 | 14.0 |

## ROOF ANCHOR KIT

Includes 12 single-use roof anchors, 72 16d cement-coated nails, shock-absorbing rope grab, lifeline, carrying case, harness, carabiner and instructional video. 25 ft. nylon lifeline allows a large range of protection while working. Rope grab with 24" SofStop™ shock-absorbing lanyard reduces fall arresting forces by as much as 50-80%. System installs easily with hammer at roof peak or on a flat roof surface. Replacement roof anchor brackets with nails and replacement rope available. Miller® brand.



### SPECIFICATIONS AND ORDERING DATA

| Description | Miller® Model | Stock No. | List | Each | Lots 2 | Shpg. Wt. |
|---|---|---|---|---|---|---|
| Roof Anchor/Lifeline System | RA10 | 1D799 | $357.35 | $336.25 | $302.42 | 19.0 |

# FALL PROTECTION/LANYARDS

**NOTE: Shock absorbers elongate up to 3½ feet during activation and fall arresting process. Activation length must be added to calculate total free fall distance from anchor point.**

• **Miller® products meet applicable OSHA, ANSI, and CSA standards.**

### A MANYARD® SHOCK-ABSORBING LANYARD

Reduces fall arresting forces by as much as 80%. Contains shock-absorbing inner core that elongates and reduces force when subjected to a fall. Releases warning flag when lanyard has been exposed to an arresting force. Two locking snaps reduce possibility of accidental disengagement or rollout. 1" nylon webbing jacket resists abrasions. 6 foot length. Miller® brand.

### B MANYARD™ SHOCK-ABSORBING LANYARD WITH REBAR SNAP HOOK

Shock absorber/lanyard combination contains a special shock-absorbing inner core material surrounded by a heavy-duty outer jacket that doubles as a back-up web lanyard. One plated locking snap hook with 3/4" throat opening and one plated locking snap hook with 2½" throat opening reduce chance of accidental disengagement. Releases a warning flag to indicate the unit has been involved in a fall and should be removed from service. Maximum working load is 310 lbs. 6 foot length. Miller® brand.

### C MANYARD II™ SHOCK-ABSORBING LANYARD

Lanyard with two plated locking snap hooks with 3/4" throat opening stretches from 4 to 6 feet, offering greater worker maneuverability. When contracted to 4 feet, it reduces the chances of tripping, snagging, or dragging. Shock-absorbing inner core material is surrounded by a heavy-duty outer jacket that doubles as a back-up web lanyard. Releases a warning flag to indicate the unit has been involved in a fall and should be removed from service. Miller® brand.

### D MANYARD II™ SHOCK-ABSORBING LANYARD WITH REBAR SNAP HOOK

Lanyard with one plated locking snap hook with a 3/4" throat opening and one plated locking snap hook with a 2½" throat opening stretches from 4 to 6 feet, offering greater worker maneuverability. When contracted to 4 feet, it greatly reduces the chances of tripping, snagging, or dragging. Shock-absorbing inner core material is surrounded by a heavy-duty outer jacket that doubles as a back-up web lanyard. Releases a warning flag to indicate the unit has been involved in a fall and should be removed from service. Miller® brand.

### E STRETCHSTOP™ LANYARD

Miller® StretchStop™ lanyard with SofStop™ Shock Absorber with two plated locking snap hooks with 3/4" throat openings stretches from 4 to 6 feet, offering greater worker maneuverability. When contracted to 4 feet, it greatly reduces the chances of tripping, snagging, or dragging. Includes the field-proven SofStop™ shock absorber with its unique back-up safety strap.

### F TWO-LEGGED STRETCHSTOP™ LANYARD

Miller® Two-Legged StretchStop™ Lanyard with SofStop™ Shock Absorber with three plated locking snap hooks with 3/4" throat openings stretches from 4 to 6 feet, offering greater worker maneuverability. When contracted to 4 feet, it greatly reduces the chances of tripping, snagging, or dragging. Includes the field-proven SofStop™ shock absorber with its unique back-up safety strap.

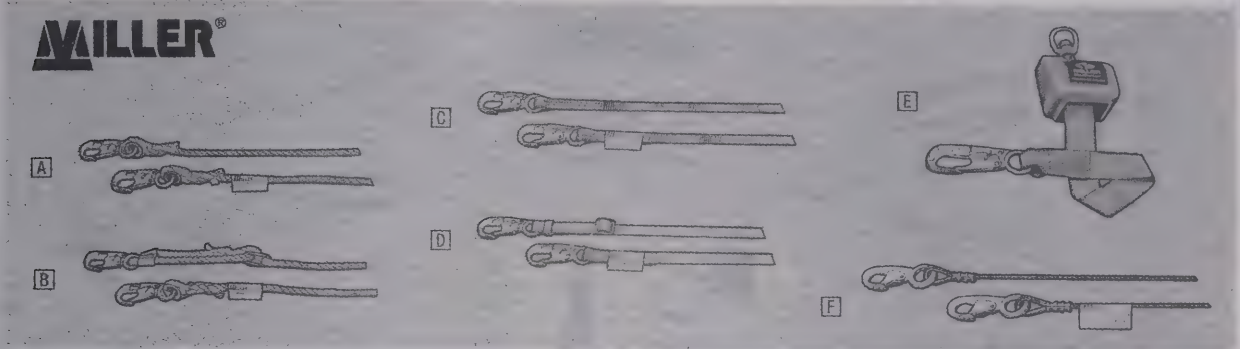
### G TWO-LEGGED MILLER® SOFSTOP™ PACK SHOCK-ABSORBING LANYARD

Two 1" nylon webbing legs provide 100% tie-off at all times. Reduces chance of worker injury during fall by decreasing fall forces throughout specially woven, tear-away material within shock-absorbing pack. Independent back-up strap that withstands 5000 lbs. of force also in pack. Three locking snaps reduce possibility of accidental disengagement or rollout. **CAUTION: If one leg is not in use, it should not be connected back into the harness as it may restrict the deployment of the SofStop™ shock absorber.** 6 foot per leg length. Miller® brand.

### H MILLER® SOFSTOP™ PACK SHOCK-ABSORBING ROPE LANYARD

Reduces chance of worker injury during fall by decreasing fall forces throughout specially woven, tear-away material within shock-absorbing pack. Independent back-up strap that withstands 5000 lbs. of force also in pack. Attached to harness and to a fall-arresting anchor point. 1/2" nylon filament rope. Two locking snaps reduce possibility of accidental disengagement or rollout. **CAUTION: If one leg is not in use, it should not be connected back into the harness as it may restrict the deployment of the SofStop™ shock absorber.** Available in 5 and 6 ft. lengths. Miller® brand.

### I MILLER® SOFSTOP™ PACK WEBBING LANYARD



Reduces chance of worker injury during fall by decreasing fall forces throughout specially woven, tear-away material within shock-absorbing pack. Independent back-up strap that withstands 5000 lbs. of force also in pack. Attach to harness and to fall-arresting anchor point. 1" nylon webbing. Two locking snaps reduce possibility of accidental disengagement or rollout. 6 foot length. Miller® brand.

### J MILLER® SOFSTOP™ PACK STEEL LANYARD

Reduces chance of worker injury during fall by decreasing fall forces throughout specially woven, tear-away material within shock-absorbing pack. Independent back-up strap that withstands 5000 lbs. of force also in pack. Attach to harness and to a fall-arresting anchor point. 7/32" steel cable provides maximum abrasion resistance and resists high temperatures. Vinyl covering protects steel cable from environment. Two locking snaps reduce possibility of accidental disengagement or rollout. 6 foot length. Miller® brand.

MILLER®

### A ROPE LANYARD

Securely attaches a body belt or harness to a fall-arresting anchor point. 1/2" filament rope provides some shock absorption that reduces force while arresting a fall. Available in 4, 5 and 6 foot lengths. Two locking snaps reduce possibility of accidental disengagement or rollout. Miller® brand.

### B ADJUSTABLE ROPE LANYARD

Economically provides fall protection for workers who must work at different heights. Adjusts up to 6 feet. 1/2" filament nylon rope lanyard attaches body belt or harness to a fall-arresting anchor point and provides some shock absorption while arresting a fall. Two locking snaps reduce possibility of accidental disengagement or rollout. Miller® brand.

### C WEBBING LANYARD

Provides worker with strong, durable connecting device. 1" nylon webbing attaches body belt or harness to a fall-arresting anchor point. Two locking snaps reduce possibility of accidental disengagement or rollout. 6 foot length. Miller® brand.

### D ADJUSTABLE WEBBING LANYARD

Economically provides fall protection for workers who must work at different heights. Provides worker with strong, durable connecting device. Adjusts from 6 to 10 feet. 1" nylon webbing attaches body belt or harness to a fall-arresting anchor point. Two locking snaps reduce possibility of accidental disengagement or rollout. Miller® brand.

### E RETRACTABLE WEBBING LANYARD

Lanyard automatically extends and retracts with worker while allowing for full range of movement. 10 foot lightweight nylon webbing. Brakes instantly to limit free fall to 2 feet or less. Limits forces in the event of fall. Swivel shackle prevents twisting. Carabiner included for attachment to anchor point. Vinyl boot protects components from environment. For warehouse, cherry picker or aerial basket applications. Locking snap reduces possibility of accidental disengagement or rollout. Miller® brand.

### F STEEL LANYARD

For use in positioning only. Vinyl-covered lanyard with 7/32" steel cable. 6 foot length. Two locking snaps reduce possibility of accidental disengagement or rollout. Miller® brand.

| Key | Description | Length (Ft.) | Miller® Model | Stock No. | List | Each | Lots 6 | Shpg. Wt. |

# FALL PROTECTION/CONNECTING DEVICES

### A TWO-LEGGED ROPE LANYARD

For retrieval and suspension purposes only. Can snap into shoulder D-rings of retrieval harness. Rope thimble with steel eye centers worker for balanced raising and lowering. 1/2" filament nylon rope. 5 ft. length. Locking snaps reduce possibility of accidental disengagement or rollout. Miller® brand.

### B REBAR CHAIN ASSEMBLY

For use in conjunction with harness or belt with side D-rings as a positioning device for workers. Locking snap that has a 2" throat opening allows for broad range of tie-off points. Large locking snap attaches to rebar forms that hold wearer in place, allowing hands-free working environment. Swivel attachment reduces chain twisting. Drop forged fittings, steel chains. WARNING: Rebar chain assemblies are for fall restraint and fall positioning only. Independent lifeline must be used when fall arrest protection is required. Miller® brand.

### C ROPE GRAB

Adjustable connection point to rope or lifeline when used as a fall-arresting anchor point. Locks instantly in event of a fall. D-ring is compatible attachment to lanyards with locking snaps. Cam lever release allows for easy repositioning up and down rope to minimize free fall distance. For use with 5/8" or 3/4" nylon or polyester rope. Must be used with an independent lifeline for fall arrest on bos'n chair and suspended scaffolding applications. Miller® brand.

### D SHOCK-ABSORBING ROPE GRAB

Rope grab connects to lifeline/anchor point and lanyard reduces forces on body during a fall. Locks instantly in event of a fall. Cam lever release allows for easy repositioning up and down rope to minimize free fall distance. For use with 5/8" or 3/4" nylon or polyester rope. Must be used with an independent lifeline for fall arrest on bos'n chair and suspended scaffolding applications. Miller® brand.

### E TRAILING ROPE GRAB

Allows workers to climb quickly with both hands free. Trailing rope grabs automatically move up and down the lifeline with worker. No need for manual adjustment. In the event of a fall, rope grab locks onto lifeline. Designed for any vertical lifeline application including ladder climbing, window washing and painting. Stainless steel construction ensures dependable service. Available alone or with 3 ft. rope or web lanyard to reduce need of matching or stocking accessories. Also available with 3 ft. SofStop™ lanyard that provides a 50 to 80% reduction in shock force should a fall occur. Accommodates 5/8" diameter rope. Meet all applicable ANSI, OSHA and CSA standards. Miller® brand.

### F MICROLOC COMPACT TRAILING WIRE AND ROPE GRABS

Compact designs, easy to use and durable. Provides hands-free operation. Attaches anywhere on lifeline offering increased versatility. Easy to install—no weaving necessary. Meet all OSHA, ANSI, CSA, and CE standards. No. 4RC60 Wire Rope Grab accommodates 5/16" cable. No. 4RC61 Rope Grab accommodates 5/8" synthetic rope. A 3 ft. shock-absorbing lanyard is recommended for use with rope grab. Miller® brand.

### G LIFELINES

Made of durable nylon to withstand effects of ultraviolet rays and other environmental conditions. Can be used with Miller® rope grabs or Miller® roof anchor kit, see page 2507. 5/8" diameter available in 30, 50 or 100 ft. length. Meet all applicable ANSI, OSHA, and CSA standards. Miller® brand.

### H CARABINER

Connects retractable lifelines to overhead anchor points. Screw-type locking device is user-friendly and has a tensile strength of more than 5,000 pounds. Meets all applicable OSHA, ANSI, and CSA standards. Miller® brand.

### I AUTO LOCK CARABINER

Self-closing and locking. Durable formed steel construction provides assured safety, versatility and long service life. May be used as a connecting link between self-retracting lifelines, rope grab lanyards and an anchorage point. Meets all applicable OSHA, ANSI and CSA requirements.

# FALL PROTECTION/CONNECTING DEVICES

### A CROSS-ARM STRAP

The Miller® cross-arm strap is designed to wrap around I-beams and other structures forming a secure attachment point for lanyards and other connecting devices. Manufactured from 2" nylon webbing for maximum strength, the strap features a 2" forged D-ring which slips through a 3" D-ring.

### B CHAIN CROSS-ARM

Provides a single user with an easy-to-install, temporary anchorage connector. Six-foot cross-arm chain easily wraps around I-beams or other structures. Safely wraps around corners and sharp edges and is for use in environments where chemical, heat or welding splatter may occur.

### C WEBBING/HOOK ANCHOR

Compact, lightweight connector is designed to facilitate anchoring to scaffolding, pipe or angle iron. Features a large snap hook with a 2½" throat opening for easy, one-hand installation and a D-Ring to accomodate the connecting device. No tools required.

### D MOUNTED D-RING

Mounted D-ring provides a compatible anchor point for connecting devices such as lanyards or retractable lifelines. Steel D-ring and plate can be attached to an approved structure with bolts, lock washers, nuts and drilling template provided. Designed to provide a variety of positioning alternatives.

### E D-BOLT ANCHORAGE CONNECTOR

D-Bolt Anchorage Connector with 5 inch connector bolt is designed specifically to prevent roll-out. Forged steel D-bolt attaches to suitable anchorage up to 4 inches thick. Bored hole at the base of the D-bolt anchor accepts 5/8 inch grade 8 bolts of various lengths which increases versatility.

### F PUSH-THRU EYE BOLT WITH SHOCK ABSORBER

Simple one-hand installation with no tools. Miller SofStop™ shock absorber included to complete anchorage system. Fits 3/4" diameter hole.

### G WIRE HOOK

Stainless steel wire hook provides safe anchorage point for applications including railings, small I-beams, angle iron and scaffolding. One hand installation, squeeze spring-loaded hook and slip the large opening (13" maximum) over approved structure.

### H EXTENSION POLE/HOOK

20 foot pole and hook designed for climbing ladders, towers or applications where quick temporary overhead anchorage is needed. Pole extends up to 20 feet and spring-loaded hook (9" maximum opening) securely attaches lifelines to beams, etc. No tools required.

### I ANCHORAGE BRACKET

Heavy-duty anchorage connector that comes with hex bolts, washers, lock nuts, drilling template, and 3/4" eye bolt for attachment to a structure capable of supporting 5,000 lbs. Designed to provide a variety of positioning alternatives.

### J SHADOW™ BEAM ANCHOR

Connects to a wide range of flanged beam sizes from 4 inches to 12 inches wide and up to 1¼" inches thick. It installs horizontally on the top flange of the beam (when an overhead anchorage does not exist) or overhead on the bottom flange of a compatible I-beam. Once locked in, the Shadow™ Beam Anchor grips the beam and moves with the worker providing increased mobility. The integral D-ring provides a compatible connection point for lanyards. Features the integrated positive-lock engagement system, which assures proper installation by locking the anchor jaws firmly into the cross bar with a durable spring-loaded engagement pin. No tools required. Can be used in corrosive environments.

### K RETRACTABLE LIFELINE

Provides fall arrest protection for workers performing various climbing and descending tasks or working on multiple levels. Continuous cable payout/retraction allows maximum freedom of movement. 50 ft. galvanized steel cable. Centrifugal braking mechanism engages to limit free-fall distance to 2 feet or less. Can be anchored to I-beams, top of permanent ladders or used in confined spaces. Must be used in conjunction with retrieval device in confined space applications. Maximum working load of 310 lbs. Aluminum alloy housing. Includes a carabiner for mounting.

### L M N MIGHTYLITE 20 FT. LIGHT-WEIGHT SELF-RETRACTING LIFELINE

Easy-to-use, dependable, and economical fall protection in a variety of applications. Designed to facilitate worker mobility and comfort. Lifeline automatically pays out with the worker up to its maximum length of 20 ft. Retraction forces are controlled to prevent pull on the worker. As the worker moves, MightyLite automatically takes up the slack in the lifeline, keeping it out of the way.

Easy to carry and install overhead and can be permanently mounted for repeated use. For use in construction, warehouse, utility, mining, and confined space applications.

In the event of a slip or a fall, the force on the lifeline activates a centrifugal braking mechanism which limits the free-fall to less than 24". Three models available. No. 3ZL99 features 1" polyester webbing, No. 3ZL98 features 3/16" galvanized steel, and No. 3ZM01 features 3/16" stainless steel cable for applications such as welding and working in harsh environments. Maximum working load is 310 lbs.

A swivel locking snap hook at the end of the lifeline directly attaches to the D-ring on a full body harness for quick hookup.

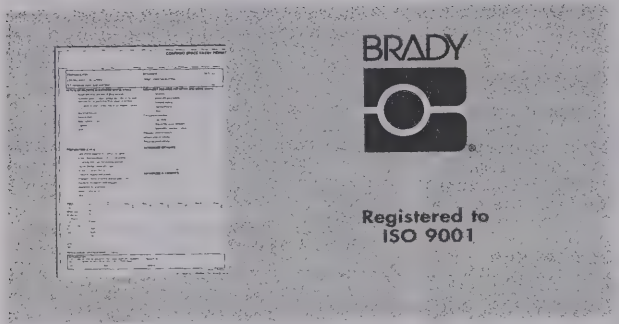
# CONFINED SPACE PRODUCTS

OSHA's Permit Required Confined Space regulation requires employers to establish written programs and permit systems to protect workers from asphyxiation, drowning, and other hazards when entering confined spaces. This program must provide safety procedures and training information including the following:

**WRITTEN PROGRAM:** A written program must be established to prevent unauthorized entry. The written program should be designed to provide employees and supervisors a reference for guidance and direction for confined space entry.

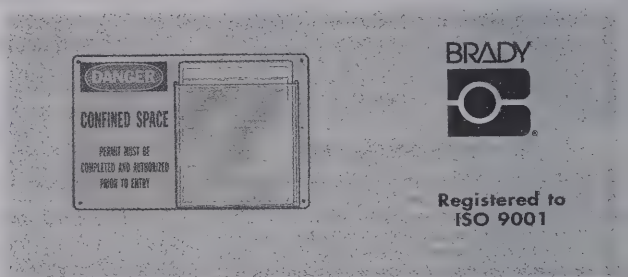


**EMPLOYEE TRAINING:** Authorized entrants, attendants, and individuals who authorize entry shall be trained on the hazards and proper procedures for working safely in confined spaces.

**DEVELOPING A PERMIT SYSTEM:** Employers must establish a system for preparing, issuing, and implementing confined space entry permits.

**EMPLOYEE INFORMATION:** Employers must inform employees of the existence, location, and dangers of permit required confined spaces. See selection of safety signes and tag below.

**LOCKOUT/TAGOUT:** Confined spaces must be isolated from service and completely protected against the release of energy and material into the space before entry. See Index for our full line of lockout/tagout products.

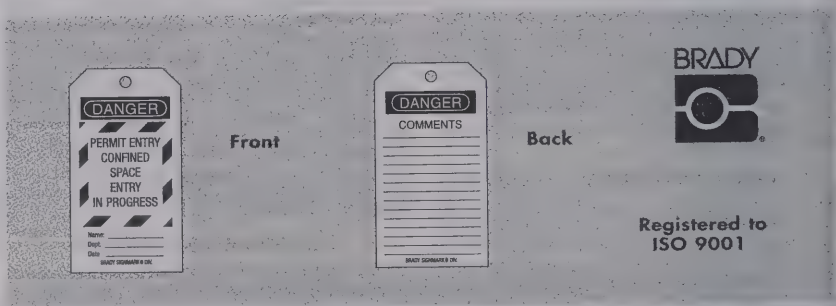


## CONFINED SPACE ENTRY PERMIT

Confined Space Entry Permit includes all information required by confined space regulation. OSHA requires that a permit be completed and authorized to enter a confined space. Available in 2-ply carbonless pads of 25 permits. 8½" x 11". Brady USA brand (65937).

**No. 5AC22.** Shpg. wt. 0.8 lbs. List .....$21.64.
Each Pack of 25 **$19.68;** Lots 5 .....**$17.71**

## CONFINED SPACE SIGN/PERMIT HOLDER



Sign/Permit holder provides a confined space warning with easy access to permits. Durable polycarbonate construction. Holds No. 5AC22 8½ x 11" permits sold separately at left. Black and red printing on white background. 12H x 19"W. Brady USA brand (65903).

**No. 5AL12.** Shpg. wt. 2.3 lbs. List .....$73.64.
Each **$66.95;** Lots 5 .....**$60.26**

## CONFINED SPACE TAG

Tag is designed for repeated use. Brass grommet for added strength. Accepts locks up to 7/16" diameter shackle. Polyester laminate protects graphics against water, grease, and extreme temperatures. Wipes clean. Write-on matte finish allows workers to personalize tags with pen, pencil, or marker. Heavy-duty construction prevents accidental removal. Withstands over 80 lbs. of pulling pressure. Standard package includes 25 identical 5½" x 3" tags. Brady USA brand (65299).

**No. 1D710.** Shpg. wt. 0.5 lbs. List $52.14.
Each Pack of 25 .....**$47.40**
Lots 5 .....**$42.66**

**CONFINED SPACE SAFETY SIGNS AVAILABLE. See Index Under Signs.**

## OSHA REQUIREMENTS

OSHA requires that any worker entering a confined space be equipped with retrieval systems enabling "non-entry rescue", or equipment that allows worker to be removed without another worker entering the confined space. OSHA guidelines require use of a mechanical device (rescue unit or rope/pulley system) if space is more than 5 feet deep; a mounting device (tripod) to which retrieval line is attached; and full body harness with sliding back D-ring for attachment of retrieval line. Miller® products meet applicable OSHA and ANSI standards.

## THREE-WAY CONFINED SPACE RESCUE UNIT

**Three-Way System with Recovery** acts as a retractable lifeline, retrieval unit, and lowering unit. As a retractable lifeline, unit protects workers from falls while climbing into or out of confined spaces. Unit can be used to raise and retrieve worker trapped in a confined space. Lowering capabilities for use if individual becomes caught while being raised or needs to be lowered once he has cleared confined space entry. Retrieval speed of 20 feet per minute. Durable brake mechanism stops fall within 24 inches and automatically holds individual in place when raising or lowering is stopped or when crank is released.

**Unit is equipped with** 3/16" galvanized steel cable with maximum workload of 310 lbs. Casing constructed of lightweight strong aluminum for severe working conditions. Internal parts of stainless steel and bronze. Sealed ball bearings for smooth cable extension and retraction. Available in 25, 50 and 100 foot lengths. Includes mounting bracket and hardware for mounting on leg of No. 5T536 Aluminum Tripod sold separately below. Miller® brand.

| Cable Length (Ft.) | Miller® Model | Stock No. | List | Each | Lots 2 | Shpg. Wt. |
|---|---|---|---|---|---|---|
| **25** | M52-25G | **6T394** | $2158.55 | **$2030.00** | **$1826.42** | 40.0 |
| **50** | M52-50G | **6T395** | 2267.50 | **2154.00** | **1937.84** | 45.0 |
| **100** | 52-100G | **6T396** | 2698.10 | **2653.00** | **2386.32** | 70.0 |

## CONFINED SPACE RESCUE SYSTEM

Complete, compatible system for vertical confined space unaided entry and emergency retrieval. Includes No. 6T395 50 ft. three-way rescue unit (sold above) and carrying bag, No. 5T536 tripod (sold below) and carrying bag, carabiner, pulley, and confined space training video. Provides OSHA compliance on unaided confined space entry and emergency retrieval. Miller® brand.

| Cable Length (Ft.) | Miller® Model | Stock No. | List | Each | Lots 2 | Shpg. Wt. |
|---|---|---|---|---|---|---|
| **50** | M52-50GC | **3AG17** | $3177.95 | **$2858.00** | **$2571.86** | 115.0 |

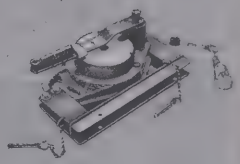
## MANHANDLER™ HOIST

**Cost-effective, OSHA compliant choice** for worker protection in confined spaces. Winch not only acts as two distinct confined space units for both rescue and positioning, but can also be used for material handling. A red indicator on the Manhandler™ snap hook warns of overloading. In emergencies, unit can be used to raise workers. Cable length of 60 ft. Meets all applicable ANSI and OSHA standards. Miller® brand (8442).

**No. 5M548.** Shpg. wt. 40.0 lbs. List $1153.60. Each $1039.00; Lots 2.....**$987.05**

## MATERIAL WORK WINCH

**For raising and lowering materials or workers if used with independent fall protection rescue device.** Automatic brake holds load in place when crank handle is released. 1500 lbs. max. line pull, 51:1 max. mechanical advantages ratio, 5.1:1 direct drive gear ratio. Zinc plated. 3/16" galvanized steel cable. Includes mounting bracket and pulley. Miller® brand.

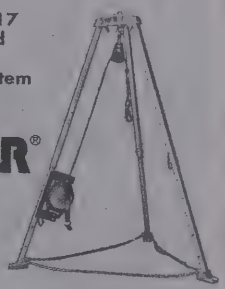


| Cable Length (Ft.) | Miller® Model | Stock No. | List | Each | Lots 2 | Shpg. Wt. |
|---|---|---|---|---|---|---|
| **88** | 8441 | **5T530** | $363.55 | **$361.25** | **$343.01** | 34.0 |

## TRIPOD

All aluminum lightweight tripod is capable of withstanding a momentary 5000 lb. vertical pull (max. workload 300 lbs.). Independent locking feature holds legs securely in outward position. Adjustable from 52" to 89" in 5½" increments. Base has radius from 38" to 66" depending on height of tripod. Safety chain between legs for stability on slippery surfaces. Rubber skid pads on feet control slippage. Three perimeter holes for attaching accessories. Yellow reflective tape for visibility in dark or inclement weather. Miller® brand.

**No. 5T536.** Shpg. wt. 37.0 lbs. List $639.30. Each.....$591.00; Lots 2.....$561.25



- **To ensure integrity, it is recommended rescue units be inspected yearly. Contact Miller® directly for more details. 1-800-873-5242.**

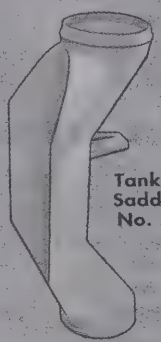
# CONFINED SPACE VENTILATION



## INDUSTRIAL AND TANK MODEL SADDLE VENT® KITS

AIR SYSTEMS INTERNATIONAL

Industrial Model Saddle Vent No. 2AM94

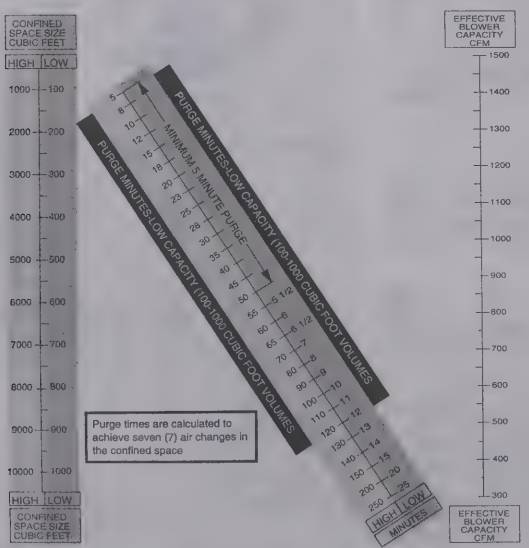
Tank Model Saddle Vent No. 5AZ95

Individual Components Available. See Page 2515.

Industrial and tank model Saddle Vents® provide easy, continuous entrances and exits to confined spaces. Unique air flow design ensures proper air flow reaches workers.

Industrial Mount Saddle Vent® System is designed for manhole work. The entire system can be completely set up in less than five minutes. 8" vinyl air duct is installed on the bottom of the Saddle Vent® and runs to the bottom of the manhole to provide fresh air and displace harmful gases—no need to remove when entering or leaving. Polyethylene duct carrier holds 50 ft. of duct. 90° Elbow removes any air duct kinks and allows for rotation of the intake duct to any position at street level.

"The Kit System" includes an industrial Saddle Vent®, universal mount, 1/2-HP electric blower, 6-ft. vinyl ventilation duct with 2 cuffs, 15-ft. vinyl ventilation duct with 2 cuffs, polyethylene duct carrier, and 90° elbow. Air Systems brand (SVB-E8CUP).



**No. 1C133.** Shpg. wt. 91.0 lbs. List $1073.00.
Each **$975.00**; Lots 2.....**$926.25**

**Industrial Model Saddle Vent®.** 43½L x 14½"W with 8" outside diameter. Orange color. Air Systems brand (SV-189).

**No. 2AM94.** Shpg. wt. 11.0 lbs. List $215.00.
Each **$195.00**; Lots 2.....**$185.25**

**Tank Model Saddle Vent®** is specially designed to fit oval or small round tank openings less than 20" in diameter. Installed in the void entry area to provide easy access to the ladder. Measures 32¾L x 13¼"W with 8" outside diameter. Gray color. Constructed of fire retardant polyethylene to meet U.S. Navy requirements. Air Systems brand (SV-189T).

**No. 5AZ95.** Shpg. wt. 7.3 lbs. List $270.00.
Each **$245.00**; Lots 2.....**$232.75**

## ESTIMATING APPROXIMATE PURGE TIMES

### HOW TO USE CHART

1. **Select the proper size scale at left, high or low depending on size of confined space**
2. **Place one end of a straight edge on the proper size scale at left.**
3. **Place other end of straight edge on blower capacity scale at right.**
4. **Read required purge time from the diagonal scale, gray or white, that corresponds to the high or low volume scale selected.**

### SPECIAL NOTES:

1. **Air quality of the confined space should be tested prior to ventilation.**
2. **Ventilate confined space for the minimum times as determined in the above chart and then retest air quality.**
3. **If toxic (combustible) gases or low oxygen is encountered, increase purge times by 50%.**
4. **If 2 blowers are used, add the two capacities, then proceed with the "How To Use Chart" directions above.**
5. **Effective blower capacity is measured with one or two 90° bends in an 8" diameter, 25 ft. blower hose.**

## SADDLE VENT®
## CONFINED SPACE ENTRY COMPONENTS

Saddle Vent® individual components provide continuous access to confined spaces. Components are a safety orange color. Air Systems brand.

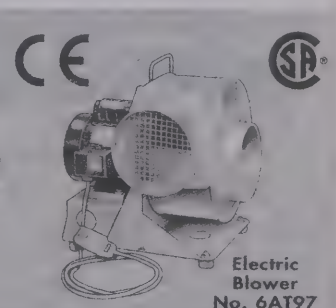
## CONFINED SPACE BLOWERS



Gas and electric air blowers are designed for use in severe conditions. 8" intake and exhaust flanges accommodate standard 8" ducting. All steel housing, frame, and welded safety guards on intake and exhaust. Blower wheels are dynamically balanced to 3000 rpm. Air Systems brand.

**Gas blower** has a Briggs & Stratton engine. Includes 5 ft. remote steel exhaust hose and custom gas-tight muffler.

**Electric blowers** are 115VAC and 12 amp. Explosion-proof blower includes 25-ft. cord and is supplied with a UL Listed electric motor and On/Off switch.

Gas Blower
No. 3AF79

## VENTURI-STYLE PNEUMATIC AIR BLOWERS

Also called air horns, these air blowers are used to ventilate explosive and hazardous vapors safely. No moving parts. Operate on compressed air or steam. Galvanized steel horn with lightweight cast aluminum base. Operating pressures up to 140 PSI. Air Systems brand.

**Petro-Vent Adapter**

This flange adapter threads directly onto 4-inch vent pipe found on most storage tanks. Bolts directly onto No. 1C089 venturi blower sold below. Air Systems brand (ASI-12ADPT).

**No. 1C091.** Shpg. wt. 7.0 lbs. List.....$105.00. Each $95.00; Lots 2.....$90.25

# PHOTO IONIZATION DETECTORS

Photo ionization detectors (PIDs) monitor low level, total volatile vapor exposure or total volatile organic compound (VOC) concentrations in PPM. VOCs include aromatics such as benzene, chlorinated hydrocarbons such as methylene chloride, ketones like MEK, aldehydes, alcohols, organic acids, heter-cyclics and olefins.

Minority-Owned Business

RAE SYSTEMS

No. 1K831
ToxiRAE

**ENVIRONMENTAL APPLICATIONS:**

- Leaking underground storage tanks
- Air pollution, trace toxic gases
- Monitoring drums
- Personnel monitoring at hazardous waste sites
- Head space analysis of soil, well and water
- Vapor recovery breakthrough

**INDUSTRIAL APPLICATIONS:**

- Confined space for real time broad band monitoring
- Emergency response to hazardous spills
- Leak detection, fugitive emissions (EPA Method 21)
- Perimeter monitoring for permit compliance
- Personnel monitoring
- Workspace monitoring
- Survey instrument
- Indoor air quality

No. 1K833
MiniRAE Plus

## TOXIRAE™ KIT

**SPECIFICATIONS:**

- Range: 0 to 99.9 PPM, 0.1 PPM resolution
  100 to 1999 PPM, 1 PPM resolution
- Accuracy: ± 2 PPM or 10% of reading
- Response Time: <20 sec.
- Continuous Operation: 12 hr.
- Temperature: 14° to 104°F
- Humidity: 0-95% RH, non-condensing
- Dimensions: 6.0 x 1.75 x 1.0"
- Intrinsic Safety: Class I, Div. 1, Groups A, B, C, D

**ToxiRAE** is the first pocket PID available. Provides continuous direct read-out of total VOCs in PPM. Ventilator under sensor draws in the air sample for accurate measurement and fast response. It has password protection, separate STEL, TWA and Peak visual, audio and optional vibration alarms. Unit has two programming keys and one operation key. Compact & light-weight, it can be worn comfortably on the belt or in the breath-ing zone for hands-free operation.

**Kit** includes pocket PID unit with 10.6eV lamp, rechargeable 2.4V 900 mAh battery (installed), single-unit charging station, battery charger 100V AC to 9V DC, 0.5A, alkaline battery adapter, cali-bration adapter with tubing, and operation/maintenance manual.

**No. 1K831.** ❸ ToxiRAE Kit (0007-0001-001). Shpg. wt. 14.0 lbs.
Each ..... $1450.00▲

❸ These products are covered by OSHA Hazard Communication Standard, and Material Safety Data Sheets (MSDS) are available. See page opposite inside back cover.
(▲) Net prices, not subject to discounts.

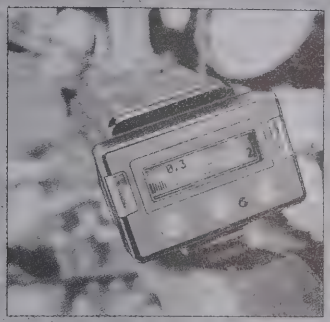
## MINIRAE™ PLUS KIT

**SPECIFICATIONS:**

- Range: 0-999.9 PPM, 0.1 PPM resolution
  1000-1999 PPM, 1 PPM resolution
- Accuracy: ± 2 PPM or 10% or reading
- Response Time: <3 sec.
- Continuous Operation: 10 hr.
- Temperature: 14° to 104°F
- Humidity: 0-95% RH, non-condensing
- Dimensions: 7.1 x 2.7 x 1.8"
- Intrinsic Safety: Class I, Div. 1, Groups A, B, C, D

**The MiniRAE Monitor** is a lightweight, hand-held PID which incor-porates a built in pump with flow >400 m1/Min. and downloading capabilities to a PC. The instrument may be operated in two modes: *Survey Mode* for continuous monitoring and storage of either Peak or Average over a programmable time period, and *Hygiene Mode* for continuous monitoring and storage of STEL, TWA and Peak over the work period.

**The MiniRAE Plus Kit** includes professional PID unit with an installed 10.6eV lamp, ProRAE-76 software package for Windows 3.1 & Dos 5.0, two installed 6V 500 mAh batteries (rechargeable), charging adapter (110V AC), power converter (110V AC to 12V DC, 0.8A) calibration adapter with flow controller, 100 PPM isobutylene cal gas bottle, organic vapor zeroing kit, gas outlet port adapter with 2" tubing, computer interface adapter, video, leather case, tool kit, wrist strap attachment, water trap car-tridge, replacement filters (5-pack), heavy-duty transport case, Operation and Maintenance Manual, Video, and a Quick Reference Guide.



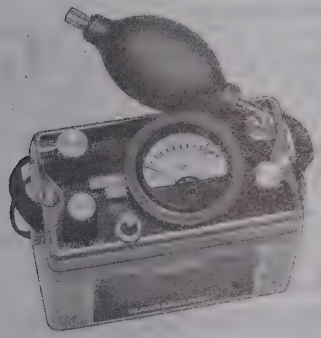
**No. 1K833.** ❸ MiniRAE PLUS KIT (002-0002-000). Shpg. wt. 14.0 lbs.
Each ..... $3450.00▲

# GAS DETECTORS

## PASSPORT® PID II ORGANIC VAPOR MONITOR

MSA

New



Detects low concentrations of volatile organic compounds. For soil remediation in connection with hazardous material spills, underground tank leakage, emissions monitoring, general leak detection, HazMat sites, arson scenes, and IH applications involving VOCs. Graphic and numeric data display helps quantify VOC levels. Operating range from 0.1 to 10,000 ppm isobutylene. Ideal for method 21 analysis without dilution tube. Auto-ranging capability allows unit to switch modes automatically as concentrations rise or fall. Operates as personal and survey monitor.

69 Pre-programmed and 10 user-defined response factors eliminate need to calculate response factors. 3 push-buttons for easy operation. Micro-processor, menu-driven monitor. Peak, short-term exposure (STEL), and time-weighted average (TWA) measurements offer a range of measurement options. Labeling feature identifies sampling locations to electronically label concentration data from different areas for easy identification. Records readings from up to 4,000 locations. Bagged sample can be collected at instrument exhaust port. Download information into a personal computer to establish a large database. MSA brand (710901).

**New No. 4LR87.** Shpg. wt. 3.0 lbs. Each.....**$4020.00▲**

BACHARACH

No. 6T220

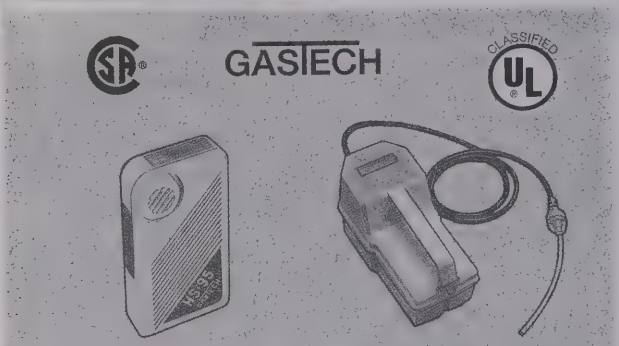
## GAS DETECTOR

### TEST FOR COMBUSTIBLE GASES AND VAPORS

These gas detectors detect combustible gases before they reach ignitable levels (LEL). Always consult user manual and applicable local electrical and safety codes prior to use. Typical applications include:

**G SNIFFER® (No. 6T220) is Portable and Designed for Fast, Accurate Measurement** of combustible gases in confined or hard-to-access areas. Differentiates between natural gas and petroleum vapors.

**Easy To Operate, Simple To Maintain, and Rugged.** Hand aspirator bulb draws air sample and passes to a hot-wire, platinum filament. Illuminated, analog readout indicates visual warning of potentially dangerous combustible levels; combustibles displayed over a range of 0 to 100% LEL.



**Lightweight Case** is reinforced fiberglass with coated die-cast aluminum top panel. Unit runs approximately 1000 tests on intermittent duty or 4 hours on continuous duty. Unit includes shoulder strap. Eight, D cell batteries required (not included). Bacharach brand (5000-0500).

**No. 6T220.** Shpg. wt. 3.0 lbs. List $594.33. Each.....**$575.50**

**VISIT THE GRAINGER WEB SITE TO PLACE YOUR ORDER!**

**Link up with Grainger's Web site at http://www.grainger.com and tap into a fast, convenient way to access up-to-date information. Our Online Catalog allows you to search and display products as well as place orders online. . . day or night.**

# CONFINED SPACE GAS DETECTORS

No. 3BC62 No. 2AW07

**LIMITED WARRANTY**

GasTech warrants materials and workmanship for one year. Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover

## GASTECH SINGLE GAS MONITORS

**Single gas, diffusion style monitors** are ideal for personal protection from hazardous gases. Monitors are enclosed in a durable, lightweight case. Compact, economic, and easy-to-use. Available in models that detect carbon monoxide, hydrogen sulfide, or oxygen.

- Microprocessor controlled
- Integrated pocket/belt clip provides hands-free monitoring
- Audible alarm sounds if preset gas levels are exceeded, if battery power is low, or if the sensor circuitry malfunctions
- No. 2AP61 Oxygen Monitor has a dual level audible alarm that activates in oxygen enriched or oxygen deficient environments
- Easy field replacement of sensor & batteries
- One "9V" battery included for 2500 hours or more of non-alarm operation
- High-impact, chemical-resistant polycarbonate-polyester plastic case is gasketed and water-resistant
- LCD display
- UL Classified and CSA Certified

SPECIFICATIONS:

- Range of Gases Detected:
  No. 2AP61 ($O_2$): 0 to 30.0% Vol in 0.1% increments
  No. 3BC62 ($H_2S$): 0 to 100 PPM in 1 PPM increments
  No. 5AJ01 (CO): 0 to 500 PPM in 1 PPM increments
- Accuracy (typ.): ±10% of reading
- Operating Temp.: –4°F to 113°F (–20° to 45°C)
- Humidity Range: 0 to 95% RH, non-condensing
- Dimensions: 4.5H x 2.5W x 1"D • Wt.: 6.5 oz.
- UL Classified
- Safety Rating: UL approved for Class I, Div. 1, Groups A, B, C, & D. CSA Certified for Class I, Div. I, Groups A, B, C, & D

### SINGLE GAS MONITORS ORDERING DATA

| Monitor Type | Gastech Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| Oxygen | OX-95 | 2AP61 | $577.50 | $525.00 | 2.0 |
| Hydrogen Sulfide | HS-95 | 3BC62 | 577.50 | 525.00 | 2.0 |
| Carbon Monoxide | CO-95 | 5AJ01 | 577.50 | 525.00 | 2.0 |

## GASTECH PORTABLE GAS MONITORS

**GT series portable gas monitors** are designed to protect workers from hazardous gases in confined spaces and other industrial work sites. Monitors are enclosed in a durable, lightweight case. Available in models that detect combustibles, oxygen, carbon monoxide, and other toxic gases.

- Hydrophobic filter attachment prevents damage to the sample system by automatically shutting the unit OFF
- Built-in pump meets federal regulation compliance for pretesting of confined spaces and other remote areas
- LCD backlit display shows real-time gas concentrations, date, time, battery capacity, alarm set points, and log remaining hours
- TWA, STEL, minimum, and maximum readings can be displayed
- Monitoring of hydrocarbons in the LEL/PPM range is standard on all units
- Built-in datalogger
- Microprocessor electronics and adjustments; top-mounted switches for easy calibration
- High-impact, chemical-resistant polycarbonate-polyester plastic case
- Easy field replacement of sensor & batteries
- Alarm points: user defined, programmable alarm levels, two alarm levels with audible and visual warnings of unsafe gas levels, latching or self-resetting modes, trigger for low battery, low flow, or sensor failure
- Batteries supplied
- UL Classified and CSA Certified

SPECIFICATIONS:

- Range of Gases Detected:
  Combustibles: 0 to 100% LEL in 1% increments
  Combustibles: 0 to 10,000 PPM in 20 PPM increments
  Carbon Monoxide (CO): 0 to 300 PPM in 1 PPM increments
  Hydrogen Sulfide ($H_2S$): 0 to 200 PPM in 1 PPM increments
  Oxygen ($O_2$): 0 to 30.0% Vol in 0.1% increments
- Accuracy (typ.): (LEL) ±5% of reading, ($O_2$) 0.5% Vol PPM, (CO, $H_2S$) ±10% of reading
- Operating Temp.: –4°F to 113°F (–20° to 45°C)
- Humidity Range: 0 to 95% RH, non-condensing
- Dimensions: 10L x 6H x 5"W • Wt.: 5 lbs.
- Safety Rating: Designed to meet the requirements of Class I, Div. 1, Groups A, B, C, & D
- UL Classified and CSA Certified

## CANNONBALL² PORTABLE GAS DETECTOR

**All features of the PhD2** plus a built-in continuous sample draw pump and alkaline "D Cell" backup power supply. The motorized sample draw pump can operate with up to 100' of hose. Low flow alarms and automatic pump shut-down prevent liquids from being accidentally drawn into the pump and sensor compartment. Rechargeable lead acid battery provides up to 10 hours of continuous operation. Four disposable "D Cell" alkaline batteries supply up to 16 hours of additional operation. Housed in a heavy-duty, waterproof ABS case for rough environments. Detector measures 9¼"x 6½ x 6"H. UL Classified for intrinsic safety and use in Hazardous Locations Class I, Groups C & D.

## ESCORT ELF® SAMPLING PUMP

**Versatile pump for both personal and area sampling.** For industrial hygiene, HazMat and coal mining applications. Provides a constant flow (volume) control with +/-2.5% regulation of flow range from 1-3 lpm and automatically compensates for any changes in battery voltage, temperature, altitude, and sample lead. Easy to calculate time-weighted averages (TWA's). Internal secondary standard calibrates pump continuously, flow-fault indicator shows if sample outlet is blocked. Withstands exposure to dusty or wet environments, inlet filter traps moisture and particulate matter. Users are alerted to any flow blockages by an LED, pump shuts off but the cumulative elapsed time remains on display.

Designed to meet IP66 Standard for water and dust tightness. Features electric laminar flow sensor. Elapsed time readout accumulates pump sample time which can be viewed on display. Stainless steel-filled plastic case provides EMI/RFI protection, can be clipped to belt for easy access. MSA brand (PMP-1-ELF-1-11-0).

**New No. 4LP77.** Shpg. wt. 3.1 lbs. Each.....$665.00▲

## ESCORT® LC SAMPLING PUMP

**For industrial hygiene, HazMat and coal mining applications.** Two controls, ON/OFF key and flow rate potentiometer are easily set. Once set, controls cannot be tampered with, assuring accurate readings.

**Port for charging jack** is located directly on battery, may be charged while still attached to unit. LEDs indicate if pump is running or if battery is low. Inlet filter traps particulate matter. Stainless steel-impregnated ABS plastic case provides EMI/RFI protection and is watertight for easy cleaning. Can be clipped to belt for easy access. Compact, lightweight and quiet. MSA brand (PMP-1-ESLC-11-0).

**New No. 4LP78.** Shpg. wt. 3.1 lbs. Each.....$420.00▲

# CONFINED SPACE GAS DETECTORS

**SENTINEL® 44 can be used as a Personal Monitor or Converted to a Sample-Draw Instrument** by attaching the sample pump. Draws samples up to 100 feet away (with appropriate hose assembly) to detect hazardous levels of gas before entering confined spaces.

**Features Built-In Data Logger.** Information is transferred to printer in two output formats: time weighted averages (TWA) and gas peak values, or TWA and peak gas values with a histogram of TWA exposure in 15 minute intervals.

**Backlit, LCD Display** shows the concentration of up to four gases simultaneously. Display also shows operating mode and alarm conditions. Adjustable visual and audible alarms. Rugged ABS plastic enclosure. RFI protection. Detachable lead acid battery for reliable performance. FM Approved and CSA Certified. Intrinsically safe for use in Class I, Division 1, Groups A, B, C, and D areas.

**No. 6T512 Features** oxygen deficiency and combustible gas monitoring. Additional sensors can be added as applications change (see accessory chart for additional sensors).

**No. 6T511 Features** oxygen deficiency, combustible gas, carbon monoxide (CO), and hydrogen sulfide ($H_2S$) monitoring.

**Gas Ranges:** 0 to 25% (oxygen), 0 to 100% LEL (combustibles), 0 to 200 PPM ($H_2S$), 0 to 999 PPM (CO). Visual indication when sensors need to be replaced: See Index.

**Both Models Include:** Battery charger, carrying strap, calibration sensor cover, calibration sampling cup, sensor extraction and calibration adjustment tool, carrying case, sampling pump with probe and filters, earphone, and confined space guideline booklet.

**No. 6T512.** Two-Gas Monitor. Bacharach brand. (51-8152).
Shpg. wt. 9.4 lbs. List $2165.00. Each.....$2065.00

**No. 6T511.** Four-Gas Monitor. Bacharach brand. (51-8205).
Shpg. wt. 10.0 lbs.List $2695.00. Each.....$2225.00

**SNIFFER® 301 (No. 6T229).** Internal sampling pump draws sample and passes it to a catalytic bead type sensor. Illuminated, 3-digit LCD digital display indicates visual warning of potentially dangerous combustible gas levels; latching internationally accepted alarm (user adjustable) flashes repeatedly. Combustibles displayed over a range of 0 to 100% LEL.

**Rugged, Rain-Resistant, Thermoplastic Case** has built-in handle and trigger switch. Integral battery test circuit (4, D alkaline or carbon-zinc batteries required, not included). Includes shoulder strap. Easily replaceable sensor elements. Order accessories and replacement items on page 2463. Intrinsically safe for Class I, Divisions 1 and 2, Groups A, B, C, and D hazardous areas. CSA Certified. Bacharach brand (51-7190).

**No. 6T229.** Shpg. wt. 4.0 lbs. List $1018.35. Each.....$965.50

**SNIFFER® 302 Indicates the Presence of Combustible Gases and Oxygen in the Air.** Illuminated LCD digital display. Internal, motor driven sampling pump draws sample to a catalytic bead type sensor. Combustibles are displayed over a range 0 to 100% LEL (Lower Explosive Limit); oxygen concentration ranges from 0 to 25% by volume.

**Two Adjustable Alarms:** latching combustible and non-latching oxygen deficiency. Thermoplastic case with adjustable shoulder strap. Includes NiCad, rechargeable battery pack with up to 14 hours of intermittent duty or 3½ hours of continuous operation when fully charged. Battery check upon activation. Intrinsically safe for Class I, Divisions 1 and 2, Groups A, B, C, and D. CSA Certified. Bacharach brand (51-8002).

**No. 6T230.** Shpg. wt. 5.4 lbs. List $1278.94. Each.....$1276.00

**No. 6T241** is to be used for continuous monitoring in confined spaces to alert personnel to the hazards of oxygen deficiency and the presence of dangerous concentrations of combustible gases.

Applications include continuous monitoring for the hazard of combustible gases in confined spaces such as: fuel storage tanks, boilers, manholes, wells, silos, bins, sewers, etc. Always consult user manual and applicable local electrical and safety codes prior to use.

**SNIFFER® 503A Provides up to 10 Hours of Continuous Monitoring** for oxygen deficiency (0 to 25% range) and combustible gases (0 to 100% LEL). Also offers two survey ranges for combustibles, 0 to 2000 PPM and 0 to 10,000 PPM.

**Two Illuminated Analog Meters** display combustibles and oxygen. Integral pump draws sample and passes it to a catalytic bead type sensor. Audible and visual red LED alarms. Audible alarm system features 100 dB output at 1 ft. Steady tone indicates oxygen deficiency; alternating tone high combustible gas concentration. Non-latching, slow chirping tone for low flow and low battery conditions.

**Sealed, Lead Acid Battery Pack** provides reliable power. Rugged, heavy-gauge aluminum housing. Hinged top lid with tempered glass window. Factory Mutual Approved (FM) as intrinsically safe for use in Class I, Division 1, Groups A, B, C, and D areas. Can be used in accordance with EPA Method 21. Bacharach brand (51-8066).

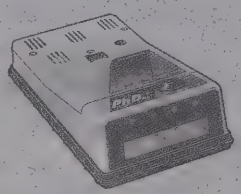
| 6T260† | Hydrogen Sulfide Sensor. Replacement electrochemical device. Also used when upgrading 2 gas Sentinel 44. | — | — | — | — | 0 | 51-8071 | 265.00 | **250.00** | 0.2 |
| 6T261† | Carbon Monoxide Sensor. Replacement electrochemical sensor. Also used when upgrading 2 gas Sentinel 44. | — | — | — | — | 0 | 51-8068 | 265.00 | **250.00** | 0.2 |

**Key: (1) Highly Recommended. (•) Compatible. (—) Not Compatible. (0) Included with instrument; may be purchased for replacement or spare.**

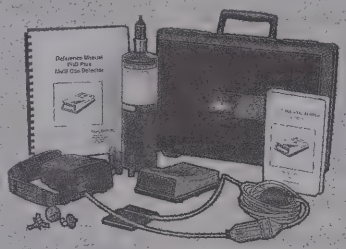
(*) Must have Nos. 6T242, 6T234, or 6T235 to use an extension. (†) Included with detector No. 6T511. ③ These products are covered by OSHA Hazard Communication Standard, and Material Safety Data Sheets (MSDS) are available. See page opposite inside back cover

# CONFINED SPACE GAS DETECTORS



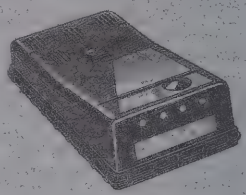
## BIOSYSTEMS PhD PLUS AND PhD ULTRA GAS DETECTORS

PhD Plus is designed as an economical configuration which does not include datalogging. PhD Ultra offers a wider selection of toxic sensors, standard datalogging, optional Datalink Kit (with computer interface cradle, software, and fast charger), and the ability to generate printed reports (via direct connection with a printer). Both monitor up to four atmospheric hazards simultaneously; oxygen deficiency or enrichment, combustible gas, and up to two additional toxic gases. Housed in a rugged, compact case designed to stand up to the most demanding environments. Easy-to-use, durable, and economical.



Day-to-day operating procedures, including automatic calibration adjustment, are controlled by the single On/Off Mode button. Verification of accuracy is achieved by attaching the gas and pushing a single button. All of the adjustments are made automatically. Feature "Smart Sensors" memory chip for improved performance and simpler maintenance. Both models are equipped with standard accessories and available as a confined space kit.

biosystems inc.



Replacement Parts Available 1-800-323-0620

No. 1N826
PhD Plus Detectors

No. 1N808
PhD Plus Value Pack

No. 1N733
PhD Ultra Detector

**FEATURES:**

- **All procedures performed with "One-Button" operation through the On/Off/Mode button**
- **Multi-sensor capability ($O_2$, LEL, CO, and $H_2S$)**
- **"Smart Sensors" equipped with EEPROM memory chip which stores serial number, calibration and other information**
- **Automatic set-up by plugging in sensor—the sensor identifies itself to the instrument, automatically displays the correct readings, and assigns the proper alarm settings**
- **Compact size—1/3 smaller than the PhD²**
- **Rugged steel-filled polycarbonate case designed to minimize RFI**
- **Fully automatic zero and span calibration**

**SPECIFICATIONS:**

- **Dimensions: 6.75 x 3.75 x 2"**
- **Wt.: NiCad 22 oz., Alkaline: 19.5 oz.**
- **Intrinsic Safety: UL Classified Class 1, Groups A, B, C, D**
- **LCD Display: Simultaneous readings for all gases**
- **Audible Alarms: Gas, low battery, electronic fault, missing/bad/changed sensor**
- **Visual Alarms: Bright red LED for each gas**
- **Backlight: Automatic activation in low light**
- **Operating Modes: Technician/Basic/Text Only**

### STANDARD ACCESSORIES

Standard accessories include leather case, carrying strap, hand aspirated sample draw kit with 10 ft. of tubing, Quick Reference Card, Reference Manual, and comprehensive training video. The sample draw kit includes sample draw/calibration adapter, squeeze bulb, tubing, sample probe, and spare sample probe filters. (Motorized sample draw pump available, see Index.)

"Alkaline" detectors include a snap-in alkaline battery pack and a set of three AA disposable batteries. "NiCad" detectors include a snap-in rechargeable NiCad battery pack, slip-in "fast charger" (2-hour recharge). Each pack provides up to 12 hours of continuous operation. **"Professional"** detectors include both Alkaline and NiCad battery packs, DataLink software and combination fast charger/computer interface "Datadock" cradle.

### CONFINED SPACE KITS

Confined Space Kits include the detector, all standard accessories, cylinder (58 or 103 liter) of all-in-one calibration gas, regulator, and a gasketed, waterproof, foam-lined carrying case.

### PhD PLUS VALUE PACK

The Value Pack is a low cost configuration which includes a two ($O_2$/LEL) or three ($O_2$/LEL/CO Plus) sensor Alkaline PhD Plus, all standard accessories, 34 liter cylinder of all-in-one calibration gas, and compact, foam-lined carrying case.

### PhD ULTRA DATALINK KIT

Datalink Kit includes a slip-in fast charger/"Datadock" computer interface cradle, connector cable, software and Reference Manual. Datalink software allows for two way communication between the PhD Ultra and a personal computer. The menu driven software is easy-to-use for gas detection record keeping. The software may be used to generate reports, graphs and tables of recorded information, or simply to store recorded information for future reference. Includes full graphics and both search and export database capabilities.

# ACCESSORIES FOR BIOSYSTEMS CONFINED SPACE GAS DETECTORS

## PhD PLUS AND PhD ULTRA ACCESSORIES

### MOTORIZED SAMPLE DRAW PUMP

Motorized Sample Draw Pump is both powered and directly monitored for proper performance by the detector. The pump automatically operates whenever the instrument is turned on. Flow blockage, disconnection or other mechanical faults trigger audible and visual alarms with display of the proper alarm message. The same pump is used for the PhD Plus and the PhD Ultra.

### CALIBRATION MATERIALS

In most cases, materials used to calibrate the CannonBall² detectors may also be used to calibrate the PhD Plus and PhD Ultra. Cylinders of calibration gas may also be interchanged, except for the PhD Plus Value Pack which uses a reduced size 34 liter cylinder of calibration gas and a different fixed flow rate calibration gas regulator.

### SMART SENSORS

Each Smart Sensor is equipped with its own EEPROM memory storage chip. Information stored with each sensor includes type of sensor, alarm settings, serial number, warranty expiration date, calibration dates (PhD Ultra only) and settings, custom temperature compensation curves, and a programmable "service required" interval (PhD Ultra only). Whenever the instrument is turned on, it reads and updates all the information contained on the sensor chips. The custom temperature compensation curves are updated with each calibration, and accuracy is improved continuously.

### FIVE-UNIT MULTI-CHARGER

Five-Unit Slip-In Multi-Charger is designed to recharge several instruments simultaneously.

### PhD PLUS AND PhD SMART SENSORS

| Description | Gas Type | For Use With | Biosystems Model | Stock No. | Each | Shpg. Wt. |

# GAS DETECTORS

## PASSPORT® PERSONAL ALARM

MSA New

Monitors and displays multiple gas readings simultaneously. Measures peak exposure, STEL and TWAs. 3 push-buttons for easy operation. Fresh air setup allows user to reset sensor zeroes, but provides protection against zeroing out potentially harmful levels of background gases. Easily calibrated. Includes Ni-Cad battery and charging systems. Microprocessor based, alarm is menu-driven for easy operation. User can page through various menu activities for calibration and display options. Features visible and audible alarms. Lockalarm™ circuit ensures a safe reading whenever the alarm is exposed to more than 100% LEL. Cannot display ambiguous low LEL reading at high gas concentrates. Information can be downloaded into personal computer to establish database. Small, lightweight and water-resistant.

**New No. 4LP82.** 3-Gas Alarm measures LEL, Oxygen and Carbon Monoxide.. Shpg. wt. 7.1 lbs.
Each ..... $2155.00▲

**New No. 4LP83.** 3-Gas alarm measures LEL, Oxygen and $H_2S$. Shpg. wt. 7.1 lbs.
Each ..... $2155.00▲

Each ..... $2350.00▲

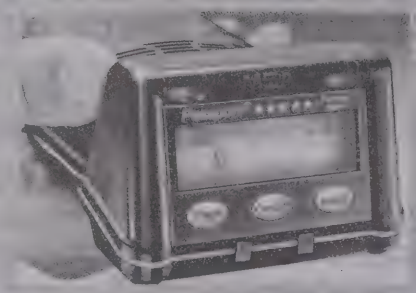
No. 4LP81

## PASSPORT FIVE STAR® PERSONAL ALARM

MSA New

Multi-gas personal alarm can be customized for many tasks. Monitors and displays multiple gas readings simultaneously. "Smart Sensor" technology allows selection of best combination of sensors to match task. Seven sensors are available, up to five can be used at one time. Easily accessible sensor bay, plug-in sensor design for easy changes.

Unique, easy to use datalogging retains information about average and peak instrument gas readings for a minimum of 15 hours. An additional, session datalog maintains records of instrument usage, alarms and operator actions such as fresh air setups and calibrations.



Fresh air setup allows user to reset sensor zeroes, but provides protection against zeroing out potentially harmful levels of background gases. Provides dependable protection with changes in atmosphere pressure. Battery gas gauge displays actual run time remaining, eliminates guessing. Various displays show peak readings, time-weighted averages (TWA) and short-term exposure limits (STEL). Lightweight unit can be hand-held, clipped to belt or left unattended for continuous monitoring.

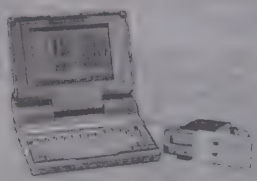
Lockalarm™ circuit ensures a safe reading whenever the alarm is exposed to more than 100% LEL. Cannot display ambiguous low LEL reading at high gas concentrates. MSA brand.

**New No. 4LP88.** 3-Gas alarm measures LEL, Oxygen and Carbon Monoxide. Shpg. wt. 2.9 lbs. Each ..... $2095.00▲

**New No. 4LP89.** 3-Gas alarm measures LEL, Oxygen and $H_2S$. Shpg. wt. 2.9 lbs. Each ..... $2095.00▲

**New No. 4LP87.** 4-Gas alarm measures LEL, Oxygen, Carbon Monoxide and $H_2S$. Shpg. wt. 3.0 lbs. Each ..... $2245.00▲

No. 4LP87



## DATA DOCKING MODULE

MSA New

Docking module allows user to download information from Passport® Personal Alarm or Passport® PID II Organic Vapor monitor into a personal computer. Uses 9-Volt battery or MSA Omega battery chargers (sold separately). Connects to PC by nine-pin serial communication port (PC not included). MSA brand (804679).

**New No. 4LP39.** Shpg. wt. 0.4 lbs. Each ..... $425.00▲

(▲) Net prices, not subject to discounts.

## CRICKET® TEST GAS STATION

Test gas station checks for CO and $H_2S$ sensitivity on Cricket Personal Alarm Nos. 4LP97 and 4LP98 (sold on page 2527). Appropriate calibration gas attaches directly to station. MSA brand (804626).

**New No. 4LP95.** Shpg. wt. 0.5 lbs. Each ..... $35.35▲

## SQUIRT® GAS BUMP TESTER

Convenient, inexpensive way to check sensor response on MSA instruments. Tester gives reading in 15 seconds, works without regulator. Uses disposable cylinders (sold separately below). MSA brand (813411).

**New No. 4LP37.** Shpg. wt. 0.5 lbs. Each ..... $42.75▲

### SQUIRT GAS BUMP TESTER CYLINDERS

| Cylinder Contents | MSA Model | New! Stock No. | Each | Shpg. Wt. |

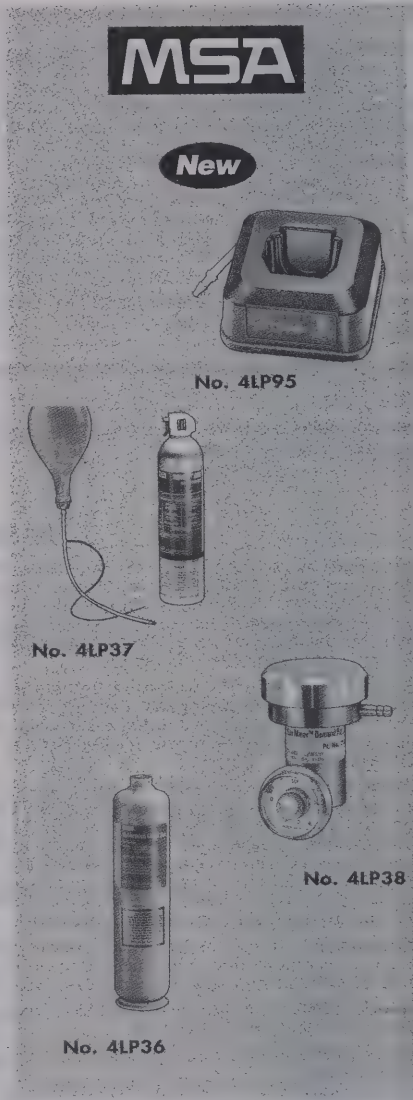
## GAS MISER™ DEMAND REGULATOR

For use with MSA RP Calibration Cylinders (sold separately). Automatic On/Off valve delivers the correct amount of gas needed to calibrate instrument. Auto shutoff when calibration is complete. Regulator can stay connected to RP cylinder in a steady state. Supplies any gas flow from 0.10 lpm to 3.00 lpm. For fixed installations such as work benches, calibration stations and bump test stations. Nickel-plated polished aluminum. MSA brand (710288).

**New No. 4LP38.** Shpg. wt. 1.0 lbs. Each ..... $240.00▲



## CALIBRATION CHECK GAS CYLINDERS

For use when calibrating MSA instruments. Sufficient gas for multiple calibrations. MSA brand.

### CALIBRATION CHECK GAS CYLINDERS

| Cylinder Contents | Liters of Gas | MSA Model | New! Stock No. | Each | Shpg. Wt. |

# SINGLE-SENSOR GAS DETECTORS

## TOXI FAMILY OF SINGLE SENSOR GAS DETECTORS

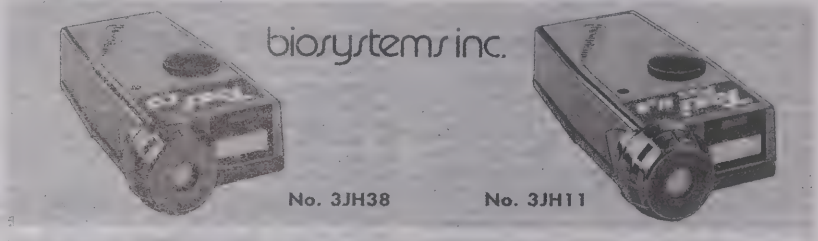
The "Toxi/Oxy Family" of compact, rugged and affordable single sensor gas detectors offers a wide range of features and capabilities designed to provide users with exactly the amount of information they require. Toxi Family detectors are housed in rugged, compact, metal plated ABS cases which are completely sealed against the elements. All procedures necessary for day-to-day operation (including fully automatic calibration adjustment) are controlled through the use of a single On/Off "Mode" button. An easy-to-read top-mounted liquid crystal display (LCD) is used to show readings as well as other messages. A manually activated back-light insures that you can see the readings even in dim light conditions. The top-mounted sensor location insures that readings are accurate even when the detector is worn in a shirt pocket. An audible alarm and bright LED alarm light warn users of dangerous conditions, while an optional vibrator alarm is available for use in high noise environments. Each set of 3 easily changed AAA alkaline batteries provides months of continuous operation. Datalogging instruments automatically remember (log) gas readings as well as other important information.

Ordering information: All Toxi, Toxi Plus, Oxy Plus, Toxi Ultra and Oxy Ultra detectors come complete with sensor, belt clip, weather cover, set of 3 AAA alkaline batteries, calibration adapter, quick reference card, and Reference Manual. Toxi Ultra includes a comprehensive training video.

Toxi/Oxy "Family" detectors may also be equipped with an optional internal vibrating alarm for high noise areas.

### TOXI

The low cost Toxi single sensor gas detector is designed to continuously monitor for CO and/or $H_2S$. The Toxi functions as a simple "Go/No Go" gas detector. The top-mounted LCD shows an "OK" message as long as conditions are safe. If an alarm condition occurs the audible and visual alarms are activated and readings are given in numbers.



### TOXI PLUS

Besides all the features included in the basic Toxi design, Toxi/Oxy Plus detectors additionally offer numeric readings as well as industrial hygiene calculations such as "Peak", STEL and TWA. The Toxi Plus is available for a variety of atmospheric hazards including CO, $H_2S$ and $SO_2$, or may be equipped with Biosystems' dual purpose "CO+" sensor for the simultaneous measurement of both CO and $H_2S$. Three modes of information provide the right amount of information for users with different skill levels; Text Only ("OK"), Basic (numeric readings) and Technician (peak, STEL and TWA as well as numeric readings).

### OXY PLUS

The economical Oxy Plus offers the same capabilities as the Toxi Plus, but is dedicated to the continuous measurement of oxygen. The Oxy Plus offers two easily adjusted alarm settings, one for low concentrations associated with dangerous oxygen deficiencies as well as one for high concentrations associated with oxygen enrichment.

(▲) Net prices not subject to discounts.

### TOXI SINGLE-SENSOR GAS DETECTORS

| Toxi Plus w/Oxygen ($O_2$) Sensor and Vibrator | 54-06-90V | 3MK27 | 495.00▲ | 1.5 |

(*) "CO Plus" sensor detects both Carbon Monoxide (CO) and Hydrogen Sulfide ($H_2S$).

## CRICKET® PERSONAL ALARMS

Compact personal alarms detect dangerous levels of carbon monoxide, oxygen or hydrogen sulfide. For use in confined spaces, oil refineries, pulp and paper mills, water and waste treatment facilities, steel mills and other industries that monitor for CO or $H_2S$. Visual and audible alarms for two distinct warnings of hazardous conditions. Pocket, lapel or hard hat attachments. High performance sensor and lithium battery lasts for life of instrument. Impact-resistant case withstands harsh treatment. MSA brand.

**New No. 4LP97.** Carbon Monoxide Detector (804746). Shpg. wt. 0.5 lbs.
Each ..... $310.00▲

**New No. 4LP98.** Hydrogen Sulfide Detector (804745). Shpg. wt. 0.5 lbs.

# SINGLE-SENSOR GAS DETECTORS

## BIOSYSTEMS PORTABLE GAS DETECTION SYSTEMS

biosystems inc.

Replacement Parts Available
1-800-323-0620

Calibration gas available on nearby pages

No. 3JH15

### TOXI ULTRA

Besides all the advantages shared by every member of the family, the datalogging Toxi Ultra is designed to easily communicate with your personal computer. Biosystems' Datalink Software lets you download monitoring information or generate detailed reports with the push of a button. The instrument automatically logs gas readings, calibration dates and other important information. Since datalogging is completely "transparent" (all you do is turn the instrument on to begin recording information) the Toxi Ultra is every bit as easy to use as the other members of the family.

### OXY ULTRA

The Oxy Ultra offers the same capabilities as the Toxi Ultra, but is dedicated to the continuous measurement of oxygen.

### TOXI ULTRA ACCESSORIES

**Datalink Kit for Toxi Ultra/Oxy Ultra** includes software, interface cable, reference manual and slip-in download cradle. Biosystems brand.

**No. 3JH34.** Datalink Kit. Shpg. wt. 2.5 lbs. Each ..... $295.00▲

### FIRST TEAM™ MINICO® RESPONDER KIT

Kit includes MiniCO® Responder, case, squirt gas bump tester, tube card and instructions. MiniCO® Responder features a simple design to greatly reduce training time. 3-Button controls for easy operation, back-lit display enables reading in dark places. Plastic case is reinforced with stainless steel fibers to protect unit from impact and shield radio frequency interference. Rubber seal around case and Goretex filter over intake provide excellent water resistance. Field replacement and maintenance is simple with easily accessible sensor and battery. Squirt bump gas detector allows for easy calibration checks while in field in about 15 seconds. MiniCO® Detector tube card has easy to follow instructions. ETL Listed; Class I; Division 1, Groups A, B, C and D. MSA brand.

## CALIBRATION GASES AND REGULATORS

### CALIBRATION GASES

EZ Cal™ multiple component calibration gas mixtures are available for use with many common Cannonball² detector configurations. Order the Cannonball² and calibration materials separately.

**No. 1H099.** Methane calibration gas. 50% LEL in air, 103 liters. Biosystems brand (54-9031). Shpg. wt. 3.7 lbs. Each ..... $120.00▲

**No. 1H098.** Methane equivalent calibration gas. 50% LEL. Shpg. wt. 3.9 lbs. Each ..... $120.00▲

**No. 1H097.** Carbon monoxide calibration gas.50 PPM in air, 103 liters. Biosystems brand (54-9032E). Shpg. wt. 3.9 lbs. Each ..... $150.00▲

**No. 1H096.** Hydrogen sulfide calibration gas. 25 PPM in nitrogen, 58 liters. Biosystems brand (54-9034). Shpg. wt. 2.5 lbs. Each ..... $180.00▲

**No. 1H095.** Sulfur dioxide calibration gas. 10 PPM in nitrogen, 58 liters Biosystems brand (54-9037). Shpg.wt. 2.5 lbs. Each ..... $180.00▲

**No. 1H094.** EZ Cal™ multiple component calibration gas with carbon monoxide (50 PPM) and methane (50% LEL) in air, 103 liters. Biosystems brand (54-9041). Shpg. wt. 3.9 lbs. Each ..... $180.00▲

**No. 1H093.** EZ Cal™ multiple component calibration gas with carbon monoxide (50 PPM) and methane (50% LEL) in air, 103 liters. Biosystems brand (54-9042E). Shpg. wt. 3.8 lbs. Each ..... $180.00▲

**No. 1H092.** EZ Cal™ multiple component calibration gas with carbon monoxide (50 PPM), H2S(25 PPM) and methane (50%) LEL) in air, 58 liters. Biosystems brand (54-9043). Shpg. wt. 2.5 lbs. Each ..... $300.00▲

**No. 1H091.** EZ Cal™ multiple component calibration gas with carbon monoxide (50 PPM), H2S (25 PPM) and methane (50%) LEL) in air, 58 liters. Biosystems brand (54-9044E). Shpg. wt. 2.5 lbs. Each ..... $300.00▲

**No. 1H090.** Ammonia calibration gas, 50 PPM in nitrogen, 58 liters requires No.1H139 regulator, sold below. Biosystems brand (54-9051). Shpg. wt. 2.5 lbs. Each ..... $400.00▲

**No. 1H089.** Chlorine calibration gas. 5 PPM in nitrogen, 58 liters. Biosystems brand.(54-9054). Shpg. wt. 2.5 lbs. Each ..... $350.00▲

**No. 1H088.** Hydrogen cyanide calibration gas. 10 PPM in nitrogen, 58 liters. Biosystems brand (54-99054). Shpg. wt. 2.5 lbs. Each ..... $400.00▲

**No. 1H087.** Nitric oxide calibration gas. 30 ppm in nitrogen, 58 liters. Biosystems brand (54-9055). Shpg. wt. 2.5 lbs. Each ..... $400.00

**No. 1H086.** Nitrogen dioxide calibration gas. 5 PPM in nitrogen, 58 liters. Biosystems brand (54-9056). Shpg. wt. 2.5 lbs. Each ..... $400.00▲

**No. 1N649.** EZ Cal™ multiple component calibration gas with carbon monoxide (50 PPM) and methane equivalent (50% LEL) in air. 34 liters. Biosystems brand (54-9045E). Shpg. wt. 2.3 lbs. Each ..... $75.00▲

### REGULATORS

Regulator, calibration gs, standard service, 1.0 LPM fixed flow rate. Biosystems brand (12-023).

**No. 1H140.** Shpg. wt. 0.5 lbs. Each ..... $150.00▲

Regulator for use with ammonia calibration gas. Corrosive service, 1.0 LPM fixed flow rate. Biosystems brand (12-025).

**No. 1H139.** Shpg. wt. 1.1 lbs. Each ..... $360.00▲

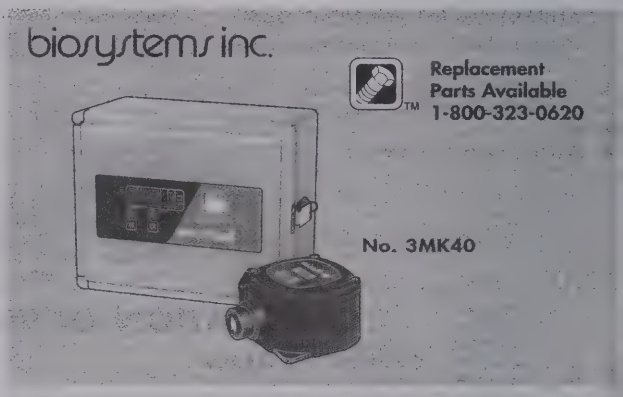
(▲) Net prices, not subject to discounts.

## UL LISTING AND CSA CERTIFICATION

**When choosing products from this section, look for the UL and CSA symbols. Those Listed and/or Certified products meet or exceed rigid standards established for personal safety and maximum product life. UL file number and CSA Certification are indicated in the individual listings.**

# GAS DETECTION SYSTEMS

## BIOSYSTEMS FIXED GAS DETECTION SYSTEMS



GasChek 1 and GasChek 4 fixed gas detection systems are designed to provide continuous round-the-clock monitoring for a variety of common atmospheric hazards. Remote detector assemblies are available in non-explosive proof or explosive proof housings for installation in hazardous locations. Both types of detector housing include digital readouts and switches which allow for single person, non-intrusive calibration adjustment. Microprocessor based GasChek electronics provide maximum flexibility in selecting alarm logic and specifying alarm levels, making these systems ideal for a wide variety of industrial monitoring applications.

- **Easy to install and operate**
- **Weatherproof NEMA 4X controller housing**
- **Digital readouts at both controller and detector**
- **2 alarm levels per channel • 1 to 5 V or 4-20mA outputs**
- **Comprehensive output DPDT relays for remote signaling and control (5A at 240V non-inductive loads)**
- **Built-in audible alarm, bright LED alarm lights and backup power supply**
- **Ambient temp. range 14°F to 104°F; 0 to 95% relative humidity**

### GASCHEK 1

The GasChek 1 is a microprocessor based fixed gas detection system designed to accept the input from a single remotely located oxygen, combustible or toxic detector assembly. Remote detector assemblies are available in non-explosive proof or explosion proof versions. The unit is designed for operation with 110/220 VAC 50-60 Hz or 12 or 24 VDC power, and includes an internal 12V sealed lead acid battery backup power supply. Each GasChek 1 system includes the controller with all standard alarms, relays and electronics installed in a NEMA 4X fiberglass housing, the appropriate input module for the sensor specifies (installed in the controller housing), sensor housing, and sensor.

## WATCHMAN® MULTIGAS MONITOR

Monitor multiple gases continuously and simultaneously, oxygen, combustible and toxic gases. For use in fire service, utilities, and other industries where personnel must enter confined spaces such as manholes, storage tanks, vaults, mines and sewers. Built-in pump allows remote sampling. Measures peak exposure, STEL and TWA. 3 Push-buttons for easy operation and calibration. Visible and audible alarms warn user of potentially dangerous situations. Microprocessor-based, menu-driven for easy operation. Fully charged Ni-Cad battery provides 10+ hours of use. Rugged, portable aluminum case withstands harsh treatment.

No. 4LP85 3-Gas Alarm measures LEL, Oxygen ($O_2$) and Carbon Monoxide (CO). No. 4LP86 3-Gas Alarm measures LEL, Oxygen ($O_2$) and $H_2S$. No. 4LP84 4-Gas Alarm measures LEL, Oxygen ($O_2$), Carbon Monoxide (CO) and $H_2S$. MSA brand.

# GASCHEK 4

biosystems inc.

Replacement Parts Available 1-800-323-0620

No. 3MK53

No. 3MK54

No. 3MK64

The GasChek 4 is a microprocessor based fixed gas detection system designed to accept the input from up to four remotely located oxygen, combustible or toxic detector assemblies. The system is designed for easy expansion by means of plug-in alarm modules. Remote detector assemblies are available in non-explosion proof or explosion proof versions.

GasChek 4 systems include the controller itself with all standard relays and electronics installed in a NEMA 4X housing. Each remote detector assembly includes sensor specific input and alarm modules (installed in the controller housing), remote sensor housing, and sensor.

**Complete GasChek 4 System**

1. Order one each of the controller (No. 3MK53).
2. Select one to four sensors that are to be used with the controller. Any combination of sensors can be used. When the system is ordered in this way the alarm modules for the selected sensors will be installed in the controller.

**Sensor/Alarm Modules for Existing GasChek Systems**

1. Order the sensor from the list. The sensor will be supplied with an alarm module to be installed in the existing controller and instructions for the installation.
2. Select the appropriate wire from the list to connect the sensor to the controller.

## CALIBRATION ADAPTER FOR FIXED GAS DETECTION SYSTEMS

- **Allows a single person to calibrate the system**
- **Use appropriate calibration gas found on adjacent pages**

No. 3MK67. Biosystems brand (54-14-A04). Shpg. wt. 6.2 lbs.
Each ..... $215.00▲

## WIRE RECOMMENDATIONS*

Use the following wire to connect GasChek remote detector assemblies. For oxygen and toxic detector assemblies up to 2000' use 18GA two conductor twisted pair shielded with drain (such as 4A630**). For combustible detector assemblies up to 600' away use 18GA four conductor twisted pair shielded with drain (such as 4A631**).

(*) Comply with local and national electric codes before installing system. (**) See Grainger General Catalog for description of wire.

**Our Grainger Electronic Catalog is a state of the art CD-ROM selection guide which features products and information from our General Catalog. The perfect reference tool when you need product and technical information on the road. Contact your local branch for more information.**

# GAS DETECTION PUMP AND ACCESSORIES

## accuro® GAS DETECTION PUMP

The Drager accuro® is a bellows type pump which provides one-hand operation when necessary, such as on ladders or difficult to reach areas. Designed for one or two hand operation, the accuro® 's shape is ergonomically contoured for comfort when making a pump stroke. Rubber grips on the pump body make it easier to hold and squeeze. Easy to maintain (no special tools required) and never needs to be lubricated. Constructed of corrosion-resistant materials, the accuro is designed tp provide years of reliable service. A unique internal scissors mechanism ensures a uniform, even pump stroke-delivering 100 cubic centimeters of sample air. The Drager accuro®, used with short-term Drager tubes, forms an intergral sampling system.

**No. 3MN34.** Drager brand (6400000). Shpg. wt. 1.0 lbs. Each.....$306.00▲

## accuro® DELUXE KIT

The accuro® Deluxe Kit contains space for several boxes of tubes. Kit includes accuro® pump (No. 3MN34), deluxe tube opener (No. 3MN35), extension tube adapter, spare parts kit, package of 10 rubber caps (No. 3MN70), deluxe case, one black permanent marker, screwdriver, and instructions.

**No. 3MN30.** Drager brand (4053474). Shpg. wt. 3.5 lbs. Each.....$394.00▲

## accuro® SOFT SIDE KIT

The accuro® Soft Side Kit includes the Drager accuro® pump (No. 3MN34), accuro® spare parts kit, screwdriver, and permanent marker—all packed in a nylon pouch. This kit is ideal for air investigations where only one or two boxes of tubes are needed.

**No. 3MN29.** Drager brand (4053473). Shpg. wt. 1.0 lbs. Each.....$344.00▲

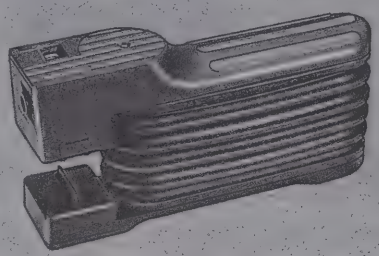
## EXTENSION HOSES

3, 10 and 15 meter extension hoses are available for use with the Drager accuro® pump. These hoses are a useful accessory for conducting gas testing at otherwise inaccessible areas.

**No. 3MN36.** Drager brand (6400077). Shpg. wt. 1.3 lbs. Each.....$107.00▲

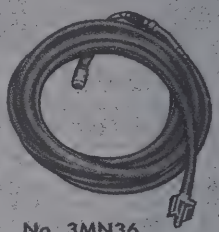
**No. 3MN37.** Drager brand (6400078). Shpg. wt. 1.6 lbs. Each.....$131.00▲

**No. 3MN38.** Drager brand (6400079). Shpg. wt. 2.3 lbs. Each.....$148.00▲



## ADAPTER

The Simultaneous Test Set Adapter is a manifold that enables the 5 tube test set to be connected to the inlet of the Drager accuro® pump (No. 3MN34). A ceramic element for opening the tube set is included.



**No. 3MN39.** Drager brand (6400090). Shpg. wt. 0.1 lbs. Each.....$42.00▲

## DRÄGER SHORT-TERM TUBES

Dräger Tubes are available for measuring gases, vapors, and aerosols. The majority of the short-term Dräger tubes are scaled tubes, operating on a defined sample volume drawn through the tube by performing a specified number of pump strokes. The concentration of the contaminant is read directly from the calibrated scale by assessing the length of the discoloration. Short-term Dräger tubes are calibrated to be used with the Dräger accuro® gas detector pump.

Short Term Tubes

## SIMULTANEOUS TEST SETS

The Simultaneous Test system offers three different sets which are used with an adapter (No. 3MN39) and a Dräger gas detector pump (No. 3MN34) for the semi-quantitative determination of inorganic gases and organic vapors. Each test set is able to test for five different gases simultaneously in less than one minute.

## TEST SET I (INORGANIC FUMES)

Includes one tube each of the following: Acid Gas (e.g.Hydochloric Acid-HCl), Basic Gas (e.g.Ammonia $NH_3$), Carbon Monoxide (CO), Hydrocyanic Acid (HCN), and Nitrous Gas (e.g. Nitrogen Dioxide-$NO_2$).

**No. 3MN62.** Shpg. wt. 0.2 lbs. Each..... **$53.00▲**

## TEST SET II (INORGANIC VAPORS)

Includes one tube each of the following: Carbon Dioxide ($CO_2$), Chlorine ($Cl_2$), Hydrogen Sulfide ($H_2S$), Phosgene ($COCl_2$), and Sulfur Dioxide ($SO_2$).

**No. 3MN63.** Shpg. wt. 0.2 lbs. Each.....**$53.00▲**

## TEST SET III (ORGANIC VAPORS)

Includes one tube each of the following: Alcohols (e.g. Methanol), Alphatic Hydrocarbons (e.g. N-Hexane), Aromatics (e.g. Toulene), Chlorinated Hydrocarbons (e.g. Perchloroethylene), and Ketones (e.g. Acetone).

**No. 3MN64.** Shpg. wt. 0.2 lbs. Each.....**$53.00▲**

## BIO-CHECK OZONE

The Drager Bio-Check OZone is a lightweight badge that changes color to indicate the ozone concentration at the immediate location. Ozone levels are determined by comparing a color change against the color standard provided with the kit. For personal exposure monitoring, the Bio-Check Ozone can be clipped easily onto clothing or, for area monitoring, it can be placed on a flat surface.

**No. 3MN41.** Shpg. wt. 0.1 lbs. Each.....**$36.00▲**

(▲) Net prices, not subject to discounts.

## HAZMAT KIT

This kit is designed to aid in the initial assessment of potentially hazardous situations (e.g.: chemical leaks, fires, and accidents involving toxic gases.) The HazMat Kit enables you to systematically identify chemical groups, as well as determine concentration levels of gases and vapors utilizing 17 types of short-term Drager tubes. Evaluation of the test results can be performed on-site without delay.

Hazmat Kit includes: accuro® pump (N0. 3MN34), spare parts kit (No. 3MN40), air current kit (No. 3MN35), 3-meter extension hose (No. 3MN36), tube handbook, matrix card, marker, ball point pen, screwdriver, deluxe carrying case, and instructions.

Also includes one box of 10 tubes for each of the following: Acetone, Alcohol, Ammonia, Benzene, Carbon Dioxide, Carbon Monoxide, Chlorine, Ethyl Acetate, Formic Acid, Hydrocarbons, Hydrocyanic Acid, Hydrogen Sulfide, Methyl Bromide, Nitrous Fumes, Oxygen, Polytest, and Trichloroethylene.

**No. 3MN32.** Shpg. wt. 10.0 lbs. Each**$1393.00▲**

## AEROTEST TYPE A

The Aerotest Type A is used for low pressure testing (up to 150 PSI) of air supplied by compressors or compressed air cylinders. The concentrations of carbon monoxide, carbon dioxide, water content, and oil can be determined readily on the spot in 60 minutes or less. The Aerotest check air purity according to ANSI specifications.

Includes deluxe tube opener (No. 3MN35), tube holder, timer, flowmeter, quick-disconnect hoses, deluxe carrying case and instructions. Also includes one box of 10 tubes for each of the following: Carbon Dioxide (No.3MN49), Carbon Monoxide (No, 3MN48), Oil (No. 3MN47), and Water Vapor (No. 3MN50).

**No. 3MN31.** Shpg. wt. 7.0 lbs. Each....**$815.00▲**

No. 3MN33

## REPLACEMENT TUBES FOR AEROTEST TYPE A

**No. 3MN50.** Shpg. wt. 0.2 lbs. Each.....**$53.00▲**

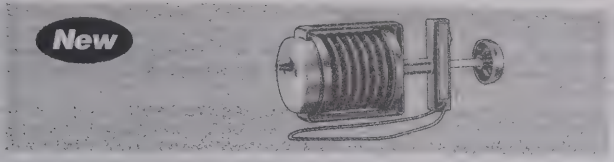
**No. 3MN49.** Shpg. wt. 0.2 lbs. Each.....**$64.00▲**

**No. 3MN48.** Shpg. wt. 0.2 lbs. Each.....**$53.00▲**

**No. 3MN47.** Shpg. wt. 0.2 lbs. Each.....**$64.00▲**

## CAPS

Package of 10 rubber caps; ideal for sealing your Drager air current tubes between ventilation checks.



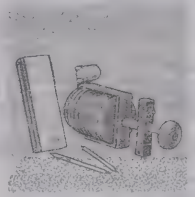
**No. 3MN70.** Shpg. wt. 0.2 lbs. Each.....**$7.00▲**

## AIR CURRENT KIT

The Drager Air Current Kit determines airflow patterns and the direction of air movement. Even weak air currents are made visible with the Air Current Tester. An understanding of the airflow pattern helps with the selection of the right measuring points for any air analysis procedure. Kit includes 1 box of smoke tubes (No. 3MN74), deluxe tube opener (No. 3MN35), rubber caps (No. 3MN70), aspirator bulb, and instructions.

**No. 3MN33.** Shpg. wt. 1.0 lbs. Each.....**$54.00▲**

# GAS DETECTION



## KWIK-DRAW® DETECTOR TUBE PUMPS

Spot-test atmosphere for wide variety of toxic gases and vapors. For use with large assortment of MSA detector tubes (sold separately below). One-hand operation and integral stroke counter. Shaft-guided compression system provides consistent, replicable flow rate and volume per stroke. Deluxe Detector Tube Pump features end-of-stroke indicator that tells user when enough air has been sampled for successful reading. MSA brand.

***New*** **No. 4LP40.** Kwik-Draw® Detector Tube Pump (488543). Shpg. wt. 1.5 lbs. Each.....$215.00▲

***New*** **No. 4LP41.** Kwik-Draw® Deluxe Detector Tube Pump (487500). Shpg. wt. 1.6 lbs. Each.....$260.00▲

## INDOOR AIR QUALITY TESTER KIT

Features Kwik-Draw® pump and detector tubes. For use in testing indoor air quality only. For use in chemical, oil drilling, utilities, petrochemical, HazMat and HVAC applications. MSA brand (710891).

***New*** **No. 4LR04.** Shpg. wt. 1.8 lbs. Each.....$300.00▲

## DETECTOR TUBES

Available for measuring over 170 gases and vapors. Made of glass with scale printed on side. Break-off tips. Sold in packages of 10. MSA brand.

## GEMINI® TWIN-PORT SAMPLER

Draw samples at independently controlled flow rates. Ideal where two or more airborne contaminants must be collected at the same time. Efficient sampling with sorbent tubes; collect two samples simultaneously from single sampling pump. Unit is compatible with MSA line of Escort pumps for added versatility. Low-flow control when sorbent tubes are used allows user to adjust flow down to one mlpm (0.001 lpm to 500 mlpm total between two tubes). Permits simultaneous sampling from tubes, helps protect against invalid samples caused by breakthrough. For industrial hygiene, HazMat and coal mining applications. MSA brand (497697).

No. 4LP18

## VENTILATION SMOKE TUBES AND SMOKE TUBE KIT

Helps determine velocity, direction and flow of slow-moving air currents. User can see direction of controlled smoke. No specialized training needed, includes easy-to-follow instructions. Kit contains aspirator bulb, 2 rubber plugs and 6 smoke producing tubes. Additional smoke tubes available in packages of 12 (order separately). For use by workers in mine shafts and tunnels, commercial buildings and industrial processing plants. MSA brand.

# EMERGENCY EYEWASH STATIONS

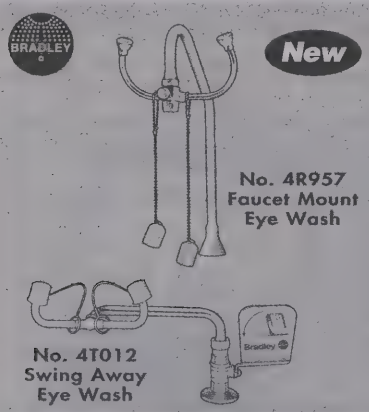
## EMERGENCY EYE AND BODY WASH STATIONS

- Isotonic saline wash
- For use wherever immediate eye and body flushing may be needed
- Bottles have tamper-evident seals

NORTH

No. 5T062
32 oz. Eyewash Station

No. 5T997 Dual Eyewash Station



Eye and body wash stations provide a soothing, sterile, isotonic wash for immediate flushing of eyes or body in the event of a chemical splash accident. Because bottles are sterile and sealed, they do not contain Acanthamoeba or other pathogens. Stations are equipped with both double-back tape and screw holes for easy mounting. Use near storage batteries, on flight lines, in plating facilities, or any potentially hazardous area where immediate eye and body flushing may be needed. Green (eyewash) and red (body flush) colors identify units as emergency safety stations.

Bottle caps are covered with tamper-evident seals. Once bottle is opened, discard any unused solution and replace with sterile, buffered refill listed in chart below. Eye-Lert stations supplement plumbed or self-contained drenching facilities. They do not take the place of a 15-minute flushing facility. North brand.

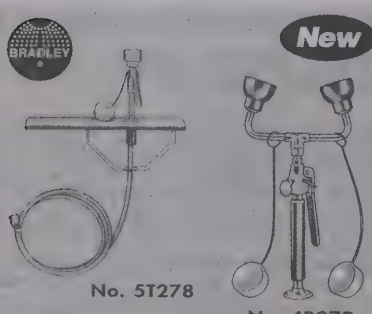
## FAUCET MOUNT AND SWING AWAY EYE WASHES

New

No. 4R957
Faucet Mount Eye Wash



No. 4T012
Swing Away Eye Wash

Faucet Mount Personal Eye Wash easily mounts to existing gooseneck or standard faucets, and is activated by turning on water supply and pulling actuator pin on eye wash. When not in use, normal operation of faucet can be used. Features chrome-plating with twin soft flow sprayheads and pop-off dust covers. Integral flow control provides a safe rinse under varying water supply conditions. Included adapters: 55/64" x 27 thread (female), 13/16" x 27 thread (male), 15/16" x 27 thread (male). Adapters designed to replace existing faucet aerator to mount eye wash. Faucet mount eye wash is considered a personal eye wash only and is intended to provide first aid relief prior to reaching an approved eye wash station.

Swing Away Eye Wash mounts on counter near sink. Eye wash stows neatly to side of sink when not in use and can be pivoted over sink when in use to drain spent water. Eye wash sprayheads and yoke assembly are chrome-plated with flow control to provide a safe, steady water flow. 1/2" IPS stay-open ball valve and highly visible push handle activate unit. Pop-off dust covers keep eye wash heads clean while not in use. All units include a high-visibility identification sign and inspection tag. Swing Away Eye Wash meets ANSI Compliance. Bradley brand.

## EMERGENCY COUNTER AND WALL MOUNT HAND-HELD DRENCH HOSES

New

No. 5T278

No. 4R979

Emergency hand-held drench hoses are available with single spray head or twin spray head assemblies. Spray heads are ABS plastic with wider spray pattern to rinse both eyes, face, and body. Flow control in spray heads provide a safe, steady water flow. Valve is chrome-plated and stays open when handle is squeezed. High visibility yellow 8' hose is reinforced thermoplastic rated at 250 psi burst strength.

Counter mount drench hoses include under-the-counter hose guide and counter mounting hardware. Wall mount drench hoses include a wall hanging bracket. Note: Drench hoses are intended to supplement emergency eye wash and shower equipment. Drench hoses with twin sprayhead assembly may be used as an ANSI approved eye wash station if installed so both hands are free after activation to simultaneously flush both eyes. All units include a high visibility identification sign and inspection tag. Bradley brand.

# EMERGENCY EYE WASH STATIONS

Portable Emergency Eye Wash Stations are ideal for use anywhere a plumed water supply is not available. Commonly used in hazardous areas including chemical, petroleum, and agricultural operations or warehouse and construction sites. Portable Self-Contained Eye Wash Stations Meet ANSI Standard Z358.1-1998 which requires a minimum 15 minute water flow at .4 GPM. All products are third party certified by the Safety Equipment Institute.

## KLEERSIGHT™ SELF-CONTAINED EMERGENCY EYE WASH STATION

Constructed of strong FDA grade PVC, 14 gallon container is transparent so you can easily see when solution needs to be cleansed or re-filled. Eye Wash activates in one quick motion when hinged eye wash tray is pulled down. Smooth ball valve operation of tray allows water to flow through eye wash sprayheads for minimum of 15 minutes at .4 GPM. Unit design features built-in carry handles and heavy duty wheels for quick and easy portability. Two large covers on top of eye wash permit convenient cleaning or re-filling of unit. Unit fills with potable water and one 5 quart container of KleerSight Concentrate to create a buffered isotonic saline solution that inhibits bacteria, fungus, algae, and acanthamoeba growth in tank for up to six months. Eye Wash can be placed on shelves, tables, or wall mounted. A wall mounting bracket is included with the eye wash. Eye wash also includes one 5 quart (180 fluid oz.) container of KleerSight Concentrate water preservative, inspection tag and highly visible eye wash sign. KleerSight Concentrate is also sold separately and can be used in any self-contained eye wash (plastic or stainless steel). Concentrate mixes in a ratio of one part concentrate to 13 gallons of potable water. Eye wash measures 25H" x 16W" x 11 ½"D and weighs 28 lbs. empty and 140 lbs. filled. Meets ANSI compliance.

## GRAVITY-FED EMERGENCY EYEWASH STATION

Durable molded polyethylene tank holds 14 gallons of portable water. Hinged eye wash tray pulls down to activate water supply and is recessed when in the closed position to protect sprayheads from contaminants. 5¼" removable fill cap allows for easy filling and cleaning of unit. Twin carry handles on side of tank provide easy mobility of unit from one location to another. Highly visable yellow sign on tank outlines proper maintenance and usage of eye wash. Eye Wash can be mounted on a wall or counter-top. Unit includes a wall mounting bracket, inspection tag and one 8 oz. bottle of water preservation. Water preserves mixes with portable water at a minimum level of five gallons and maximum level of 20 gallons. Prevents bacteria, fungi and algae growth in tank for up to six months. For replacement water preserve solution, please refer to KleerSight concentrate (5T910) sold separately above. Unit weighs 18 lbs. empty and 122 lbs. filled. 25" H x 19" W x 95 ½" D. Meets ANSI Compliance.

## PRESSURIZED PORTABLE EMERGENCY EYE WASH STATIONS

Stainless steel pressure tanks include tire filler valve with 0-100 PSI air gauge, pressure relief valve to prevent over pressurization and built in carry handles for easy transportation. Eye wash assembly has twin chrome-plated brass, soft flow, eye wash heads with flow control and pop-off dust covers. Eye wash activates by large stainless steel push handle with stay-open ball valve. Supplemental hose spray for face and body rinse has 8 ft. yellow hose with hand-held squeeze type valve. 5-gallon eye wash maintains approximate water flow for 7½ minutes from eye wash and 2½ minutes from hose spray. 25H x 8½"D. Weighs 8.5 lbs. empty, 51 lbs. full. 5-gallon complies with ANSI Standards as a Personal Eye Wash only and supplements but does not replace a permanent eye wash station. 10 and15 gallon eye washes maintain approximate water flow for 15 minutes from eye wash and 3½ minutes from hose spray. 10 gal. tank measures 25¼ H x 12¼"D. 15 gal. tank measures 35⅝H x 12¼"D. Weight range is 23 lbs. empty, 150 lbs. full. 10 and 15 gal. units meet ANSI Compliance.

SAFETY EQUIPMENT

# EMERGENCY WASH STATIONS

Emergency Drench Showers and Eye Washes are ideal for hazardous areas where a plumbed water supply is available. Commonly used in laboratories, hospitals, schools, shops and other areas where chemical or other hazardous material exposure is possible. Drench Showers, Combination Drench Showers and Eye Washes meet ANSI Standard Z358.1-1998 which requires a minimum 15 minute water flow at 20 GPM at 30 PSI for Shower Deluge, .4 GPM at 30 PSI for Eye Washes and 3 GPM at 30 PSI for Eye/Face Washes. All products are third party certified by the Safety Equipment Institute.

## COMBINATION DRENCH SHOWER/EYE WASH STATIONS

Drench Showers provide a deluge of water to entire body to rinse off hazardous materials while eye and eye/face washes provide a gentle rinse to eyes and/or face only. Joined together, Combination Drench Shower/Eye Wash Stations provide greater protection then either unit alone and in less space. Drench shower sprayheads measure 10" diameter and are available in either impact resistant plastic or corrosion resistant stainless steel. Shower head activates by a 1" NPT chrome-plated brass stay-open ball valve and stainless steel triangular pull handle. Eye Wash bowls measure 10" diameter and are available in either impact resistant plastic or corrosion resistant stainless steel. Eye Wash includes twin chrome-plated brass eye wash sprayheads with flow control to assure a safe steady water flow. Eye/Face wash sprayheads are ABS plastic with a wider spray pattern to rinse eyes and face. Eye Wash activates by a 1/2" NPT chrome-plated brass stay-open ball valve with highly visible push handle. Some models include foot treadle attachment to provide hand or foot operation of unit. Pipe and fittings are 1¼" galvanized steel protected with a yellow polyurethane coating to resist corrosion. Some models available in all stainless steel and PVC construction to withstand highly corrosive environments. Barrier Free Model (6T549) accommodates people with physical disabilities. Shower pull handle is longer and eye wash bowl is lower and extends out for wheelchair users. Water supply and waste requirements for all showers is 1¼" IPS or 2" IPS for PVC Shower Only. All showers include a 9" diameter floor flange and measure 7'7"H x 32"W. Drench showers will deliver 73 GPM at 40 PSI. All units include a highly visible identification sign and inspection tag.

## HEAT TRACE COMBINATION SHOWER & EYE/FACE WASH

Heat Trace Shower and Eye/Face Wash unit is intended for use in areas where temperatures fall below freezing. Heat Trace cable wraps around 1¼" galvanized steel shower to protect unit from freezing temperatures to -50 Degrees F. Shower is encased with pipe insulation and high visible yellow ABS plastic removable outer shell. Shower head is 10" diameter impact resistant plastic and operates by a 1" IPS stay-open ball valve and stainless steel triangular pull handle. Eye/Face wash includes twin-perforated disc ABS sprayheads with flow control and operates by a large, highly visible push handle. Electric heat trace cable operates at 5 watts/foot, 120 VAC service voltage, .7 amp/80 watts at 50°F unit water temperature. The shower temperature control thermostat opens at 64°F and closes at 54°F. Junction box is 4-hub aluminum and accepts 3/4" IPS conduit. A freeze protection valve is provided installed to the unit to ensure continual flow of water when internal temperatures drop below 35°F. Valve closes at 45°F. Heat Trace Shower also includes an indicator light which indicates power to the unit is on. Heat trace shower available with optional shower alarm systems to notify others that shower is in use. Shower Alarm (No. 4T013) may be mounted on any drench shower that has 1¼" inlet piping and minimum 30 GPM water flow. Shower alarm (sold separately). Heat trace shower accepts 1¼" IPS water supply at top of unit or at bottom of unit. Shower is rated class 1, division 2, Groups B,C,D, Explosion Proof. Electrical components are UL Listed. Heat Trace Shower ships already assembled. Unit measures 7'7"H x 40"W.

# EMERGENCY WASH STATIONS

## PEDESTAL & WALL MOUNT EYE WASH STATIONS

Pedestal Mount Eye Washes provide emergency eye wash relief in locations where wall mount options are not possible. Pedestal pipe with floor flange measures 36" from floor and is 1¼" galvanized steel protected with a yellow polyurethane coating to prevent corrosion. Pedestal Mount and Wall Mount Eye Wash bowls measure 10" diameter and are available in either impact resistant plastic or corrosion resistant stainless steel. Hinged Dust cover keeps dust and other contaminants out of bowl. Dust Cover springs open when eye wash push handle is activated. Eye Wash includes twin chrome-plated brass sprayheads with flow control. (Eye/face sprayhead is ABS plastic.) 1/2" NTP stay-open ball valve is operated by a highly visible push handle. Wall Mount Eye Wash includes heavy-gauge aluminum wall mounting bracket with three clearance holes. Water supply for pedestal and wall mount units is 1/2" IPS. Waste tee for pedestal mount eye washes is 1¼". Eye Washes deliver 2.5 GPM at 40 PSI. All units include a highly visible identification sign and inspection tag.

## EMERGENCY DRENCH SHOWERS

Designed for wall (horizontal supply) or ceiling (vertical supply) mounting, drench showers provide a deluge of water to entire face and body to rinse off chemicals or other contaminants. Shower head measures 10" diameter and is available in impact resistant plastic or corrosion resistant stainless steel. Flush Mount shower head measures 12⅞" and includes integral flange to mount even with ceiling, concealing pipe and fittings. Showers activate with 1" chrome-plated brass stay-open ball valve and stainless steel triangular pull handle. Pipe and fittings are 1" galvanized steel protected with a yellow polyurethane coating to prevent corrosion. Water supply is 1" IPS vertical or horizontal. Showers deliver 80 GPM at 40 PSI. All units include a highly visible identification sign and inspection tag.

## DRENCH SHOWER ACCESSORIES

Emergency Drench Shower Privacy Curtain provides enclosure around drench shower stations during treatment. Industrial strength Tyvek curtain is designed in high visible yellow to mark location of shower. Curtain measures 70"L x 145"W with reinforcements at top and bottom for longer durability. 1½" x 42 diameter curtain rail and mounting brackets are all stainless steel to prevent corrosion. Mounts on any free standing drench shower unit. Emergency Drench Shower Tester keeps your showers in compliance with ANSI Standards which requires a weekly testing procedure to ensure proper operation of equipment. Tester includes 84" long watertight Tyvek funnel with weighted bottom to prevent splashing around the surrounding area. Funnel directs water to a drain or bucket (not provided) for disposal. Telescoping aluminum handle extends funnel 8' for easier reaching to shower head location.

## FIRE/FIRST AID BLANKET

**Flame retardant, 100% wool material blanket** for all emergency needs. Can be used to smother flames, drape over injured victims, cover stretchers and other rescue carriers. 100% wool blanket combines flame retardant characteristics with resistance and durability. 62 x 84" size with fully serged hems. Meets Federal Standard Title 16 CFR 1610 for flame retardant use.

Blanket stores neatly in bright red nylon pouch, vinyl coated on both sides to withstand water, weather, and cold elements. Features carrying strap and four heavy-duty grommets for hanging on wall. Self-adhering Velcro nylon fastener opens pouch allowing easy removal of blanket.

For all emergencies in first aid stations, plants, schools, fire trucks, police cars, utility trucks, ambulances, and rescue vehicles. Steiner brand (BTPCO).

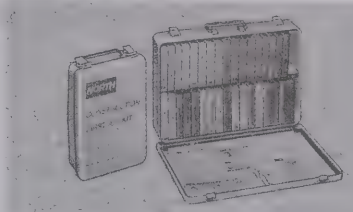
**No. 4T178.** Shpg. wt. 4.6 lbs. First Aid Blanket
List.....$62.00.
Each **$52.70**; Lots 4.....**$50.07**

## EMERGENCY FIRE BLANKET

sellstrom safeguards®

**Emergency fire blanket** is 5 x 6 ft. woven fiberglass with a continuous service temperature of 1000°F. Conveniently packed in a 18 x 12½" red herculite stain-resistant pouch. Pouch has two heavy-duty grommets for wall hanging. Velcro™ pull tab located at bottom of pouch for easy access.

**For emergency use** in plants, rescue vehicles, schools, offices, and utility trucks. Blanket smothers flames and protects victims.



**Blanket can be washed for repeated use.** Center for Disease Control suggests a .10 diluted household bleach to wash blankets. Use soft sponge and air dry. Sellstrom brand.

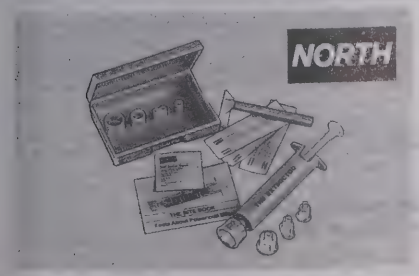
Each $48.55; Lots 4.....$43.66

## CPR MICROSHIELD® RESCUE BREATHER KIT



**Reduces potential hazard** of biological transfer between victims requiring cardio-pulmonary resuscitation (CPR) and rescuer. Consistent with American Red Cross guidelines suggested use of faceshield during CPR.

**Soft film membrane** conforms to victim's facial contours. One-way valve prevents victim's secretions from contacting rescuer through mouthpiece/airway. Unit is surgically clean, disposable, intended for single use. Microshield intended for use by CPR-trained individuals only. **Do not** use on infant victims. Compatible with most CPR models & mannequins for training purposes.

**Includes** metal container, 4 pr. each latex and nitrile gloves, 2 Microshields, 10 antiseptic wipes. North brand (01-15-00).

**No. 5M581.** CPR Rescue Breather Kit.
Shpg. wt. 1.5 lbs. List.....$31.33.
Each $28.25; Lots 4.....$25.42

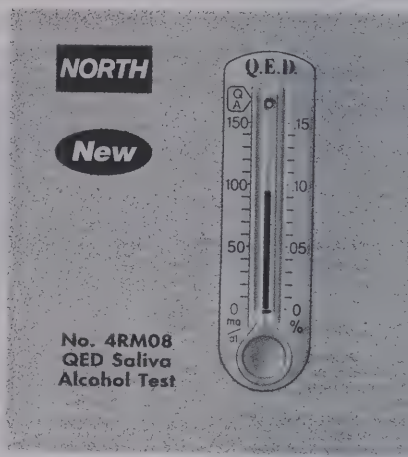
**CPR Microshield is a registered trademark of Medical Devices International.**

## THE EXTRACTOR™ SNAKE BITE/INSECT STING KIT

**Safe, effective way to remove** poison from insect stings and snake bites. Requires no incision or tourniquet. Pump creates powerful vacuum over wound that draws out poison painlessly.

**Compact, lightweight and durable.** Venom pump should be basic protective first aid equipment for every outdoor worker. Even when working alone, in many cases the injured worker can use extractor pump with one hand, without assistance, to obtain effective relief.

**Comes in rugged plastic case** with four sizes of suction cups. Included: "The Bite Book" brochure detailing treatment instructions; safety razor for shaving around wound; PVP iodine wipes; and adhesive bandages for protecting wound after treatment. Kit dimensions: 4¾L x 3½W x 1½"H. North brand (12-39-24).



**No. 4T312.** Snake Bite/Insect Sting Kit.
Shpg. wt. 0.3 lbs. List.....$16.71.
Each $15.04; Lots 4.....$13.54

# SALIVA ALCOHOL TEST AND TRAINING KIT AND EMERGENCY BURN KITS

## QED® SALIVA ALCOHOL TEST

QED Saliva Alcohol Test is a fast, non-invasive, easy way to perform random alcohol testing. Simplicity, reliability, affordability, and on-the-spot results make this an ideal onsite test. The QED is DOT approved and can be used in many working environments from machine and forklift operators to office personnel. Test subjects use a cotton-tipped saliva collector to gather saliva from their mouths, which is then placed into the QED Test by the test technician. Will test blood alcohol content from 0-45mg/dL, 0-0.145%. North brand (31-15-02).

***New*** **No. 4RM08.** QED Saliva Alcohol Test.
Shpg. wt. 0.5 lbs. List ..... $9.94.
Each **$8.95;** Lots 6 ..... **$8.50**

## DOT APPROVED TRAINING KIT FOR QED® TEST

QED Screening Test Technician Video Training Kit is a new way to train technicians for your alcohol testing program. This kit is a DOT approved training course under DOT Rule 49 CFR Part 40. There will need to be a witness to verify the student's proficiency and completion of the course. Each training kit includes: SST training video, facilitator's guide, student workbook, 10 QED A150 tests, positive control solution, procedure card, alcohol testing form, exercises and exam, and certificate. North brand (31-00-02).

***New*** **No. 4RM07.** QED Screening Test Training Kit. Shpg. wt. 1.0 lbs. List ..... $354.44.
Each **$319.00;** Lots 2 ..... **$303.05**

## EMERGENCY BURN KITS

North Emergency Burn Kits contain the essential items to quickly treat burn emergencies. Available in a variety of fills to meet your specific needs, kits feature Water-Jel Burn Dressing Packets, the simple-to-use one step product for emergency burn care. Easily wall mounted, the durable plastic kits are ideal for use wherever burns may occur. North Burn Kits can also be mounted beside basic first aid kits as a supplement to provide quick first aid for burns.

# BURN CARE AND PERSONAL PROTECTION TOWELETTES

## BURN CARE

### SPRAY, GEL, AND OINTMENTS

**Nos. 4T368, 4RL69, 3AX13, and 4RL92 Burn Spray/Foille Spray.** Topical anesthetic provides instant relief from pain caused by burns.

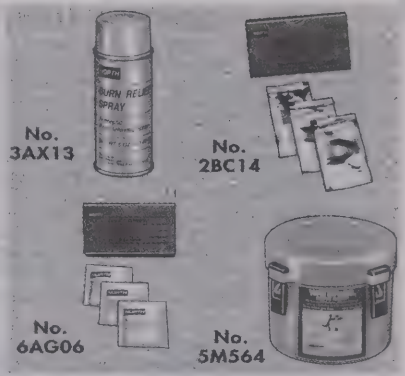
**No. 2AD94, 2BC14, and 6AZ81 Water Jel®/Burn Jel®.** Individual packets with strong pain relieving medicine for burns. Contains lidocaine.

**Nos. 6AG06, 4RL64 and 1N729 Burn Ointment.** Individual packets with strong pain relieving medicine for burns. Contains benzocaine. Water-Jel® Cool Jel - Specifically made for use on minor burns, cuts, and scrapes. Cool Jel's cooling formula soothes, comforts and moisturizes the afflicted areas while forming a protective barrier that guards against contaminants and irritants that may delay healing.

Water-Jel® Unburn - Specifically formulated for sunburn. Contains pain relieving lidocaine. It is not sticky and will not stain clothing. Unburn cools and soothes affected areas while moisturizing the skin to prevent peeling.

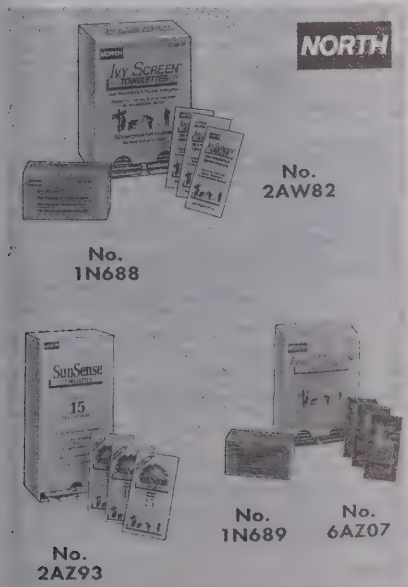
### WATER-JEL® PRODUCTS

Water-Jel dressings and blankets are a patented system combining a scientifically formulated gel and a special care material. When applied to a burn, these products help calm the victim as well as immediately cool the skin, ease pain, and protect the wound from further contamination. They can be easily removed without reinjuring the wound.



**No. 5M564. Water-Jel Burn Wrap.** 3 ft. x 2½ ft. burn wrap/extinguisher in plastic canister.

**No. 5M565 Water-Jel Fire Blanket.** 5 ft. x 6 ft. blanket in durable plastic canister.



**No. 5M563 Water-Jel Heat Shield Blanket.** 8 ft. x 6 ft. blanket in durable plastic canister. Protects rescuer from heat and flames.

**No. 4RL70, 4RL71, 5M554, and 5M555 Water-Jel Burn Dressing.** Bacteriostatic burn dressing protects wound from further contamination. Will not adhere to skin. Available in 2 x 2", 2 x 6", 4 x 4", 4 x 16", 12 x 16", and 8 x 18" sizes.

# VISUAL SIGNALING DEVICES

## WARNING LIGHTS

Warning lights are effective signal devices in high ambient noise areas. Visual signaling devices come in a variety of revolving (rotating) or strobe light styles. Federal Signal brand.

**Revolving lights** create a flash by either rotating the lamp or a mirror-like reflector around a bulb. They provide a steady burning beam as they revolve in a circular pattern. Generally used in areas where caution should be exercised: process control, start-up, overhead door movement, and in similar situations where action or movement requires attention.

**Strobe lights** produce a high intensity burst of light. Normally unaffected by vibration and require little maintenance. For use in areas requiring a warning of potential danger such as: toxic release, treacherous walkways, moving robotic equipment.

### ECONOMICAL REVOLVING WARNING LIGHT

**Vitalite®.** Compact revolving light for areas where hazardous or dangerous conditions are present and where a constant revolving beam of light is desirable. Single screw dome retainer makes relamping easier. 60 flashes per minute. 40-watt long-life incandescent lamp. Designed for 1/2" dia. pipe mount. Red or amber color. 120VAC, 60 Hz. UL Listed indoors (E94581); CSA Certified (C22.2).

### HEAVY DUTY REVOLVING WARNING LIGHT

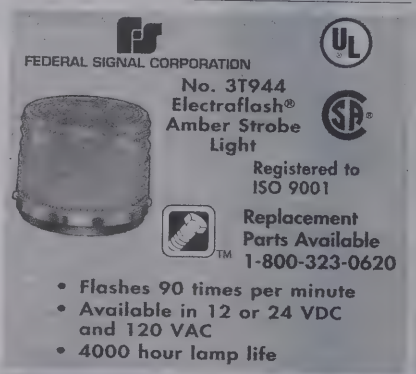
**Commander®.** Powerful 100 watt rotating sealed beam lamp in heavy-duty die cast housing. 24 fins dissipate heat for extended life. Approximately 60 flashes per minute producing a revolving beam of light with 20,000 candlepower. Pivotable lamp allows for beam adjustment through 90°. Hammertone gray finish base with stainless steel dome retaining ring. Designed for 1" pipe or flat surface mount. Red or amber color. Rated NEMA 3R; UL Listed (1638) indoor, outdoor; CSA Certified (C22.2).

### COMPACT STROBE WARNING LIGHT

**Fireball®.** Effectively brings attention to industrial hazards, and production processes. Features Xenon flash tube, solid-state circuitry, polycarbonate fresnel dome, zinc die cast base painted with a corrosion resistant polyurethane. Produces a brilliant flash 80 times per minute. 300 effective candlepower, peak candlepower 1,000,000*. Designed for 1/2" dia. pipe mount. Red or amber color. 120VAC, 60 Hz. UL Listed indoor, outdoor (E94581); CSA Certified (C22.2).

### DOUBLE FLASH STROBE WARNING LIGHT

**Starfire®.** Convenient size and intense double flash of light makes this model popular for mounting on cranes and other moving devices, marking dangerous areas, and process control. Features solid-state electronics, impact-resistant polycarbonate fresnel dome, anodized aluminum base which resists rust and corrosion. Produces a double-flash of light 75-85 times per minute. 1200 effective candlepower, peak candlepower 2,000,000*. Designed for 1/2" dia. pipe mount. Red or amber color. 120VAC, 60 Hz. UL Listed indoor, outdoor (E94581); CSA Certified (C22.2).



(*) Effective candlepower is intensity which would appear to observer if light were burning steadily. Peak candlepower is max. light intensity generated by flashing light during light pulse.

## ECONOMICAL STROBE WARNING LIGHT

Electraflash® provides an effective strobe flash in alerting of hazardous conditions. 12 VDC and 24 VDC are most often used on moving equipment such as forklifts and utility vehicles, while the 120 VAC unit is used as an economical alternative to the Fireball® strobe listed above. Features Xenon flash tube, solid state circuitry, polycarbonate Fresnel dome and polycarbonate base. Provides 90 FPM. 12 VDC and 24 VDC units mount on any flat surface. 120 VAC unit designed for 1/2" dia. pipe mount. Lamp life 4,000 hrs. 120 VAC unit is UL Listed (1638). Indoor/outdoor. CSA Certified (C22.2).

## WARNING LIGHT MOUNTING KIT

**Provides firm, dependable support** for all 120 volt warning lights listed on this page, on walls throughout commercial, institutional, and industrial facilities. Attractive styling complements office decor or manufacturing environment.

Easy to install. Durable cast aluminum construction with gray hammertone finish. Can be wired through back of bracket for electrical box mounting or through threaded hole in base for external 1/2" conduit connection. Kit includes wall mounting bracket, backplate, and mounting screws. 6H x 6 3/8"W. Extension is 5 7/8". Federal Signal brand (LWMB2).

**No. 5T588.** Shpg. wt. 2.8 lbs. List.....$84.04. Each **$74.65;** Lots 4.....**$67.14**

*Close it, lock it, keep it safe — You'll find the right stuff right here.*

# LITESTAK™ STATUS INDICATOR SIGNALING LIGHTS

**Litestak™ Status Indicator produces attention grabbing pulses of light** through the use of a solid state flasher. Subtle flash provided by units for use in process control applications such as machine shut down, material shortage, fault, and tooling change. Litestak™is a column of signaling lights composed of a No. 3T949 die cast zinc base and polycarbonate light modules listed below.

**Base module is prewired** to support from one to five light modules. No. 3T949 base is a non-metallic construction, designed for 3/4" NPT pipe mounting connection or surface mounting through the 4 knockouts molded internally. Contains a flasher circuit. Base can be wired to either flash (flasher included) and/or steady burn each light module.

**Surface Mount Base** is prewired with six wires for steady on light modules. Includes mounting ring and gasket. Accommodates up to five of the light modules listed below (Nos. 3T950 thru 3T954). Requires a 2⅜" dia. hole in mounting surface.

**Light modules are interchangeable and stackable.** Allows customization from 1 to 5 different colored modules per column. Each module is prewired for easy assembly. Includes a 25 watt lamp and a split lens which allows for quick lamp change. Applications include machine shutdown, part storage, tooling change, robotic cell activity, and process control. 120 VAC, 60 Hz, UL Listed. Indoor. Meets NEMA 1 (National Electrical Manufacturers Association) requirements. Federal Signal brand.

**Litestak™ Horn module** can be used as a stand-alone audible device with LSB pipe mount base (3T949), LSBS surface mount base (1N896), or combined with Litestak status indicator light modules to create an audible/visual combination signal.

The Horn is a modular unit which mounts directly onto the top of any 120VAC Litestak™ (maximum 4 colors). Black speaker grille covers protect the Horn. Volume is adjustable. Produces 77dB a@ 10'. Applications include assembly lines, conveyor systems, automated lines, instrument panels, workshops, etc., where a higher volume device is not required. 120 VAC unit. UL-Listed (E4813N), indoor. CSA Approved (LR5835-42).

- Approximately 70 flashes per minute
- Light modules are stackable and interchangeable
- Flashing or steady burning
- Meets NEMA 1 requirements
- 25 Watt lamp included
- Easy to install
- UL Listed (E94581)
- CSA Certified (005835W)

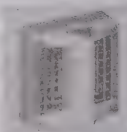
## BATTERY POWERED WARNING LIGHT

FEDERAL SIGNAL CORPORATION



Registered to ISO 9001

Replacement Parts Available 1-800-323-0620

Portable light for job sites or areas requiring temporary warning lights. Five watt lamp flashes 65 times per minute utilizing solid state flasher. Amber dome made of impact resistant polycarbonate. Features simple steel carrying ring, or can be mounted with through bolt. 12 VDC. Powered by two 6 volt batteries (not included, order No. 5U060). Lamp life 300 hours. 11.2H x 3.5D x 7.22"W. Federal Signal brand (BPL26).

**No. 1N744.** Shpg. wt. 2.5 lbs. List $65.17
Each **$51.15**; Lots 4 ..... $46.01

## SURFACE MOUNT STROBE LIGHTS

FEDERAL SIGNAL CORPORATION

Registered to ISO 9001

No. 1N741 Clear Strobe Light

- Horn not included

Panel mount strobe provides 180° flash. Exterior polycarbonate construction with gasket. Unit mountable on 4" electrical box with blank cover, directly on enclosure or panel, or directly to No. 4A967 horn to produce audible and visual signal in one (as pictured, horn not included). 120 VAC, 0.06 amps. Lamp life 4000 hours. Triangular shape measures 3⅞ x 3 15/16"W. Available in clear or red. UL Listed indoor (1638); CSA Certified (C22.2). Federal Signal brand.

**No. 1N741.** Clear Strobe Light (VALS-120) Shpg. wt. 0.2 lbs.
List $92.37. Each **$64.40**; Lots 4 ..... **$57.91**

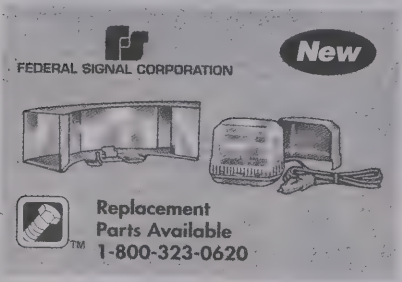
# AUDIBLE AND VISUAL SIGNALING DEVICES

## BACK-UP ALARM

Interactive vehicular alarm provides just the right level of audible signal to warn people of approaching fork lift, tow motor o vehicle. Back-up alarm samples ambient noise levels surroundin vehicle and adjusts sound output. Decibel output can vary fron 107dB to 82dB. Federal Signal brand (253-012-048).



*New!* **No. 4RM40.** Shpg. wt. 1.6 lbs. List $129.78.
Each **$116.95;** Lots 4 ..... **$105.21**

## LOW PROFILE STREAMLINE® MINI STROBE

Designed to be flush mounted to control panels or other flat surfaces in which electrical wiring can be passed through to mounting surface. For use on control panels, machines, above entry ways, on walls and along assembly lines. Mount via two supplied 1¼", 8/32 slotted hex bolts. Polypropylene gasket is supplied to provide water-tight and dust-tight seal (NEMA 4X). Gasket mounts between base of ligh and mounting surface. Available in amber green and red colors. Strobe tube i replaceable and is rated for 4,000 hours o life. 120VAC. UL listed, CSA approved Federal Signal brand.

## MAGNET MOUNT FIREBEAM® ROTATING LIGHT

Compact, lightweight light designed for law enforcement, fire, construction and utility market applications. Features snap-together polycarbonate dome and base, which allows lamp to be quickly changed without tools. 55 watt halogen lamp produces 68,000 candelas. Light can be operated at a speed of 95 or 175 flashes per minute. Swivel and magnetic mounts allow versatility. Comes equipped with a cigarette lighter plug (10 foot cord) and black half-dome covers to prevent flashback. Conforms to SAE, J845. Available in blue or amber color. 12VDC. Federal Signal brand.

### EXPLOSION PROOF STROBE LIGHT

For use in hazardous and marine locations. Finished with powder epoxy applied over copper free aluminum housing. All exposed hardware is 316 grade stainless steel. Comes standard for 3/4" pendant mount. After mounting box is in place, fixture is threaded onto mounting box, making electrical connection. Electrical continuity is not made until five threads are engaged. Strobe light has effective candlepower of 850 candelas and two million peak candlepower. Flash rate approximately 80 per minute. UL Listed for hazardous (UL 844) and marine locations (UL 595). Meets NEC Classifications for Class I, Division 1 & 2, Group C & D; Class II, Division 1 & 2, Group E, F & G; Class III, Division 1 & 2. Rated NEMA 4X. CSA Certified (C22.2). Federal Signal brand.

### EXPLOSION PROOF REVOLVING WARNING LIGHTS

For use on oil rigs, mines, refineries and chemical plants. Has all features of Nos. 1N750 & 1N751 strobe lights above, except it produces a beam of light that rotates in 360° pattern with approximate flash rate of 90 per minute. Candlepower of 1800 utilizing 40 watt lamp. Red or amber color. Federal Signal brand.

### EXPLOSION PROOF HORN

Corrosion resistant horn features stainless steel diaphragm. Produces 100 dB at 10 feet. 120 VAC, features internal volume control. Tapped for 3/4" mounting UL Listed for Class I, Division 1, Groups C & D; Class II, Division I, Groups E, F & G. CSA Certified (C22.1). California State Fire Marshal approved. Federal Signal brand.

# AUDIBLE SIGNALING DEVICES

Audible signaling devices, either solid-state or electromechanical, produce distinctive sounds. This characteristic in itself, helps determine where the device can be effectively used. The models listed below produce varying sounds: vibrating horns No. 4A967, ringing bells Nos. 4A960 and 5T589, and electronic reproductions of your choice of one of four tones in No. 4A968. For example a horn or bell may be selected to overcome moderate noise levels while a "blast" from the SelecTone® will get attention in noisier environments. Federal Signal brand.

## VIBRATING HORN

**Vibratone® Horn.** Low current horn used for producing coded blasts or sustained tones for paging, and for start and dismissal signaling indoors or out (with No. 4A969 weatherproof box). Produces 100 dB at 10 ft. 120V, 60 Hz. Gray hammertone finish with mounting screws included. UL Listed (E4813); CSA certified (005835X); FM approved.

## ELECTRONIC SIREN

**Electronic Siren.** Produces one of three different high decibel tone outputs from same unit. Tone choices are "wail", yelp or horn. Tone is user selectable by reconfiguring internal jumpers. Capable of producing up to 111 dB at 10 ft. Rugged high impact plastic construction. Resistant to ultraviolet light and is rated NEMA 3R. When mounted on No. 4A969 weatherproof box, unit can be pointed anywhere within 360° half sphere of area. Standard voltages of 24VDC, 120VAC or 240VAC field selectable. UL Listed (464) indoor, outdoor; Canadian Underwriters Laboratories approved (464).

## RESONATING HORN

**Resonating Horn.** Electric horn which produces sound by means of a diaphragm, which resonates a column of air. Unit produces a horn-type tone that is 105 dB at 10 ft. Features corrosion resistant cast aluminum housing with brass projector. Gray hammertone finish. Housing tapped for 1/2" conduit. Duty cycle of five minutes on, five minutes off. For indoor/outdoor use. UL Listed (464), CSA approved (C22.2).

## VIBRATING BELLS

**Vibratone® Bells.** Vibrating bells signal general alarms, starts and dismissals, and danger warnings. 4" model produces 98 dB at 10 ft. 6" model produces 100 dB at 10 ft. Mount on standard outlet box or in outdoor applications use No. 4A969 weatherproof box. Gray hammertone finish. 120V, 60 Hz. UL Listed (E4813); CSA certified (005835X); FM approved.

## WEATHERPROOF BACK BOX

For weatherproof outdoor surface mounting of Nos. 4A967 horn, No. 1N742 siren, and 4A960 and 5T589 bells. Cast aluminum gasketed weatherproof box complete with mounting lugs and threaded conduit openings. ½" and ¾".

## SOLID-STATE AUDIBLE SIGNAL

**SelecTone® Signal.** Lightweight, compact signal device produces 110 dB at 10 ft. Requires one tone module No. 1N894 listed below (order separately). Used for code paging, general alarm, start and dismissal, evacuation and other specific warnings. Speaker cone and projector made of spun aluminum. Internal amplification circuitry including gain control contained in die-cast aluminum housing. Gray hammertone finish. 120V, 60 Hz. UL Listed indoor, outdoor (S2635); CSA certified (005835X).

## UNIVERSAL TONE MODULE

For exclusive use with No. 4A968 SelecTone® Audible Signal listed above. Micro controller based tone generator is capable of producing any one of 18 different tones. Tone selection choices include: Wail, Yelp, Hi Lo, Bell, Yeow, Horn, Beep, Stutter, Slow Whoop, Gradual Horn, Temporal Slow Whoop, Westminster Chime, Evac, Air Horn, Chime, Phaser, Alternate Hi Lo, and Warble. User tone selection is accomplished by setting the five position DIP switch in any one of the 18 configurations. Plastic housing with impregnated stainless steel fibers shields circuitry from RFI (radio frequency interference) and EMI (electro magnetic interference).

## INTERCOM

Two-way industrial intercom provides reliable communications and superior sound quality. Has a rugged NEMA type 4X housing. Ideal for use in oil refineries, petrochemical plants, offshore platforms, pulp and paper mills, etc. Features include: volume control, call button, balanced line output, listen/talk switch and remote device activation. The listen/talk switch is easy to operate; to talk, press down; to listen, release. Will operate from -31° to 150°F. Standard voltages of 24VDC, 120VAC, and 240VAC are field selectable. Minimum 2 required. UL-Listed (E94581N), indoor/outdoor, CSA approved (5835-49). Federal Signal brand.

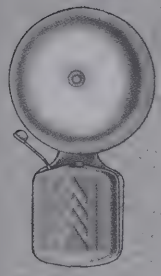
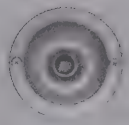
# LOW VOLTAGE BELLS, BUZZER AND CHIME KIT

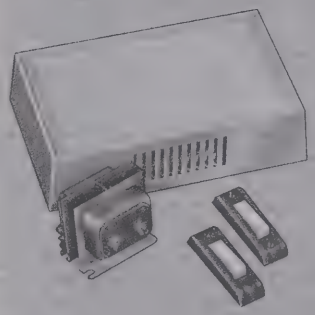


A No. 3ZR09 Low Voltage Buzzer

EDWARDS



C No. 3ZR06 Low Voltage 4" Bell



B No. 3ZR05 Low Voltage 2½" Bell

- Solenoid activated
- Includes mounting equipment
- Snap on cover for easy installation
- Attractive satin aluminum finish
- Operates off of 3 to 6 volt DC battery or 6-8 volt, 60 Hz, AC transformer
- For No. 4X742 transformer, see Index
- 32mA at 16 VAC

D No. 3ZR07 Push Button

- Surface mounted
- Durable metal construction
- Brass finish

E No. 3ZR10 Chime Kit

- COMPLETE KIT
- Includes mounting equipment, 16 volt UL Listed transformer and two push buttons
- Decorative white cover plate
- Two note signal
- Solenoid activated

## A LOW VOLTAGE BUZZER

88 dB at 3 ft. for use in quiet areas where soft subtle signals are not offensive. Schools, libraries, hospitals, hotels, apartment buildings and most businesses. Operates on 6-8 VAC or 3-6 VDC (use transformer No. 4X742 for VAC—see page 403). Satin aluminum finish. 1¾W x 2¾H x 1"D. Edwards brand (725).

**No. 3ZR09.** Shpg.wt. 0.2 lbs. List $9.20. Each **$6.44**; Lots 6.....**$6.12**

## B LOW VOLTAGE 2½" BELL

Bell with 2½" gong signaling device. 78 dB at 10 ft. For commercial businesses or institutions. Use to signal people or to signal vehicle entrance. Use to gain entrance to closed or secured areas such as labs or computer rooms. Operates on 6-8 VAC or 3-6 VDC (use transformer No. 4X742 for VAC—see page 403). Silver color. 2½ W x 5⅜ H x 1¼" D. Edwards brand (740).

**No.3ZR05.** Shpg. wt. 0.4lbs. List $11.35. Each **$7.94**; Lots 6.....**$7.55**

## C LOW VOLTAGE 4" BELL

Bell with 4" gong signaling device. 78 dB at 10 ft. For facilities where signals must be heard over normal manufacturing noises. Use in machine shops, foundries and stamping plants. Operates on 6-8 VAC or 3-6 VDC (use transformer No. 4X742 for VAC—see Index. Silver color. 4 W x 6⅞ H x 1¾" D. Edwards brand (744).

**No. 3ZR06.** Shpg. wt. 0.4 lbs. List $14.50. Each **$10.15**; Lots 6.....**$9.64**

## D PUSH BUTTON

Use push button along with No. 4X742 transformer and No. 1W566 wire to complete system using bells and buzzers listed (both sold separately—see page 403). Surface mounted. Round style is 2⅝ W x 2⅝ H x ⅝" D, with durable metal construction and brass finish. Rectangular style is ⅞ x 2⅞ H x ⅝" D, with a non-rusting plastic brown and ivory finish..

**No. 3ZR07.** Round style. Edwards brand(600). Shpg.wt. 0.1 lbs. List$4.70. Each **$3.29**; Lots 6.....**$3.13**

**No. 3ZR08** Rectangular style. Edwards brand (630). Shpg. wt. 0.1 lbs. List $3.95. Each **$2.77**; Lots 6.....**$2.63**

## E CHIME KIT

Features two note signal for one entrance and a one note signal for another. Double entry. For applications where signal is given before entry or for service. Ideal for use in any commercial application where a low volume pleasant tone would serve as the best signaling device. Includes 10 volt UL Listed transformer, and two brown w/ ivory push buttons. Chime box has white finish. 7¼H x 4⅝Wx2"D. Edwards brand(C212W).

**No. 3ZR10.** Shpg. wt. 2.0 lbs. List $23.60. Each **$16.52**; Lots 4 .....**$15.69**

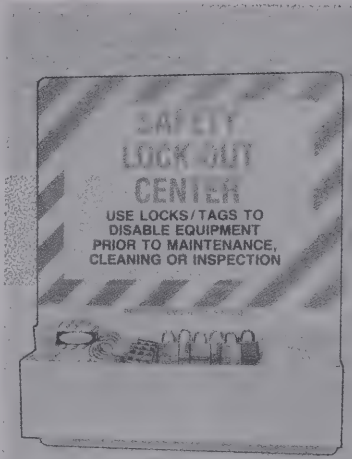
## F MINIATURE BELLS

70dB at 3 ft. For notification purposes. Adjustable volume and dust proof cover. Grounded frame. 3⅛ H x ¾ W x ¾" D. Bell is 1¼" D. Edwards brand.

| Input Volts | Edwards Model | Stock No. | List | Each | Lots 4 | Shpg. Wt. |
|---|---|---|---|---|---|---|
| 6-12 VAC or 5-10 VDC | 13-1AB | 3ZR03 | $34.45 | $24.12 | $22.91 | 0.2 |
| 24 VAC | 13-1G5 | 3ZR04 | 34.45 | 24.12 | 22.91 | 0.2 |

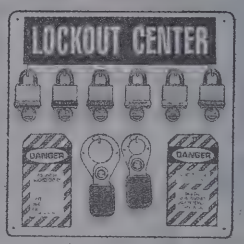
# SAFETY LOCKOUT/TAGOUT ACCESSORIES

## SAFETY LOCKOUT CENTERS



Store and dispense lockout/tagout devices for OSHA compliance. Select lockout equipment to fit individual needs or choose fully equipped units. Components sold separately on following pages. Prinzing brand.

**Deluxe Lockout Board.** Provides focal point for distributing lockout equipment and information. Large pockets accommodate a variety of lockout safety devices and supplies. Red and black lettering with red stripes on white background. Tough acrylic construction. 30"H x 24"W x 4½"D. Available Equipped or Unequipped. Equipped model includes: 25 lockout training booklets, 20 tags and fasteners, six individually keyed multi-colored padlocks, and five multiple 1½" dia. lockout devices.



**Economy Lockout Board.** For small shops or for multiple locations near machines in large plants. Features 10 hooks to mix and match lockout equipment to fit individual needs. Black lettering on white background. Acrylic construction. 14"H x 14"W x 1⅜"D. Available Equipped or Unequipped. Equipped model includes: six individually keyed multi-colored padlocks, two multiple lockout devices (1" and 1.5") and ten lockout tags with cable ties.

**Circuit Breaker Lockout Board.** For attachment on or near breaker box. Holds only necessary lockout equipment to properly secure breakers into "Off" position. Red lettering and stripes on white background. Polystyrene plastic construction. 6"W x 8"H x 2½"D. Available Equipped or Unequipped. Equipped model includes: one each single, double and multi-pole breaker lockouts, one lockout tag and tie and one padlock.

**Lockout Training Booklet.** Assists in basic understanding of lockout tags, locks, deenergizing power sources and release or blocking of energy prior to performing maintenance. Available in English or Spanish language. 16 pages. **10 per package.**

## RED WALL SWITCH LOCKOUT

**Safely lock most wall-mounted switches** in the On or Off position. Helps protect against unauthorized or accidental use of switches. Installs using existing screws. Accepts standard shackle diameter locks. Rugged plastic construction resists tampering and breakage. Red color. **Six per package.** Brady USA brand (65696).

**No. 2AF98.** Shpg. wt. 0.2 lbs. List $49.39. Each **$44.90;** Lots 5 **$42.66;** Lots 10.....**$40.41**

## CLEAR WALL SWITCH LOCKOUT

**Wall switch lockout** helps prevent accidental or unwanted operation of wall switch. Constructed of clear polycarbonate plastic to give user plain view of wall switch position. Mounting holes in lockout line up with existing holes in switch cover plate and allow use of existing switch plate screws. Accepts 9/32" diameter shackle padlock (not included). Each lockout includes instruction card. **Priced and sold individually.** 1⅜"W x 4¼"H x 1¼"D. Prinzing brand (WSL0).

**No. 5U715.** Shpg. wt. 0.1 lbs. List $7.09. Each **$6.38;** Lots 6 **$6.06;** Lots 12.....**$5.74**

## LOCKOUT/TAGOUT TRAINING MATERIALS

**OSHA's 1910.147 Lockout/Tagout standard** requires that all energy sources be turned Off and "locked out" while machines are being serviced or maintained. The standard calls for three steps to compliance:

1. Written Program and Procedures
2. Employee Training
3. Program Implementation

Utilize Brady's complete and effective program to comply. Compliance manuals aid in the understanding of the regulation and development of the compliance program, videos and booklets help with the training of employees, and a variety of locks, tags, signs, and devices help implement lockout procedures for many different energy sources.

## LOCKOUT COMPLIANCE MANUAL

**The Lockout Compliance Manual and Procedures** is a two volume set which contains samples that highlight what OSHA is looking for and demonstrates what must be done to comply with the regulation. Manual includes step-by-step instructions for developing a compliance program, suggested training program, forms and checklists for developing hazardous energy control procedures, sample programs and procedures, and a copy of OSHA Standard CFR 1910.147. Lockout Procedures includes programs and forms for completing an inventory listing, equipment procedures and employee training log. Brady USA brand (65558).

**No. 6T826.** Shpg. wt. 5.0 lbs. List $159.72. Each **$145.20;** Lots 3.....**$130.68**

## TRAINING VIDEOS

**Lockout/Tagout** video is a two-part program which explains the standard, and details correct procedures for locking and tagging. Excellent source for training employees on the importance of Lockout/Tagout and explaining five key elements of a company's lockout procedures. Length: 27 minutes. Brady USA brand (65554).

**No. 6T822.** Shpg. wt. 0.7 lbs. List $544.50. Each **$495.00;** Lots 3.....**$445.50**

**Lockout For Life** video analyzes real-life scenarios to show what went wrong and how following proper lockout procedures could have saved lives. Demonstrates many effective lockout techniques. Motivational program appropriate for both new and experienced employees—ideal for annual retraining program. Length: 19 minutes. Brady USA brand (66255).

**No. 6U834.** Shpg. wt. 0.7 lbs. List $544.50. Each **$495.00;** Lots 3.....**$445.50**

**Lockout/Tagout: Controlling The Beast** video is designed to work with the employer's plan for the control of hazardous energy. Provides general overview of standard, different types of energy sources, when to lock and tag, and OSHA's six-step procedure for controlling hazardous energy. Length: 19 Minutes. Brady USA brand (65285).

**No. 6T733.** Shpg. wt. 0.7 lbs. List $544.50. Each **$495.00;** Lots 3.....**$445.50**

## TRAINING HANDBOOKS

**Handbooks are ideal** for use in conjunction with training videos. Explains to employees their role in an effective lockout program. Includes quiz to test understanding and comprehension of the standard. **10 per package.** Brady USA brand.

| Description | Qty./ Pkg. | Brady Model No. | Stock No. | List | Each | Lots 5 | Shpg. Wt. |

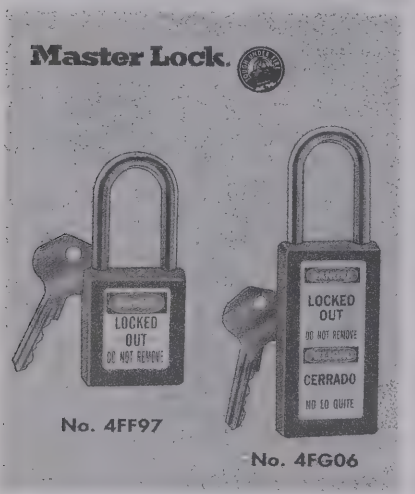
# SAFETY LOCKOUT ACCESSORIES AND PADLOCKS

## SAFETY LOCKOUTS

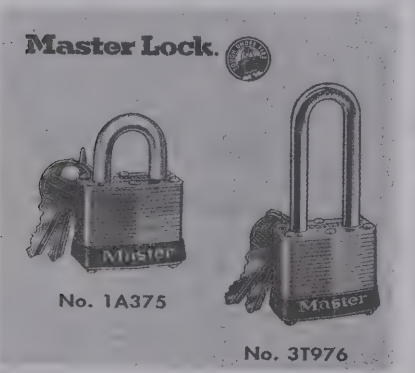
**Tamper Resistant Safety Lockouts** keep equipment inoperative while repairs or adjustments are being made. This reduces the risk of injury, work spoilage, and costly equipment damage. Simply attach device to energy disconnect switch. Up to six people can place their padlocks on the lockout. Control cannot be turned on until after the last worker has removed their padlock. Insulated with bright vinyl coating. Made of high tensile steel for twist resistance. Locking holes accommodate padlocks with up to 3/8" shackle dia. Meet OSHA requirements. Master brand.



| Inside Jaw Dia. (In.) | Dim. (In.) L | W | Master Model | Stock No. | List | Each | Lots 12 | Shpg Wt. |
|---|---|---|---|---|---|---|---|---|
| 1 | 4½ | 1½ | 420 | **1U177** | $4.79 | $4.31 | $4.10 | 0.3 |
| 1½ | 5 | 1½ | 421 | **5T591** | 5.69 | 4.71 | 4.47 | 0.3 |

## LABELED LOCKOUT HASPS

Labeled lockout hasp is a combination lockout tag and safety lockout. Allows up to six workmen to lockout power on line or equipment while displaying tagout message. Durable anodized aluminum. 7¼ x 3". Available in five colors. 5 hasps per package. Combination pack includes one hasp of each color. Brady USA brand.



| Color | Brady USA Model | Stock No. | Qty. Per Pack | Priced per Pkg. List | Each | Lots 3 | Shpg. Wt. |

## SAFETY LOCKOUT LIGHTWEIGHT PADLOCKS

**Complete OSHA device compliance.** Reduces confusion with other locks due to "Safety Lockout" identification on lock and keys. Two permanent write-on labels allow easy, custom identification. Eight body colors for fast identification. Restricted safety key minimizes unauthorized duplication and the risk of key interchange. For extra safety, one key provided and key can't be removed when lock is open. Lightweight Xenoy® body is durable and non-conductive. Extra long shackle fits most lockout applications. **Precision 6 pin tumbler mechanism. Keyed differently.** Master model 411 series features custom English/Spanish label. Master brand.

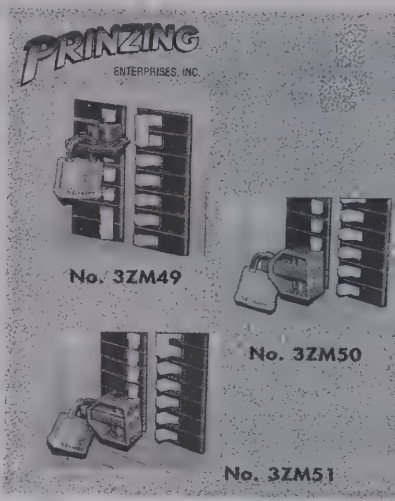
## BREAKER SWITCH LOCKOUTS

### SINGLE POLE CIRCUIT BREAKER SWITCH LOCKOUT



Safely locks out most major brand breaker switches with a recess hole in the toggle. Simple design slides into place and can be secured with a 1/4" or 9/32" diameter shackle padlock. Red polycarbonate material. Prinzing brand.

### DOUBLE POLE CIRCUIT BREAKER SWITCH LOCKOUT

Safely locks out most major brand double pole circuit breaker switches with toggles connected by a cross bar. Simple design makes application easy. Centered bar slides into place and can be secured with a 1/4" or 9/32" diameter shackle padlock. Red polycarbonate material. Prinzing brand.

### MULTI-POLE CIRCUIT BREAKER SWITCH LOCKOUT

Safely locks out most major brand multi- or triple pole circuit breaker switches in the "OFF" position. Simple design makes application easy. Centered bar slides into place and can be secured with a 1/4" or 9/32" diameter shackle padlock. Red polycarbonate material. Prinzing brand.

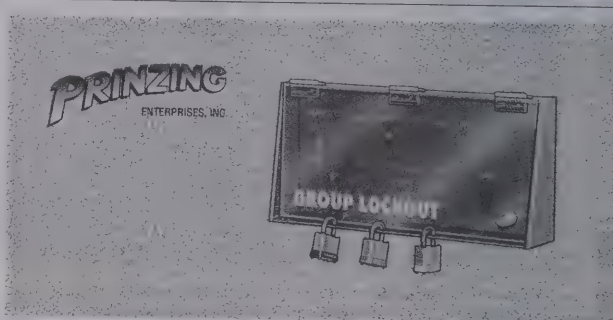
## PREMIUM LOCKOUT KIT

Deluxe kit offers portable solutions to most any lockout requirement. The rugged polyethylene carrying case contains: three 1.5" 12 gauge steel multiple lockout hasps; three Master Lock #3 padlocks; fourteen padlock identifier stickers; twenty vinyl lockout safety tags with eyelets and nylon cable ties; three single pole electrical breaker lockouts; two double pole electrical breaker lockouts; one electric plug lockout; one lockout safety training booklet; one gate valve lockout fits 1-2.5" diameter handle; one gate valve lockout fits 2.5-5" diameter handle; one wall switch lockout; five 3 x 5" "LOCK OUT HERE" pressure sensitive vinyl signs, black on yellow; five 3 x 5" "LOCK OUT BEFORE SERVICING" pressure sensitive vinyl signs, black on yellow; five 5 x 7" "CAUTION-THIS MACHINE MUST BE LOCKED OUT BEFORE DOING MAINTENANCE..." pressure sensitive vinyl signs, black on yellow; one AC voltage detector pen (120-600). 7H x 14.3L x 7.5"D. Prinzing brand (LKP).

**No. 3ZM53.** Shpg. wt. 6.5 lbs. List.....$172.44. Each **$149.95;** Lots 3.....**$142.45;** Lots 6.....**$134.96**

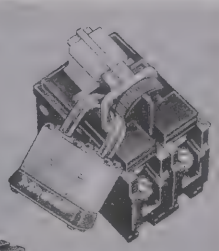


## TAG CENTER

Tag organizer keeps them handy. Eight clear, flexible pockets hold a total of approximately 240 tags. Each pocket measures 4⅜H x 3⅝W x 1¼"D and offers instant identification of tags. Durable white acrylic unit with red lettering measures 15½H x 23¼W x 1½"D and is wall mountable. Prinzing brand (TC8).

**No. 3ZM60.** Shpg. wt. 3.0 lbs. List $48.24. Each **$41.95;** Lots 3.....**$39.85**

## GROUP LOCKOUT BOX

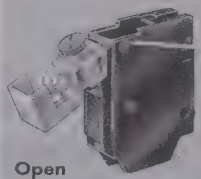


Each worker can apply a padlock to the key box, effectively locking out multiple sources of energy controlled by the keys inside the box. Clear acrylic hinged cover provides a visual check and access to keys when padlocks are removed. Eighteen hooks for keys and 13 external holes for padlocks. Rugged red and clear acrylic construction for wall mounting. 7½H x 16W x 2½"D. Prinzing brand (GLOBOX).

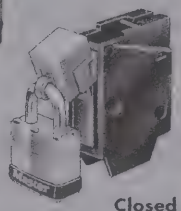
**No. 3ZM52.** Shpg. wt. 3.4 lbs. List $61.00. Each **$51.50;** Lots 4.....**$48.88**

## UNIVERSAL MULTI-POLE BREAKER LOCKOUT

For use with most major multi-pole breakers with tie-bar. No self-locking tie needed. Locks out breakers including GE, I-T-E, Sylvania, Challenger, Bryant, Westinghouse and General Switch Co. Rugged red plastic construction. Helps comply with OSHA lockout requirements. Accepts up to 9/32" diameter padlock. **Six per package.** Brady USA brand (66320).



**No. 1D671.** Shpg. wt. 0.3 lbs. List $45.87. Each **$41.70**; Lots 6 **$39.62**; Lots 12.....**$37.53**



No. 1D671 Universal Multi-Pole Breaker Lockout

## "NO HOLE" CIRCUIT BREAKER LOCKOUTS AND CLEATS

Locks out most single throw circuit breakers with or without a hole through the switch tongue. Fits wider and thicker switch tongues; 277-.65" x 0.46" thick. To assure positive lockout for long sliding switch throws and switches with large angular rotation found with some Westinghouse, I-T-E, Square D and Federal Pacific circuit breakers, use lockout cleat in conjunction with 277 and 480/600 volt "No Hole" breaker lockouts. Snap-on and off features allows for use only when needed. Red plastic construction. Accepts up to 9/32" diameter lock. **Priced and sold 6 per package.** Meets current OSHA lockout requirements. Brady USA brand.

No. 2AD54 "No-Hole" Circuit Breaker Lockout

## LOCKOUT SAFETY KIT

**Lockout Safety Kit** assists in complying with OSHA safety lockout requirements. Helps protect employees from accidental start-up of equipment and machinery by locking out power control. Kit includes: gray polyethylene carrying case, three 1.5" 12 gauge steel multiple lockouts, three Master Lock No. 3 padlocks, fourteen padlock identifier stickers, ten vinyl lockout safety tags with eyelets and nylon cable ties, three single pole electrical breaker lockouts, two double pole electrical breaker lockouts, one electrical plug lockout and one Lockout Safety Training Booklet. Prinzing brand (LKX).

**No. 5U714.** Shpg. wt. 5.0 lbs. List $86.45. Each ..... **$73.55;**
Lots 3 **$69.87**; Lots 6 ..... **$66.20**

No. 5U714
Lockout Safety Kit

## LOCKOUT SAFETY KIT

**Solve almost any lockout situation** with full range of lockout devices and accessories. Kit includes one each: black plastic tool box with tray for transportation, 1" to 2½" Gate Valve Lockout, small Ball Valve Lockout, 3/4" blue padlock, 2" blue padlock, Labeled Lockout Hasp, Universal Multi-Pole Lockout, 480/600V "No Hole" Lockout, red Wall Switch Lockout, small red Plug Lockout, and five Lockout Tags. Brady USA brand (65289).

**No. 1D711.** Shpg. wt. 5.2 lbs. List $124.08. Each ..... **$112.80;**
Lots 3 **$107.16**; Lots 6 ..... **$101.52**

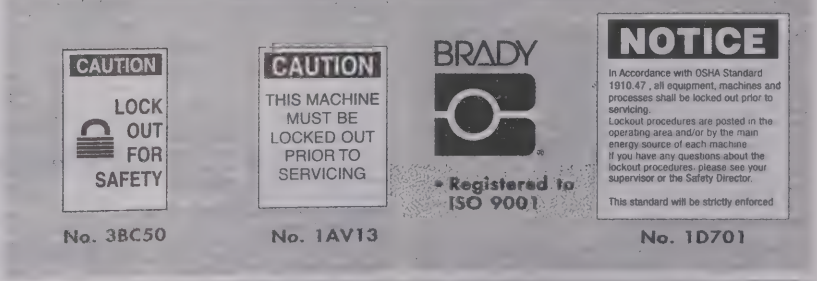
# HEAVY-DUTY LOCKOUT TAGS

BRADY

Lockout tags can be used for both lockout and tagout identification. Tags designed for repeated use. Brass grommet for added strength. Accepts locks up to 7/16" diameter shackle. Polyester laminate protects graphics against water, grease, and extreme temperatures. Wipes clean. Write-on matte finish allows workers to personalize tags with pen, pencil or marker. Heavy-duty construction prevents accidental removal. Withstands over 80 lbs. of pulling pressure. Standard package includes 25 identical 5½ x 3" tags. Brady USA brand.



## LOCKOUT TAG SPECIFICATIONS AND ORDERING DATA

# INDUSTRIAL SAFETY TRAINING MATERIALS

## BLOODBORNE PATHOGENS—WORKER AWARENESS

**Designed in Compliance with OSHA 29 CFR 1910.1030**

**Live-action video** designed specifically for training industrial workers and emergency response teams. Easy-to-understand, comprehensive program helps eliminate misconceptions and trains workers on modes of transmission, universal precautions, safe housekeeping practices, cleanup and disposal of contaminated material and spills. Program includes 10 Employee Handbooks and one Facilitator Guide. Video and Interactive CD-ROM available.

## PERMIT–REQUIRED CONFINED SPACE ENTRY

**Designed in Compliance with OSHA 29 CFR 1910.146**

**Program illustrates the hazards** of working in a confined space and the importance of following proper procedures. Live-action footage and graphics make this program a must-see for all maintenance, repair and response teams. Designed to meet federal regulation, program trains workers on: What is a Confined Space; Associated Hazards; Proper Entry Procedures including Permits, Monitoring and Protective Equipment; Attendant Responsibilities; and Emergency Rescue Procedures. Program includes 10 Employee Handbooks and one Facilitator Guide. Video and Interactive CD-ROM available.

## LOCKOUT/TAGOUT

**Designed in Compliance with OSHA 29 CFR 1910.147**

**Two out of every three incidents** related to the accidental release of stored energy involve machine operators. Two-part series complies with the OSHA standard, motivates workers to recognize and respect the potential hazards of stored energy, and follow safe work practices. Program includes 10 Employee Handbooks and one Facilitator Guide. Video and Interactive CD-ROM available.

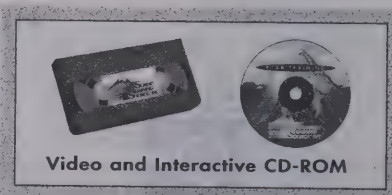
**Part 1—AWARENESS**

Aimed at non-maintenance personnel who are affected by Lockout/Tagout procedures, program creates an awareness and respect for hazards associated with the accidental release of stored energy and the purpose of a lockout and tagout program.

**Part 2—PROCEDURES**

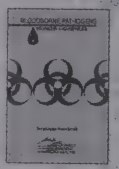
Step-by-step procedures are demonstrated for safely isolating, locking out and tagging all common forms of energy found in industry. The video covers safe start-up procedures and special situations.

## BACK SAFETY—THE ERGONOMIC CONNECTION



Back injuries account for over 25% of all disabling work injuries and make up one-third of all compensation expenses in the United States. Reduce incidents and associated costs with this program. Graphics and multiple live-action examples help explain ergonomic solutions to prevent back disorders and encourage employees to use proper body mechanics and lifting techniques. Program covers: How the Back Works; Proper Body Mechanics; Common Back Injuries; Risk Factors Causing Back Injuries; and Preventive Measures. Program includes 10 Employee Handbooks and one Facilitator Guide. Video and Interactive CD-ROM available.

## ERGONOMICS--PREVENTING CTDs



**Millions of workers** are disabled yearly by cumulative trauma injuries at an enormous cost to industry. Ergonomics has been the target of multi-million dollar fines levied by OSHA. Reviewed by ergonomic experts, this two-part program helps your company reduce workers' compensation costs and absenteeism due to CTDs. Program helps improve quality and effectiveness, and increase job satisfaction. Broadcast quality, live-action video filmed in paper, pharmaceutical, textile, chemical and manufacturing facilities features graphics that explain important concepts in ergonomics.

**Part 1—Employee Module:** Contains What are Cumulative Trauma Injuries; Factors Causing Cumulative Trauma Injuries; Preventive Measures.

**Part 2—Supervisor Module:** Contains Techniques to Analyze Job Functions; Recognizing CTD Indicators; Preventive Measures in Job Function and Design. Program includes 10 Employee Handbooks and one Facilitator Guide. Complies with OSHA's proposed Ergonomic Guidelines for General Industry. Video and Interactive CD-ROM available.

Safety Orientation

## HAZARD COMMUNICATION

**Designed in Compliance with OSHA 29 CFR 1910.1200**

**Three out of five OSHA citations are related to Hazard Communication.** This cost-effective, step-by-step program emphasizes Right-to Know compliance. The broadcast quality video uses graphics and live-action film sequences to train employees on:

Hazard Identification, Container Labeling, MSDS, Employee Training, and Written Plan. Program includes 10 Employee Handbooks and one Facilitator Guide. Video and Interactive CD-ROM available.

## PERSONAL PROTECTIVE EQUIPMENT--THE DANGER ZONE

**Designed in Compliance with OSHA 29 CFR 1910.132**

**Broadcast-quality video** uses convincing statistics and motivational sequences to encourage workers to wear the proper protection for the hazards they face on the job. Stresses importance of assessing hazards prior to PPE selection. Filmed in industry, this program demonstrates proper use and care of hard hats, safety glasses, goggles, respirators, protective clothing, gloves, shoes and more. Program includes 10 Workbooks. Video and Interactive CD-ROM available.

## FORKLIFT SAFETY--THE RESPONSIBLE OPERATOR

**Designed in Compliance with OSHA 29 CFR 1910.178**

**Motivational 2-part compliance series** incorporates graphics and live-action footage to train forklift operators on the principles of operation, safe driving skills, and hazard awareness in the driving environment.

Program includes 10 Employee Handbooks and one Facilitator Guide. Video and Interactive CD-ROM available.

**Part 1—OPERATIONS:** Includes Operation of a Forklift; Refueling and Battery Changing; Load Capacity; Stability Triangle; Pre-Operation Inspection

**Part 2—SAFE DRIVING SKILLS:** Includes Driving Skills; Interaction with Pedestrian Traffic; Proper Load Handling Techniques; Hazard Awareness in the Driving Environment.

## FALL PROTECTION--TAKING CONTROL

**Designed in Compliance with OSHA 29 CFR 1926.501**

**Almost 10% of all fatal occupational injuries** are due to falls in the workplace. Program motivates workers to follow safe work practices. Train employees on how to recognize and respect fall hazards, the importance of engineering hazards out of a worksite, and how to correctly select, use and care for fall arrest equipment. This program uses graphics and industrial footage to effectively teach planning and equipment use in protecting against falls.

Produced in consultation with regulatory agencies, industry experts and equipment manufacturers, this program explains the correct use of: Anchor Points; Full Body Harnesses; Rope Grabs; Lanyards; and Lifelines. Program includes 10 Employee Handbooks and one Facilitator Guide. Video and Interactive CD-ROM available.

## EXCAVATIONS, TRENCHES AND SHORING

**Designed in Compliance with 1926.651 and 1926.652**

**Excavation and trenching accidents** are a leading cause of disabling injuries in the construction industry. This program uses live-action footage and state-of-the-art graphics to train workers to recognize and respect the potential hazards associated with excavations. The program provides an overview of protective systems, regulatory requirements and safe work practices to prevent cave-ins and is ideal for all personnel who work in or around excavations and trenches. Program includes 10 Employee Handbooks and one Facilitator Guide. Available in Video only.

## SAFETY ORIENTATION

**Safety Orientation is the first line of defense** against common workplace accidents at your facility. This outstanding safety training program motivates employees, reduces on-the-job accidents, and creates a positive safety culture. This live-action film with scenes including mills, warehouses, assembly lines, laboratories and offices, covers these important topics: PPE; Good Housekeeping; Hazard Communication, Recognizing Potential Hazards in the Work Environment and Ergonomic Awareness. Program includes 10 Employee Handbooks and one Facilitator Guide. Video and Interactive CD-ROM available.

# SAFETY SIGNS

## "CAUTION" HEADER SAFETY SIGNS

Four safety sign materials available to fit every application: fiberglass, aluminum, plastic and self-sticking vinyl.

Fiberglass signs consist of protected graphics permanently embedded within a fiberglass resin package for excellent indoor/outdoor durability. Aluminum signs have superior chemical and abrasion resistance over traditional surface printed aluminum signs. Plastic signs provide an economical alternative for light duty applications. Self-sticking vinyl signs provide excellent abrasion and chemical resistance while reliably adhering to tough surfaces. All signs meet OSHA specifications for size, color and legend. Brady USA brand.

**BRADY USA INC. 15-YEAR WARRANTY**
Brady warrants their fiberglass signs for 15 years against a fading, chipping, or cracking. Other signs warranted for year. Text of warranty available on request. S "Manufacturers' Warranties" on page opposite inside ba cover.

# SAFETY SIGNS

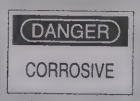
## "DANGER" HEADER SAFETY SIGNS



Four safety sign materials available to fit every application: fiberglass, aluminum, plastic, and self-sticking vinyl.

Fiberglass signs consist of protected graphics permanently embedded within a fiberglass resin package for excellent indoor/outdoor durability. Aluminum signs have superior chemical and abrasion resistance over traditional surface printed aluminum signs. Plastic signs provide an economical alternative for ligth duty applications. Self-sticking vinyl signs provide excellent abrasion and chemical resistance while reliably adhering to tough surfaces. All signs meet OSHA specifications for size, color, and legend. Brady USA brand.

**BRADY USA INC. 15-YEAR WARRANTY**

Brady warrants their fiberglass signs for 15 years against an fading, chipping, or cracking. Other signs warranted for year. Text of warranty available on request. Se "Manufacturer's Warranties" on page opposite inside back cover.

## REGULATORY LABELS

• Registered to ISO 9001

BRADY

### ASBESTOS HAZARD LABEL.

Alert workers and other personnel to hazards present during asbestos abatement projects. Label meets OSHA requirement 1910.1001 for jobsite safety. Black and red printing on white background. 3½H x 5"W. Sold individually. Brady USA brand (85451)

**No. 1K945.** Shpg. wt. 0.1 lbs. List.....$1.60.
Each **$1.46;** Lots 10.....**$1.31**

### PCB LABEL

Meet most current EPA regulations for identifying either PCB contaminated equipment or waste. Durable outdoor vinyl construction. Black printing on yellow background. 6" x 6". 50 per package. Brady USA brand (87028).

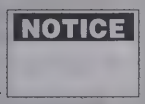
**No. 3AM99.** Shpg. wt. 0.8 lbs. List.....$62.86.
Each **$57.15;** Lots 5.....**$51.44**

### BLOODBORNE PATHOGENS LABEL

Designed to reduce occupational exposure to bloodborne pathogens including Hepatitis B, Non-B, HIV and a variety of other bloodborne diseases. Helps comply with OSHA 1910.1030. Black printing on orange background. 3½ H x 5". Sold individually. Brady USA brand (89170).

**No. 5AH27.** Shpg. wt. 0.1 lbs. List.....$1.60.
Each **$1.46;** Lots 10.....**$1.31**

**HAZARDOUS WASTE LABELS AVAILABLE SEE PAGE 2594**

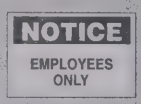


# "NOTICE" HEADER SAFETY SIGNS

Four safety sign materials available to fit every application: fiberglass, aluminum, plastic and self-sticking vinyl.

Fiberglass signs consist of protected graphics permanently embedded within a fiberglass resin package for excellent indoor/outdoor durability. Aluminum signs have superior chemical and abrasion resistance over traditional surface printed aluminum signs. Plastic signs provide an economical alternative for light duty applications. Self-sticking vinyl signs provide excellent abrasion and chemical resistance while reliably adhering to tough surfaces. All signs meet OSHA specifications for size, color and legend. Brady USA brand.

### BRADY USA INC. 15-YEAR WARRANTY



Brady warrants their fiberglass signs for 15 years against any fading, chipping, or cracking. Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.

## SIGN-SHOP-IN-A-BOX® KIT

Kit contains:

- 2" high, black Quik-Align® self-spacing letters:
  20 each—A, E, I, L, N, O, R, S, T
  10 each—remaining letters
- 15 fiberglass sign panels:
  10 white, 10 x 14"
  2 yellow, 10 x 14"
  2 white, 14 x 20"
  1 yellow, 14 x 20"
- 12 vinyl self-sticking OSHA headers:
  3 "CAUTION"
  4 "DANGER"
  3 "NOTICE"
  2 "SAFETY FIRST"
- 10 double-faced foam mounting strips.

Versatile kit for making quick, accurate signs. Brady USA, Inc. brand (44197).

**No. 5T159.** Shpg. wt. 16.0 lbs. List .....$270.05. Each $245.50; Lots 2.....$220.95

- Designed to help comply with the Americans with Disabilities Act
- Non-glare matte finish
- Grade II braille and raised characters
- Includes 2 strips of double faced mounting tape
- Durable acrylic material can be used indoors or outdoors

BRADY

### Americans with Disabilities Act

**On January 26, 1992, the Americans with Disabilities Act** (ADA) preventing discrimination against people with disabilities became effective. The act states that buildings must be able to "reasonably accommodate" people with disabilities. Every place where a disabled person could visit or work must comply with ADA requirements. These places include existing manufacturing facilities, hospitals, offices, schools, as well as places of public accommodation, such as hotels, restaurants and retail stores. New construction and renovation projects with a permit applied for after January 26, 1992, must also comply.

**ADA requires special signs** that designate permanent rooms and spaces such as restrooms, conference rooms and offices. These signs must have: Grade II braille, raised characters, upper case letters that are 5/8-2" high, and pictograms with verbal descriptions. Signs must also be used to identify accessible areas such as parking spaces, loading zones, entrances and restrooms with International Symbols of Accessibility. Special signs are required to provide direction to or information about functional spaces such as accessible exits or restrooms.

**Brady USA, Inc. signs have a non-glare matte finish** and provide high contrast between legend and background. White lettering or black background. Acrylic. Brady USA, Inc.

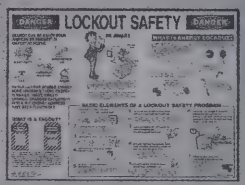
# SAFETY POSTERS AND RIGHT-TO-KNOW CENTERS

## SAFETY POSTERS

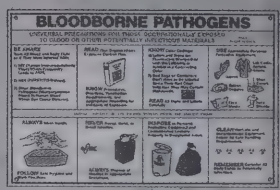
• Asset to Training Programs

**Lockout Safety Poster.** Two-color illustrated poster covers basic points of lockout safety, reminding workers of potential dangers. Laminated on both sides and edge sealed for durability. 18H x 24"W. Prinzing brand.



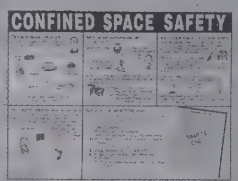
**Bloodborne Pathogen Poster.** Provides an easy-to-understand, colorful simplification of OSHA's biohazard standard. Constant visual reminder of safe hygiene and universal precautions. Heavy-duty polyethylene material is tear resistant and can be easily wiped clean. 16H x 24"W. Prinzing brand.

**Confined Space Safety Poster.** Provides all employees with a basic overview of potential dangers of confined spaces and related safety precautions. Helps meet OSHA requirements. Colorful illustrations help get message across. Laminated paper construction. 18H x 24"W. Prinzing brand.



**"Safe Handling of Flammable Liquids Basic Guidelines for Your Workplace" Poster.** Covers a broad spectrum of flammable liquid handling. Colorfully describes entire safety cycle of flammable/hazardous liquids from start through clean up and disposal. Visual reminder of safe work precautions. Heavy-duty polyethylene material is tear resistant and easy to clean. Corner grommets prevent ripping. 16H x 24"W. Prinzing brand.

**Right To Know Understanding MSDS Poster.** Visually reminds workers of OSHA's hazard communication standard and compliance situations. Contains basic elements of typical Right to Know programs. Encourages safe work practices while being used as a reference guide. Laminated paper construction. 18H x 24"W. Prinzing brand.



**Haz-Mat Warning Label Poster.** Colorfully describes two of the most popular warning label systems used. Constant visual reference guide. Heavy-duty polyethylene material is tear resistant and easy to clean. Corner grommets prevent ripping. 16H x 24"W. Prinzing brand.

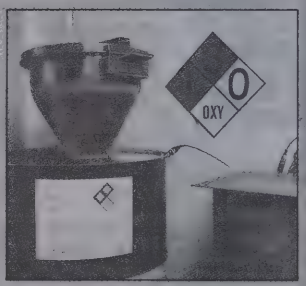
## TECHNICAL REFERENCE LITERATURE

Technical reference literature is available on such subjects as welding, basic electricity, electric motors, and hydraulics and pneumatics. See Index under Books.



## RIGHT-TO-KNOW SOFTWARE

Create custom Right-To-Know container labels instantly with Windows based software and label blanks. Scroll and select from the pre-programmed categories to create the labels needed. Categories include: physical and health hazards, signal words, target organs and pictograms. Chemical information is saved on a personal computer hard drive. Chemical data is automatically formatted to all label sizes without having to re-key information. Preview each label format and then print. Choose from either NFPA Diamond or Color Bar formats. Labels are made of vinyl material for both indoor and outdoor use. 25 sheets per package. Brady USA brand.

# SIGN MAKING SOFTWARE AND SIGN BLANKS

## SIGN MAKER SOFTWARE

Create industrial signs instantly using Windows based Sign Maker Software and sign blanks. 100 of Brady's most popular sign legends (in English and Spanish) are built into the software, as are 55 standard pictograms. Laser/ink jet printable sign blanks are self-sticking and made of polyester material for both indoor and outdoor use. Available with common OSHA headers; blank yellow, white and orange; and three convenient sizes. 25 sheets per package. Brady USA brand.

## SIGN, TAG & LABEL AND RIGHT-TO-KNOW SOFTWARE SUITE KIT

Software suite is a comprehensive identification software package that comes complete with ready-to-go templates including right-to-know tags and labels, safety signs, lockout tags, safety decals and more. Use this software with PC and laser or ink-jet printer. Works well with Windows 3.1, Windows 95 and Windows NT. Kit contains SLT and RTK software, blanks starter kit and 100 snap-in grommets. Brady USA brand (64651).

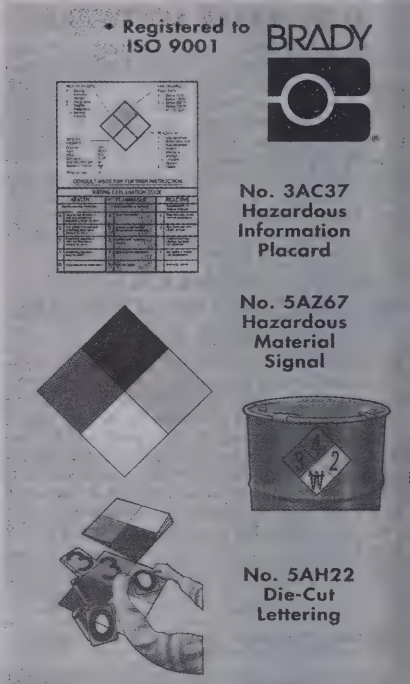
## HAZARDOUS INFORMATION PLACARD

Graphically explains the National Fire Protection Association hazard identification coding system. Excellent means of training and reminding personnel how the NFPA system works. Indoor/outdoor durable fiberglass material. Four mounting holes for quick installation. 14H x 10"W. Brady USA brand (78786).

**No. 3AC37**. Shpg. wt. 0.6 lbs. List.....$15.09. Each **$13.72**; Lots 10.....**$12.35**

## HAZARDOUS MATERIAL SIGNALS



Signals provide identification of hazardous chemical containers and dedicated hazardous material storage areas based on the National Fire Protection Association Code No. 704M and Federal Standard 313. For placement on storage tanks, processing tanks and vessels, feed hoppers, pipelines and other potentially hazardous equipment. Can be used to identify potentially hazardous areas for benefit of both employees and outside emergency response personnel. Available in premium outdoor grade vinyl or Fiber-Shield® fiberglass. Fiberglass signals come with four predrilled mounting holes. Quik-Align® die-cut numbers and letters mark corners of signal (sold separately below). Brady USA brand.

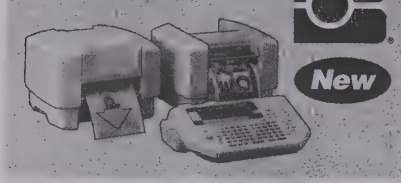
## MSDS/JOB SITE DOCUMENT CENTER

For use indoors in dusty/dirty work areas or outdoors in all weather. Helps keep MSDS and other documents readily accessibly and in compliance with OSHA requirements. Accommodates one 3" binder, sold separately. Durable yellow sintra plastic construction with red wording. Features lockable hasp on full length hinged cover and keyholes for wall mounting. 13.4W x 13.3H x 4.7"D. Prinzing brand (JS1).

**No. 3ZM68.** Shpg. wt. 5.3 lbs. List.....$84.13. Each **$71.05;** Lots 4.....**$67.48**

## OSHA #200 RECORDKEEPING CENTER



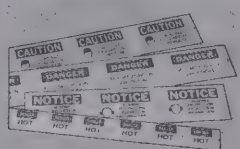
Help comply with OSHA's 200 Log and Summary requirement. OSHA requires most companies with eleven or more employees to prepare and maintain records of work related injuries and illnesses. Comprehensive kit offers immediate compliance solutions for accident recordkeeping and documentation.

**Kit includes:** white with blue lettering acrylic summary and posting board with clear view pocket to showcase documents, 12H x 24"W; blue polyethylene three ring binder (1.5" dia. rings) which holds approximately 300 sheets, white PVC-coated wire binder holder keeps required five years of injury/illness documents; white, blue and black plastic sign with legend "Report All Accidents", 10 x 14"; white and blue acrylic standout wall sign "OSHA Info", 8H x 14½W x 6"D; and one package each of 25 OSHA #200 and #101 log forms. Prinzing brand (OR25001).

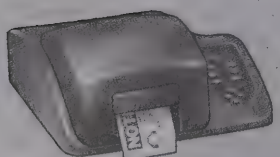
**No. 3ZM59.** Shpg. wt. 7.6 lbs. List.....$138.00. Each **$120.00;** Lots 4.....**$114.00**

# LABEL AND SIGN MAKING SYSTEM

Brady 6 Month Warranty. See page opposite inside backside cover.



## GRAPHICSPRO™ LETTERING AND LABELING SYSTEM



Create custom labels and signs using GraphicsPro™ lettering and labeling system. System includes three components: keyboard/display, thermal transfer printer and cutter. Choose a complete system for the greatest value or a keyboard/cutter combination package. PC Interface printer and cutter hardware connects to any PC running Windows® 95. Create attractive, multi-color labels by easily matching ribbon and tape colors. Hundreds of print color options. Prints/cuts up to 3¾" characters. Optional scanner allows printing of scanned images such as a corporate logo. Standard software features include over 100 frequently used symbols, barcoding (UPC, Code 3 of 9, Interleave 2 of 5 and EAN), 21 different fonts and eight languages (English, Spanish, French, German, Dutch, Italian, Danish and Portuguese). Use premask to apply cut image to sign blank or any flat, clean surface. Ribbons and tapes available in wide variety of colors and materials. Brady USA brand.

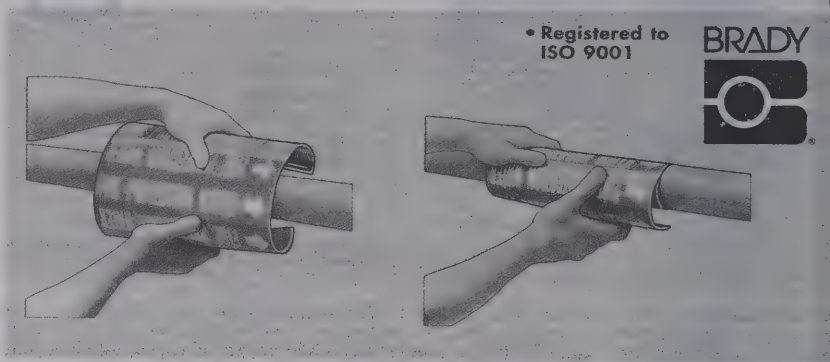
**IF YOU'RE IN A BIND, CALL GRAINGER**



If it's an emergency, chances are Grainger's got the items you need today. Grainger has more than 350 well-stocked branches nationwide. So you can replace, build, or repair it right away. And we're conveniently located. To find the branch nearest you, check the Branch Locations listed in the front of this catalog.

# PIPE MARKERS

## BRADYSNAP-ON™ PIPE MARKERS

Designed for use either indoors or out, in plants with minimal heat and chemical exposure. Ideal for use when self-sticking markers are not appropriate (ie. dirty, oily, greasy or rough surface pipes) or when quick installation is needed. No pipe preparation is necessary. BradySnap-On™ markers provide 360° visibility. If needed, markers can be taken off and reapplied. All markers meet or exceed the ANSI standard for pipe identification.

For pipes 3/4" to 5⅞" outside diameter, select from BradySnap-On™ pipe markers listed below and on pages 2599 and 2600. This is a coiled vinyl pipe marker, sized to fit the pipe it is to be applied to. Simply uncoil the marker and snap it around the pipe.

### BRADYSNAP-ON™ PIPE MARKERS SPECIFICATIONS AND ORDERING DATA

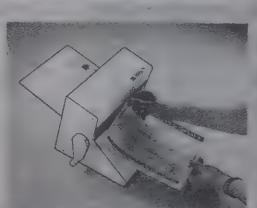
## LAMINATOR

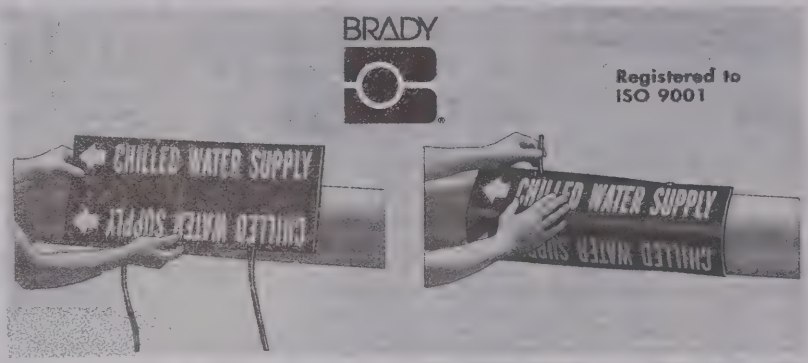


Small, lightweight, portable. For use in office or industrial applications to laminate documents without heat, electricity or messy chemicals. Laminate signs, graphs, ID badges, ISO documents, instruction or procedure sheets and other important documents. Three replaceable cartridges allow for lamination on one or both sides of a document, or laminate one side while applying adhesive to the other for mountable documents. Laminates documents 8-1/2" wide up to 100 feet long. Features integral cut-off blade at roller exit. Supply laminate cartridges sold separately below. Made in USA. Brady USA brand.

No. 4NG66. Select cartridge, insert document, and turn handle

Adhesives and laminate are applied

Cut-off blade provides a precise trim to finish documents



| Description | Supply Size | Brady USA Model | *New!* Stock No. | List | Each | Lots 3 | Shpg. Wt. |
|---|---|---|---|---|---|---|---|

| Supply Laminate, Double-sided/Office use | 8.6 x 100 | 20602 | 4NG73 | 55.00 | 50.00 | 45.00 | 3.1 |

(*) Over-lam on one side, transfer adhesive on the other side

Designed for use either indoors or out, in plants with minimal heat and chemical exposure. Ideal for use when selfsticking markers are not appropriate (ie. dirty, oily, greasy or rough surface pipes) or when quick installation is needed. No pipe preparation is necessary. If needed, markers can be taken off and reapplied. All markers meet or exceed the ANSI standard for pipe identification.

For pipes 6" to 15" outside diameter, select from Strap-On pipe marker choices listed below. Designed to meet the needs of large pipe identification. Marker is a flat sheet with sets of slots to accommodate the two straps of Bradylock™ Fastener (included with each marker.) Hold the marker where it should be placed on the pipe, wrap one strap around the pipe and insert into the slot on other side of marker. Repeat with remaining strap. Brady USA brand.

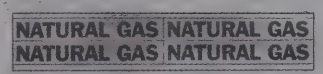
# PIPE MARKERS

## SELF-STICKING VINYL PIPE MARKERS

*Registered to ISO 9001

BRADY

**Brady Pipe Marking Systems Meet the ANSI A13.1-1981 Standard**



Premium indoor/outdoor grade vinyl film designed to stick directly to the pipe or pipe covering. Apply to clean, dry surface. Also order arrow tape or additional arrows and pipe banding tape (see page 2604) to show direction of flow and provide a complete identification system. **Choose Style 1HV for 6" or greater pipe outside diameter; Style 1 for 3" to 5"; Style 4 for 1" to 2½"; and Style 3C for 3/4" or less.** Brady USA brand.

### HOW TO ORDER PIPE MARKERS

1. Choose legends from the listing below and on pages 2603 and 2604
2. Choose from ANSI colors:
Hazardous materials—Black lettering on yellow field
Liquids of low hazard—White lettering on green field
Fire quenching materials—white letters on blue background
Gases of low hazard—white letters on blue background
3. Choose size of marker according to pipe diameter:
See paragraph above for reference.
4. When ordering self-sticking pipe markers, also order arrow tape or additional arrows and pipe banding tape below and on page 2604.

Style 1
1 Marker Per
2¼ x 14" Card

Style 4
4 Markers Per
1⅛ x 7" Card

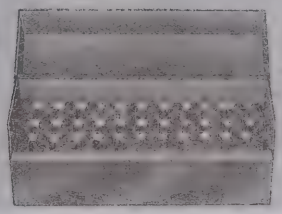
# STEEL HAND STAMPS



Letter Set

Number Set

Replacement Parts Available
TM 1-800-323-0620

Combination Number & Letter Set

Steel letter and number sets allow permanent marking of a wide range of heat-treated metal parts, tools, assemblies, and components. Stamps are easy to hold, and the beveled ends are easy to strike with a hammer. Impressions are Gothic letters and numbers. Made of domestically sourced first-run 6150 alloy tool steel and engineered to a hardness of 60 to 63 at the character end and 49 to 53 (Rockwell C scale) at the striking end for longest wear and highest safety. Sets are stored in a high-impact plastic case except Nos. 1F108 and 1F109 which have wood cases.

Letter sets contain 27 pieces—A thru Z and an ampersand (&). Number sets contain 9 pieces—0 thru 8 with 6 serving as 9. Combination letter and number hand stamp sets contain 36 pieces—A thru Z plus an ampersand (&) and 0 thru 8 with 6 serving as 9; housed in a metal index box.

All stamps meet or exceed Federal Specification GGG-D-280C. Made in USA. C.H. Hanson brand.

**Heavy-Duty Stamp Sets.** Designed for heavy-duty metal marking at a lower cost. Character and size are marked on thumb side.

**Premier Heavy-Duty Stamp Sets.** Feature extra large shanks for easiest use. Reduces hand fatigue while larger striking surface promotes safety. Character and size are marked on thumb side.

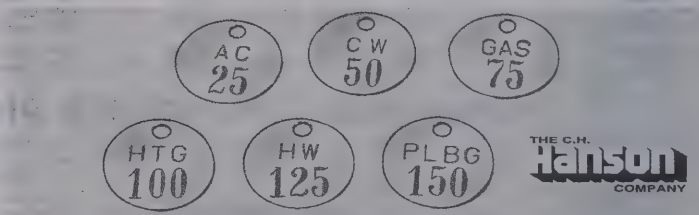
## BLANK METAL TAGS

Blank tags allow quick and easy identification of most types of equipment, materials, and pipes by simply stamping description directly onto tag. Ideal for building maintenance and housekeeping applications. Use of steel hand stamp sets (available separately) allows customized legends and valve tags.



All solid brass tags are 18-gauge thick except No. 1F034 (also known as a "miner's check") which is 16-gauge. No. 1F036 20-gauge stainless steel tag is recommended for corrosive environments such as the petrochemical industry. Sold in package of 100. Made in USA. C.H. Hanson brand.

## STANDARD BRASS VALVE TAGS

Six different consecutively numbered legends available. Round, 18-gauge solid brass tags are 1½" in diameter with a 3/16" tophole. Feature 1/4" black-filled characters above 1/2" black-filled numbers. Tags satisfy ANSI A13.1-1981-3.4. (For identification of materials in pipes of less than 3/4" in diameter. Use of permanently legible tags is suggested for valve and fitting identification.) Sold in consecutively numbered lots of 25. Legends available are: AC (air conditioning), CW (cold water), HW (hot water), GAS, HTG (heating), and PLBG (plumbing). Made in USA. C.H. Hanson brand.

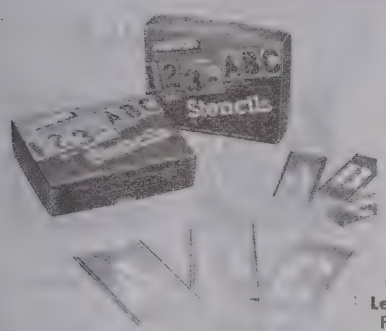
## LEAD SECURITY SEALING PRESS AND SEALS



Heavy-duty sealing press and lead seals provide security and protection in a variety of situations. Once the annealed two ply twisted wire is slipped through hole in lead seal disc and crushed with press, seal cannot be opened without detection. Use for sealing shipping containers, various meters, controls, valves, and boxes as well as other applications where tamper resistance is desired. Lead seal discs are 7/16" in dia. with 10" long wires. C.H. Hanson brand.

**No. 1F132.** Seal Press (27905). Shpg. wt. 0.9 lbs. List.....$48.71. Each.....**$43.30**

**No. 1F246.** Security Seals (27910). 7/16" disc with 10" long two ply wire. 100 seals per package. Shpg. wt. 1.1 lbs. List.....$10.39. Each.....**$9.41**

# BRASS ADJUSTABLE INTERLOCKING STENCILS

THE C.H. Hanson COMPANY

92-Piece Number & Letter Kits Available in Four Character Sizes

13-Piece Number & 33-Piece Letter Kits Available in Large 8, 10, & 12" Sizes

A flexible method of marking goods for shipment, and making signs for plant use. Simple to use. All characters interlock by sliding adjacent grooves of individual stencils together. Equally simple to disassemble and wipe clean for immediate recomposition or storage. Made in USA. C.H. Hanson brand.

**92-piece character kits** are available in 1, 2, 3, and 4" character heights and include: four letter E's; three each A, I, N, O, S; one Q; two each of remaining letters and ampersand (&) symbol. Numbers include three each 1 and 0; two each of 2 thru 9. Also one each of beginner, period ender, plain ender, comma, and dash; two periods; three spacers.

**13-piece number kits** come in 8, 10, and 12" number heights and include: one each 1 thru 9 and 0; one each of beginner, plain ender, and period.

**33-piece letter kits** also come in 8, 10, and 12" letter heights and contain: one each A thru Z; one each of ampersand (&), beginner, ender, spacer, period, comma, and dash.

## PARKING LOT AND FLOOR STENCILS

Durable stencils provide clear and legible warnings and precautions. Made of 0.015 mil thick high impact, chemical-resistant plastic. Reusable, flexible, and durable, these stencils are easily stored when not in use. Made in USA. C.H. Hanson brand.

**Parking lot stencils** help solve employee parking problems, provide added service to customers and visitors, and promote traffic safety. Large 12" high letters. Can be used on a variety of surfaces with either spray or brush-on paints formulated for parking lot use. (Refer to Rust-Oleum System Selector on page 1980)

**Floor marking stencils** are typically used for factory and warehouse floors and sidewalks. When used with spray or brush-on paints, these reusable stencils provide easy permanent identification of dangerous or hazardous areas. Character height is 3".

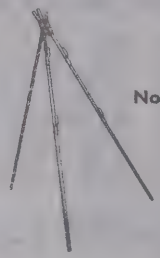
# SIGN STANDS

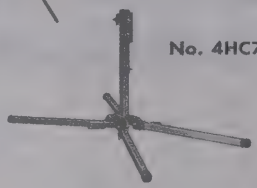
### No. 4HC74 ROLL-UP/RIGID TRI-POD SIGN STAND

Tripod style sign stand displays 36" or 48" roll-up or rigid signs, without special adapters, around construction work zones. Fabricated from durable, galvanized mechanical tubing. Strong, lightweight design allows for easy set-up and take down. Special attention given to elimination of sharp edges. Also holds up to 3 warning flags for additional visibility.



### No. 4HC76 ALUMINUM SPRING-LESS SIGN STAND

Sign stand displays 36" or 48" roll-up signs a minimum of 14" off the ground. Spring-less stand features fold-down telescoping aluminum legs utilizing kick-lock release levers. Legs adjust for uneven terrain. Ideal for use with roll-up signs offered below. Signs are held securely in place by a swivel pad and threaded shaft, tightened via easy to use knob.



### No. 4HC77 ALUMINUM SPRING LOADED SIGN STAND

Spring loaded sign stand displays 36" or 48" roll-up signs a minimum of 14" off the ground. Patented spring design incorporates positive stops to prevent spring over-stress and absorbs winds up to 50 mph. Durable, lightweight, and corrosion-resistant aluminum legs provide longer service life and easier handling without sacrificing strength. Telescoping legs provide maximum stability. Ideal for use with roll-up signs offered below.

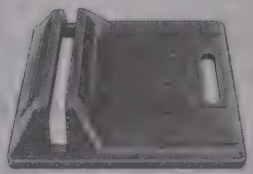
# ADDGARD BARRICADE SYSTEM



Ideal for confined space manholes, industrial plant dangers, sidewalk barriers, airports, and hospitals. Meets the OSHA requirement (29 CFR parts 1910) for protecting "confined space" and MUTCD requirement (MUTCD 6D-1) protecting pedestrians in a temporary traffic control work zone. Quick release snap hinge allows for quick assembly and take down, enabling a large area to be fenced off in minutes. Folds accordion style for compact storage. Manufactured of structurally foam molded polyethylene. Each Addgard Barricade System unit consists of 4 panels, 2 "Caution" signs, 2 "Confined Space" signs and 4 orange and white reflective striped boards. No. 4HC75 thirteen pound flat weights offer additional panel stability. Order separately below.

# ROLL-UP SIGNS

## MESH ROLL-UP SIGNS

Constructed with 2 layers of orange heavy duty, double knit, nylon mesh material. Legends and boarders are heat sealed using black vinyl material. Sign kits include: 36" or 48" sign, heavy duty rib supports and carrying case.

## REFLECTIVE VINYL ROLL-UP SIGNS

Fluorescent orange, super bright reflective vinyl construction signs are most effective during the hours of dusk to dawn, when sources of light are reduced. Superior protection is provided by these temporary signs with highest reflectivity available. Sign kits include: 48" x 48" roll-up sign, heavy duty rib supports and carrying case.

SERVICES & MATERIALS

## DUAL FUNCTION 12V LIGHT WITH PHOTOCELL FOR BEAR-A-CADE

Rugged, reliable unit provides trouble-free, long life operation in hot and/or cold weather. Amber 7" lens features dual function for both steady-burn and/or flashing triple switch. 55-75 FMP rate. Powered by two 6 volt lantern batteries (not included). Photocell conserves battery life and eliminates manual operation. Case constructed of copolymer polypropylene with UV stabilizers. Comes with theft resistant, galvanized 5½" bolt, protector, special wrench and key. Compliments Bear-A-Cade brand barricades Nos. 3JP35 and 3JP36, sold below. (#2000).

**No. 3JP33.** Shpg. wt. 2.7 lbs.
List $27.25. Each.....**$25.90**

## TYPE I AND II PLASTIC BARRICADES

- Durable
- Recyclable
- Expandable
- Economical
- Interchangeable
- Stackable

**Impact-resistant, plastic barricades are designed to snap together easily** and break away when hit, yielding less damage to persons, property and barricade itself. Cost efficient interchangeable modular panels allow replacement of single module, not entire barricade. High density polyethylene construction guarantees long wear. UV antioxidant additives resist sun damage. Washable, non-rusting. Push-button stabilizer arms help prevent closing, "walking", or toppling over in heavy winds. Holes at the bottom of legs allow for placement of anchoring stakes.

**Barricades feature 3M 8" x 24" engineer grade** reflective orange and white, left and right striped sheeting, meeting State of California requirements. Type I has sheeting on top panel only; Type II has sheeting on both top and bottom panels. Panels have reinforced bolt holes strategically placed for easy installation of signs. Accommodates industry standard flashing light with 5½" bolt (No. 3JP33, order separately above). Stacking lugs secure barricades in place for shipping and storage. Bear-A-Cade brand.

| Description | Bear-A-Cade Model | Stock No. | List | Each | Shpg. Wt. |
|---|---|---|---|---|---|
| Type I Barricade | W8X4E2 | 3JP35 | $62.60 | $59.50 | 18.0 |
| Type II Barricade | W8X4E4 | 3JP36 | 77.60 | 73.75 | 18.0 |

## MINI-CADE "CAUTION" SIGN STAND

Bear-A-Cade's mini-cade (cub) is bright yellow and made of recycled plastic materials. Provides a "24 hour" night and day visibility safety sign stand or warning device to alert of hazardous areas. Bold, black "CAUTION" lettering on 3M reflective sheeting. Can be used indoors or outdoors in various situations at home or on the job. High density polyethylene guarantees long wear. UV antioxidant additives resist sun damage. Washable, no rusting or warping. Reinforced bolt holes for easy installation of multi-purpose signage. Sign folds flat for easy storage. Bear-A-Cade brand (8X2E2).

**No. 3JP34.** Shpg. wt. 9.0 lbs.
List $38.80. Each.....**$36.90**

## MOLDED PLASTIC BARRICADE

Features the latest technology for durability, impact absorption, recyclability and visibility. Safely warns motorists and pedestrians of dangers on roads and around construction work zones. Engineer reflective orange and white stripes provide nighttime visibility. Replaceable 12 x 24" top panel meets the Federal Manual on Uniform Traffic Control Devices for reflective sheeting requirements. Unique recessed light mount bracket protects and accommodates flashing barricade lights, No. 1A123 or No. 4HC78, sold separately below. Includes recessed area to protect reflective sheeting. Sheeted panel is replaceable. 24W x 36"H unit is made from a minimum of 30% post consumer recycled high density polyethylene. White color. Services & Materials brand (2085792).

**No. 3W259.** Shpg. wt. 18.0 lbs. List .....$72.34.
Each **$50.95**; Lots 4.....**$48.40**

## FLASHING AMBER BARRICADE LIGHT

7" Lexan polycarbonate lens in Fresnel design with advanced optics increases visibility. 55 to 75 FPM flash rate. Unit is powered by two 6V lantern batteries (such as No. 2V553, not included) and comes with an internal photocell which eliminates manual operation in outdoor applications and conserves battery power. Light can be mounted on any barricade or plastic barrel by use of a 3½" bolt. Tamperproof bolt and key provided help guard against theft. Used as a warning device around construction sites, work zones, in plant work areas, and around highway construction projects. Services & Materials brand (2004828).

**No. 1A123.** Shpg. wt. 1.8 lbs. List .....$25.76.
Each **$16.81**; Lots 10.....**$15.97**

## L.E.D. AMBER BARRICADE LIGHT

**Offers same features as No. 1A123** Flashing Barricade Light listed above, with the latest technology for extended battery life. L.E.D. light provides savings in replacement batteries, replacement incandescent bulbs and labor costs. Bulb turns with lens to transmit light in proper direction. Features 7" polycarbonate lens in Fresnal design and internal photocell to eliminate manual operation. Services & Materials brand (2190550).

**No. 4HC78.** Shpg. wt. 2.0 lbs. List .....$48.00.
Each **$36.05**; Lots 10.....**$34.21**

## PLASTIC CHANNELIZERS

For use in channelizing or delineating traffic flow and marking specific hazards. Channelizers meet or exceed MUTCD Part IV Section 6C-6 Specifications. Highly visible units constructed of high density polyethylene that retains shape after repeated impacts. Single flat side prevents drum from rolling after impact. Waffle pattern on bottom of base eliminates "creeping." **Base sold separately below.** Available with 4" or 6" engineer grade or flexible high intensity reflective sheeting, depending on local requirements. Tapered design enables nesting for storage and transport. 38⅝" height, 18⅛" top diameter, 22³⁄₁₆" base diameter. Accommodates No. 1A123 or No. 4HC78 flashing barricade lights, listed above. **Channelizer and base sold separately.** See chart below for ordering data. Services & Materials brand.

## TRAFFIC CONES

Flow molded PVC cones have extra wide, weighted bases for maximum stability in high winds and highway turbulence, no ballast needed. Construction withstands high speed impacts; cones snap back into shape with little or no damage. "Hi-viz" red/orange. Nos. 5U795 and 5U800 feature a black base. Available plain or stenciled with "Caution/Wet Floor" legend on one side of cone only. Used indoors and out to channel traffic, control crowds, warn people of repair projects, wet floors, and similar hazards. No. 3T922 28" cone and No. 5U800 12 lb. 36" cone feature 2 permanently attached reflector cone collars needed to meet standards set in the Federal Manual on Uniform Traffic Control Devices (MUTCD Manual Section F, VI-34(c) and VI-34(c) Rev. 5). This states that a cone 28" or more should be reflectorized with a 6" and 4" white reflective band when used on high speed roadways and on all facilities during hours of darkness. Stack easily to store. Services & Materials brand.

## HIGHWAY WARNING TRIANGLES

Constructed of molded plastic in high visibility fluorescent orange with red acrylic plastic reflectors for day or night use. Dimensions including base: 17¾W x 16¼"H. Weighted base rotates 90° to prevent triangles from blowing over in wind or highway turbulence. Design meets FMVSS 125 Specifications and SAE-W4-74DOT. Set of three triangles packed in molded storage case. Services & Materials brand (HWT-3).

**No. 1A493.** Shpg. wt. 19.0 lbs. List .....$26.63.
Each **$24.46;** Lots 5 .....**$23.24**

## SAFETY VESTS

Comfortable vests in dayglow orange color are available in Econo Style, General purpose, Surveyor's or LED Flashing style. D.O.T. Reflective and Tightweave vests are lime color. Services & Materials brand.

Econo Style Vests, Nos. 5AG19 and 5AZ90 are 100% dayglow orange polyester mesh and have 3/4 x 2" front Velcro closure with 3/4 x 8" elastic side straps. Both are bound in 3/4" black cotton binding. No. 5AZ90 has 3/4" reflective lime green vertical stripes on both front and back, and it conforms to Manual on Uniform Traffic Control Devices. Section 6F-3. VI-60 (C) Rev.5. Priced each, sold in multiples of 5 vests only.

**General Purpose Vests, Nos. 4A414 and 4A413** are similar to the Econo Style vests above only these are constructed of flat-weave, vinyl coated polyester mesh. No. 4A413 is reflective and has 1⅜" vertical stripes on front and back, and it conforms to Manual on Uniform Traffic Control Devices. Section 6F-3. VI-60 (C) Rev.5. **Priced each, sold in multiples of 5 vests only.**

**Surveyor's Vests, Nos. 1N934 and 1N932** are 65% cotton and 35% polyester and feature 1⅜" white reflective stripes. These vests have front zipper closure with two outside and two inside pockets. **Priced and sold individually.**

**L.E.D. Flashing Safety Vest, No. 4RR16** is a poncho-style soft mesh vest with flashing horizontal stripes. Vertical reflective stripes are 1⅜" wide. Ideal for flaggers, law enforcement and emergency response. L.E.D. light is visible up to 1/2 mile. Two AA batteries for 240 hours of battery life (fully charged). One size fits all. **Priced and sold individually.**

**D.O.T. Reflective Safety Vests, Nos. 4RR15 and 4RR13** are polyester tightweave fluorescent lime mesh material and feature 1½" orange/silver reflective stripes. Bound in black cloth binding with hook and loop front closure. 360° visibility at night, conform to high visability requirements and manual on Uniform Traffic Control Devices Section 6E-3, Revision 3. **Priced and sold individually.**

**Tightweave Reflective Vest, No. 4RR14** is lightweight, woven polyester mesh with 1½" orange/silver vertical reflective stripes. Breathable vest features black cloth binding with elastic side straps and hook and loop front closure. Meets D.O.T. requirements for fluorescent lime color. One size fits all. **Priced and sold individually.**

## DELINEATOR POSTS

**Easily transportable** delineator provides durable highly visible barrier. Features unique reflective dot. Applications include traffic delineation in congested areas, parking garages, and sporting events. Each unit features two 3" white reflective collars and two yellow reflective dots for added daytime and nighttime visibility. Impact resistant polyethylene. 4 O.D. x 42"H. Delineators meet standards set in MUTCD Section F, 3F-2.

**No. 3T999** delineator features permanent metal base that can be either epoxied to road surface or bolted down using standard anchor bolts for semi-permanent applications.

**No. 3T998** delineator features durable 12 lb. rubber base that slides over post and enables unit to be easily moved.

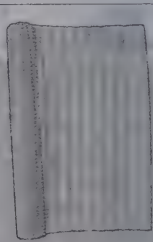
## PLASTIC SAFETY FENCE

- Acid resistant
- Nonconductive
- Nontoxic
- Reusable
- 50 ft. roll length
- U.V. Stabilized

SERVICES & MATERIALS

**Strong, lightweight, reusable** bright orange colored diamond mesh safety fence is made of high density polyethylene. Used for temporary or permanent enclosures around excavations, construction sites, dangerous equipment, at ski resorts, golf courses, recreation areas, for crowd control barriers, and erosion control netting. Roll size is 4 ft. high x 50 ft. long. Mesh opening is 1¼ x 1½". Breakload is 360 lbs. per foot. Services & Materials brand (FNC-450S).



**No. 5W418.** Shpg. wt. 14.0 lbs. List.....$68.70.
Each Roll **$49.30**; Lots 3 .....**$46.84**

## WARNING BARRIER FENCE

**Economical, highly visible** bright orange colored safety fence designed to provide an excellent visual warning barrier around work zones, hazardous areas, or for crowd control. This strong, lightweight fence is made of high density polyethylene. The rolls are extremely compact, easy to handle, and require a minimum of storage space. Roll size is 4 ft. high x 100 ft. long. Oval mesh opening is 3½ x 1½". Breakload is 740 lbs. per foot. Services & Materials brand (LWBF-4100)

**No. 5T587.** Shpg. wt. 16.0 lbs. List .....$112.68.
Each Roll **$69.00**; Lots 3 .....**$65.55**

## SAFE-STRIDE® ANTI-SKID PAINT

**Acrylic, abrasive anti-slip paint** provides safe traction for pedestrian traffic. Single coat application dries in 18 to 25 hours. Surface installation is between 12 and 16 mils. Lead, chromium and mercury free. Applies with brush or roller, cleans up easily with water. Adheres to cleaned bare materials such as wood, concrete, primed metal, asphalt, marble, stone and many other surfaces. Use Floor Preparation compound No. 3JW46, sold separately above, to clean and prepare surface before application. Coverage of 100 to 125 sq. ft. per gallon. For best results, apply above 50°F. Available in one gallon containers. Wooster Products brand (SSAGRY)

**No. 3JW47.** Shpg. wt. 13.0 lbs.
List $44.71. Each.....**$40.65**

## SAFETY RESURFACER KIT

**Provides safe traction for pedestrians** and vehicles on floors, decks and ramps. Heavy-duty two-part epoxy cures overnight to a durable anti-slip safety surface. Surface installation is about 1/16" thick and fills cracks, holes and voids with no shrinkage. When properly installed, will not crack or separate from substrate when subjected to reasonable flexing, thermal shock or impact. Bonds to practically any surface. USDA approved. Coverage of 25 sq. ft. per kit with no shrinkage.

**Kit includes:** Part "A" epoxy with abrasive grit, Part "B" epoxy curing agent with color pigment, blending agitator for proper mixing, spatula for removing material from cans, and squeegee applicator for proper grit exposure. Wooster Products brand (WP70KITGRY).

**No. 3JW48.** Shpg. wt. 20.0 lbs.
List $101.42. Each.....**$92.20**

# SAFETY AND SECURITY MIRRORS

## CONVEX STYLE SAFETY AND SECURITY MIRRORS

Enable dock workers and drivers to see around blind corners and doorways. Also used for security to monitor aisles and high risk areas. All circular and rectangular convex mirrors are trimmed with heavy extruded rubber rim. Suitable for indoor or outdoor use and require minimum maintenance.

Adjustable swivel ball assembly and heavy gauge steel mounting bracket enable fine adjustment of proper angle for effective viewing. Mirror size in inches equates to viewing distance in feet, i.e. 18" mirror distance seen clearly is 18 feet. Rectangular mirrors use height.

Lightweight, shatterproof Klear Vu® acrylic lens mounted to durable hardboard backing or steel backing for added strength and durability. For use in harsh environments. Tough, double-strength glass lens models mounted to hardboard backing are also available. Klear Vu® brand by Brossard.

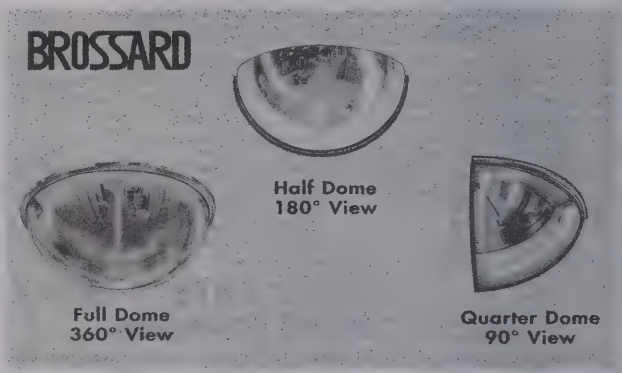
## DOME STYLE SAFETY AND SECURITY MIRRORS



Lightweight, shatterproof All Vu® acrylic dome mirrors offer wide angle visibility of aisle, pedestrian or vehicle traffic at blind intersections and corners. For indoor or outdoor use. All mirrors have heavy extruded rubber rim. Full and half dome styles are available with either durable hardboard backing or steel backing for added strength and durability.

Require minimum maintenance. Viewing distance of mirror in feet is equivalent to its size in inches, i.e. 18" mirror distance seen clearly is 18 feet. Mirrors can be suspended or fastened to a wall or ceiling with hangers furnished. All Vu® brand by Brossard.

**Full Dome Mirrors** provide 360° viewing recommended for 4-way intersections. Ceiling type. Available with hardboard or steel backing. Extra large 48" size also available.

**Half Dome Mirrors** for 3-way "T" intersections allow 180° viewing. Wall or ceiling type. Choice of hardboard or steel backing.

**Quarter Dome Mirrors** enable 90° of viewing at 2-way, "L-shaped" intersections to help avoid collisions. Corner mounted. Available with hardboard backing only.

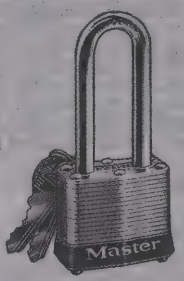
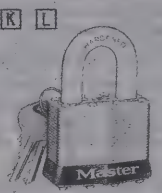
# STANDARD KEY SYSTEMS

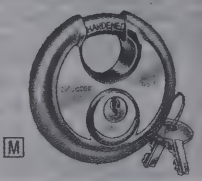
Available in two types of key systems to meet your security needs. Locks can be ordered keyed differently or keyed alike.

**Keyed Different (KD).** Each lock has a different key number for added pick resistance and a wider key range.



**Keyed Alike (KA).** Each lock has same key number for added convenience. Additional locks can be ordered later to fit that same key number. For master keying and other options not listed on this page, call 1-800-323-0620 for price and delivery.





**For keyed alike or master keying, or for Key Sequences not listed, call 1-800-323-0620**

**MASTER LOCK LIFETIME WARRANTY**

Text of warranty available on request, see page opposite inside back cover

A, B **Medium Security.** Popular low cost protection ideal for applications requiring tamper resistance. Warded multi-spring locking padlock with durable laminated steel case and steel shackle. Rustproofed for extended wear. Two keys included. Individually boxed. Master Lock brand.

C, D **Medium Security.** Designed for general security uses including tool boxes, well covers, trash containers, and other similar applications. Features laminated steel case, single locking steel shackle and 4-pin tumbler locking mechanism. Rustproofed for extended wear. Extra length shackles available. Two brass keys included. Individually boxed. Master Lock brand.

E **thru** J **High Security.** Ideal for storage cabinets, tool cribs, sheds, gates and other similar applications. Tough laminated steel bodies stand up to physical abuse for dependable protection against theft. Features 4-pin tumbler lock mechanism with dual locking hardened steel shackles for cut and saw resistance. Extra length shackles available. Rustproofed for extended wear. Two brass keys included. Individually boxed. Master Lock brand.

K, L **High Security.** For perimeter and storefront gates, construction equipment, vending equipment and truck doors. Large diameter hardened alloy steel shackles resist cutting, sawing, pulling and prying. Heavy-duty steel cases stand up to severe attack. 5-Pin tumbler cylinders provide added pick resistance. Rustproofed for extended wear. Two brass keys included. Individually boxed. Master Lock brand.

M **High Security.** Round body design increases security by minimizing shackle exposure to cutting and sawing. Interior anti-saw pins deter cutting through the stainless steel case. Hardened steel shackle resists prying. Disc-shaped design helps repel forced attacks. Individually carded. Master Lock brand.

# REMOVABLE CYLINDER PADLOCKS AND BRASS PADLOCKS

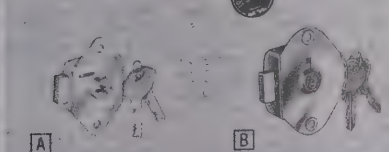
Available in two types of key systems to meet your security needs. Locks can be ordered keyed different or keyed alike.

**Keyed Different (KD).** Each lock has a different key number. Choose 5- and 6-Pin tumbler locks for added pick resistance and a wider key range.

**Keyed Alike (KA).** Each lock has the same key number for added convenience. Additional locks can be ordered later to fit that same key number. For master keying and other options not listed on this page, call 1-800-323-0620 for price and delivery.

A, B, C **High Security with Removable Cylinders.** Removable cylinder allows padlock to be rekeyed whenever security is compromised due to lost keys or employee turnover. Includes 5-pin cylinders for pick resistance, dual locking steel shackles for cut and saw resistance. Nos. 1U163 and 1U164 include hardened alloy steel shackles and hardened locking levers for additional strength. Individually boxed. Master Lock brand.

D, E **High Security Round Body Design.** Includes removable cylinder feature of units listed above, with a round body design to deflect hammer blows. Anti-saw pins located in lock body to resist cutting. Features hardened steel alloy shackles, dual ball bearing locking, and 5-pin cylinders to resist physical assault and picking. Individually boxed. Master Lock brand.



F, G **High Security Brass Padlocks.** Corrosion resistant brass case and brass cylinders make locks ideal for outdoor security use and other areas where corrosion is a problem. Dual locking hardened steel shackle provides pry, cut, and saw resistance, 4-pin cylinder resists picking. Applications include outdoor gates, sheds, truck doors, utility equipment, boats and marine equipment, and other areas where extra corrosion resistance and high security are required. Two keys included. Individually boxed. Master Lock brand.

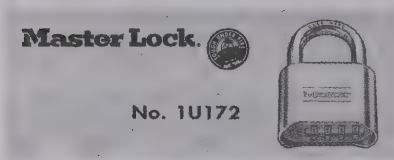
## COMBINATION PADLOCKS



A, B **Medium Security.** Durable protection with reinforced stainless steel outer case covering heavy wrought steel inner case. Hardened steel shackle for cut and saw resistance. Lifetime lubricated. Dial automatically locks under shackle tension to resist combination picking. For use in factories, schools and lockers. Case sizes: 1⅞" thickness, 3/4" dia. Shackle dimen: 9/32" dia., 3/4" vertical, 13/16" horizontal. Nos. 4T103, 1D573, and 1D569 feature key control override for fast supervisory access to all locks in system. Control key ordered separately. Control chart with all serial numbers and combinations maintained at Master Lock. Verification required for control chart information. For small installations not requiring serial number and code registration, order No. 1D573. Master Lock brand.

C, D **High Security.** Provide protection against severe vandalism and attack. Combination convenience with dual locking hardened steel alloy steel shackles and solid inner case. Dial automatically locks under shackle tension to resist combination picking. Lifetime lubricated. For high security applications. Case sizes: 2³⁄₁₆" thickness. 15/16" dia. Shackles dimens: 5/16" dia. 1" vertical, 15/16" horizontal. For small installations not requiring serial number and key code registration, order No. 1D569. Master Lock brand.

D E F

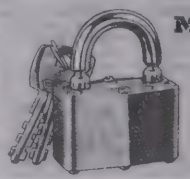
For keyed alike or master keying, or for Key Sequences not listed, call 1-800-323-0620

G

**A, B, C Weather Tough Rekeyable Padlocks** for outdoor commercial applications where weather is a problem. Thermal plastic cover and cylinder dust cover protect lock body and key cylinder from dirt, dust, and other contaminants. Drain channels move water and other debris through lock body and away from lock mechanism. Locks also feature chromed boron alloy steel shackles to repel saws and bolt cutters. Dual locking shackles resist forcing and prying, pick resistant spool pins prevent unauthorized entry. Locks can be ordered keyed differently or alike.

Padlocks feature steel case and 5-pin W6000 removable steel cylinder. Replaceable case-hardened chromed boron alloy steel shackle. Dual stainless steel ball bearings lock each shackle leg separately. Lubricated internally with "Corrosion X" to prevent rusting. Master Lock brand.

**D, E, F, G High Security Rekeyable Padlocks** for high security commercial use. Feature chromed boron alloy steel shackles which provide up to 16,000 lbs. shackle pull strength and include dual deadbolt locking for extreme resistance to prying. Large steel shackle guard repels saws and bolt cutters (Nos. 6T416 and 6T417 have hardened solid steel body). Five pin cylinders with pick resistant spool pins are virtually impossible to pick. Locks available keyed differently or alike.



Padlocks feature steel case and removable 5-pin W6000 cylinder. Replaceable case-hardened chromed boron alloy steel shackle. Dual hardened stainless steel ball bearings lock each shackle leg separately. Weather resistant thermal plastic cover, except for Nos. 6T416 and 6T417. Lubricated internally with "Corrosion X" to prevent rusting. Master Lock brand.

## SAFETY LOCKOUT PADLOCKS AVAILABLE CHECK INDEX FOR COMPLETE LISTINGS

Master Lock.

## KEY CONTROL CABINETS

Cabinets are designed for storing and controlling distribution of keys and for providing a high degree of security for keys to restricted areas, equipment, vehicles, etc.

Steel cabinet comes with built-in slotted steel key racks, numbered white snap-hook key tags (replacement key tags available below), "out-key" control tags and a numbered lock location chart. These materials allow adoption of a key control system for key accountability and security. Available in seven key capacities.

The sturdy, welded steel cabinet can be hung on a wall, used on table or shelf, or recessed into a wall opening. Door has full length hinge and comes with a key lock, two keys included. All cabinets are made with heavy gauge steel and finished with a two-step textured epoxy paint. Beige enamel finish. HPC brand.

- **Key control system for key accountability and security**
- **Cabinet can be hung on a wall, used on a table or shelf, or recessed into wall opening**

# TRAILER LOCKS

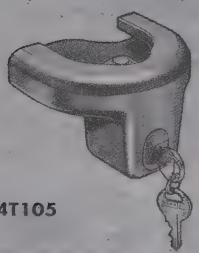
## ENFORCER™ KING PIN TRAILER LOCK

- Electroplated for maximum weather and wear protection
- Locks with or without key

No. 1U207
King Pin Lock

**King Pin Lock**
**Designed to Prevent Trailer Theft**

**Specially designed cylinder security locking mechanism.** It uses rotating brass discs instead of spring loaded pins. This disc cylinder design makes these locks extremely difficult to pick. The rotating brass discs are like tumblers on a safe; locks must be in locked position in order to remove key. When key is removed, combinations are automatically scrambled making key duplication very difficult. The principle also provides maximum resistance to freezing or fouling from dirt or rust.



Each locking system has an individually coded key and lock combination with 360,000,000 possible combinations. Key replacement/duplication must be done by the manufacturer who maintains a computerized code record of each unit. Transport Security brand.

**No. 1U207 Enforcer™ King Pin Lock.** Solid cast with ductile alloy; one component design is both lightweight and very strong. No exposed dismantling parts. Electroplated for maximum weather and wear protection. Locks with or without key; all purpose handle helps prevent accidental locking. Housing of the lock is made from case-hardened steel and is threaded directly into ductile cast body of the unit.

**TRAILER LOCK ORDERING DATA**

| Lock Type | Transport Security Model | Stock No. | List | Each | Lots 3 | Shpg. Wt. |

| **King Pin Lock** | 1111 | **1U207** | $102.05 | **$90.30** | **$81.27** | 11.0 |

Master Lock.

No. 4T105

## TRAILER LOCKS

**Locks Securely Enclose Trailer Coupler Socket to Prevent Theft of Unhitched Vehicles and Equipment**

**Special purpose lock** is designed to guard against tow-away of unhitched generators, air compressors, boats, snowmobiles, and utility trailers. Frustrates thieves by covering the trailer coupler with a secure enclosure designed to surround the coupler socket. Case-hardened set screw is blocked by a key operated cylinder.

Lock features the same pin-tumbler locking mechanism used in Master's most popular padlocks. Rust resistant baked epoxy acrylic finish. Master Lock brand.

**TRAILER LOCK DATA**

| Trailer Lock Type | Master Lock Model | Stock No. | List | Each | Lots 6 | Lots 12 | Shpg. Wt. |
|---|---|---|---|---|---|---|---|

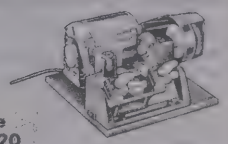
## DON'T FORGET THE BACK OF THE BOOK! MANY CROSS-REFERENCE GUIDES AND INDEXES HELP MAKE PRODUCT SELECTION EASIER

Besides complete National Brand and Product Indexes, the back section of this catalog contains a Terminology and Technical Data Section as well as a handy Stock Number/Page Number Cross-Reference Guide. And don't forget, if you need assistance with product selection, help is as close as a call to your local branch.

## COMPACT SPEEDEX® KEY DUPLICATING MACHINE

**Used by motels, hotels, locksmiths,** apartment house managers, hardware and farm stores, and for institutional operation where occasional key duplication is necessary. Portable size and weight make the key machine convenient to use almost anywhere. Rotary milling cutter has bronze bearings and features Softy™ Tylon X rotary brush. 4-Way jaws for cutting regular and double-sided keys. Features double-sided copy dog. 1/15 HP, 120 volt AC motor. HPC brand (9120 RM).

**No. 5T836.** Shpg. wt. 16.0 lbs. List .....$704.94.
Each **$410.75;** Lots 3.....**$390.08**

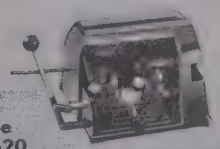


HPC Replacement Parts Available 1-800-323-0620

## HIGH VOLUME SPEEDEX® KEY DUPLICATING MACHINE

**Used by motels, hotels, locksmiths,** property management, and fleet operations where constant duplications of existing keys are necessary. Mounts on a sturdy base. Rotary cutter has bronze bearing and features Softy™ Tylon X rotary brush with cover. 4-Way jaws for cutting regular and double-sided keys. Features double-sided copy dog. Cuts large hotel and motel keys. 1/6 HP, 120 volt AC heavy-duty motor. HPC brand (9160 MC).

**No. 6T399.** Shpg. wt. 31.0 lbs. List.....$896.75.
Each **$538.00;** Lots 3.....**$511.10**

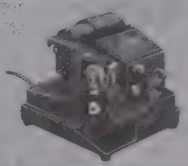


HPC Replacement Parts Available 1-800-323-0620

## POWER SPEEDEX SEMI-AUTOMATIC KEY DUPLICATOR

**Semi-automatic for duplicating even the largest of keys,** such as hotel/motel keys. Operated by spring loaded lever carriage. Moves smoothly with use of one hand when cutting. Features molded plastic cover with built-in light that encloses motor. Equipped with 4-Way jaws to ensure accurate cut keys on the first try. Durable construction and bronze bearings combine for long life and accuracy. 1/6 HP, 3.5 amps, 120 volts AC. Bench size: 18"W x 19"D. HPC brand (9180MC).

**No. 3ZV08.** Shpg. wt. 35.0 lbs. List.....$1140.00.
Each **$798.00;** Lots 3.....**$758.10**



HPC Replacement Parts Available 1-800-323-0620

## AUTOMATE™ FULLY AUTOMATIC KEY DUPLICATOR

**For use by motels, hotels, locksmiths,** real estate management firms, hardware and farm stores and institutional operations where constant key duplicating is necessary. Fully automatic feature allows for total hands free operation. Cutting cycle is 20 seconds. Reversible jaws allow cutting a wide variety of keys. Spring loader carriage assures consistent duplication. High quality tool steel cutter. Cuts large hotel and motel keys. 1/6 HP, 3.7 amps, 120 volts AC. Bench size: 19"W x 16"D. HPC brand (6666HQT).

**No. 3ZV07.** Shpg. wt. 35.0 lbs. List.....$1998.00.
Each **$1399.00;** Lots 3 .....**$1329.05**

HPC Replacement Parts Available 1-800-323-0620

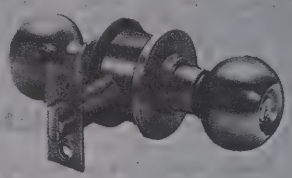
# STANDARD-DUTY CYLINDRICAL LOCKSETS

Provides a high degree of key-in-knob security for application in homes and light commercial buildings. These locksets can be installed in doors prepared to ANSI A115.2 Specifications covering cylindrical locksets. They are available in a variety of trim and lock functions. Construction features include a heavy-gauge steel, zinc-plated dichromated mechanism, 2¾" standard backset (for doors with 2⅜" backset, utilize one of the kits listed below, Nos. 5T680 thru 5T683), 1/2" throw latchbolt, and a guardbolt that deadlocks latchbolt when door is closed. Adjustable from 1⅜" to 2" standard door thickness. 2¼" x 1" rectangular flat front is standard. Locksets are field reversible. Strikes are 1¼" curved lip for 1¾" standard door thickness. Keyed different. ANSI Series 4000, Grade 2. Yale brand.

**FUNCTIONS:**

**Passage or Closet Set** for doors that do not require locking. Either knob operates latchbolt at all times.



**Privacy or Bath Lock.** Either knob operates latchbolt unless outside knob is locked by pushbutton inside. Button automatically releases when inside knob is turned or door is closed. Emergency release in outside knob. Inside knob always active.

**Storeroom or Closet Lock** for use on utility, exit or storeroom doors. Deadlocking latchbolt operated by knob inside, key in outside knob. Outside knob always rigid, inside knob always active.

**Entrance or Office Lock** features deadlocking latchbolt which is operated by either knob when unlocked. Pushing and turning button locks outside knob. Requires key until-button is manually unlocked. Pushing button locks outside knob until unlocked by key or by turning inside knob.

# STANDARD-DUTY CYLINDRICAL LEVER LOCKSETS

**For keyed alike or master keying, call 1-800-323-0620**

Yale®
Yale Security Inc.

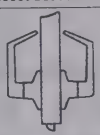
- **Complies with applicable Americans with Disabilities Act (ADA) Requirements**

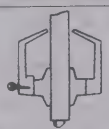
Combines the Augusta and Pacific Beach Levers with the 5300 Series Grade 2 standard duty lock configuration. Provides easy accessibility for handicapped persons and those with disabilities. The lever designs are easy to grip and depress for entry. Meets Accessibility Guidelines of the Americans with Disabilities Act (ADA), the Uniform Federal Accessibility Standards and ANSI 117.1, which requires ease of accessibility for the handicapped. Lever locksets on this page conform to ANSI Spec. A156.2, Series 4000 Grade 2 and can be installed in doors prepared to ANSI Spec. 115.2, which covers hollow metal doors and frame preparation for cylindrical locksets. UL Listed for mounting on fire doors up to and including 3 hours.

Features heavy gauge cold rolled steel mechanism, 2 1/16" dia. lock case, 1/2" throw stainless steel latchbolt, 2 3/4" backset (for doors with 2 3/8" backset, utilize one of the kits listed below, Nos. 6T584 thru 6T587), and 1 1/4" curved lip strike. Adjustable for use on doors from 1 3/8" to 1 3/4" thick. Installation requires 2 1/8" cross bore, and latchbolt requires a 1" edge bore with mortise for rectangular front.

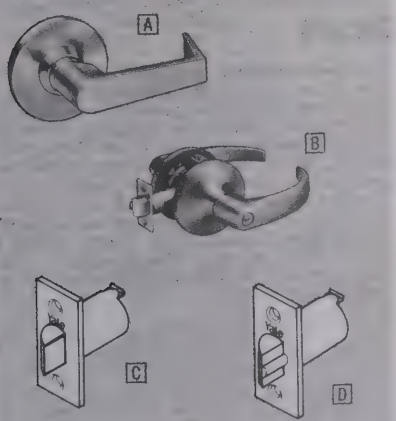
## FUNCTIONS:

**Passage or Closet Set** for doors that do not require locking. Either lever operates latchbolt at all times.





**Privacy or Bath Lock** for lavatory or other privacy doors. Either lever operates latchbolt unless outside lever is locked by pushbutton inside. Button automatically releases when inside lever is turned or door is closed. Emergency release in outside lever. Emergency key included. Inside lever always active.



**Storeroom or Closet Lock** for use on utility, exit, or storeroom doors. Deadlocking latchbolt operated by lever inside, key in outside lever. Outside lever always locked; inside knob always active.

**Classroom Lock** for use primarily on classroom and utility room doors. Deadlocking latchbolt. Either lever operates latchbolt except when outside lever is locked by key. Inside lever always active. Key releases outside lever.

**Entrance or Office Lock** for general home, office, or entrance doors. Deadlocking latchbolt operated by key in outside lever or by rotating inside lever. Either lever operates latchbolt (except when outside lever is locked from inside). Pushing turn button in inside lever locks outside lever. Button automatically releases when inside lever is turned or key is rotated in locked outside lever. Outside lever may be retained in locked position by pushing and rotating turn button 90° clockwise to a horizontal position. This is not released until turn button is manually returned to the vertical position. Inside lever always active.

## BOLTLOCKS

**For keyed alike or master keying, call 1-800-323-0620**

**Security Boltlock.** Key outside, thumbturn inside. Latchbolt held retracted or deadlocked by button. Installation on 1⅛" to 2¼" thick doors. Supplied with 1109E brass cylinder (2 keys), 3⅝W x 2½"H case, and 2⅜" backset. Latchbolt has 1/2" throw. High-density rust resistant alloy with brass finish. Yale brand.

**Heavy-Duty Boltlock.** No. 5T720 has key outside, thumbturn inside. No. 5T721 has keys on both sides. Installs on either hand of door, 1⅛" to 2¼" thick. 2⅜" backset standard. Case, strike and deadbolt with two hardened steel inserts. 1109E brass cylinder. Keyed different. Brass finish. Yale brand.

**Pin Tumbler Boltlock.** No. 5T722 has key outside, thumbturn inside. No. 5T723 has keys on both sides and has one-way installation screws that cannot be removed without drilling. Features two hardened steel interlocking bolts that resist prying. Shutter guard protects against forced entry even if outside cylinder is removed. Installation on 1⅜ to 2¼" thick doors of either hand. 1109E brass cylinder (2 keys), 4¾W x 3⁵⁄₃₂"H high density rust-resistant alloy case, and 2⅜" backset. Dull bronze finish. Yale brand.

# HEAVY-DUTY CYLINDRICAL LOCKSETS AND BORED DEADLOCKS

For keyed alike or master keying, call 1-800-323-0620

R3618

Ⓐ No. 5T707

Ⓑ No. 3ZV59

Yale®
Yale Security Inc.

- **Complies with applicable Americans with Disabilities Act (ADA) Requirements**

Combines the Augusta and Pacific Beach Lever Handles with the high level security of the 5400 Series lockset. These locksets can be installed in doors prepared to ANSI A115.2 or A115.18 Specifications covering cylindrical locksets. This key-in-lever design is available in a variety of lock functions. Construction features include heavy-duty gauge steel, zinc-plated dichromated mechanism, 2¾" standard backset, 1/2" standard latchbolt, and guardbolt that deadlocks latchbolt when door is closed. Adjustable from 1¾" to 2¼" door thickness. 2¼ x 1/8" beveled fronts are standard. Locks are field reversible. 1¼" curved lip strike for 1¾" door is standard. Keyed different. ANSI Series 4000, Grade 1.

FUNCTIONS:

**Passage or Closet Set** for doors that do not require locking. Either lever operates latchbolt at all times.

**Privacy or Bath Lock** for lavatory or other privacy doors. Either lever operates latchbolt unless outside lever is locked by push-button inside. Button automatically releases when inside lever is turned or door is closed. Emergency release in outside lever. Emergency key included. Inside lever always active.

**Storeroom or Closet Lock** for use in utility, exit or storeroom doors. Deadlocking latchbolt operated by lever inside, key in outside lever. Outside lever always locked; inside lever always active.

**Classroom Lock** for use primarily on classroom and utility room doors. Deadlocking latchbolt. Either lever operates latchbolt when outside lever is locked by key. Inside lever always active. Key releases outside lever.

**Entrance or Office Lock** for general home, office, or entrance doors. Deadlocking latchbolt operated by key in outside lever or by turning inside lever. Either lever operates latchbolt (except when outside lever is locked from inside). Pushing turn button in inside lever locks outside lever. Button automatically releases when inside lever is turned or key is rotated in locked outside lever. Outside lever may be retained in locked position by pushing and rotating turn button 90° clockwise to a horizontal position. This is not released until turn button is manually returned to the vertical position. Inside lever always active.

## 7150 SQUARE BOLT EXIT DEVICES

**For use in hospitals, museums, schools, theaters, and hotels** where increased security is desired. Increases security, maintains safety required by law. 400 lbs. pull outside applies only 63 lbs. of force on frame. Traditional pullman latch bolts apply 280 lbs. to frame with the same 400 lbs. pull. Meets ANSI 156.3 Grade 1 Types 1 and 28. Utilizes same outside trim as 2100 and 7100 Series exit devices. Fits doors from 30" to 48" wide, single door or pair of doors with mullion. UL and ULC listed fire exit hardware for openings up to 8 ft. x 8 ft. (20, 30, 45, 60, 90 and 120 minute doors). UL and ULC listed panic exit hardware for emergency exit doors. Yale brand.

# EMERGENCY EXIT DOOR ALARMS AND ACCESS CONTROL LOCKS

## EMERGENCY EXIT ALARM LOCKS

A **Multigard double deadlock provides maximum protection** from unauthorized entrance while granting easy and instant emergency exit. Key operated deadbolt requires less than one pound of force to throw one full inch of hardened steel bolt into keeper. Easy to operate and extra tough for protection against thieves. Withstands 250 lbs. of pulling force. 18" Clapper arm. Tested for up to 100,000 cycles of operation for UL listing as panic hardware (SA4890). Packaged with 9 volt DC battery with low battery alert. Non-handed, can be used right or left hand. Alarm Lock brand.

B **Security device used to control unauthorized use** of emergency exit door while complying with standard safety and building codes. Provides maximum security, trouble-free service, theft deterrence, and permits instant exit in case of emergency. Features deadbolt, warning alarm, outside cylinder capability, tamper switch on alarm box cover, and long-life battery pack (No. 1U106, for replacement battery pack, see page 2646). First person to reach door releases lock by applying pressure on emergency door clapper plate to open door and sound alarm. Alarm Lock brand. UL Listed (SA5911).

C **Panic exit alarm deadbolt locking-bar and channel type device** restricts unauthorized use of exit doors by sounding a dual piezo alarm, yet enables immediate door opening in emergencies. Features easy installation, relatching by deadbolting latchbolt, and outside cylinder readiness for alarm bypass by designated individuals. Incorporates 9 volt battery with low battery alert. Approved by the California State Fire Marshall. Non-handed, can be used right or left hand. Alarm Lock brand. UL Listed (SA4890).

**Rim cylinders for above listed units available below.**

## KEYLESS ACCESS CONTROL LOCKS

- **Self contained fully programmable 12 digit metal keypad**
- **Low battery audible alert**
- **UL Listed fire rated**

**Alarm Lock Trilogy™T-2 DL2700 and DL2750 series electronic digital locksets** offer limited access without use of keys. Electronic locks feature three tier hierarchy system: Master code, Sub-Master code, and 15 individual user codes. All codes can be easily programmed into keypad at once. 20,000,000 possible codes make system virtually pickproof. Combinations can be set for 3, 4, or 5 digits.

**Features self-contained battery power source** (5 AA alkaline batteries) allowing 200,000 openings. Easily installed unit uses same door preparation as most standard cylindrical locksets. Provides key override with standard cylinders included, or interchangeable core accepts Best IC core type cylinders. Cylinder not included on Interchangeable Core Nos. 3ZM83 thru 3ZM85, 3ZM89 thru 3ZM91.

**DL2700 Lockset is a Grade 1 leverset** which features clutch mechanism for long life and durability. Also meets all ADA requirements. Accommodates 1⅝" to 1⅞" thick doors with a 2¾" backset. **Leversets are non-handed.** Alarm Lock brand.

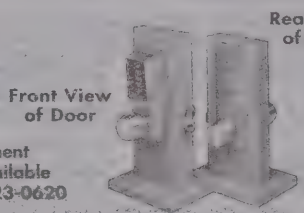
*Close it, lock it, keep it safe — You'll find the right stuff right here.*



# MECHANICAL PUSHBUTTON COMBINATION LOCKS

A Standard Access Control

**Unican**

Replacement Parts Available 1-800-323-0620

B Standard Access Control with Thumb, or Key Passage Set

Front View of Door (Right Hand Lever pictured)

C Standard Access Control with Lever

- **One-hand operation; depress correct buttons in the correct sequence and turn knob to unlock the 5/8" deadlocking latch**
- **Combinations can be made up of one, two, three, four, or all five buttons pushed individually, or if desired, pushed in unison with other buttons, developing thousands of different combination possibilities. Changeable in seconds by authorized individuals**
- **Burglar-proof with no keyhole to pick; vandal-proof with no card slot to jam**
- **Easily installed; fits A.S.A. 161 cutouts on 1 3/8 to 2 1/4" thick wood or metal doors**
- **Completely mechanical—no electrical wiring—no batteries**
- **Passage set function. When activated by an inside thumb or key turn (see No. 1U141 or No. 1U083), the outside knob can be set to open the lock without using pushbutton combination. For use in offices or anywhere the door is left unlocked for extended periods.**

Unican 1000 Series keyless access control for use whenever limited access is desirable in commerce, industry, institutions, and residences. Typical applications include apartment lobbies, employee entrances, dormitories, computer rooms, and hospitals.

Eliminates problem of issuing, controlling, and collecting keys or magnetic cards. Quick, simple combination change assures continuing security after employees, tenants, or guests leave.

All locks include ASA and, standard strike, installation instructions, full scale template, and key for combination change access.

Replaces cylindrical and tubular lock sets. **Dimensions:** 2¾" backset, 3" wide, 7⅜" high (outside), 9" high (inside). 3 13/16" deep, and latch front 1⅛ x 2¼". Unican brand.

## Simplex

No. 1U094 Deadbolt

- **Combination can be changed in seconds by authorized individuals**

**Deadbolt Door Locks DL Series.** Press combination and turn front knob clockwise to "open". Lock remains open (bolt retracted) until either inside lever or outside knob is turned to throw bolt into locked position. Measures 4W x 5"H. Simplex brand.

**Automatic Spring Latch NL & NLA Series. NL Series:** Door locks automatically when closed unless latch hold-back thumbslide on inside is activated, allowing door to remain unlocked. Deadlocking latch can't be pried back on closed door; opens with thumb turn from inside. Latch bolt reverses without affecting deadlatching. Measures 4W x 5"H. Simplex brand.

**NLA Series:** Same as NL Series but without thumbslide latch hold-back feature. Simplex brand.

**NOTE:** Series 100 for door 1⅜" thick. Series 200 for door 1¾ to 2⅛" thick. All locks above include a sheet metal strike for outswing doors and a cast box strike for inswing wood frame installation.

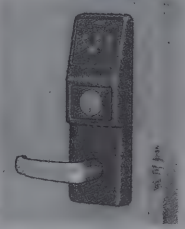
## COMMERCIAL GRADE PROGRAMMABLE LOCK



**For Both Exterior or Interior Doors**

Extra heavy duty TorqDefender outside lever lock retracts latchbolt when valid code is entered on keypad. Allows owner to program up to 20 unique 3 to 8 digit keypad codes. No external wiring required. Uses four AA batteries, features low battery indicator. Escutcheon plate allows universal retrofitting to existing doors, both right or left hand installations. Weather and vandal resistant. Clutch controlled outside lever is normally locked, inside lever is normally open. 10$\frac{7}{16}$L x 3$\frac{1}{4}$W x 1$\frac{1}{2}$"D. Locknetics brand (PRO5157).

- **Solid stainless steel keypad buttons in Lexan housing**
- **Extra heavy-duty, cast stainless steel internal parts, solid cast lever handles**
- **Exceeds ANSI Grade 1, ADA compliant hardware**
- **UL listed for 3 hr. fire rated openings**
- **Mechanical keyed by 1¼" mortise cylinder. Can override programmable lock**

**No. 4GD96.** Shpg. wt. 8.2 lbs. List .....$638.00.
Each **$446.75**; Lots 4.....**$424.41**

LOCKNETICS Security Engineering

**No. 4GD96**

## HOW TO ORDER

### I) SELECT THE TYPE OF LOCK:

**For Electromagnetic Types:**

**A) Heavy-Duty, High Traffic or Perimeter Door:**

1) Stock Number requires activation device to release (see Part II below): Nos. 4GD84, 4GD85

2) Stock Number does not require activation device* to release: Nos. 4GD79, 4GD80

**B) General Purpose, Medium Traffic:**

1) Stock Number requires activation device to release (See Part II below): No. 4GD81

**C) Light-Duty, Low Traffic or Interior Door:**

1) Stock Number requires activation device to release (See Part II below): Nos. 4GD82, 4GD83~

**For Electromechanical Types:**

**A) Light-Duty, Low Traffic:**

1) Stock Number includes keypad activation device for release and power supply: No. 4GD96

(*) Use activation device to prevent unauthorized exit alarm in lock from energizing, or for remote use. See options under Part II.

### II) SELECT TYPE OF ACTIVATION DEVICE:

**For:**

**A) Entry (Access)**

1) Authorized

a) Keyed

i) Standard Cylindrical Lock Type; Nos. 4GD91, 4GD92

ii) Programmable Data Touchentry™ Key; Nos. 4GD93, 4GD99, 4HC31

b) Coded

i) Keypad; Stock Nos. 4GD94, 4GD95

**B) Exit (Egress)**

1) Authorized (use same devices found in Part II A, listed above)

2) Universal and Unauthorized, Delayed; Nos. 4GD88, 4GD89

### III) SELECT POWER SUPPLY:

**NOTE: Power Supply Provides:**

1) 12 or 24 DC voltage output to power locks from 110 AC voltage input. DC voltage required for Nos. 4GD84, 4GD85, 4GD82, 4GD83, 4GD81. Optional for Stock Nos. 4GD79, 4GD80 (check input power specifications for lock).

2) Back up power for minimum of 4 hours. Automatically applied if main power is interrupted. Recommended for all locks and devices.

**TO SELECT TYPE AND NUMBER OF POWER SUPPLIES:**

A) Determine current draw of lock and activation (release) device

B) Multiply by number of locks and devices

C) Select power supply with output current that exceeds total current draw

**Note: More than one power supply may be required.**

# SURFACE MOUNT TYPE ELECTROMAGNETIC LOCKS

**For outswinging, single, hollow, metal, aluminum or wood doors and frames**

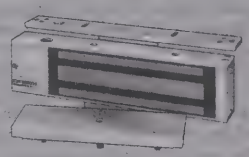
Units are designed to stay locked as long as power is supplied to them. Shutting off or interrupting power will cause release. See How To Order charts on page 2640. Immediate release can be achieved by connecting to most fire alarm panels (see Index). Satin Aluminum, clear adonized finish. Locknetics brand.

**390 SERIES**

- 1650 lbs. holding force
- 12 or 24 VDC input voltage

**310 SERIES**

- 1200 lbs. holding force
- 12 or 24 VDC input voltage



**320 SERIES**

- 650 lbs. holding force
- 12 or 24 VDC input voltage

**101+ SERIES**

- 1500 lbs. holding force
- 12 or 24V; DC or AC input voltage
- Adjustable 15 to 30 second release delay. Unauthorized release by applying approximately 15 lbs. pressure to inside of door
- Unauthorized release will activate light and audible alarms
- Authorized release by inserting TOUCHENTRY™ key into unit reader (2 keys included), or with remote activation device

LOCKNETICS Security Engineering a HARROW company

- Meets ANSI/BHMA Standard A156.23

## KEYED VERSIONS

### TOUCHENTRY™ PROGRAMMABLE DATA KEY STATIONS

- Includes controller, reader and connecting cable
- Controller allows up to 150 unique codes
- Steel NEMA 1 housing, 8W x 8H x 4"D
- Current draw: 200mA max. @ 12 or 24V AC/DC; 5A DPDT, 30VDC output; 2-aux outputs @ 5A SPDT, 30 VDC
- Reader has stainless steel housing, 1⅜W x 2⁵⁄₁₆H x ⅞"D, is vandal and weather resistant
- Frame mount, max 2 readers per controller
- Use No. 4HC31, sold separately, to change standard factory set TOUCHENTRY™ key codes
- TOUCHENTRY™ key No. 4GD99, sold separately, is sealed against environment and static

### STANDARD KEY STATIONS

- Accepts 1¼" mortise cylinder (sold separately, see Index)
- Anti-tamper screws
- Stainless steel plate, 2¾"W x 4½"H, with aluminum housing, 1⅝"D
- Current draw: 30mA max. @ 12 or 24V AC/DC
- Mounts in standard 2 x 4 box

### STANDARD PUSH BUTTON STATIONS

- Lighted, ⅞" dia. red engraved, with "EXIT" button
- Stainless steel plate, 2¾W x 4½"L

## CODED VERSIONS

### KEYPAD STATIONS

- Includes controller, keypad and connecting cable
- Controller allows up to 150 unique codes
- LED signal status
- Current draw: 200mA max. @ 12 or 24V AC/DC; 5A, DPDT, 30VDC output; 2-aux outputs @ 5A SPDT, 30VDC
- No. 4GD94 for high traffic areas

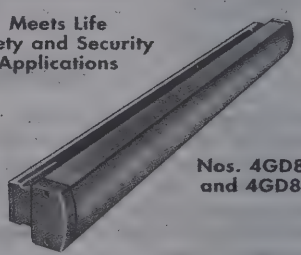
# NON-LATCHING EXIT TYPE BARS

**For Random Release of Electromagnetic Locks**

### SMARTBAR

- Requires only slight touch to deactivate lock
- Contact can be made at any point on bar. One motion egress
- No moving parts to wear out or damage, low maintenance
- Heavy-duty aluminum extrusion, contemporary design, clear anodized finish
- 12 or 24 VAC/DC input
- Current draw: 250mA; 3A @ 30VDC, SPDT output
- For 36" or less door (can be cut in field), includes 16 ft. door cord and cable
- Locknetics brand (690-36)

**No. 4GD89.** Shpg. wt. 5.0 lbs. List $360.00. Each **$252.00**; Lots 4 ..... **$239.40**



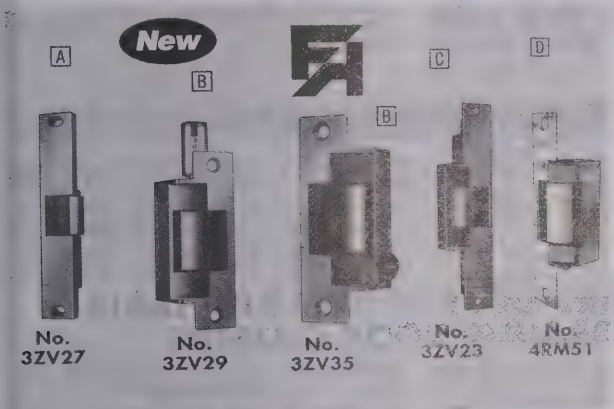
### TOUCH BAR

- Push to deactivate lock, pressure can be applied to any part of bar face
- Heavy-duty aluminum extrusion contemporary design, clear anodized finish
- No input power required; 3A @ 30VDC, SPDT output
- For 36" or less door (can be cut in field), includes 18" 20 AWG leads
- Locknetics brand (671-36XAR)

**No. 4GD88.** Shpg. wt. 5.9 lbs. List $240.00. Each **$168.00**; Lots 4..... **$159.60**

LOCKNETICS Security Engineering a HARROW company

Meets Life Safety and Security Applications



Nos. 4GD88 and 4GD89

Allows for Exit from Inside without Keys or Codes

# ELECTRIC STRIKES

BHMA Standard 501, grade 1 electric strikes are non fail safe, unlock when energized. Solenoid actuated for 12 or 24 Volt DC. Requires rectifier (sold separately below) for conversion from AC to DC. Reversible, non-handed. UL Listed Standard No. 1034 burglary resistant electric strike. Horizontal adjustment to compensate for misalignment. Corrosion resistant metal construction, stainless steel face plate, cast stainless steel case and working parts, stainless steel springs. 32D dull stainless steel finish. Folger Adam brand.

**A For use with Rim-Type exit devices, active leaf of a pair of doors or doors with surface mount vertical rod exit device.** When using electrical strike in conjunction with vertical rod exit device, it is necessary that the bottom rod of exit device be removed or made inoperative, the latchbolt of exit device be the "pullman" of beveled type (round or square latchbolts must be beveled), and the latchbolt be free-latching and remain projected while door is open. Mechanisms that hold latchbolt retracted while door is open and automatically release it when door is closed must be removed or made inoperative.

**B For use with locks without deadbolts and mortise exit devices.** Designed for hollow metal and wood frame applications. Feature 1/2, 5/8, and 3/4" bolt throws. UL Listed Standard No. 10B Fire Test of Door Assemblies, Class A, 3 Hour, Single Swing Doors. Fits Standard ANSI A115.1 Frame cutout (with slight modifications to face of frame).

**C For use with locks without deadbolts.** Features 1/2, 5/8, 3/4, and 7/8" bolt throws. UL Listed Standard No. 10B Fire Test of Door Assemblies, Class A, 3 Hour, Single Swing Doors.

**D BHMA Standard 156.5, grade 2 electric strikes** are non fail safe, unlocks when energized. Tested to 500,000 cycles, 2100 lbs pull test and 70 lb impact test. Reversible, non-handed. UL Listed Standard No. 1034 burglary resistant electric strikes. Requires rectifier when 12 or 24 volt AC power available only for silent operation. Utilize 3ZV22 listed below. Fits ANSI 115.1 Standard Prep.

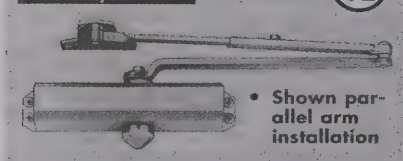
(*) All strikes listed on this page can be used with components on the line with proper electric strike voltage.

## AC TO DC POWER RECTIFIER



**Changes AC voltage to DC voltage** with a full wave bridge rectifier. Accepts 12 or 24 volt AC input and gives 12 or 24 volt DC output depending on input. Maximum amps: 1.5. Each has four 6" leads. All units in listing above require DC input voltage. If DC power not available, the power must be rectified from AC to DC after the voltage is stepped down to 12 or 24 VAC. Folger Adam brand (076-0712-005).

# HYDRAULIC DOOR CLOSERS

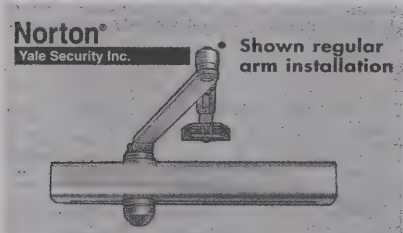
## STANDARD-DUTY SIZED HYDRAULIC DOOR CLOSERS

• Shown parallel arm installation

Replacement Parts Available 1-800-323-0620

- For interior or exterior doors
- Tri-style installation
- Two valve door control
- Adjustable backcheck
- UL Listed, meets ANSI Grade 1 Standards

**Aluminum housing** for doors serving medium traffic applications. Closer's narrow style makes it ideal for glass doors. Has two independent valves for best closing control. Sized interior models can be mounted on doors opening left or right, either push or pull side. Tri-style installation. Can be mounted regular arm, top jamb, or parallel arm.



**Can be used with doors 1¾ to 2½" thick; 2 ½ to 4 feet wide; up to 8 feet high.** Hydraulic cylinder is case aluminum alloy. Straight steel arm assembly.

**Also fits Yale 50 Series** door and screw hole locations. Aluminum or brown finish. UL Listed. Meet ANSI Grade 1 Standards. Norton brand.

## STANDARD-DUTY FULLY ADJUSTABLE HYDRAULIC DOOR CLOSERS

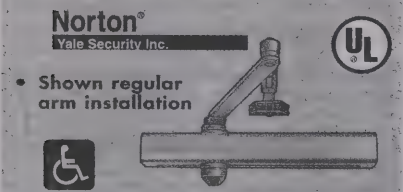
• Shown regular arm installation

- Multi-size power
- Tri-style installation
- Non-handed
- Individual control for adjusting door speed, latch speed and backcheck
- UL Listed, meets ANSI Grade 1 Standards

Replacement Parts Available 1-800-323-0620

**Aluminum housing** for doors serving medium traffic applications. Non-sized to adjust spring power for proper closing force on both interior and exterior doors. Power range is adjusted from size 2 thru size 6 by turning nut. Tri-style installation. Can be mounted regular arm, top jamb, or parallel arm. Non-handed to permit closer mounting on either right or left hand doors. Adjustable back check provides cushion toward end of opening cycle. Molded slim style cover made of high impact UL Listed material.

**All models fit Yale 3301 Series** door and screw hole locations. UL Listed. Meets ANSI Grade 1 Standards.



**Nos. 6T314 and 6T315 include a Hold Open Arm** which allows door to be held in an open position from 90 to 180°. To release, a slight push will cause door to close. Non-handed. Norton brand.

## STANDARD-DUTY BARRIER FREE HYDRAULIC DOOR CLOSERS

Replacement Parts Available 1-800-323-0620

• Shown regular arm installation

- For interior or exterior doors
- Individual control for adjusting door speed, latch speed and backcheck
- UL Listed, meets ANSI Grade 1 Standards

**Aluminum housing** for doors serving medium traffic applications. Designed for compliance with the Physically Handicapped Accessibility Code. Barrier free door closers are adjustable in 1 thru 4 size range. Lighter powered to reduce door opening resistance to manageable levels for the handicapped and still provide door control. Tri-style installation. Can be mounted regular arm, top jamb, or parallel arm. Non-handed to permit closer mounting on either right or left hand doors.

**Also fits Yale 3301BF Series** door and screw hole locations. UL Listed. Meets ANSI Grade 1 Standards. Norton brand.

# OVERHEAD DOOR STOPS/HOLDERS

REXSON™
Yale Security Inc.

Replacement Parts Available
™ 1-800-323-0620

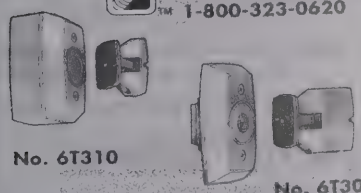
**RIXSON-FIREMARK TWO-YEAR WARRANTY**

Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.

- Hold door in open positions up to 110°
- Meet requirements of ANSI A156.8
- Aluminum finish
- For use with all closers including Rixson and Norton closers listed above and on page 2079,2644

For medium traffic interior doors or heavy traffic exterior doors where floor or wall stops cannot be used. Surface mounts with screws and thru-bolts provided in package. Holders are reversible for right or lefthand door mounting.

Can be mounted to mechanically hold door open at positions up to 110° (holder engages when door is pushed to specified degree and remains until manually pulled closed). Control knob (found only on No. 4A438) can manually turn off hold-open feature whenever desired.



Positive dead stop built into holder prevents door from hitting other doors, walls, and people; reduces wear on door closer mechanism, frame and door. Holders can be used with all closers including Rixson and Norton closers listed above and on page 2580. Aluminum finish. Meet requirements of ANSI A156.8. Rixson-Firemark brand.

# ELECTROMAGNETIC DOOR RELEASES

REXSON™
Yale Security Inc.

Replacement Parts Available
™ 1-800-323-0620

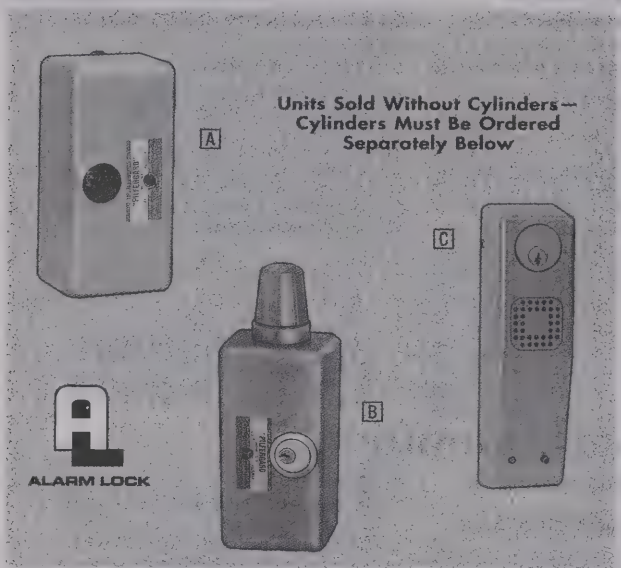
No. 6T310

No. 6T308

**RIXSON-FIREMARK TWO-YEAR WARRANTY**

Text of warranty available on request. See "Manufacturers' Warranties" on page opposite inside back cover.

- Approximately 45 pounds of holding power • Aluminum finish
- Magnet protected against transients and surges up to 600V (AC models)
- Fail-safe operation, power failure releases door to close
- Positive release button initiates closing motion • Meets NFPA Codes



Designed to hold fire and smoke barrier doors open until released by remote smoke detector or other switching device. Complete assembly includes armature contact plate with adjustable pivot mounting for installation on door, and heavy-duty electromagnet for mounting on wall behind door. Door-mounted contact plate includes hardware for thru-bolting or concealed mounting. Spotting template assures correct alignment. Armature may be bolted through with concealed fastening bracket. Mounting hardware included.

For installation where required by code, where doors may be used to confine smoke or fire, or wherever remote control or automatic closing doors are required. Releases operate on 120V, AC, 60 Hz, 0.017 amp, or 24V, AC/DC, 0.080 amp. Conforms to the requirements of National Fire Protection Association NFPA/ANSI Buls. 80 and 101. Listed with California State Fire Marshall. UL Listed, GTPR for automatic releasing systems. Rixson-Firemark brand.

# EMERGENCY EXIT DOOR ALARMS

## PILFERGARD EXIT DOOR ALARMS

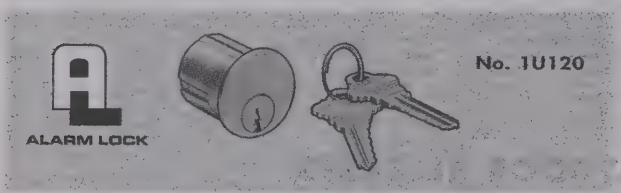
A **Pilfergard exit door alarm** is engineered to deter use of emergency exit door by emitting a heavy-duty twin action horn when door is opened by unauthorized personnel. However, exit doors can still be unlocked as required by safety codes and bypassed only by approved, designated key-carrying employees. Easily surface mounted, tamper proof, cannot be defeated by a second magnet, and comes with a test button to ascertain battery and horn condition. Contains battery pack already installed. Alarm Lock brand.

For additional battery packs, order No. 1U106 listed below.

For cylinders, see below.

B **Exit door alarm with large, flashing warning light** as well as twin action horns. Provides visual and audible evidence as to exact door violated. Contains battery pack already installed. Alarm Lock brand.

For additional battery packs, order No. 1U106 listed below.



For cylinders, see below.

C **Easy-to-install, multipurpose door annunciator** is for use on a wide range of doors, including narrow stiles. Features include: an attention-getting 110 dB alarm at 10 ft., steady test button sound and staccato tone, user selectable immediate or 15-second delay alarm, user selectable continuous alarm (until silenced by user with key), or 2-minute automatic shutoff with continuing red flashing LED indicator light. Mar-resistant, metallic-silver finish. Contains standard alkaline 9-volt battery. Alarm Lock brand.

For cylinders, see below.

| Key | Description† | Finish | Alarm Lock Model | Stock No. | List | Each | Lots 4 | Shpg. Wt. |
|---|---|---|---|---|---|---|---|---|
| A | Exit Alarm | Silver | PG10 | **1U112** | $189.74 | **$123.35** | **$111.00** | 3.5 |

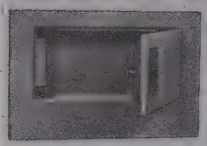
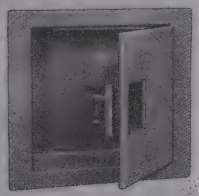
## CAMERA LENS SELECTION GUIDE



Selection Procedure:
1. Determine maximum distance between camera and object.
2. Determine width of object to be viewed.
3. Select lens with proper viewing coverage*.

(*) Viewing height is calculated by multiplying viewing width by 0.75.



| Maximum Distance Between Camera and Object (in feet) | | | | | | | | | | | | Lens Stock No. |
|---|---|---|---|---|---|---|---|---|---|---|---|---|
| 10 | 20 | 30 | 40 | 50 | 60 | 70 | 80 | 90 | 100 | 120 | 130 | |
| Maximum Viewing Width Covered by Lens (in feet) | | | | | | | | | | | | |
| 22 | 45 | 68 | 90 | 115 | 137 | 160 | 182 | 205 | 228 | 272 | 295 | 4TN92 |
| 13 | 23 | 40 | 52 | 65 | 80 | 90 | 105 | 120 | 130 | 150 | 160 | 5H596 |
| 10 | 20 | 30 | 40 | 50 | 60 | 70 | 80 | 90 | 100 | 120 | 130 | 4B375 |
| 10 | 20 | 30 | 40 | 50 | 60 | 70 | 80 | 90 | 100 | 120 | 130 | 4TN93 |
| 10 | 20 | 30 | 40 | 60 | 60 | 70 | 80 | 90 | 100 | 120 | 130 | 5H595 |

## INSULATED FIRE SAFES AND 2-DRAWER FILE

### No. 4TH98 ADVANCED OFFICE SAFE

- UL350°F—2 hour label
- Water Resistant
- 4-Number changeable combination lock and tubular key
- 6 live-locking bolts
- Door pocket, key rack and compartment for valuables
- Locking drawer and multi-position shelf
- May be bolted to floor (hardware included)
- Holds standard and A-4 size papers and binders

### No. 4TJ01 OFFICE SAFE

- UL350°F—1 hour label
- Electronic lock and tubular key
- 4 live-locking bolts
- Door pocket, key rack and compartment for valuables
- Locking drawer and 2 multi-position shelves
- May be bolted to floor (hardware included)
- Holds standard and A-4 size papers and binders

### No. 4TH99 OFFICE SAFE

- UL350°F—1 hour label
- 3-number combination lock and tubular key
- 4 live-locking bolts
- Door pocket, key rack and compartment for valuables
- Locking drawer and multi-position shelf
- May be bolted to floor (hardware included)
- Holds standard and A-4 size papers and binders

### No. 3W167 HOME/OFFICE SAFE

- UL350°F—1 hour label
- 3-number changeable combination lock with privacy shield
- Long-lasting powder-coat finish
- 4" line locking bolts with steel dead bolts
- Includes inner drawer for small valuables

### No. 5Z058 OFFICE SAFE

- UL350°F—1 hour label
- 3-number changeable combination lock
- 4" live-locking bolt
- Adjustable shelf for organization
- Optional bolt-down installation feature, hardware included

### No. 3KN95 2-DRAWER FILE

- UL350°F—1 hour label
- Smooth, quiet, rugged drawer slides
- Accommodates legal and letter-size file folders
- Key lock for privacy and dual latches for security
- Weighted so file will not tip when both drawers are open

Design Options: A comparable "F" Line hinge, a comparalbe non-ferrous hinge, or comparable different kind of hinge may be substituted.
Example: 150 lbs. (68 Kg) 1¾" (44m) x 3' (.91m) x 7' (2.13m) door, medium frequency application. Select door weight column 126 lbs. (57 Kg) to 175 lbs. (79Kg) and select door size column 1¾" (44m) x 3' (.91m) x 7' (2.13m). In box where both lines intersect, use CB1900 4 x 4 (114mm x 114mm) or 4½ x 4 (114mm x 102mm) hinge for medium frequency use.
